In adjusting the regional standardized payment amounts for the Middle Atlantic census division, a sample of FY 1982 (base year for determining hospital-specific rate) cost reports from New York hospitals with direct medical education cost centers were recalculated to change the method by which administrative and general costs were allocated to the method specified in the Medicare cost report. The allowable Medicare inpatient operating costs from the revised Medicare cost reports for each sample hospital were used in estimating a revised hospital-specific rate. The revised hospital-specific rate was compared to the hospital-specific rate derived from the original method by which administrative and general costs were allocated. A percentage change in the hospital-specific rates was developed for each sample hospital. The percentage change was then applied to the base year cost data, representing allowable costs per Medicare discharge, for each sample hospital included in the data base used to construct the standardized amounts. The average percentage change for the sample hospitals was applied for each of the remaining New York hospitals with direct medical education cost centers that were not included in the sample. After the costs per case of the New York teaching hospitals were thus adjusted, the regional standardized payment amounts were recomputed in accordance with the past methodologies used to calculate such rates. For the final rule, the regional standardized payment amounts will be recalculated showing the full effect of the actual change for all hospitals in New York with direct medical education cost centers.

f. Outliers. Section 1886(d)(5)(A) of the Act requires that, in addition to the basic prospective payment rates, payments must be made for discharges involving day outliers and may be made for cost outliers. Section 1886(d)(2)(E) of the Act correspondingly requires that the standardized amounts be reduced by a proportion that is estimated to reflect outlier payments. Furthermore, section 1886(d)(5)(A)(iv) of the Act further directs that outlier payments may not be less than five percent nor more than six percent of total payments projected to be made based on the prospective payment rates in any year. In FY 1984 we estimated outlier payments as six percent of total payments (including both standard prospective payment system payments and outlier payments). We made the maximum estimate permitted under the law in order to ensure that we would provide an adequate margin for outlier payments.

For both FY 1985 and FY 1986, we reduced the size of the reserve for outliers from six percent of total payments to five percent of total payments in order to provide proportionately greater payment for typical cases and avoiding any great risk of general disadvantage to hospitals. We believe that it was in the greater interest of hospitals and the Medicare program to eliminate some of the reserve for outliers and correspondingly increase the amount in the standardized amounts, thereby providing hospitals with somewhat larger Federal rates for typical cases. We note that this has had the effect of increasing the predictability of total payments for hospitals in that less of the total is attributable to those cases that meet particular qualifications. Therefore, we propose to continue to set the size of the outlier reserve at approximately the five percent level for FY 1987. As indicated in the previous rules on prospective payment, we will pay for any outlier that meets the criteria in § 412.80, even if actual aggregate outlier payments result in more than five percent (as proposed) of total payments.

We are not proposing to revise the day outlier and cost outlier thresholds. For FY 1986, we set the day outlier threshold at the lesser of 17 days or 1.94 standard deviations. We refer the reader to Table 5 in this addendum for the FY 1986 and proposed FY 1987 DRG day outlier thresholds. For FY 1986, we set the cost outlier thresholds at the greater of two times the Federal rate for the DRG, or $13,500. We are proposing to retain these thresholds for FY 1987.

Because of the extent of the changes proposed in this rule, we are providing four examples below (two for day outliers and two for cost outliers). The first day outlier example and the first cost outlier example are applicable to hospitals with cost reporting periods that occur on the same basis as the Federal fiscal year (that is, October 1, 1986). The other examples would apply to hospitals with cost reporting periods that occur on a different basis than October 1, 1986. The prior outlier examples in the September 1, 1983 interim final rule (48 FR 39777) did not show the full computation of the indirect medical education factor (or, of course, the recent changes to that factor) and did not include disproportionate share hospital adjustments and the capital-related standardized amounts.

The following is an example of how the additional payment would be determined for a day outlier in FY 1987:

Hospital X is a small central city teaching hospital located in the San Francisco MSA. Hospital X has a ratio of interns and residents to beds of .1 and is eligible for a disproportionate share adjustment factor of 5 percent. Mrs. Smith is admitted to hospital X on October 3, 1986 and is discharged October 31, 1986. Mrs. Smith's stay is classified in DRG 31. Because Mrs. Smith's 28 day stay exceeds the 20 day length-of-stay outlier threshold for DRG 31, hospital X is eligible for payment for 8 outlier days in addition to the

otherwise applicable prospective payment. The amount of hospital X's outlier payment (excluding the usual Federal payment that applies for both outlier and non-outlier cases) is calculated as follows:

Step 1.—Computation of Federal rate (excludes payments for capital, indirect medical education costs and disproportionate share hospital adjustment)

Pacific Census Division Urban Standardized Amounts:	
Labor-related	$2063.58
Non labor-related	$ 894.05
National Urban Standardized Amounts:	
Labor-related	$2194.80
Non labor-related	$ 769.86
San Francisco MSA Wage Index	1.6306
DRG 31 Relative Weight	.5363

Federal rate
= .5363 [.50 ($2063.58 × 1.6306 + $894.05) + .50 ($2194.80 × 1.6306 + $769.86)]
= .5363 ($2150.04 + $2195.67]
= $2338.22
Federal portion of prospective payment rate = 75 percent
Federal payment (excluding capital) = .75 ($2338.22) = $1753.67

Step 2.—Computation of Federal Capital Payment

Pacific Census Division Urban Standardized Capital Rate	$274.86
National Urban Standardized Capital Rate	$240.71
Federal Portion of Capital Prospective Payment Rate (percent)	20
DRG 31 Relative Weight	.5363

DRG 31 Federal Capital Payment Rate (reflects regional/national blends)
[.50($274.86 + .50($240.71)](.5363) = $138.77
DRG 31 Federal Capital Payment
= $138.77 × .20 = $27.75
Federal Prospective Payment, including capital = $1753.67 + $27.75 = $1781.42

Step 3.—Computation of Day Outlier Payments

Outlier days 26 − 20 = 6
DRG 31 geometric mean length of stay 3.9 days
Marginal cost factor .60
Outlier payment (excludes disproportionate share hospital and indirect medical education costs) = Number of outlier days × (Total Federal prospective payment ÷ Geometric mean length of stay for DRG) × Marginal cost factor
= 6($1781.42 ÷ 3.9).60 = $2192.52

Step 4.—Computation of Indirect Medical Education Adjustment for Day Outliers

Intern and Resident/Bed Ratio
Indirect medical education adjustment factor 2[1 + .1).405 − 1] = .7871 or 7.871%
Indirect medical education outlier payment = Indirect medical education adjustment factor × Outlier payment = .07871($2192.52) = $172.57

Step 5.—Computation of Disproportionate Share Payment for Day Outliers

Disproportionate share adjustment factor 5% or .05
Disproportionate share hospital outlier payment = Disporortionate share hospital adjustment factor × Outlier payment = .05($2192.52) = $109.63

Step 6.—Total Day Outlier Payments

Regular	$2,192.52
Indirect medical education	172.57
Disproportionate share hospital	109.63
Total	2,474.72

The following is an example of how the additional payment would be determined for a high cost outlier in FY 1987:

Same facts as in the day outlier example with the exception that Mrs. Smith's length of stay was 16 days and she incurred total billed charges of $100,000.

Step 1.—Computation of Hospital X's Standardized Cost

[Includes captial]

Billed Charges—$100,000.00
National ratio of cost to charges[1]—.71
Indirect medical education adjustment factor—.07871
Disproportionate share hospital adjustment factor: Hospital X's Standardized Cost = $100,000.00 ÷ 1 + (.07871 + .05) × .71 = $83,809.07

Step 2.—Determination of Cost Outlier Threshold

Computation 1 (Based on Federal Rate)

DRG 31 Federal rate, excluding capital—$2338.22
DRG 31 Federal Capital Payment Rate—[.50($274.86) + .50($240.71)](.5363) = $138.77
Federal rate, including capital, for threshold computation—$2338.22 + $138.77 = $2476.99
Federal rate, doubled—2 × $2476.99 = $4953.98

Computation 2 (Based on Wage Index Adjusted Standard Cost Outlier threshold)

Standard Cost Outlier Threshold—$13,500
Labor-related share [1] 69.24%
Nonlabor-related share, excluding capital [1]—23.03%
Nonlabor-related share, capital only [1]—7.73%
Wage index adjusted cost outlier threshold, including capital ($13,500 × .6924 × 1.6306) + ($13,500 × .2303) + ($13,500 × .0773) = $19,477.66
Computation 1 result—$4,953.98
Computation 2 result—$19,477.66
Higher or computation 1 or computation 2—$19,477.66
Applicable cost outlier threshold—$19,477.66

Step 3.—Calculation of Cost Outlier Payment

Outlier cost—$62,903.67 − $19,477.66 = $43,426.01
Capital portion [1] of hospital cost from market basket—7.73% = .0773
Capital portion of outlier cost—$43,426.01 × .0773 = $3,356.83
Federal portion of capital rate—20%
Federal capital portion of outlier cost—.20 × $3,356.83 = $671.37
Outlier cost, excluding capital]—$43,426.01 − $3,356.83 = $40,069.18
Federal portion of prospective payment rate, excluding capital—75%
Federal portion of outlier cost, excluding capital—.75 × $40,069.18 = $30,051.89
Marginal cost factor—.60
Outlier payment, capital and non-capital portions—($671.37 − $30,051.89).60 = $18,433.96

Step 4.—Cost outlier payment for indirect medical education costs

Interns and resident/Bed ratio—.1
Percentage add-on for indirect medical education—7.871%
Indirect medical education cost outlier payment—$18,433.96 × .07871 = $1,450.94

Step 5.—Cost outlier payment adjusted for Disproportionate Share Hospital

Disproportionate share hospital percentage add-on—5%
Disproportionate share hospital outlier payment—$18,433.96 × .05 = $921.70

Step 6.—Total cost outlier payements

Regular	$18,433.96
Indirect Medical Education	1,450.94
Disproportionate Share Hospital	921.70
Total	20,806.60

The following is an example of how the additional payment would be determined for a day outlier in FY 1987 for hospitals whose cost reporting period begins *after* October 1, 1986:

The same facts are applicable as in the period day outlier example but with the exception that Hospital X's cost reporting period begins January 1, 1987 and ends December 31, 1987. For discharges occurring between October 1, 1986 and December 31, 1986, Hospital X's prospective payments do not include capital (capital costs for Hospital X would continue to be paid on a pass-

[1] Previously this factor was .72 (see the September 1, 1983 interim final rule (48 FR 39777)) and was derived from 1981 data. The proposed revised factor of .71 reflects the inclusion captial costs, and the exclusion of interest income on funded depreciation and was developed from FY 1984 cost and charge data.

BEST COPY AVAILABLE

through basis until January 1, 1987). Therefore, for the period October 1, 1986 through December 31, 1986, the amount of Hospital X's day outlier payment is calculated as follows:

Step 1.—Computation of Federal rate (excludes payments for indirect medical education costs and disproportionate share hospital adjustment)

Pacific Census Division Urban Standardized Amounts:
Labor-related $2063.58
Nonlabor-related $694.05
National Urban Standardized Amounts:
Labor-related $2194.80
Nonlabor-related $738.96
San Francisco MSA Wage Index 1.6395
DRG 31 Relative Weight ..... .5363

Federal rate
= .5363 [.80 ($2063.58 × 1.6395 + $694.05) + .20 ($2194.80 × 1.6395 + $738.96)]
= .5363 ($2150.04 + $2193.87)
= $2338.22

Federal portion of prospective payment rate = 75 percent
Federal payment = .75 ($2338.22) = $1753.67

Step 2.—Computation of Day Outlier Payments

Outlier days = 28 − 20 = 8
DRG 31 geometric mean length of stay = 3.9 days
Marginal cost factor = .60
Outlier payment (excludes disproportionate share hospital and indirect medical education costs) = Number of outlier days × (Total Federal prospective payment ÷ Geometric mean length of stay for DRG) × Marginal cost factor = 8 ($1753.67 ÷ 3.9) .60 = $2156.36

Step 3.—Computation of Indirect Medical Education Adjustment for Day Outliers

Intern and Resident/Bed Ratio = .1
Indirect medical education adjustment factor = $2[(1 + .1)^{.405} - 1] = .07871$ or 7.871%
Indirect medical education outlier payment = Indirect medical education adjustment factor × Outlier payment = .07871 ($2156.36) = $169.66

Step 4.—Computation of Disproportionate Share Payment for Day Outliers

Disproportionate share adjustment factor 5% or .05

Disproportionate share hospital outlier payment = Disproportionate share hospital adjustment factor × Outlier Payment = .05 ($2156.36) = $107.82

Step 5.—Total Day Outlier Payments

Regular	$2,156.36
Indirect medical education	169.66
Disproportionate share hospital	107.82
Total	2,436.16

The following is an example of how the additional payment would be determined for a cost outlier in FY 1987 for a hospital whose cost reporting period begins *after* October 1, 1986:

The same facts are applicable as in the previous cost outlier example but with the exception that Hospital X's cost reporting period begins January 1, 1987 and ends December 31, 1987. For discharges occurring between October 1, 1986 and December 31, 1986, Hospital X's prospective payments would not include capital (Hospital X's capital costs would continue to be paid on a pass-through basis until January 1, 1987). Therefore, for the period October 1, 1986 through December 31, 1986, the amount of Hospital X's outlier payment is calculated as follows:

Step 1.—Computation of Hospital X's Standardized Cost

Billed Charges—$100,000.00
National ratio of cost to charges—.71
Indirect medical education adjustment factor—7.871%
Disproportionate share hospital adjustment factor—5%
Hospital X's Standardized cost equals $100,000 divided by 1 plus (.07871 plus .05) times .71 equals $62,903.67

Step 2.—Determination of Cost Outlier Thresholds

Computation 1 (Based on Federal Rate)

DRG 31 Federal rate—$2338.22
Federal rate for threshold computation equals $2338.22
Federal rate, doubled—2 × $2338.22 = $4676.44

Computation 2 (Based on Wage Index Adjusted Standard Cost Outlier Threshold)

Standard Cost Outlier Threshold—$13,500
Labor-related share [1]—69.24%
Nonlabor-related share, excluding capital[1]—23.03%
Nonlabor-related share, capital only [1]—7.73%
Wage index adjusted cost outlier threshold, including capital—
($13,500 × .6924 × 1.6395) + ($13,500 × .2303) + ($13,500 × .0773) = $19,477.66
Computation 1 result—$4,676.44
Computation 2 result—$19,477.66
Higher of computation 1 or computation 2—$19,477.66
Applicable cost outlier threshold—$19, 477.66

Step 3.—Calculation of Cost Outlier Payment

Outlier cost—$62,903.67 − $19,477.66 = $43,426.01
Capital portion[1] of hospital cost from market basket—7.73% or .0773
Capital portion of outlier cost—$43,426.01 × .0773 = $3,356.83
Outlier cost, excluding capital[2]—$43,426.01 − $3,356.83 = $40,069.18
Federal portion of prospective payment rate—75%
Federal portion of outlier cost—.75 × $40,069.18 = $30,051.89
Marginal cost factor—.60
Outlier payment—.60 × $30,051.89 = $18,031.13

Step 4.—Cost outlier payment for indirect medical education costs

Intern and resident/Bed ratio—.1
Percentage add-on for indirect medical education—7.871%
Indirect medical education cost outlier payment—$18,031.13 × .07871 = $1,419.23

Step 5.—Cost outlier payment adjusted for disproportionate share hospital

Disproportionate share hospital percentage add-on—5%
Disproportionate share hospital outlier payment—$18,031.13 × .05 = $901.56

Step 6.—*Total cost outlier payments:*

Regular	$18,031.31
Indirect medical education	1,419.23
Disproportionate share hospital	901.56
Total	20,351.92

The above total amounts represent only the outlier payment amounts for the discharges and exclude the usual prospective payments that apply for both outlier and non-outlier cases.

For purposes of this rule, we are not proposing to revise the 60 percent marginal cost factor used to compute outlier payments. To date, the 60 percent factor represents our best estimate of the ratio of marginal cost (that is, the incremental change in the actual cost of care per unit of output) to average cost. Most of the available estimates of the ratio of marginal cost to average cost vary quite substantially from one study to another depending on the measure of hospital output (such as days, admissions, or services) and the time interval examined. Although the 60 percent marginal cost factor that we have adopted is in the upper range of the available estimates, and may be appropriate as an overall average, we are concerned that it may yield payments that tend to discourage hospitals from treating outlier cases that are unusually costly or require very long lengths of stay. Since we do not wish to discourage the treatment of severely ill Medicare patients who require particularly resource-intensive care, we are specifically soliciting comments on the propriety of the 60 percent marginal

[1] These market basket portions reflect the labor-related and nonlabor-related components as described in Table 2, column 2 in section IV of the addendum.

[2] The capital portion of the outlier cost is excluded because it is paid on a pass-through basis for the hospital in this example until January 1, 1987.

cost factor used to compute outlier payments, particularly with respect to its ability to compensate hospitals reasonably for unusually expensive outlier cases. Commenters should understand that any recommended increase in the marginal cost ratio that might be incorporated in the final rule on the FY 1987 prospective payment rates would also require a corresponding increase in the length of stay and cost outlier thresholds to ensure that total estimated outlier payments comprise five percent of anticipated prospective payments.

g. Costs of Malpractice Insurance. On April 1, 1986, we published an interim final rule in the Federal Register on payment for the cost of malpractice insurance (51 FR 11142). In that rule we adopted an apportionment methodology for determining reasonable cost reimbursement for hospital malpractice insurance costs. The new apportionment policy for hospitals (§ 405.457), which generally will recognize as allowable costs a larger proportion of malpractice costs than previous policy, divides total malpractice insurance premium cost into two components. The "administrative component" is included in the Administrative and General (A&G) cost center and is apportioned on the basis of the individual hospital's Medicare utilization rate. The "risk component" is apportioned on the basis of a formula that takes into account the individual hospital's utilization as well as the national Medicare patient utilization rate and the national Medicare malpractice loss ratio.

For purposes of updating the standardized amounts, the Federal rates already include sufficient costs to account for any changes made as a result of the April 1, 1986 interim final rule. The Federal rates are based on unaudited hospital cost reports from cost reporting periods that ended in 1981. Based on our review of the cost reports, it appears that a large number of hospitals, in order to preserve their rights to appeal the prior regulations (§ 405.452) that provided for separate apportionment of malpractice costs, included such costs in the A&G cost center (that is, in accordance with the Medicare reimbursement principles in effect prior to the June 1, 1979 final rule (effective for cost reporting periods beginning on or after July 1, 1979) which established the policy on separate apportionment of malpractice costs in § 405.452(a)(1)(ii)). The effect of this action on the part of hospitals is that the Federal rates reflect an amount for malpractice costs that is in excess of the amount that would have been recognized had hospitals, in completing their Medicare cost reports, generally adhered to the existing regulations providing for separate apportionment of Medicare malpractice costs.

We have included no adjustment in the update factor for malpractice insurance costs. Those hospitals that request adjustments to their base year costs will have their hospital specific rates adjusted under our malpractice regulation. We are not making any adjustment to the federal rates for malpractice, and we note that if such an adjustment were made, it would reduce the rates. This is because the federal rates are based upon 1981 unaudited cost reports, and about half the hospitals submitted those cost reports under the regulations in effect prior to 1979, which provided for greater malpractice payments than provided for by the current regulations. We expect the hospitals that submitted cost reports under the 1979 regulations would be those whose malpractice payments were either increased under the 1979 regulations or were minimally reduced by the 1979 regulations.

In addition, as we stated in the September 3, 1985 final rule (50 FR 35703), our analyses indicate that the Federal rates are overstated for a number of reasons. Furthermore, both the General Accounting Office and the Department's Office of the Inspector General have conducted studies showing that the Federal rates are overstated. In light of these findings, we believe that it would be inappropriate to increase the rates further to reflect a modification in policy concerning reimbursement of malpractice insurance costs.

B. Adjustments for Area Wage Levels and Cost-of-Living

This section contains an explanation of the application of two types of adjustments to the adjusted standardized amounts that will be made by the intermediaries in determining the prospective payment rates as described in section D below. For discussion purposes, it is necessary to present the adjusted standardized amounts divided into labor and nonlabor portions. Table 1, as we propose to revise it in this addendum, contains the actual labor-related and nonlabor-related shares that would be used to calculate the prospective payment rates.

1. Adjustment for Area Wage Levels

Section 1886(d)(2)(H) of the Act requires that an adjustment be made to the labor-related portion of the prospective payment rates to account for area differences in hospital wage levels. This adjustment is made by the intermediaries by multiplying the labor-related portion of the adjusted standardized amounts by the appropriate wage index for the area in which the hospital is located. The proposed revised wage index, which makes minor corrections (for the provision in section IV.D. of the preamble regarding hospitals in redesignated rural counties which are surrounded on all sides by urban counties) to the wage index published in the May 6, 1986 interim final rule, is set forth in Tables 4a and 4b of this addendum.

2. Adjustment for Cost of Living in Alaska and Hawaii

Section 1886(d)(5)(C)(iv) of the Act authorizes an adjustment to take into account the unique circumstances of hospitals in Alaska and Hawaii. Higher labor-related costs for these two States were included in the adjustment for area wages above. For FY 1987, the adjustment necessary for nonlabor-related costs for hospitals in Alaska and Hawaii would be made by the intermediaries by multiplying the nonlabor portion of the standardized amounts by the appropriate adjustment factor contained in the table below. (We note that the adjustment factors are different from those in effect in FY 1986.)

Table of Cost-of-Living Adjustment Factors, Alaska and Hawaii Hospitals

Alaska—All areas	1.25
Hawaii:	
Oahu	1.225
Kauai	1.175
Maui	1.20
Molokai	1.20
Lanai	1.20
Hawaii	1.15

Note.—The above factors are based on data obtained from the U.S. Office of Personnel Management.

C. DRG Weighting Factors

All inpatient hospital discharges are categorized according to a DRG as discussed in the September 1, 1983 interim final rule (48 FR 39760) and the September 3, 1985 final rule (50 FR 35647).

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in medical technology and treatment patterns that may affect the cost of providing inpatient care. Accordingly, section 1886(d)(4)(C) of the Act provides that, effective for discharges occurring in FY 1986, and no less often than once every four years thereafter, the Secretary "shall adjust

the classifications and weighting factors . . . to reflect changes in treatment patterns, technology, and other factors which may change the relative use of hospital resources."

In compliance with the law, we published in the September 3, 1985 final rule (50 FR 35722) revised DRG weights that were recalibrated to reflect changes in resource consumption that had occurred subsequent to 1981 (the base-year data used to derive the initial DRG weights). Unlike the FY 1984 (48 FR 39878) and FY 1985 (49 FR 34760) series of DRG weights, which were largely developed from 1981 Medicare cost report data and billing records from a 20 percent sample of Medicare beneficiaries, the DRG weights in the September 3, 1985 final rule were constructed from the FY 1984 Part A Tape Bill (PATBILL) file, which is the universe of available inpatient bills for Medicare patients discharged in FY 1984. The most recent DRG weights were based exclusively on hospital charges for nearly 11 million patient stays. For a detailed explanation of the development of these charge-based DRG relative weights, we refer the reader to the discussion in the June 10, 1985 proposed rule (50 FR 24372) and the September 3, 1985 final rule (50 FR 35652).

However, as a result of a series of Congressional postponements as described earlier, the prospective payment changes published in the September 3, 1985 final rule, including the revised DRG relative weights, which were to be effective for discharges occurring on or after October 1, 1985, were postponed through April 30, 1986. We implemented the revised DRG relative weights published in the September 3, 1985 final rule effective with discharges occurring on or after May 1, 1986 (51 FR 16772).

We considered proposing to recalibrate the DRG weights using a later PATBILL data set (subsequent to FY 1984) in this proposed rule as recommended by ProPAC. However, we decided against this course of action.

The Conference Committee report to Pub. L. 98-21 (H.R. Rep. No. 47, 98th Cong., 1st Sess. 187 (1983)) clearly anticipated the use of discretion as to the frequency of DRG weight recalibration by stipulating that the DRG classifications and weighting factors be adjusted for FY 1986, and subsequently as necessary, but not less often than once every four years. We believe it is appropriate not to recalibrate annually because—

—Shifts in the consumption of hospital resources among DRGs, the very basis for recalibration, generally occur as a result of changes in medical technology and the adoption of new treatment methods. Typically, these changes occur gradually over time as the clinical efficacy or cost saving benefits of the new technology and procedures become apparent and are adopted by hospitals and physicians on a widespread basis. Therefore, frequent or annual recalibration of DRGs is unnecessary in light of the general pace of technological diffusion and its effect on inpatient hospital resource consumption; and

—To the extent that new procedures or treatment methods may be rapidly adopted because the benefits are immediately evident, and the effect is to alter significantly the resource intensity or scope of procedures included in a specific DRG, we believe that these changes are adequately accommodated under the current system by which DRG classification system changes are made as specified in § 412.10. Under that regulation HCFA issues classification changes in an annual notice published in the Federal Register. In addition to the classification changes, we are proposing to reweight the DRGs that are affected as a result of the reclassification changes.

We welcome any suggestions that commenters may have regarding the frequency of recalibration of DRG weights.

D. Calculation of Prospective Payment Rates for FY 1987 General Formula for Calculation of Prospective Payment Rates for Cost Reporting Periods Beginning on or after October 1, 1983 and Before October 1, 1987

Prospective Payment Rate = (Hospital-Specific Portion + Federal Portion) + (Hospital-Specific Capital Portion + Federal Capital Portion)

1. Hospital-Specific Portion

The hospital-specific portion of the prospective payment rate is based on a hospital's historical cost experience. For the first cost reporting period under prospective payment, a hospital-specific rate was calculated for each hospital, derived generally from the following formula:

Base year costs per discharge divided by 1981 case-mix index multiplied by updating factor equals Hospital-specific rate

For the first prospective payment cost reporting period, the hospital-specific portion equaled 75 percent of the hospital-specific rate.

For each subsequent transition period cost reporting period, the hospital-specific portion is derived as follows:

Previous period's Hospital-Specific Rate × Updating Factor × Blending Percentage × DRG Weight.

The blending percentage for cost reporting periods beginning in FY 1987 is 25 percent. For a more detailed discussion of the hospital-specific portion, we refer the reader to the September 1, 1983 interim final rule (48 FR 39772).

a. Updating the Hospital-Specific Rates for FY 1987 Cost Reporting Periods. We are proposing to increase the hospital-specific rates by 0.5 percent for cost reporting periods beginning on or after October 1, 1986. As required by section 1886(e)(4) of the Act in conjunction with section 1886(b)(3)(B) of the Act, this is the same percentage increase (0.5 percent) that we are proposing to change the Federal rates for in FY 1987.

As we pointed out, we believe the FY 1986 rates were set too high. If we were to propose to correct the rates prospectively for the full amount of the overstatement, it would result in a reduction of the hospital-specific rates. For the same reasons that we have proposed not to reduce the FY 1987 Federal rates, we have decided that it is preferable to increase the rates by 0.5 percent.

b. Calculation of Hospital-Specific Portion. For hospital cost reporting periods beginning on or after October 1, 1986, the hospital-specific portion of a hospital's payment for a given discharge would be calculated by:

Step 1.—Multiplying the previous cost reporting period's hospital-specific rate, as described in the May 6, 1986 interim final rule, by the applicable update factor (1.005);

Step 2.—Multiplying the previous cost reporting period's hospital-specific rate by 25 percent; and

Step 3.—Multiplying the amount resulting from Step 2 by the specific DRG weighting factor applicable to the discharge. The result is the hospital-specific portion of the FY 1987 prospective payment for a given discharge.

c. New Providers. Hospitals that have not completed a 12-month cost reporting period under Medicare (either under current or previous ownership) prior to September 30, 1983 and meet the criteria in § 412.74 are considered new providers for purposes of the prospective payment system. Their prospective payment rates are computed solely on the basis of the Federal rates. Thus, new providers are paid a blend of 50 percent of the appropriate Federal regional rate and 50 percent of the Federal national rate for

discharges occurring on or after October 1, 1986 and before October 1, 1987.

2. Federal Portion

For cost reporting periods beginning on or after October 1, 1986 and before October 1, 1987, the Federal portion of the hospital's rate will be 75 percent of the hospital's Federal rate. Beginning with discharges occurring on or after October 1, 1986, the Federal rate is comprised of a blend of the appropriate Federal regional rate (50 percent) and the Federal national rate (50 percent). The Federal rates are determined as follows:

Step 1.—Selecting the appropriate regional and national adjusted standardized amount considering the location and urban and rural designation of the hospital (see Table 1, section IV of the addendum);

Step 2.—Multiplying the labor-related portion of the standardized amount by the appropriate wage index;

Step 3.—For hospitals in Alaska and Hawaii, multiplying the nonlabor-related portion of the standardized amount by the appropriate cost-of-living adjustment factor.

Step 4.—Summing the amounts from step 2 and the nonlabor portion of the standardized amount (adjusted if appropriate under step 3); and

Step 5.—Multiplying the final amount from step 4 by the weighting factor corresponding to the appropriate DRG weight (see Table 5, section IV of the addendum).

3. Hospital-Specific Capital Portion

For hospital cost reporting periods beginning on or after October 1, 1986, the hospital-specific portion of a hospital's payment would be calculated by multiplying by 80 percent the lower of—

- Actual allowable capital-related costs for the hospital's cost reporting period beginning on or after October 1, 1986; or
- The sum of total payments as calculated by multiplying the hospital-specific capital-related rate by the applicable percentage for updating the prospective payment amounts (0.5 percent), and multiplying the product by the DRG weighting factor (see Table 5 in section IV of the addendum).

4. Federal Capital Portion

For hospital cost reporting periods beginning on or after October 1, 1986, the Federal capital portion of a hospital's payment for a given discharge would be calculated by:

Step 1.—Selecting the appropriate regional and national standardized capital amount considering the location and urban and rural designation of the hospital (See Table 1, section IV of the addendum.

Step 2.—For hospitals in Alaska and Hawaii, multiplying the appropriate regional and national capital amounts in Step 1 by the appropriate cost-of-living adjustment factor;

Step 3.—Multiplying the final amount from step 2 by the DRG weighting factor (see Table 5, section IV of the addendum).

III. Proposed Target Rate Percentages for Hospitals and Hospital Units Excluded From the Prospective Payment System

A. Background

The inpatient operating costs of hospitals and hospital units excluded from the prospective payment system are subject to rate-of-increase limits established under the authority of section 1886(b) of the Act, which is implemented in § 405.463 of the regulations. Under these limits, an annual target amount (stated as inpatient operating cost per discharge) is set for each hospital, based on the hospital' own cost experience. This target amount is applied as a ceiling on the allowable costs per discharge for the hospital's next cost reporting period.

A hospital that has inpatient operating costs per discharge in excess of its target amount would be paid no more that that amount. However, a hospital that has inpatient operating costs less than its target amount would be paid its costs plus the lower of (1) 50 percent of the differences between the inpatient operating cost per discharge and the target amount, or (2) five percent of the target amount.

Each hospital's target amount is adjusted annually, before the beginning of its cost reporting period, by an applicable target rate percentage for the 12-month period, prorated based on calendar year target rate percentages. For cost reporting periods beginning in FY 1983 and FY 1984, the applicable target rate percentage was the estimated hospital market basket increase factor plus one percentage point. For cost reporting periods beginning in FY 1985, the applicable target rate percentage was the estimated hospital market basket increase factor plus one-quarter of one percentage point, as prescribed by section 1886(b)(3)(B) of the Act. Under section 9101 of Pub. L. 99–272, the applicable target rate percentage increase for cost reporting periods beginning on or after October 1, 1985 through September 30, 1986 is ¾ of one percent. Section 9101 of Pub. L. 99–272 provides that for purposes of updating the target rate for FY 1987, the FY 1986 increase will be deemed to have been one-half of one percent. However, for cost reporting periods beginning in FY 1987, and thereafter, the target rate percentage is adjusted by an update factor determined by the Secretary under section 1886(e)(4) of the Act considering the recommendations of ProPAC under section 1886(e)(2) of the Act and may not exceed the market basket percentage as determined under section 1886(b)(3)(B) of the Act.

B. Proposed Target Amounts for Cost Reporting Periods Beginning in FY 1987

For cost reporting periods beginning in FY 1987, we are proposing to increase each hospital's previous year's target amount by 0.5 percent. Under section 1886(b)(3)(B) of the Act, as amended by section 9101(b) of Pub. L. 99–272, the applicable percentage increase, for FYs 1987 and 1988, is determined pursuant to section 1886(e)(4) of the Act, and may not exceed the market basket increase. The same percentage increase, therefore, applies to the target rate amounts for hospitals and units excluded from the propective payment system as applies to the prospective payment rates for hospitals subject to that system.

C. ProPAC Recommendations

ProPAC recommends that for FY 1987, the target rate of increase limits for hospitals and units excluded from the prospective payment system be—

- Updated to reflect the projected increase in the hospital market basket (4.6–4.8 percent);
- Corrected for forecast errors in FY 1986 (−0.3 percent); and
- Adjusted for the policy target adjustment factor (−0.8 percent).

Our proposed target rate increase (0.5 percent) is very similar to ProPAC's recommendation. Our projected increase in the market basket of 3.6 percent is based on more recent data than ProPAC's estimate. Likewise, our forecast error projection of −0.4 percent and our net case mix change of −2.1 percent are based on more recent data.

We are also proposing to consider the policy target adjustment factor in updating the target rates. We would use the same policy target adjustment factor (−2.0 percent) for the excluded facilities as we are proposing to use for prospective payment hospitals as required under section 1886(e)(4) of the Act.

IV. Tables

This section contains the tables referred to throughout the premable to

this proposed rule and in this addendum. For purposes of this proposed rule and to avoid confusion, we have retained the designations of Tables 1 through 5 that were first used in the September 1, 1983 initial prospective payment final rule (48 FR 39844). Tables 1, 2, 3c, 3d, 4a, 4b, 5, 6 and 7 are presented below. The tables are as follows:

Table 1—Adjusted Standardized Amounts, Labor/Nonlabor/Capital
Table 2—Hospital Market Basket
Table 3a—Hospital Case Mix (September 1, 1983 final rule—48 FR 39847)
3b—Average Case-Mix Indexes by Hospitals Classification Group (September 1, 1983 final rule—48 FR 39871)
3c—Hospital Case-Mix Indexes for Cost Reporting Periods Beginning in Federal FY 1985
3d—Average Case-Mix Indexes by Hospital Classification Group FY 1985
Table 4a—Wage Index for Urban Areas
Table 4b—Wage Index for Rural Areas
Table 5—Diagnosis-Related Groups
Table 6—Grouper Changes
Table 7—Length-of-stay Percentiles

TABLE 6 - CHANGES TO GROUPER PROGRAM

PROBLEM	GROUPER MODIFICATION
A. DRG Logic Issues	
DRG 385 (Neonates, Died or Transferred) includes transfers to foster care facilities, as well as other facilities, in addition to transfers to acute care hospitals. It is not appropriate to classify normal newborns transferred to foster care facilities, or similar facilities, into DRG 385.	Assign a newborn to DRG 385 only for cases with a reported discharge status of "died" or "transferred to an acute care hospital." Assign a newborn transferred to other than an acute care facility to DRGs 386-391, as appropriate, based on the diagnosis and procedure codes.
Procedure code 8421, thumb reattachment, had been inadvertently omitted from the procedures classified in MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue).	Add procedure code 8421 to DRGs 228 and 229.
B. SURGICAL HIERARCHY	
Cases showing multiple surgical procedures should be classified into the DRG that coincides with the most resource intensive procedure performed. Based upon the current weights:	
In MDC 2 (Diseases and Disorders of the Eye), extraocular procedures except orbit are more resource intensive than primary iris procedures.	1. Place extraocular procedures except orbit above primary iris procedures in the surgical hierarchy for MDC 2.
In MDC 3 (Diseases and Disorders of the Ear, Nose and Throat), cleft lip and palate repair and sinus and mastoid procedures, are more resource intensive than salivary gland procedures except sailoadenectomy.	2. Place cleft lip and palate repair and sinus and mastoid procedures above salivary gland procedures except sailoadenectomy in the surgical hierarchy for MDC 3.
In MDC 5 (Diseases and Disorders of the Circulatory System), permanent cardiac pacemaker implantations are more resource intensive than vascular procedures.	3. Place permanent cardiac pacemaker implantation above vascular procedures in the surgical hierarchy for MDC 5.
In MDC 6 (Diseases and Disorders of the Digestive System), mouth procedures are more resource intensive than anal and stomal procedures.	4. Place mouth procedures above anal and stomal procedures in the surgical hierarchy for MDC 6.

PROBLEM

In MDC 7 (Diseases and Disorders of the Hepatobiliary System), diagnostic procedures are more resource intensive than biliary tract procedures.

In MDC 21 (Injuries, Poisonings and Toxic Effect of Drugs), wound debridements are more resource intensive than skin grafts.

C. Homogeneity

In MDC 22 (Burns), cases assigned to DRG 457 show a high degree of heterogeneity. One of the factors contributing to this heterogeneity is the comingling of cases requiring surgical procedures with those treated medically.

In MDC 17 (Myeloproliferative Diseases and Disorders, and Poorly Differentiated Neoplasms), a high degree of heterogeneity exists in DRGs 401 through 404. Two factors have been identified as contributing to this heterogeneity, that is, comingling of acute leukemia with lymphoma and other leukemia cases and differentiating classification on the basis of age.

GROUPER MODIFICATION

5. Place diagnostic procedures above biliary tract procedures in the surgical hierarchy for MDC 7.

6. Place wound debridements above skin grafts in the surgical hierarchy for MDC 21.

DRG 457, extensive burns, would be divided into 2 categories. The new DRG 457 would include only extensive burns without O.R. procedures. A new DRG 472 would include extensive burns with O.R. procedures.

DRGS 401 through 405 would be reconfigured to remove acute leukemia cases. Acute leukemia without major O.R. procedure would be classified into 2 DRGs, that is, DRG 405 for patients under age 18 and a new DRG 473 for patients over age 17. Lymphoma/non-acute leukemia without major O.R. procedure would be classified based on other O.R. procedures, with and without CC, and medical cases, with and without CC. Age would no longer affect DRG classification of lymphoma/non-acute leukemia.

PROBLEM

In MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue), the construction of DRGs 223-224, upper extremity O.R. procedures, results in the comingling of a broad range of procedures that can be performed on a single body site. There is substantial variability in resources associated with these procedures.

Also in MDC 8, the construction of DRGs 228-229, hand O.R. procedures, results in the comingling of a broad range of surgical procedures, with DRG assignment dependent only on the presence or absence of ganglion diagnoses. There is substantial variation in the resources associated with these procedures.

In MDC 11 (Diseases and Disorders of the Kidney and Urinary Tract), it was found that age or absence of CC had little effect on the resource consumption associated with extracorporeal shock wave lithotripsy (ESWL). Regardless of patient age and the absence of complications or comorbidities, the procedure is similar in resources to those cases classified into DRG 323, urinary stones, age greater than 69 and/or CC.

GROUPER MODIFICATION

DRGs 223-224 would be reconfigured to eliminate age considerations from this classification. Major shoulder and elbow joint procedures would be grouped to a single DRG. Other upper extremity O.R. procedures with CCs would be classified in the same DRG as major upper extremity joint procedures.

DRGs 228-229 would be reconfigured to eliminate ganglion diagnoses from consideration in the classification of hand procedures. Major wrist, hand and thumb O.R. procedures and other O.R. procedures with CC would be grouped to DRG 228. O.R. procedures other than major joint procedures without CC would comprise the proposed DRG 229.

All cases with a principal diagnosis of urinary stones that were treated with ESWL and no O.R. procedures would be assigned to DRG 323, regardless of age and/or CC.

TECHNICAL NOTE: The above lengths of stay were developed using the same FY 1984 discharges and GROUPER program used to compute the recalibrated DRG relative-weights which appeared in the September 3, 1985 Federal Register (50 FR 35722). Each percentile length of stay (LOS) value was computed according to the following formula:

Let n represent the number of discharges classified by DRG and let x_1, x_2, ..., x_n represent the ordered LOS values for each DRG set of discharges. For the t_{pp} percentile, where pw (/100), let $np = j + g$ where j is the integer part and g is the fractional part of np. The t_{pp} percentile, y, is defined as the LOS value at $x_{n,}$

$$y = (1-g)x_j + gx_{j+}$$

Appendix A—Data Sources Used to Estimate the Market Basket Relative Weights, and Choice of Price Proxies

As discussed above in section III of the preamble, we are proposing to rebase and reweight the hospital market basket. The market basket reflects the average change in the price of goods and services purchased by hospitals to furnish inpatient care. Below we list the data sources used to estimate the relative weights in the hospital market basket and our choice of price proxies.

A. Data Sources Used to Estimate Relative Weights

1. Payroll Expenses: Wages and Salaries

Source: American Hospital Association, *Hospital Statistics*, Annual Survey, Chicago, Illinois, 1983.

2. Payroll Expenses: Employee Benefits

Source: Same as above.

3. Professional Fees

Source: Same as above.

This category was split into two components:

- Medical fees; and
- Other professional fees. Medical professional fees comprise the largest portion of the professional fees component in the AHA *Annual Survey* of hospital costs. The weight for medical fees was calculated as a residual. The latter weight for other professional fees was derived from an analysis of the value of input consumption by the hospital industry as published in "The Detailed Input-Output Structure of the U.S. Economy: 1977," compiled by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce.[1] This weight was then subtracted from professional fees, resulting in the weight for medical professional fees.

4. Capital-Related Costs: Depreciation

Source: Same as above.

This item split into two asset components: (1) buildings and fixed equipment, and (2) moveable equipment, using unpublished data obtained from AHA.

5. Capital-Related Costs: Interest

Source: Same as above.

6. Capital-Related Costs: Other

This category consists of three components that are captured in the AHA classification "Residual-other expense," category. These components are—

- Fire and allied insurance;
- Leases and rentals; and
- Real estate taxes.

Under section 1886(a)(4) of the Act, Medicare providers are entitled to a "pass-through" reimbursement for these costs, as well as capital, depreciation and interest, for cost reporting periods beginning prior to October 1, 1986. In this proposed rule, this category would be included under the capital component of the hospital market basket.

The share for each cost is represented in the AHA residual expense category "Other" derived from an analysis of the value of input consumption by the hospital industry as published in "The Detailed Input-Output Structure of the U.S. Economy: 1977," compiled by BEA, U.S. Department of Commerce. The capital-related shares are combined into a single "Other capital-related" category and incorproated with the weights for depreciation and interest to form the aggregate capital component.

7. Utility and Energy Consumption

Source: Same as above.

This item was split into five cost components: (1) fuel, oil, coal and other fuel; (2) electricity; (3) natural gas; (4) motor gasoline; and (5) water and sewerage. The proportions of each cost were derived from an analysis of the value of input consumption by the hospital industry, as published in "The Detailed Input-Output Structure of the U.S. Economy: 1977," compiled by BEA.[2]

8. Malpractice Insurance

This cost category was derived from an analysis of the median percentage of professional liability insurance expense applied to total hospital insurance costs, as compiled in the *HAS/MONITREND Six-Month National Data Book*, published by the Hospital Administrative Service Division of AHA. The data from the six months ending June 30, 1982, and December 31, 1982, were combined and a weighted average based on bed-size was computed.

9. All Other Products and Services

This residual measures the weights of unattributed products and services included in the residual "Other" category published in the AHA Annual Survey. Shares were derived from an analysis of BEA's hospital input-output matrix and incorporates all noncapital-related categories (other capital-related shares was initially derived with the other residual costs shares and then incorporated into the capital component of the hospital market basket) consumed by the hospital industry, with the exception of utilities and energy consumption, malpractice insurance premiums, salaried and fee-paid other professional remuneration that were delineated above. The following major classifications were derived by aggregating like products and services consumed by the hospital industry:

Other Products

1. Pharmaceuticals.
2. Food.
   a. Direct Purchases.
   b. Indirect Purchases (by dietary contractors).
3. Chemical and Cleaning Products.
4. Surgical and Medical Instruments.
5. Photographic Supplies.
6. Rubber and Plastics.
7. Paper Products.
8. Apparel.
9. Minor Machinery and Equipment.
10. Miscellaneous Products.

Other Services

1. Business Services.
2. Computer and Data Processing Services.
3. Transportation and Shipping.
4. Telephone.
5. Blood Services.
6. Postage.
7. All Other Services: Labor-Intensive.
8. All Other Services: Nonlabor-Intensive.

B. Choice of Price Proxies

1. Payroll Expenses (Wages and Salaries)

External Wage Variable (used in Reimbursement Price Index)—Percentage change in weighted average of nine employment cost indexes and the internal wage variable, as described below.

Data Source—Department of Labor, Bureau of Labor Statistics, *Employment and Earnings*.

Frequency—Monthly.

Payroll expenses (wages and salaries) include all expenses defined as payroll by the AHA in their annual survey. Remuneration for salaried physicians, residents, and interns is included in payroll expenses, while remuneration for physicians who bill the hospital for their fees is not. Their fees are included in the cost category "professional fees, medical." For purposes of establishing the 1982 base-year weights,

[1] The Interindustry Economics Division of BEA conducts a survey of the value of input consumption by major industry classification at five-year intervals. The last study was for cost consumption during 1977. The calculated cost of each individual input goods and services supplied to the hospital industry was aged and updated from 1977 to 1982 using appropriate historical price movements for the detailed expense categories. Relative expenditure weights were then computed for the various cost categories.

[2] Ibid.

expenditures for trainees and residents and interns are removed.

In order to construct an external occupation-specific measure of hospital wages and salaries, occupational data were derived from a survey by the U.S. Census Bureau Survey of employment by the hospital industry published in the *1980 Census of Population, Subject Report, Occupation of Industry* in May 1984. The survey reported the number of employees in 1980 and the mean 1979 earnings of each of these occupations. Earnings and employment levels were combined to yield total payroll (wages and salaries) costs for nine occupational categories that can be measured by a corresponding Employment Cost Index (ECI). The ECI maintains a series on the level of wages and salaries paid to private industry workers in each of these occupational groups. Total payroll for each occupation in 1979 was then updated to 1982 by using the change in the corresponding ECI. Weights for each category were calculated. By calculating a weighted average of price changes for each occupation, an external wage variable was constructed that associates the employment structure of the hospital industry with a reasonable measure of wage movements.

The following table describes the 1982 labor cost shares for wages and salaries paid employees of the hospital industry per ECI occupational groups.

TABLE—ECI OCCUPATIONAL GROUPS

	1982 wage cost shares (percent)
1. Professional/Technical	57.229
2. Managers/Administrators	7.248
3. Sales Workers	.337
4. Clerical Workers	12.887
5. Craft/Kindred Workers	2.461
6. Operatives, Except Transport	.394
7. Transport Equipment Operatives	.285
8. Nonfarm Workers	.166
9. Service Workers	18.723
Total	100.000

2. Employee Benefits

External Price Variable (used in Reimbursement Price Index)—Percentage change in supplements to wages and salaries per employee on nonagricultural payrolls.

Data Sources—

For supplements to wages and salaries—U.S. Department of Commerce, Bureau of Economic Analysis, *Survey of Current Business*. July issues have details on components.

For number of employees on nonagricultural payrolls—U.S. Department of Labor, Bureau of Labor Statistics, *Employment and Earnings*.

Frequency—For supplements to wages and salaries, quarterly; for number of employees on nonagricultural payrolls, monthly.

Employee benefits include employer-paid fringe benefits for Social Security, group insurance, retirement, and other fringe benefits. Supplements to wages and salaries have two major categories of benefits:

- Employer contributions for social insurance; and
- Employer contributions to private pension and welfare funds. Employer contributions for social insurance include Federal, State, and local social insurance funds. These funds are for old-age, survivors, disability, and hospital insurance; State unemployment insurance; workmen's compensation; and other programs. Employer contributions to private pension and welfare funds include pension and profit-sharing, group health insurance, group life insurance, workmen's compensation, and supplemental unemployment. Supplements to wages and salaries include an irrelevant third component, "Other," which was approximately 0.7 percent of the total in 1982.

In calendar year 1982, employee benefits were 15.2 percent of community hospital employee compensation.[3] For total nonfarm, supplements to wages and salaries were 16.0 percent of employee compensation, and for all domestic industries supplements to wages and salaries were 15.9 percent of employee compensation in 1982.[4] The percent change in supplements to wages and salaries per employee on nonagricultural payrolls provides an external indicator of fringe benefit cost pressure on per employee basis.

3. Professional Fees: Medical

External Price Variable (used in National Hospital Price Index)—Percentage change in the charges for physicians' services as measured by the Consumer Price Index for All Urban Consumers (component of medical care services).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly

The medical fees category primarily represents fees billed to hospitals by physicians for services furnished in hospital ancillary departments such as radiology, pathology and anesthesiology. These services are usually billed under Medicare Part B, and as such are not part of the prospective payment system inpatient market basket. Salaries for staff physicians as well as for interns and residents are not included in this classification. The physician services component of the Consumer Price Index is used to approximate percent changes in fees charged. It is assumed that the physician specialists working in hospitals exhibit similar cost pressures in maintaining their practice and, thus, would generally modify their charge structure in line with the rest of the profession.

4. Professional Fees: Other

External Price Variable—Percentage change in the employment cost index for professionals and technicians.

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

The cost category "Professional Fees: Other," includes fees for legal, auditing, consulting, and other hospital-specific professional contracting. As such, this cost category reflects salaries as well as expenses for travel, research assistance, clerical assistance, and overhead. The proxy chosen is the Employment Cost Index for Professionals and Technicians.

5. Capital-Related Costs: Depreciation on Fixed Assets

External Price Variable—Percentage change in Engineering News-Record Building Cost Index (10-year quarterly moving average).

Data Source—Engineering News-Record

Frequency—First week of a month.

As a general rule, capital costing is an accounting concept that attempts to relate the value of an asset to its period of consumption ("time-release" basis) by allocating a fixed rate of depreciation on a periodic basis. Operating costs, in contrast, are generally considered to have a concurrent period of expenditure incurrence and asset consumption. By its very nature, accounting for depreciation costs entails judgment as to the useful life of a class of assets and a method for updating its replacement value. The following points highlight the critical areas of concern regarding the treatment of capital costs in the hospital market basket:

- Capital assets represent present and future costs that do not lend themselves to adjustment based on short-term financial conditions, as opposed to operating costs.

[3] American Hospital Association, *National Hospital Panel Survey*.

[4] U.S. Department of Commerce, Bureau of Economic Analysis, *Survey of Current Business*, July 1982.

• Although capital investment costs do not change year-to-year, their replacement value does. The hospital industry must arrange the means by which a sufficient flow of capital payments provide for replacement costs.

• Two distinct methods can be recognized by the Medicare program in facilitating a "sinking fund" for capital asset replacement—

—The HCFA market incorporates changes in measured costs for constructing or manufacturing classes of assets. Any future increases in reimbursement to hospitals for its capital cost that were incurred in prior years can be invested and achieve a return contributing to ability to fund potential asset replacement; and

—Especially in the case of fixed assets, the depreciation flow rate to hospitals, based on the useful life of such assets, far exceeds the proportion of the mortgage payments devoted to the principal during the earlier years of the mortgage in cases in which capital is funded by debt. The substantial increment affords hospitals the ability to further enhance their fund for future asset replacement. In addition, the reimbursement practice has been to allow taxable institutions to achieve a return on equity investment far superior to market rates of return on other investment instruments.

In regard to depreciation on fixed capital assets such as buildings or fixed equipment, a judgmental determination is necessary for forecasting purposes on two elements of updating for replacement cost:

• The type of asset measured by the variable; and

• The lag period selected for incorporating price changes.

For purposes of developing this rebased market basket, the building cost index derived and maintained by the Engineering News-Record (ENR) was selected as the best currently available source of measuring changes in costs of fixed assets. The ENR building index is published monthly by the Bureau of Economic Analysis in its *Survey of Current Business* (Current Business Statistics). This index tabulates surveyed cost changes in 20 cities for three major building categories and three classifications of skilled tradesmen predominantly utilized by the construction industry. ENR assigned aggregate weights to fixed quantities of structured steel, Portland cement and lumber. In the labor component, it calculated an average wage paid to carpenters, bricklayers, and structural ironworkers. The actual weightings were based on the relative importance of the various components in construction that were obtained from a survey of construction authorities. Because the ENR index deals only with the effects of trends in wage rates and material prices, it is considered an appropriate means of updating the fixed asset component of the hospital market basket. (A number of other indexes were reviewed and evaluated for use, including some hospital or health-specific measures. This broad-based index met several criteria. We are continuing research in this area.)

The other element in forecasting price movements of fixed capital involves the selection of a 10-year (40-quarter) moving average of the ENR index. The concept of using current price depreciation as an appropriate indicator of depreciation relies on the notion that actual replacement activity mainly occurs across a proportion of facilities in any given year. Therefore, the introduction of a current price index should be effected on a longer term moving average basis. This has the added benefit of providing less volatility with which hospitals can develop and implement the planning processing. From an economic prospective, a longer term average is felt to be more reflective of the inherent stability of escalation in capital costs.

6. Capital-Related Costs: Depreciation on Moveable Assets:

External Price Variable—Percentage change in the cost of machinery and equipment as measured by the Producer Price Index (SIC code #11) (five-year quarterly moving average).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

Similar concerns to those for fixed assets play a role in establishing an appropriate means of forecasting price movements in moveable assets. However, in this sector, replacement rates tend to be more frequent for various reasons: obsolescence, maintenance costs, and the shorter time span of the useful life assigned to such assets. A five-year (20 quarter) moving average of changes in the cost of machinery and equipment reflects changes in prices for the period in use of much of these assets before replacement. A broad-based index for machinery and equipment was used in the absence of a relevant fixed-weight index of hospital machinery and equipment. A disadvantage in the use of this proxy lies in the fact that rapid technological rate of improvements in medical care equipment may exhibit different price trends than that for other nonmedical furniture and appliances. The overwhelming rate of innovation in this segment of durable goods precludes the formulation of any index that could portray period-to-period changes in costs for health care equipment.

A broad-based index of machinery and equipment was selected to proxy all movable assets of hospitals because it encompasses a wide range of heavy duty electrical and mechanical products. Included in the array of manufactured products are furnaces and ovens, power tools and accessories, pumps and compressors, scales and balances, elevators, and air-conditioning and refrigeration equipment. Many electrical product components are also evaluated within this variable. Of special note, this proxy incorporates x-ray equipment and other testing and measuring instruments, as well as commercial laundry equipment.

Although it was preferable to disaggregate movable assets into distinct functional groupings so that the distinction in price movements could be recognized, there is no up-to-date, reliable fixed weight index for hospital assets available. When the 1977 Input/Output analysis for health sector capital goods is released, it may be possible to construct such an index.

7. Capital-Related Costs: Interest

External Price Variable—Weighted average of percentage change is yield on domestic municipal bonds, *Daily Bond Buyer* (20 bonds) (seven-year quarterly moving average) (85.34 percent) and percentage change in average yield on Moody's AAA corporate bonds (seven-year quarterly moving average) (14.66 percent).

Data Source—For municipal and corporate bonds, U.S. Department of Commerce, Bureau of Economic Analysis, *Survey of Current Business*, Finance Section. BEA publishes the yield on the Thursday nearest the end of the month.

Frequency— For municipal and corporate bonds, weekly.

Long-term debt is contracted over time at interest rates in effect at the time the debt is incurred. The effect of changing long-term interest rates is approximated by a seven-year quarterly weighted moving average of domestic municipal bonds and corporate bonds. To account for any differences that may occur in interest rates for proprietary hospitals, compared to voluntary hospitals, 1982 weights of proprietary interest costs were obtained from unpublished AHA data.

8. Capital-Related Costs: All Other

External Price Variable Percentage change in residential rent as measured by the Consumer Price Index for All Urban Consumers.

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

In addition to depreciation and interest, which predominate the cost of capital, there are several other, relatively minor cost expenditures that may be considered as capital-related. Payments for fire and allied property insurance, leases and rentals, and real estate taxes all fall within this category. A measurement of rental costs would implicitly recognize these related cost factors. Since there exists no commercial rental proxy, residential rental is a reasonable proxy that can, over time, reflect the trend in price movements of the residual capital-related costs.

9. Fuel Oil, Coal, and Other Fuel

External Price Variable—Percentage change in the cost of refined petroleum products as measured by the Producer Price Index (SIC code #057).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

Institutions purchase heating fuel in bulk quantities. Accordingly, price movement of this commodity is appropriately measured at the wholesale level. This proxy incorporates various distillates and grades of fuel oil that are primarily utilized in the heating of plants. Since the cost of refining is included in the price charged for this fuel, use of a proxy reflecting only changes in the cost of crude oil was not considered adequate.

10. Electricity

External Price Variable—Percentage change in the cost of electric power as measured by the Producer Price Index (SIC code #054).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

This proxy includes rates charged to commercial users (40 kw-demand), as well as to industrial users (500 kw-demand). Since the hospital industry is composed of both small and large size plants, its costs will incorporate both of these rate classifications and this cost index is, therefore, considered appropriate.

11. Natural Gas

External Price Variable—Percentage change in the cost of gas fuels as measured by the Producer Price Index (SIC code #0531).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

This proxy measures both domestic and imported costs of various gas fuels including liquified petroleum gas. Purchases by hospitals are generally from a regional gas company which may utilize all types of gas fuel; hence, a broadly-defined index of costs of gas fuels is appropriate.

12. Motor Gasoline

External Price Variable—Percentage change in the cost of gasoline as measured by the Producer Price Index (SIC code #0571).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

Hospitals maintain a fleet of vehicles, including ambulances, and would generally purchase motor fuel at wholesale quantities. This index is composed of all grades of gasoline (regular, unleaded, and premium) used by different classes of vehicles.

13. Water and Sewerage

External Price Variable—Percentage change in the cost of water and sewerage maintenance, as measured by the Consumer Price Index for All Urban Consumers.

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly

Costs for this combined product and service category are generally for purchases from municipal entities or utility companies. There are no data available on cost to preferred commercial users of these services and, thus, the Consumer Price Index for water and sewerage is used to approximate price changes facing hospitals.

14. Malpractice Insurance

External Price Variable—Percentage change in the hospital malpractice insurance component in the AHA Annual Survey (for the period 1966–1976). Set by DHHS in collaboration with AHA from 1977 to 1981. Percentage changes in hospital insurance premium data from the Insurance Services Offices from 1982 through April 1985 and thereafter extrapolated.

Data Source—Unpublished data provided to DHHS by AHA, Office of Research Affairs, and unpublished data from the Insurance Services Offices.

Frequency—For AHA and DHHS estimates and data, annually, and for the Insurance Services Offices data, quarterly.

The costs associated with professional liability in hospitals are difficult to quantify in both cross-section and time-series data. Hospitals may self-insure, pay on a claims-made basis, or purchase professional liability insurance for a fixed or changing level of coverage. Hospitals located in the same area may have varying experience ratings; therefore, premium rates may differ significantly. No national or regional data source currently exists that can quantify precisely the many variations in the cost associated with professional liability in hospitals.

15. Pharmaceuticals

External Price Variable—Percentage change in drugs and pharmaceuticals as measured by the Producer Price Index (SIC code # 063).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, table 23.

Frequency—Monthly.

Hospitals commonly purchase drugs in bulk quantities and, accordingly, the Producer Price Index is an appropriate measure. This category consists of medicinal and chemical preparation, prescription and over-the-counter drugs, and other biological products administered to patients for either diagnostic or therapeutic benefit.

16. Food: Direct Purchases

External Price Variable—Percentage change in the cost of processed foods and feeds, as measured by the Producer Price Index (SIC code # 02).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

Items included under this variable are purchased directly by those hospitals that independently operate their dietary department or certain segments of their dietary service. Purchases tend to be in bulk quantity for both perishable and nonperishable foodstuffs, and prices generally reflect those available at the wholesale price level. Major groups of processed foods measured under this classification include cereal and bakery products, meats, poultry and fish, dairy products, processed fruits and vegetables, beverages, and other

miscellaneous processed foods. Other ingredients utilized in the course of preparing the culinary output, such as oils, shortening and confectionary sweeteners, are also reflected in this index. Since price movements for raw, unprocessed farm products, such as milk and eggs, tend to parallel the price trends for processed foods, it is appropriate to use this index as a proxy for both categories of food purchases.

17. Food: Indirect Purchases

External Price Variable—Percentage change in the cost of food purchased away from home, as measured by the Consumer Price Index for All Urban Consumers (SIC code # 19).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

Much of the hospital industry employs outside contractors to facilitate dietary preparations and service requirements for hospital patients and personnel. As such, it includes the cost of food products, other labor costs and nonlabor costs, such as napkins, flatware and glassware incurred by these contractors. Although a consumer price index is utilized for products typically purchased at a bulk rate, this index is considered relevant in that much of the food inputs provided at food service establishments are generally purchased at the wholesale level, especially by the nationwide chains so prevalent in the restaurant industry today.

18. Chemical and Cleaning Products

External Price Variable—Percentage change in the cost of industrial chemical products, as measured by the Consumer Price Index for All Urban Consumers (SIC code #061).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

The hospital industry consumes a vast variety of chemical products, ranging from organic and norganic solutions and compounds to cleaning agents and hygienic paraphernalia. The variable "Industrial Chemicals" was selected as representatives of all chemical products and derivatives because the more broad-based index of "Chemicals and Allied Products" subsumes to a great extent the surveyed prices for drugs and pharmaceuticals, and for biological products, each of which is categorized and measured elsewhere in this market basket index. Industrial chemicals are comprised of both organic and inorganic solids, liquids, and gases.

19. Surgical and Medical Equipment

External Price Variable—Percentage change in Medical and Surgical Instruments, as measured by the Producer Price Index (SIC code #1562).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

Products and parts used for surgical and medical purposes incorporate a multitude of minor equipment and accessories too low in price to capitalize. This equipment ranges from parts of diagnostic and therapeutic instruments to pacemakers. Since most of these products utilize electronic components, a proxy reflecting a broad diversification of electronic parts and accessories was selected to monitor price movements for this category of costs. Included in the BLS survey under this classification are x-ray equipment and parts, generator parts, batteries and transistors, and a host of intricate mechanisms that are utilized in manufacturing an electronic appliance. Most of these specialized products are generally not available at the consumer level, and the Producerr Price Index proxy is, therefore, indicated.

20. Photographic Supplies

External Price Variable—Percentage change in the cost of photographic supplies, as measured by the Producer Price Index (SIC code #1542).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

A considerable quantity of photographic materials are consumed by the hospital industry, especially in the diagnostic services. Radiology and pathology departments use a variety of photographic apparatus and films. Therefore, it is reasonable to conclude that items under this classification are usually purchased in wholesale lots and changes in prices are best quantified by the Producer Price Index proxy.

21. Rubber and Plastics

External Price Variable—Percentage change in the cost of rubber and plastic products, as measured by the Producer Price Index (SIC code #07).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

The rubber and plastic product category includes a wide array of miscellaneous rubber and plastic products, including rubber gloves, rubber hoses, and disposable plastic products. Among the items measured by this index are rubber clothing and coated fabrics, plastic packaging, and plastic tableware. Purchases are at the wholesale level, and the broad-based Producer Price Index for rubber and plastic products was chosen because it has tended to approximate combined price movements of both components historically.

22. Paper Products

External Price Variable—Percentage change in the cost of converted paper and paperboard products, as measured by the Producer Price Index (SIC code #0615).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

Products measured under this category include printing and office paper goods, disposable garments and tableware, and packaging products. Hospitals are consumers in each of these areas. The proxy chosen encompasses an array of converted paper and paperboard products and various milled paper products, such as tissues and napkins, bags and writing paper.

23. Apparel

External Price Variable—Percentage change in the cost of apparel, as measured by the Producer Price Index (SIC code #361).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

Hospitals are major purchasers of various types of textile goods, including uniforms, gowns, sheets, blankets, pillow cases, towels, and washcloths. This proxy contains an array of men's and women's garments. Since these products tend to be acquired in multiple quantities, the Producer Price Index for apparel is an appropriate variable.

24. Minor Machinery and Equipment

External Price Variable—Percentage change in the cost of machinery and equipment, as measured by the Producer Price Index (SIC code #11).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review*.

Frequency—Monthly.

This category is designed to measure the various types of tools, accessories and parts that are minor in cost and, therefore, not capitalized. A broad-based Producer Price Index for minor machinery and equipment is used to

approximate price movements for this cost category.

25. Miscellaneous Products

External Price Variable—Percentage change in the cost of all finished goods, as measured by the Producer Price Index.

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*

Frequency—Monthly

This residual category is intended to measure a diversified grouping of consumable commodities utilized by the hospital, each of which is considered too small to individually have a measurable impact on price movements within this market basket. Some of these groups are identified as metals and metal products, nonmetallic mineral products, minor transportation equipment and parts, minor furniture and other household durables, photographic equipment, and other consumable products. Since these products are at the finished stage, a Producer Price Index measuring all finished goods is appropriate for such a broad-based grouping.

26. Business Services

External Price Variable—Percentage change in the average hourly earnings of employees engaged in the business services industry, as measured by the Employment and Earnings Index (SIC code #73).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Employment and Earnings.*

Frequency—Monthly.

As is true in the majority of the service industry, the price charged for the various services furnished primarily reflects the salaries and wages paid the employees of each particular firm. Other costs do indeed play a role in setting prices, but the key ingredient, labor-related costs, are predominant. This is also true for the hospital service industry. Therefore, a measurement of changes in average labor costs for a particular service-based industry is an appropriate indicator of the changes in prices charged to clients of those services.

By far, the largest component of services provided to a hospital from external sources, representing over a third of the total, is business services. A broad spectrum of business services purchased by hospitals includes computer programming and data processing, management and consulting services, stenographic services, credit collection, marketing, and numerous other administrative functions. Among the industries surveyed by the Bureau of Labor Statistics and classified under Business Services are those enumerated above, as well as a number of miscellaneous business services such as public relations or protective services. Since computer and data processing services compose a sizable segment on their own, those services were measured and proxied separately from other business services.

27. Computer and Data Processing Services

External Price Variable—Percentage change is the average hourly earnings of employees engaged in firms furnishing computer and data processing services, as measured by the Employment and Earnings Index (SIC Code #737).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Employment and Earnings.*

Frequency—Monthly.

This rapidly growing sector accounts for over 15 percent of all outside services purchased by hospitals. Although many hospitals rely on their internal staff for the day-to-day operations of their information processing needs, those institutions also often obtain the consulting services of firms specializing in the design and implementation of a computerized data-gathering-and-monitoring system. In addition, outside firms are often "on call" in facilitating solutions to any technical problems that may arise or to adopt a particular system to additional or modified uses. Changes in average hourly earnings in the computer and data processing services are an appropriate measure of price movements in this highly labor-intensive industry.

28. Transportation and Shipping

External Price Variable—Percentage change in the transportation component of the Consumer Price Index for All Urban Consumers.

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*

Frequency—Monthly.

This cost category encompasses a diverse group of transportation services utilized by the hospital industry. It includes public transportation services that may be used for business travel and private transportation sources such as ambulance travel for hospital patients. The cost of shipping and motor freight fees are applied to many hospital purchases. Each of these types of transportation costs is embodied in the total transportation component of the Consumer Price Index, which measures both private and public transportation modes. Since shipping fees are basically a function of the cost of maintaining the vehicles used to haul freight, this index is considered appropriate in that it also measures the underlying cost of operating a vehicle such as repairs, insurance fees, motor fuels, finance charges, and other incidentals.

29. Telephone

External Price Variable—Percentage change in the cost of telephone services, as measured by the Consumer Price Index for All Urban Consumers.

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*

Frequency—Monthly.

This component includes charges for both local and long-distance phone calls. In this rapidly changing industry, the cost to the phone companies of furnishing worldwide facilities fundamentally stems from a vast capital infrastructure and the most sophisticated, up-to-date equipment. Since labor-related costs are also accounted for in fixing telephone fees, the Consumer Price Index for telephones is used as the proxy.

30. Blood Services

External Price Variable—Percentage change in the cost of providing blood and related biologicals, as measured by the Producer Price Index (SIC code #063711).

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*

Frequency—Monthly.

Blood supplies are often provided to hospitals from external sources, predominantly from public service agencies. In addition to whole blood products, many derivatives are obtained for specific types of operations. These include plasma, platelets, and other blood components. The index in the Producer Price Index measures both human blood and its derivatives, as well as other biological products, and, as such, is an appropriate measure of price movements.

31. Postage

External Price Variable—Percentage change in the cost of postage, as measured by the Consumer Price Index for All Urban Consumers.

Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*

Frequency—Monthly.

In recent times, many businesses, including the hospital industry, have begun to make use of alternative mail services for either parcel post or express mail. However, the prevalent cost of postage services still appears to be linked to mail transported by the U.S. Postal Service. As such, the index for postage surveyed by the Consumer Price Index is considered an appropriate measure of price movements for this service.

32. All Other Services: Labor-Intensive

External Price Variable—Percentage change in the average employment cost index for all service workers.
Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Employment and Earnings.*
Frequency—Monthly.

The majority of the residual services not measured before are highly labor-intensive and are grouped together for purposes of using the employment cost index for workers engaged in the services sector as a forecast proxy. Some of these individual services purchased by hospitals include miscellaneous repairs, commercial laundry, refuse systems, and general building services.

33. All Other Services: Nonlabor-Intensive

External Price Variable—Percentage change in the all-items component of the Consumer Price Index for All Urban Consumers.
Data Source—U.S. Department of Labor, Bureau of Labor Statistics, *Monthly Labor Review.*
Frequency—Monthly.

The remaining residual services were classified as nonlabor-intensive and included such services as insurance (not capital-related), bank service charges, fees for business and professional associations, and vehicle rentals. In this case, an overall measure for all services covered by the Consumer Price Index is an appropriate indicator.

Appendix B—Regulatory Impact Analysis

A. Introduction

Executive Order 12291 (E.O. 12291) requires us to prepare and publish an initial regulatory impact analysis for any proposed regulations that would be likely to result in: (1) an annual effect on the economy of $100 million or more, (2) a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Several provisions proposed in this document would exceed the $100 million threshold under E.O. 12291. Therefore, we are including an impact analysis that contains a discussion of each significant proposed change.

In addition, for proposed regulations we prepare and publish an initial regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that the regulations would not have a significant economic impact on a substantial number of small entities. Under the RFA, we treat all hospitals as small entities. It is clear that these proposed changes would affect a substantial number of hospitals and the effects on some would be significant. Therefore, we are providing an initial regulatory flexibility analysis.

We are also including in this document a regulatory impact and flexibility analysis of the interim final rule published May 6, 1986 (51 FR 16772) to implement provisions of Pub. L. 99-272 related to operation of the prospective payment system during FY 1986. Due to time constraints, the Director of the Office of Management and Budget waived the requirements of E.O. 12291 for that interim final rule, and the Secretary deferred the preparation of a regulatory flexibility analysis, which is consistent with section 606 of the RFA. We promised in that document to prepare and publish the necessary analyses in conjunction with this proposed rule.

The discussion below, in combination with the rest of this proposed rule, constitutes a combined regulatory impact analysis and regulatory flexibility analysis meeting the requirements of E.O. 12291 and the RFA.

B. Objectives

We expect these proposed changes to further our original objectives in implementing the prospective payment system. The prospective payment rates create incentives similar to the incentives a hospital would face in pricing and marketing its services in a conventional market. By paying all hospitals the same market-like rate for like services, we let hospitals know in advance the amount they will be paid per discharge. We give them both an opportunity to receive this payment regardless of their specific cost experience, and a strong incentive to operate more efficiently, minimizing unnecessary costs. Unlike a cost limitation approach, which achieves savings largely by disallowing Medicare payment for costs in excess of a specific limit, the prospective payment system achieves savings by intensifying hospitals' incentives to operate efficiently. Thus, our objectves include—

- Restructuring hospitals' economic incentives;
- Basing payment on a system that identifies the product being purchased more accurately than cost reimbursement;
- Reinforcing the role of the Federal government as a prudent buyer of services; and
- Restraining the rate of hospital cost increases, thus moderating the outflow of expenditures from the Medicare trust fund, while maintaining high quality care.

In addition, we share national goals of deficit reduction and restraints on government spending in general. We believe these proposals will further all of our goals while maintaining the financial viability of the hospital industry and assuring access to high quality care for beneficiaries.

We expect these proposed changes to further those objectives while avoiding or minimizing unintended adverse consequences and ensuring that the outcomes of this payment system are, in general, reasonable and equitable. Thus, the intent is to refine further the prospective payment system without undercutting our objectves.

C. Problems of Impact Quantification and Attributing Causality

In preparing previously published interim, proposed, and final rules concerned with the prospective payment system, we have used the best data available to analyze the rules and their implementing procedures. Moreover, since the beginning of the prospective payment system, we have developed increasingly sophisticated models of how the prospective payment system works. Nonetheless, at present, we still have no adequate way to model potential behavioral changes on the part of hospitals, hospital managers and employees, physicians, suppliers, or beneficiaries. Further, changes in the private sector, such as changes in the ways that employers finance and control health benefits, interact with the behavioral incentives created by the Medicare payment system. We do not have the capability to model such interactions.

We continue to study many aspects of the prospective payment system with the intent of obtaining more adequate data for the purpose of better

quantifying the effects of behavioral changes caused by the payment system. Examples of these initiatives include various reports to Congress, as required by section 609 of Pub. L. 98–21 and sections 9113 and 9114 of Pub. L. 99–272. These studies will examine many issues, including the feasibility and impact of eliminating or phasing out separate urban and rural DRG prospective payment rates, the feasibility and desirability of applying the payment methodology to payment by all payors for inpatient hospital services, and the impact of outlier and transfer policies on rural hospitals. We are also required, under section 609(a)(2)(A) of Pub. L. 98–21, to study and report annually to the Congress on the impact of the prospective payment system. In addition to these initiatives, we and others (such as the hospital industry) have undertaken a variety of studies on the effects of the prospective payment system, such as examining selected aspects of hospital management behavior under the prospective payment system, to be able to predict better certain effects and outcomes from the system.

Nonetheless, we are limited in our ability to attribute the causation of particular changes in the hospital industry directly to particular regulations. This is made particularly difficult by the changing nature of the health care sector, and the nature of the prospective payment system itself. The prospective payment system is but one of numerous efforts aimed at controlling rapidly rising health care costs. In many cases, then, it may be difficult to determine the extent to which the prospective payment system, or some other initiative, caused the result, or whether two (or more) initiatives caused the result interactively. Further, the prospective payment system itself is interactive and it is sometimes difficult to isolate the effects, within the system, of a particular change of policy or procedure.

Apart from the more easily identifiable initiatives that are affecting the health care market, especially on the demand side, changes also have been occurring on the supply side. Most notable of these changes is the increase in the supply of physicians, which enhances the competition for patients among providers. There also has been significant growth of facilities furnishing out-of-hospital treatment and of health maintenance organizations (HMOs). In addition, home health services are the fastest growing component of the Medicare program.

In view of the problems we have experienced in quantifying impacts and attributing causality, we believe that the approach we are taking in the specific impact discussions below is the most feasible one. In some cases we have included quantitative estimates of program savings or anticipated changes in payment levels. However, since it is not possible to develop a reliable quantitative analysis and comparison of the costs and benefits of all the provisions to the various affected parties, we have primarily focused on explaining the kinds of interactions and the decisions that these parties will have to consider. As with previous impact analyses, we are soliciting comments and information about the anticipated effects of these proposed changes to the prospective payment system.

D. Basis and Methodology of Estimates

Much of the available Medicare program data still reflect patterns and trends of utilization and payment under cost reimbursement. Where it is feasible and appropriate, we have used these data to model and analyze the effects of particular proposals. However, the quantitative estimats given below should be received with a qualified recognition of the limitations of the data on which they are based. Moreover, from October 1, 1985, through April 30, 1986, the prospective payment system was operating under legislative constraints that we had not expected; further, the inclusion of capital-related costs and implementation of changes required under Pub. L. 99–272 have made the task of modeling more complex. Our analysis is also made more difficult by the necessity to consider and present separately the impacts associated with the interim final rule published May 6, 1986.

Interactive effects, the recent legislative freeze, and the phasing in of different facilities (and sometimes areas) on different schedules compel us to be tentative. In particular, we must point out that as yet we have only incomplete data on the effect on hospital-specific costs per case of the change in the cost report allocation sequence for teaching hospitals in New York State. Thus, any estimates below, especially those reflecting regional rates for the Mid-Atlantic region, must be viewed as approximate.

Because this analysis includes a discussion of the May 6, 1986 final rule as well as provisions of this proposed rule, and because the provisions of Pub. L. 99–272 created certain analytic problems through extension of the transition period (with the Oregon exception) and requirements to restandardize the FY 1987 rates, we have had to consider carefully what baseline we would use to assess the relative impacts of the various provisions of this proposed rule. In previous impact analyses, we have simply used projected payments for the fiscal year preceding the year for which we were setting rates as the baseline, and represented the impact of specific provisions relative to the projected percent change in total payments.

As a result of the enactment of Pub. L. 99–272, however, for FY 1986 payments have been made on two distinct bases. Thus, we had a choice: we could use FY 1985 rates (that is, the rates actually paid during the first seven months of FY 1986), or the FY 1986 payment rates (that is, those paid during the period May 1, 1986 through September 30, 1986) as a baseline.

We decided to use the payment parameters in effect for the seven-month period from October 1, 1985 to April 30, 1986 as our initial baseline. Because of statutory postponements in implementing the September 3, 1985 rule, the rates paid during the first seven months of FY 1986 reflect the FY 1985 payment rates. Thus, the following discussion of the provisions of the interim final rule published May 6, 1986 compares payments for the baseline period to the May to September FY 1986 payments. The FY 1986 payments in effect from May through September 1986 are then used as the baseline for FY 1987 impact assessments of the provisions of this proposed rule. To ensure comparability, we assumed that all payment periods and payment parameters used in the comparisions were in effect for a full twelve months.

Generally, to assess the effect of a specific provision, we have treated all hospitals in our database as if they had the same cost reporting period; that is, a cost reporting period coinciding with the Federal fiscal year. In some instances, however, we want to reflect the effects of hospitals' phasing in on different schedules. Those instances, such as the estimates of payment per case, are clearly identified below. Our model does not take into account any prospective behavioral changes in response to these proposals.

E. Hospitals Included In and Excluded From the Prospective Payment System

Since October 1983, hospitals operating under prospective payment have been phasing into the system according to their own accounting year starting dates. Further, since September 1985, both Massachusetts and New York

have discontinued their waivers, and hospitals in those States have entered the prospective payment system. As of January 1, 1986, about 5700 hospitals (94 percent of all Medicare-participating hospitals) were operating under the prospective payment system. Only 169 hospitals remain excluded from the prospective payment system because of waivers (New Jersey and Maryland) or demonstrations (Rochester and Finger Lakes regions of New York State).

As of January 1, 1986, 739 Medicare hospitals were excluded from the prospective payment system and continue to be paid on the basis of reasonable cost reimbursement, subject to hospital-specific limits on the rate of their cost increases. Examples of these hospitals include psychiatric, rehabilitation, alcohol/drug, long-term, and children's hospitals. Another 1,598 psychiatric, rehabilitation and alcohol/drug units, in hospitals included in the prospective payment system, are excluded from prospective payment as of the same date. These units, too, are paid on the basis of reasonable cost reimbursement, subject to hospital-specific limits on the rate of their cost increases.

More than four hundred hospitals are being paid on various special bases under the prospective payment system, as required by statute. They include hospitals accorded special treatment as described in our regulations at 42 CFR Part 412, Subpart G, such as sole community hospitals, and cancer treatment and research hospitals. Also included in this group receiving payment on special bases are referral centers and hospitals that previously allowed extensive direct billing under Part B of Medicare.

F. Implementation of Certain Provisions of COBRA

1. General Discussion

On May 6, 1986, we published an interim final rule with comment period (51 FR 16772) implementing certain provisions of Pub. L. 99-272 that affected operation of the prospective payment system during FY 1986, as well as subsequent years. Although these statutory provisions generally afforded us little administrative discretion, we promised to prepare an analysis of the impact of implementation of those provisions and publish it in conjunction with this proposed rule.

2. Statutory Increase in Payment Rates

The final rule we published on September 3, 1985 would not have increased payment rates under the prospective payment system for FY 1986. However, as a result of Pub. L. 99-272—

- For prospective payment hospitals, the update to the adjusted standardized rates of one-half of one percent is effective for discharges occurring on or after May 1, 1986. The hospital-specific rates are increased by zero percent for discharges occurring during the first seven months of a hospital's cost reporting period beginning in FY 1986 and by one-half of one percent for discharges occurring during the remaining five months of that cost reporting period.
- For hospitals excluded from the prospective payment system, the hospital's target amount for cost reporting periods beginning in FY 1986 is the previous year's target amount increased by five-twenty-fourths of one percent (that is, an increase of one-half of one percent for five months of the 12-month cost reporting period).
- For purposes of determining update percentages for discharges occurring on or after October 1, 1986 or cost reporting periods beginning on or after October 1, 1986, as appropriate, the applicable percentage increase for both prospective payment hospitals and excluded hospitals, for discharges occurring in FY 1986 or cost reporting periods beginning in FY 1986, as appropriate, is deemed to have been one-half of one percent throughout the applicable period.

We estimate that these increases will result in increased payments to hospitals of $35 million in FY 1986 and $210 million in FY 1987. Excluded hospitals and units account for a small proportion of total inpatient hospital expenditures, and would receive, in the aggregate, less than $2 million more in cost reporting periods beginning in FY 1986.

Hospitals under the prospective payment system will benefit by a direct increase in payment rates. Because the increase is a simple percentage increase, hospitals that already received high payment amounts, on the average, based on their wage indexes and case mix, would receive higher dollar increases than hospitals that receive lower average payments.

Excluded hospitals and units will benefit from increased target amounts in different ways, depending on the change in the relationship of their average costs per case to their new target amounts. Hospitals that would have had costs per case under their target amounts before the increase will benefit from larger incentive payments (that is, payments in excess of cost under § 405.463(d)(2)). Hospitals that have costs greater than their target amounts even with the increase nonetheless will benefit from increased reimbursement. A few hospitals that might otherwise have experienced target amount payments slightly less than their cost per case may actually receive small incentive payments, instead. However, because the increase in the target amount is relatively small, such cases would be rare.

3. No Retroactive Application of the HCFA Adjusted Gross Wage Index

For purposes of determining the prospective payments to hospitals in FY 1984 and FY 1985, we used calendar year 1981 hospital wage and employment data obtained from the Bureau of Labor Statistics' (BLS's) ES 202 Employment, Wages and Contributions file for hospital workers to construct the wage index. However, the September 3, 1985 final rule set forth a revised hospital wage index that is based on an HCFA survey of hospital gross hourly wage and salary data. This wage index was developed in an attempt to overcome the limitation of the BLS data with regard to full-time and part-time employment.

This revised wage index was not implemented because of the provisions of the Emergency Extension Act of 1985 (Pub. L. 99-107) and the succeeding amendments to that Act. Section 9103(a) of Pub. L. 99-272 specifies that, for discharges occurring on or after May 1, 1986, prospective payments to hospitals are to be adjusted to reflect the changes made in the September 3, 1985 final rule relating to the hospital wage index. The retroactive application of the revised wage index to cost reporting periods beginning on or after October 1, 1983 is repealed.

In May the 6, 1986 rule, we made adjustments to the wage index published in the September 3, 1985 final rule to correct data errors. On the whole, the effect of these corrections was slight, especially in comparison with the effect of the repeal of retroactive application of the revised wage index.

As shown in the impact analysis of the September 3, 1985 final rule (50 FR 35757), the aggregate effect of retroactive application of the revised wage index would have been a 0.11 percent reduction in FY 1986 payments. However, as a result of the repeal of the retroactivity provision, there will be no such reduction.

4. Extension of the Transition Period

Section 9102 of Pub. L. 99-272 extended the prospective payment

system transition period by making the following changes:

• *Hospital-specific/Federal blend.* For cost reporting periods beginning on or after October 1, 1985 and before October 1, 1988, the blend of hospital-specific and Federal portions is 50 percent hospital-specific and 50 percent Federal for the first seven months of the cost reporting period and 45 percent hospital-specific and 55 percent Federal for the remaining five months of the cost reporting period. For cost reporting periods beginning in FY 1987, the blend is 25 percent hospital-specific and 75 percent Federal. Starting with cost reporting periods beginning in FY 1988, the payment rate is based exclusively on the Federal portion.

• *Regional/National Blend of Federal Rate.* For discharges occurring in FY 1986, the Federal portion is made up of 25 percent national and 75 percent regional. For discharges occurring in FY 1987, the combined rate is 50 percent national and 50 percent regional. The Federal portion is based exclusively on the national rate beginning in FY 1988.

Further, under the provisions set forth in section 9102(d)(4) of Pub. L. 99–272, all hospitals subject to the prospective payment system that are located in the State of Oregon are excepted from the changes made to the transition period by the preceding paragraphs of section 9102 of Pub. L. 99–272. Section 9102(d)(4) of Pub. L. 99–272 further specifies that for those hospitals located in Oregon, the following applies:

• *Hospital-specific/Federal blend for Oregon.* Section 9102(d)(4)(B) states that for the first seven months of a cost reporting period beginning in FY 1986, the payment rate consists of a blend of 50 percent of the hospital-specific rate and 50 percent of the Federal rate. For the remaining five months of a cost reporting period beginning in FY 1986, the blend is 25 percent of the hospital-specific rate and 75 percent of the Federal rate. For cost reporting periods beginning on or after October 1, 1986, the payment rate is comprised solely of the Federal rate.

• *Regional/National blend of Federal rate for Oregon.* For discharges occurring on or after October 1, 1985 and before May 1, 1986, the Federal rate consists of 75 percent of the regional rate and 25 percent of the national rate. For discharges occurring on or after May 1, 1986 and before October 1, 1987, the Federal rate consists of 50 percent of the regional rate and 50 percent of the national rate. For discharges occurring on or after October 1, 1986, the Federal rate is comprised solely of the national rate.

Thus, despite the delay of implementation of the September 3, 1985 final rule, Oregon hospitals will make the transition to a fully national Federal rate at the same time all hospitals would have, had the transition not been extended.

As discussed above in section D. of this analysis, to assess the impact of the revised transition provisions, we had to determine what to use as a baseline. We decided to use the seven-month period from October 1, 1985 to April 30, 1986, annualized to ensure comparability, as the main baseline. Thus, we have compared payment levels for the May 1, 1986 to September 30, 1986 period to that baseline. (See section L. of this impact analysis for the comparable discussion of FY 1987 payment rates.)

The Pub. L. 99–272 changes in blending of hospital-specific and Federal rates, and of national and regional portions of the Federal rates (including the special provisions for Oregon), affect payments to different categories of hospitals differently. The following table illustrates the magnitude of the effect on selected categories of hospitals.

TABLE I.—IMPACT OF PUB. L. 99–272 TRANSITION CHANGES ON PAYMENTS FOR THE PERIOD MAY 1, 1986 TO SEPTEMBER 30, 1986

Category of hospitals	Annualized percent changes in total payments
All Hospitals	0.17
Urban Hospitals	0.19
0–99 beds	0.74
100–404 beds	0.13
405–864 beds	0.23
865+ beds	0.14
Rural Hospital	0.06
0–99 beds	0.07
100–149 beds	−0.12
150+ beds	0.20
By Census Region:	
New England	0.28
Mid Atlantic	0.36
South Atlantic	0.18
East North Central	0.17
East South Central	0.08
West North Central	−0.10
West South Central	−0.07
Mountain	0.11
Pacific	0.32
—Oregon	3.24

5. Additional Payments to Hospitals Serving a Disproportionate Share of Low-Income Patients

Section 9105 of Pub. L. 99–272 added a new section 1886(d)(5)(F) to the Act requiring additional payment for hospitals that serve a disproportionate share of low-income patients. For discharges occurring on or after May 1, 1986 and before October 1, 1988, an additional payment must be made for each prospective payment hospital that meets one of the following criteria:

• During the hospital's cost reporting period, the hospital has a disproportionate patient percentage that is at least equal to—

—15 percent if the hospital is located in an urban area and has 100 or more beds;

—40 percent, if the hospital is located in an urban area and has fewer than 100 beds; or

—45 percent, if the hospital is located in a rural area.

• The hospital is located in an urban area, has 100 or more bed, and can demonstrate that, during its cost reporting period, more than 30 percent of its total inpatient care revenues is derived from State and local government payments for indigent care furnished to patients not covered by Medicare or Medicaid.

For purposes of meeting the latter criterion, it is incumbent upon a hospital to demonstrate that more than 30 percent of its total inpatient care revenues are from State and local government sources and that these revenues are specifically earmarked for the care of indigents (that is, none of that money may be used for any purpose other than indigent care). The following are among the types of care that are not to be included by the hospital as indigent care:

• Free care furnished to satisfy the hospital's Hill-Burton obligation.

• Free care or care furnished at reduced rates made available by the hospital to its employees or by a government hospital to any category of public employees.

• Funds furnished to the hospital to cover general operating deficits.

The disproportionate patient percentage used in the first criterion described above is the sum, expressed as a percentage, of the following two fractions.

1. Patient days of those patients entitled to both Medicare Part A and Supplemental Security Income (SSI) (excluding those patients receiving State supplementation only)

   Patient days of those patients entitled to Medicare Part A

2. Patient days of those patients entitled to Medicaid but not to Medicare Part A

   Total number of patient days

The method of computing a hospital's disproportionate patient percentage and the process for making payments to hospitals that serve a disproportionate share of low-income patients are discussed in detail in the May 6, 1986 rule (51 FR 16777).

The additional payment adjustment for hospitals that meet the

disproportionate patient percentage criterion is determined as follows:

- For urban hospitals with 100 or more beds, the hospital's total DRG revenue (as defined below) is increased by 2.5 percent plus one-half the difference between the hospital's percentage of low-income patients and 15 percent, up to a maximum of 15 percent; that is, the disproportionate share adjustment factor is the lesser of 15 percent or (P−.15)(.5)+.025, where P equals the hospital's disproportionate patient percentage expressed as a decimal.
- For urban hospitals with fewer than 100 beds, the hospital's total DRG revenue is increased by five percent.
- For rural hospitals, the hospital's total DRG revenue is increased by four percent.

For a hospital that meets the definition of a disproportionate share hospital based on the indigent care revenue criterion, the payment adjustment is determined by increasing the hospital's total DRG revenue by 15 percent. A hospital's total DRG revenue is the revenue based on DRG-adjusted prospective payment rates (for transition period payments, the Federal portion of the hospital's payment rates) including outlier payments but excluding any other additional payments such as the indirect medical education payment.

Between 900 and 1200 hospitals may qualify for these payments. The large majority, probably at least 700, are expected to be urban hospitals with more than 100 beds. Nonetheless, we expect between 170 and 200 rural hospitals to receive some additional payment under this provision.

We estimate that this will result in additional payments of $200 million to qualifying hospitals for the period May 1, 1986 to September 30, 1986. For FYs 1987 and 1988, we estimate that additional payments to qualifying hospitals will be $600 million and $825 million, respectively. This will not result in an overall increase in Medicare program expenditures for the latter two fiscal years, since the Federal rates for all hospitals will be adjusted to remove the effects of the estimated additional payments, as discussed in section II.A.1.e. of the Addendum to this proposed rule. See section L. of this impact analysis for the effects of that adjustment on the FY 1987 payment rates.

6. Paymnt for the Indirect Costs of Medical Education

Because the indirect costs of medical education are defined in terms of increased operating costs, they are not separately identifiable on the cost report or in other financial or accounting records. Rather, these incremental costs have been statistically estimated as a function of teaching intensity, and a proxy measure (the hospital's ratio of the number of interns and residents to the number of beds) has been used to measure teaching intensity. The coefficient describing this statistical relationship has been expressed as a percentage and applied as the indirect medical education adjustment factor.

Section 9104(a) of Pub. L. 99-272 reduced the education adjustment factor used to determine the indirect medical education payment from 11.59 percent to approximately 8.1 percent for discharges occurring on or after May 1, 1986 and before October 1, 1986. For discharges occurring on or after October 1, 1986, the adjustment factor is equal to approximately 8.7 percent. In addition to being reduced, the adjustment factor is no longer applied on a linear basis, but rather on a curvilinear or variable basis. An adjustment made on a curvilinear basis reflects a nonlinear cost relationship; that is each absolute increment in a hospital's ratio of interns and residents to beds does not result in an equal proportional increase in costs. Therefore, the adjustment factors are only approximately 8.1 percent and 8.7 percent.

For discharges occurring on or after May 1, 1986 and before October 1, 1986, the indirect medical education factor equals the following:

$$2\times\left[\left(\frac{1+\text{interns and residents}}{\text{beds}}\right)^{.405}-1\right]$$

For discharges occurring on or after October 1, 1986, that factor equals the following:

$$1.5\times\left[\left(\frac{1+\text{interns and residents}}{\text{beds}}\right)^{.4755}-1\right]$$

We estimate that implementation of section 9104(a) of Pub. L. 99-272 will result in savings as follows:

Fiscal years	Savings (in millions)
1986	−$175
1987	−630
1988	−910
1989	−1,135
1990	−1,245
1991	−1,365

The savings for FY 1986 are for the period May 1, 1986 to September 30, 1986.

We analyzed the effect that the approximately 30 percent reduction in the education adjustment factor would have on both indirect medical education payments and total payments for teaching hospitals by comparing their annualized payment levels, for the period October 1, 1985 through April 30, 1986 to the new levels, also expressed on an annual basis. Because of the adoption of the required curvilinear method of computation, for most groups of hospitals the effective reduction of the amount of teaching payments was greater than the percent reduction in the teaching adjustment factor, as illustrated by Table II.

TABLE II.—ESTIMATED PERCENT REDUCTION IN TEACHING PAYMENTS [1] FOR THE PERIOD MAY 1, 1986, TO SEPTEMBER 30, 1986

Category of hospitals	Annualized percent change in teaching payments [2]
All Hospitals	−35.9
Urban Hospitals	−35.3
0-99 beds	−33.5
100-404 beds	−35.0
405-684	−36.0
685 + beds	−36.8
Rural Hospital	−34.6
0-99 beds	−32.2
100-169 beds	−31.9
170 + beds	−34.8
By Census Region:	
New England	−36.3
Mid Atlantic	−35.4
South Atlantic	−36.2
East North Central	−34.5
East South Central	−33.4
West North Central	−34.9
West South Central	−34.5
Mountain	−35.7
Pacific	−36.5
Teaching Status:	
Non-Teaching	0.0
Resident/Bed Ratio Less than 0.25	−32.7
Resident/Bed Ratio Greater than 0.25	−37.7
Disproportionate Share Hospitals (DHS):	
No Additional Payments	−34.8
Urban DSH less than 100 beds	−36.6
Urban DSH 100 beds or more	−34.7
Rural DSH	−30.7

[1] "Teaching payments" refers to payments under the adjustment for the indirect cost of medical education. See 42 CFR 412.118.

[2] This reflects the estimated proportional difference in total dollar payments for all teaching hospitals in each category, because teaching payments are made only in relation to the Federal portion of the prospective payment rate, and because the Federal portion increased from 50 percent to 55 percent between these two periods, the actual dollar decrease for all hospitals in the aggregate will be less than suggested by these percent changes.

As would be expected, the greatest proportional reduction in payments for the indirect costs of medical education would be experienced by teaching hospitals with high resident-to-bed ratios. Hospitals with resident-to-bed ratios of less than 0.25 are expected to experience, on the average, the equivalent of a 1.48 percent annual reduction in total payments. Hospitals with heavier teaching involvement (that is, hospitals with resident-to-bed ratios equal to or greater than 0.25) will experience, on the average, the equivalent of a 0.47 percent annual

decrease in total payments for the same period.

7. Payment for Indirect Medical Education Costs of Certain Clinics.

Section 602(k) of Pub. L. 98–21, the public law that established the prospective payment system, authorizes waiver of the statutory requirement that nonphysician services be furnished either directly or under arrangement in the case of a hospital that had followed a practice of direct billing under Medicare Part B so extensively that immediate compliance with these requirements would threaten the stability of patient care.

Section 602(k) of Pub. L. 98–21 also requires that we reduce the Medicare Part A payment to hospitals that have such waivers for the amount of Part B billings for nonphysician services furnished to the hospital's inpatients. Therefore, payments for inpatient services are reduced to take into account 100 percent of the reasonable charges (before application of the Medicare Part B deductible and coinsurance amounts) for nonphysician services furnished by an outside supplier.

Generally, a hospital's indirect medical education payment is determined on the basis of the total DRG revenue based on the Federal rates received by the hospital. The DRG revenue received by hospitals that qualify for a waiver does not include the Part B reasonable charges for nonphysician services furnished by an outside supplier. Therefore, our policy for determining the amount of the indirect medical education payment for a hospital that has a waiver has been to base the payment on the DRG revenue based on Federal rates after it has been reduced for Part B billing.

Section 9112(a) of Pub. L. 99–272 amended section 602(k) of Pub. L. 98–21 by adding a provision that specifies that the indirect medical education payment for hospitals that have a waiver is to be computed as if the hospital were receiving under Part A all the payments that were made under Part B because of the waiver. That is, a hospital with a waiver under section 602(k) of Pub. L. 98–21 is treated as if the waiver is not in effect for purposes of computing the additional payment for the indirect costs of medical education. Section 9112(b) of Pub. L. 99–272 specifies that this amendment is effective for cost reporting periods beginning on or after January 1, 1986.

In addition, section 9112(a) of Pub. L. 99–272 amended section 602(k) of Pub. L. 98–21 to specify that, effective April 17, 1986, Part A services billed under Part B under a waiver will be paid at 100 percent of the reasonable charge (or other applicable basis of payment), and that in order to retain its waiver, the hospital must ensure that the supplier that bills for the services accepts this payment as payment in full (that is, the beneficiary is not responsible for payment of the coinsurance, or for any amount in excess of the reasonable charge (or other applicable basis for payment)). In section 9112 of Pub. L. 99–272, Congress specifically stated that payment for Part A services billed under Part B is equal to 100 percent of the reasonable charge and that the entity furnishing the services must accept *this amount* as the full charge. For administrative simplicity, we will not apply the deductible to these payments.

Only 4 hospitals currently have waivers under 602(k). Further, the Secretary's authority under section 602(k) to waive those requirements specified in the Act does not extend to cost reporting periods beginning on or after October 1, 1986. As a result, in terms of overall Medicare expenditures, costs or savings resulting from these time-limited changes are negligible. Nonetheless, hospitals with a 602(k) waiver will experience a significant benefit from increased payments for the indirect cost of medical education. On the other hand, the outside suppliers furnishing services through some waiver hospitals will have to forego billing beneficiaries for charges in excess of Medicare reasonable charges. We expect that this time-limited requirement will not be so costly that affected hospitals will relinquish their waivers.

8. Cumulative and Interactive Effects

Because each of the several changes discussed above may affect a given hospital in different ways, we have analyzed the separate and combined effects of certain of them on selected categories of hospitals. The comparisons we made are based on the percent change in estimated annualized total payments for the periods October 1, 1985 to April 30, 1986, and May 1, 1986 to September 30, 1986. Table III, below, shows the comparative effect of implementation of certain provisions of Pub. L. 99–272, assuming that all hospitals phased into the system on the same schedule, on a Federal fiscal year basis. Note that the column titled "Total Combined Effects" reflects the use of the HCFA survey-based wage index and the 0.50 percent increase to standardized amounts and hospital-specific rates, as well as all the factors included in the separately identified columns.

BILLING CODE 4120-01-C

We also analyzed the effect these changes, as a whole, made on the average payment per case for operating costs (excluding capital). To do this, we modeled each hospital's total operating payments according to its own fiscal year. These payments again were compared for two annualized periods: the baseline used the FY 1985 payment parameters in effect for the 7-month period from October 1985 through April 1986, and the comparison period used the payment parameters established under Pub. L. 99-272. Payments included additional payment for the costs of indirect medical education and disproportionate share payments, but excluded payments for capital-related costs, the direct costs of medical education, and other pass-through costs. The results are shown in Table VI., in section L. of this impact analysis, along with projected average payments per case for FY 1987.

G. Referral Center Criteria

There are currently 187 rural referral centers and one urban referral center. Those that qualified for referral center status in FY 1984 must requalify in FY 1987, for a new three-year period to begin in FY 1988, or lose their referral center status. The bulk of referral centers qualified during FY 1985, and will not have to requalify for a new three-year period until FY 1988.

The proposed criteria may enable some hospitals that could not meet the earlier discharge criteria to qualify in FY 1987. Under the specific criteria set forth in section 9106(a) of Pub. L. 99-272, we expect a small number of osteopathic hospitals to qualify, perhaps as few as two. Since hospitals in Massachusetts and New York State entered the prospective payment system only recently, we also expect some additional hospitals from those States to qualify for referral center status.

The initial qualification criteria for referral centers that qualified in FY 1984 included only hospitals with 500 beds or more. For the most part, those centers have met the qualifying criteria for at least two years since FY 1984, and should requalify in FY 1987. The proposed revision to the discharge criteria would minimize the possibility that a hospital would fail to requalify because of that criterion. A hospital would have to have qualified on the basis of the 6000 discharges criterion (or the regional urban median) and have experienced a greater than average decline in discharges to fail to requalify solely on the basis of that criterioon. Some hospitals may not be able to meet the proposed case-mix requirement. However, we believe these requirements are set at appropriate levels and are crucial to identifying those hospitals that truly function in a referral capacity.

H. Excluded Hospitals and Units

1. Target Amount Updates

As noted above, 738 Medicare hospitals and 1,598 units in hospitals included in the prospective payment system currently are paid on a reasonable cost basis subject to the rate-of-increase ceiling requirement of § 405.463. For cost reporting periods beginning in FY 1987, these hospitals would have a target amount equal to the 0.5 percent greater than the target amount for its previous cost reporting period. That is, the FY 1986 cost reporting period target amount, which was equal to the FY 1985 target amount increased by five-twenty-fourths of a percent in accordance with section 9101 of Pub. L. 99-272, would be multiplied by 1.005. As a result, excluded hospitals and units would be paid, in the aggregate, somewhat more than they would have been paid if the target amount included in the September 3, 1985 final rule had been implemented and carried forward for FY 1987.

The effect this would have on affected hospitals and units would vary depending on each one's existing relationship of costs per discharge to its target amount, and the relative gains in productivity (efficiency) the hospital or unit is able to achieve. For hospitals and units that achieve per discharge costs lower than their target amounts, the primary impact would be to affect the level of additional payments made under § 405.463(d)(2) proportional to the hospital's increase or decrease in per-discharge costs.

In general, we expect the increased ceiling on payments would maintain existing incentives for economy and efficiency experienced by excluded hospitals and units. We do not believe that these limits would achieve incentives comparable to those produced by the prospective payment system. Therefore, we will, as required under the law, continue to study means for establishing an appropriate prospective payment methodology for those hospitals and units that are currently excluded from the prospective payment system. Nontheless, we believe the proposed target amount level would ensure that services furnished to beneficiaries by affected hospitals and units would, for the most part, be paid for at a level no higher than necessary for the efficient delivery of needed health services.

2. Alcohol/Drug Hospitals and Units

In the September 3, 1985 final rule we extended the exclusion of alcohol/drug hospitals and units from the prospective payment system for an additional year (50 FR 35669). As of March 1986, there were 26 excluded alcohol/drug hospitals and 355 excluded units in PPS hospitals included in the prospective payment system. In June 1985, there were 23 hospitals and 317 units. Thus, there has been some increase in numbers over the additional extension period.

We do not expect that the further extension of this exclusion for one more year would result in a substantial increase in the number of participating alcohol/drug hospitals and units. Our study of the potential effects of the new DRGs proposed for these services is incomplete. Thus, we cannot predict the effect of bringing these hospitals and units under the prospective payment system.

I. DRG Classification Changes

Because we have attempted to respond as fully as possible to ProPAC's recommendations regarding DRG classification changes in addition to those we proposed on March 13, 1986, we have not yet modified the GROUPER program. Thus, we are unable to regroup claims in order to assess the impact of the proposed classification changes included in this proposed rule. We do not, however, expect the changes we are proposing for DRG classification to have a substantial impact on payment to any particular category of hospital, except possibly those hospitals specializing in treating cases that fall in affected DRGs.

The proposed DRG classification changes are intended to foster greater homogeneity within each DRG, or, when that is not possible, to ensure that the structure of a DRG is such that payment for the average case does not systematically advantage one group of hospitals at the expense of another. Because we evaluate the appropriateness of DRG classification changes in the aggregate, from the perspective of their ability to better explain variation in resource use across cases, and because most DRGs are defined broadly enough so that there is little concentration of cases in a given DRG among hospitals, we do not believe that an analysis of the economic impact of our proposed classification changes would reveal anything other than coincidental effects, particularly given the level of aggregation we generally work at.

J. Elimination of PIP

Approximately 3290 hospitals currently receive payments under the PIP method and would be affected by the proposal to eliminate PIP for discharges on or after July 1, 1987.

As a result of PIP, payments to PIP hospitals have been delayed less than reimbursement for non-PIP hospitals. Therefore, PIP hospitals have had a cash flow advantage over non-PIP hospitals. As a result of the elimination of PIP, the payment delay for hospitals presently under PIP could come to equal the current delay for current non-PIP hospitals. If this were to occur, our Medicare program outlays (as distinct from incurred expenditures) would be temporarily reduced. However, we anticipate that elimination of PIP would give current PIP hospitals incentives to speed up their billing process. Presently they have little incentive to speed up billing, or even to reduce any error rate, because timely payment is assured.

We anticipate that, in response to elimination of PIP, a hospital that does not currently file electronic media claims (EMC) would look at its own billing cycles and decide whether or not to bill through EMC. We expect that most hospitals have computer systems with the capability to submit claims electronically to the intermediary. At the present time our data show that 50 percent of all hospitals submit EMCs. We believe that the elimination of PIP would provide an incentive for more hospitals to convert to electronic claims.

For a hospital paid on a bill basis, billing errors may mean significant delay of payment. EMCs are prepared more easily by the hospital, with fewer errors than hardcopy claims. Additionally, EMCs are automatically entered into the intermediary's system, while hard copy bills must be individually typed. While data regarding average processing time under each method are not available, we believe that, in the absence of PIP, increased EMC could result in more rapid payment than under individual hard copy billing for some hospitals.

Hospitals with large numbers of patients with stays of 45 days and over may be slightly disadvantaged because only one interim payment per discharge would be allowed. Those hospitals having patients with unusually long lengths-of-stay may be slightly more disadvantaged if they have large numbers of patients falling between the end of the hospital's billing cycle and up to 45 days. We expect that the special interim payment for cases extending beyond 45 days would ease the impact of this proposal. However, this would apply only to payment for certain high-cost cases.

Monitoring and recomputation requirements under PIP, which occur not less often than quarterly, would be eliminated, as well as adjustment for PIP interim billing at cost settlement. Hence, we expect some administrative efficiencies. The data are not available to estimate the personpower and systems savings related to this activity.

K. Impact of Capital-Related Prospective Payments

1. Background

Section 601(a)2 of Pub. L. 98–21 and section 9107 of Pub. L. 99–272 authorize the Secretary to include, as hospital inpatient operating costs, capital-related costs for cost reporting periods beginning on or after October 1, 1986. By so doing, capital-related costs, which are currently reimbursed on a reasonable cost basis, would be incorporated into the prospective payment system. The hospital prospective payment rates would then include payments for these capital-related costs as well as for operating costs.

In our report to Congress entitled "Hospital Capital Expenses: A Strategy for the Future," we analyze the effects of the current system on hospital investment behavior and recommend that extension of the prospective payment system for capital-related costs would bring about a more rational and efficient distribution of capital resources. It also represents a less interventionist role for government and a much more market-oriented approach to the allocation of scarce resources than the current system. Based on our analysis of the industry, we believe it is an opportune time to revise our policy with respect to capital-related costs and subsume them under the prospective payment system.

By incorporating capital-related costs into the prospective payment system, we are extending the objectives underlying the current system to this area of inpatient hospital costs. Because capital costs remain fixed over an extended period of time, these types of expenditures generally do not correlate closely with variations in operating costs in the short-run. In a price-competitive market, however, capital-related costs will follow long-run charges in operating costs. Because we reimburse capital-related expenditures on a reasonable cost basis, hospitals have no strong economic incentive to conform their capital-related expenditures to the long-run patient market conditions of hospital operating characteristics. Thus, the principal objective we hope to achieve through integrating payments for inpatient capital-related costs into the prospective payment system is to establish the same kind of economic relationship between a hospital's operating costs and capital investment decisions as exist in price-competitive markets.

The difficulty in establishing a more price sensitive model for hospital capital investment decisions is the absence of a natural pricing mechanism that would serve to limit revenue sources for hospital capital investments. In fact, the current cost-based reimbursement system rewards hospitals through higher payments for investing in economically inefficient assets rather than for prudent purchasing and investment decisions. Rather than rewarding hospitals for investing in accordance with perceived market demand and the hospital's operating characteristics, the current cost-based reimbursement system rewards hospitals on the basis of their access to financial markets. For example, under cost-based reimbursement, a financially sound hospital with low utilization and with a low case-mix index can borrow funds for expansion of its plant even though it currently has surplus bed capacity. Under the current system, Medicare will reimburse these capital costs without regard to the prudence of the investment. Because of its higher capital costs, this hospital receives higher payments per discharge than a similar hospital with the same occupancy rate and case-mix index but which lacks the access to the financial market of the first hospital.

The proposal to establish prospective payment rates for inpatient hospital capital-related costs would establish a price that would result in hospitals accepting a certain degree of risk for their investment decisions. Incorporating payments for capital-related costs into the prospective payment system would subject these costs to the same financial and economic incentives to which operating costs are subject.

2. Expected Effects

Hospitals that either recently have or are about to make substantial commitments to building projects, either in the form of acquisitions or construction, could be adversely affected by this proposal. Building projects typically require long planning horizons and have long depreciable lives. Hence, hospitals that acquired major capital assets (for example, buildings and major fixed equipment)

and revalued these assets prior to the enactment of section 2314 of the Deficit Reduction Act of 1984 (Pub. L. 98-369), or that either are about to begin, are in the midst of, or completed construction of major capital projects within the past few years, may now be obligated to substantial long-term capital-related expenditures. As a result these hospitals may have above average capital related costs and therefore may be adversely affected by our proposal. Hospitals with low operating margins may experience some cash flow difficulties as a result of implementation of capital-related prospective payment rates, and may have to adopt one or more of the following measures:

- Reduce planned or current capital expenditures through modifying or eliminating current or planned capital acquisition or construction projects;
- Increase revenues through increasing charges or expanding into new markets by either offering new services or reaching new segments of the population;
- Begin or expand fund raising activities; or
- Accept reduction of historically experienced margins or revenue over costs.

We must point out, however, that our proposal provides a transition period during which time hospitals would be afforded an opportunity to adjust their capital planning and budgeting to meet the constraints of the new payment system. In this context, it is also appropriate to restate our intention to consider various alternative time tables for phasing in prospective capital-related payments and for computing payments. As stated in section II.D. of the preamble, we are seriously considering an alternative capital proposal which would deal separately with long-term capital (plant and fixed equipment) and shorter-term capital (movable equipment), with a long transition period to national rates for long-term capital and an immediate move to national rates for movable equipment. This structure might be combined with a rolling base for the hospital-specific portion of long-term capital and an exceptions pool to provide relief to hospitals meeting specified exception criteria. We estimate that adoption of a proposal such as this would likely reduce the estimated savings of the basic proposal by about 25–30 percent.

While some hospitals may be adversely affected by our proposed capital-related prospective payments, other hospitals with below average capital related costs may benefit from this proposal. Many publicly controlled hospitals have been under-capitalized in recent years because of budget constraints and low patient revenues. Because these hospitals typically have not been able to invest in new plant and equipment, their capital-related costs tend to be below average. Once the capital prospective payment rates are fully phased in, these hospitals may be benefited significantly because payments will be based on national average capital-related cost per discharge rather than the hospital's own capital-related costs. Whether these additional revenues would enable hospitals to invest in plant and equipment will depend on the hospital's cash flow needs. Hospitals experiencing serious operating deficits would most likely apply the additional payments to help reduce their operating deficits, while hospitals in a stronger financial position may use the additional revenues to finance capital projects.

We have analyzed, based on available data, the impact the proposed phase-in of capital payment rates would have on certain classes of hospitals over the four-year phase-in period, beginning in FY 1987. Table IV summarizes the results of this analysis. (The combined effects of the proposed capital rates and the updated prospective payment rates for operating costs (excluding capital) are discussed in section M. of this impact analysis.) Table IV displays the effects of implementing the proposed payment system over the four year transition period in terms of the percent change in payments levels between payment amounts approximating what hospitals would receive under the current system for FY 1987 and what they could expect to receive under Federal capital-related prospective payment rates. That is, we compared payments hospitals would receive assuming a 100 percent hospital-specific methodology for FY 1987 with the Federal portion of the prospective capital payment rates phased in over the proposed four year transition period. We used constant dollars and assumed no behavioral change. Thus, this table essentially displays a static analysis of the effect of the proposed transition period.

1/ Each column below represents a comparison of the total capital payments that would result from capital prospective payment rates composed of a blend of Federal and hospital-specific portions, both updated by the proposed 0.5 percent update factor, to the total capital payments that would result from capital rates that were 100 percent hospital-specific and updated by the projected capital market basket increase for FY 1987.

2/ For FY 1987, the Federal rates are 50 percent of the national rate plus 50 percent of the regional rate, except for sole community hospitals.

3/ For FY 1988 and thereafter, Federal rates are 100 percent national, except for sole community hospitals.

4/ Sole community hospitals will be paid 75 percent of their hospital-specific rate plus 25 percent of their Federal regional rate for FY 1987 and thereafter.

BILLING CODE 4120-01-C

In computing the capital prospective payment rates, we removed from the rates 100 percent of the interest earned on funded depreciation and adjusted the rates for the effect of outlier payments. We used the capital component of the hospital market basket to project hospital-specific capital costs through FY 1987. The Federal and hospital-specific portions of the proposed capital rates both were updated by the proposed prospective payment update factor of 0.5 percent.

If FY 1987 capital-related payments were based solely on the Federal rates, all hospitals under the prospective payments system could expect, on the average, a 12.15 percent payment reduction compared to their FY 1984 capital costs updated through FY 1987 by the capital component of the market basket. To the extent that capital costs increased more slowly than the capital component for a particular hospital or category of hospitals, the impact would be lessened. The overall reduction over the phase-in period reflects the combined effect of removing interest on funded depreciation and the different factors used to update hospitals' capital-related costs and the prospective capital-related payment rates for FY 1987. Hence, one can conclude the categories of hospitals with less than a 12.15 percent estimated reduction in payments have, on the average, capital-related costs that are lower than average. Conversely, hospitals sustaining a greater reduction in their capital-related payments have higher than average costs.

Although capital-related payments would decline overall under the proposed payment system, there are some notable exceptions to this trend. Small, urban, disproportionate share hospitals could expect a nearly 26.5 percent increase in their capital-related payments compared to their 1984 capital-related costs updated by the capital component of the market basket. This represents the largest gain of any hospital group. Other categories of hospitals that would benefit from the proposed system are publicly controlled (government) hospitals, hospitals heavily involved in teaching programs, and large, urban hospitals. On average, these hospitals could expect to receive a significant increase in capital-related payments. Also, hospitals in the New England census division could expect to receive, on the average, higher payments for capital-related expenditures. To the extent that a hospital's capital related costs increased faster than the capital component of the market basket, the hospital would benefit less.

Among those categories of hospitals that would sustain reductions in revenues under the proposed system, proprietary hospitals would be the most severely affected group. The extreme drop in payments to proprietary hospitals, we believe, reflects their generally heavier and more recent investments in major capital assets, compared to other hospital assets than other types of hospitals.

Rural hospitals in general would receive lower payments, and the second most severely affected hospital category, after proprietary hospitals, would be rural hospitals with between 100 and 169 beds. The major factors contributing to the reduced rates for these hospitals, we believe, are low occupancy levels and the effect of outlier payment adjustments.

On the whole, rural hospitals would experience a greater drop in capital-related revenues under the proposed system than would urban hospitals. On average, if the proposed Federal capital rates were imposed in full in FY 1987 all rural hospitals would see almost a 19 percent decline in payments relative to their FY 1984 capital-related costs updated by the capital component of the market basket through FY 1987, while urban hospitals, on the average, would experience less than an 11 percent decline compared to their FY 1984 capital-related costs updated through FY 1987. However, urban hospitals with between 100 and 404 beds would experience reductions comparable to rural hospitals.

Although the New England Region would experience some disadvantage for the first year of the phase-in, when regional and hospital-specific rates would depress payments, over the long run it is the one geographical area that would benefit the most from the proposed revamping of the capital-related payment system. The West South Central and Mountain regions of the country would be the most adversely affected areas. This may be the result of a large number of small rural hospitals being concentrated in those regions.

L. Updated Payment Rates and Resulting FY 1987 Payment Amounts

The addendum to this proposed rule, which is printed after the text of the proposed regulation changes and which precedes the appendices, sets forth the proposed methodology for computation of FY 1987 standardized amounts and includes tables of the proposed Federal national and regional rates, DRG relative weights, and outlier thresholds. In this section we present an analysis of the impact of those proposed payment rates. The combined effect of these rates and the proposed capitol rates is discussed in section M. of this impact analysis.

Many of the proposed changes to hospital prospective payments for FY 1987 result from changes required under sections 1886 (d) and (e) of the Act as amended by sections 9101 through 9105 of Pub. L. 99-272. The following changes are required under the statute as currently amended:

- Effective with cost reporting periods beginning in FY 1987, except for hospitals located in Oregon and for sole community hospitals, hospital prospective payment rates will be the sum of 75 percent of the Federal rates and 25 percent of a hospital-specific rate (section 1886(d)(1)(C) of the Act);
- For discharges occuring on or after October 1, 1986, (with the exception of discharges from sole community hospitals and hospitals located in Oregon), the Federal portion of the prospective payment rates will be comprised of 50 percent of the national standardized amount and 50 percent of the appropriate regional standardized amounts, per section 1886(d)(1)(D) of the Act;
- The hospital costs used to establish the rates will be restandardized to reflect the indirect costs of medical education as measured by the revised indirect medical education adjustment factor and to reflect payment adjustments to disproportionate share hospitals per sections 1886(d)(2)(C) (i) and (iv) of the Act as amended by sections 9104(b) and 9105(b) of Pub. L. 99-272; and
- The standardized amounts will be adjusted, by the indirect medical education payment equality factor, to reflect the savings from the change in the indirect medical education adjustment, as required under section 1886(d)(3)(C)(iii) of the Act, as added by section 9104(b) of Pub. L. 99-272.

In addition to reflecting changes required under the Act, the proposed hospital payment rates reflect changes we are proposing, some as a result of changes in the industry, in response to the prospective payment system and other influences, some as a result of more accurate data. We are proposing the following additional changes under general authority granted the Secretary in the prospective payment statute:

- A 0.5 percent update factor for both the Federal and hospital-specific rates (see section II.A.3.f. of the Addendum);
- A revised and rebased market basket, which results in different weights for the labor and non-labor components of the market basket (see section III of the preamble and

BEST COPY AVAILABLE

Appendix A of this document for a detailed discussion); and

• The incorporation of the HCFA gross wage index into the restandardization of the Federal amounts and for computing the prospective payment rates (see section II.A.2. of the addendum).

Table IV summarizes the separate and combined effects of those of the above provisions that are estimable using available data. As noted above, changes often interact in complex ways, not simply multiplicatively or additively. The percent changes reflected below include total payments for operating costs (excluding capital), payments for the indirect costs of medical education, and additional payment for outlier cases and to disproportionate share hospitals.

The proposed FY 1987 prospective payments for capital are excluded to allow comparison with estimated FY 1986 payments. (See section M. of this impact analysis for a discussion of the combined effects of these rate changes and the proposed capital payments.) Direct medical education payments are also excluded. All hospitals are assumed to have the same cost reporting period, corresponding to the Federal fiscal year. The column titled "Total Combined Effects" includes the effects of the proposed 0.5 percent update factor.

1/ This column shows the combined effects of restandardization of base year cost data and adjustment of the standardized amounts by the indirect medical education payment equality factor.

2/ This column shows the combined effects of the first two columns.

3/ This column includes the effect of the proposed 0.5 percent update factor, and assumes that outlier criteria remain unchanged.

4/ The Federal regional rates for the Mid-Atlantic region reflect the adjustment of base year costs to recognize the effects of a revised sequence of cost allocation for certain teaching hospitals. This change and the corresponding effects on hospital-specific rates and payments for the indirect costs of medical education are reflected in the projected payments for hospitals in that region.

5/ Oregon alone would receive payment based 100 percent of the Federal national rate, with a resulting payment increase of 4.65 percent.

BILLING CODE 4120-01-C

Each of the proposed changes has somewhat different distributive effects. The change in labor and nonlabor portions of the standardized amounts for operating costs (excluding capital) would benefit rural hospitals, as a whole, much more than urban hospitals. However, it would not significantly benefit rural hospitals with less than 100 beds. The only categories of hospitals that would experience a significant disadvantage from this proposed change would be the largest urban hospitals, hospitals with major teaching involvements, and hospitals in the Pacific region. The first two of the categories undoubtedly overlap to a large extent.

The restandardized adjusted standardized amounts result in lower payments for all categories of hospitals. There is a wide range of effects on different census regions, with the New England and Mid-Atlantic regions experiencing negligible effects, while the South Atlantic, East South Central, West South Central, and Pacific regions experience more adverse effects.

Interestingly, the category of hospitals most adversely affected by the restandardization and adjustment of the new Federal rates is disproportionate share hospitals with less than 100 beds. This appears to be the only change we are proposing that would affect this category adversely; they are the category most benefited by both the proposed capital prospective payments and the change of blend. (As can be seen in Table VII of section M. of this impact analysis, they are the only category projected to increase their Medicare profit margin for FY 1987.) This is a small group of hospitals, comprising less than one percent of all Medicare participating hospitals included in the prospective payment system. Apparently, their average hospital-specific costs, both for capital-related costs and operating costs excluding capital, are significantly below the national average. Thus, any change that would pay these hospitals an amount per case closer to the national average cost per case benefits them significantly.

Nationally, the great majority of hospitals would receive increased FY 1987 payments for their operating costs (excluding capital) as a result of these proposals. Geographically, only the East North Central region would decline, as a whole. The largest urban hospitals and medium-sized rural hospitals also would be somewhat disadvantaged.

The greatest overall payment increases would accrue to the Mid-Atlantic, East South Central, and Mountain regions. Other than the small urban disproportionate share hospitals already discussed, the categories of hospitals most benefiting would be the larger group of all urban hospitals with less than 100 beds, disproportionate share rural hospitals, and rural referral centers.

In addition to reviewing the effects of these proposals on total operating cost payments, we considered their effect on average payment per case, as we did for the FY 1986 changes discussed in section F. of this impact analysis. This enabled us to reflect the practical effect of hospitals phasing into the prospective payment system on the basis of their own cost reporting periods. Table VI shows the comparative average payment rates for FYs 1986 and 1987, compared to the baseline average payments per case for the period from October 1, 1985 to April 30, 1986. As can be seen, the national average payment per case continues to increase.

BILLING CODE 4120-01-C

M. Combined Impact of Proposed FY 1987 Prospective Payment Rates for Operating and Capital-Related Costs

As discussed in section II.A.3.f. of the Addendum to this proposed rule, operating margins of hospitals appear to have increased significantly under the prospective payment system. It is not our intention or our responsibility to determine what specific levels of hospital margins may be appropriate. Nonetheless, individual hospitals will assess the impact of these proposals on themselves largely in terms of the anticipated effects on the projected relationships of their FY 1987 revenues to their FY 1987 costs. The proposed inclusion of capital under the prospective payment system makes this of special concern to affected hospitals this year.

Based on available data, we have done our best to consider what the combined effects of these proposals would be on hospital profit margins for payments and costs related to services for Medicare beneficiaries. There are some limitations in the data and methodology that require us to view the results with caution, but we believe that they nonetheless throw significant light on the magnitude of anticipated overall effects of these proposals. Table VII shows the projected changes in Medicare total payments and profit margins from FY 1986 to FY 1987, taking into consideration payments for both capital-related costs and operating costs excluding capital. To estimate these margins, we had to estimate Medicare-related revenues and costs (excluding revenues and costs related to the direct costs of medical education) for each fiscal year, and compute the differences. To estimate costs, we used FY 1984 cost report data, most of which is unaudited, and brought it forward to the appropriate fiscal year basis using the hospital market basket.

1/ This column shows the projected change in total payments, including operating and capital costs, disproportionate share payments, indirect medical education payments, and outlier payments, but excluding payments for the direct costs of medical education.

2/ Estimated for a hypothetical full year of payments using the payment parameters in effect from May 1, 1986 through September 30, 1986.

3/ Projected for a hypothetical full year of payments with an 0.5 percent update factor applied to operating cost standardized amounts (labor, nonlabor, and capital components) and both the operating cost (excluding capital) and capital-related hospital-specific portions. All projected costs were inflated using the projected hospital market basket. All hospitals were assumed to have the same cost reporting period, corresponding to the Federal fiscal year.

BILLING CODE 4120-01-C

As can be seen, in the aggregate, we estimate that all of these selected categories of hospitals would show some margin of profit. Of course, not all individual hospitals have profits now, or will have profits in FY 1987. Table VIII shows the same comparisons as Table VII, broken down by payment cells, rather than by selected categories of hospitals. This analysis shows that rural hospitals in the South Atlantic region may experience, in the aggregate, an excess of costs over revenues in FY 1987.

N. Quality of and Access to Care

As we have stated on other occasions, the prospective payment system endeavors to change hospital behavior through financial incentives. While our goals are largely economic, we are also acutely concerned that for some hospitals economic considerations might, in some cases, overshadow their concerns for the quality of care delivered and maintaining access to appropriate services and levels of services for Medicare beneficiaries.

We believe that the incentives to increase the efficiency with which inpatient services are provided to Medicare patients should not conflict with established quality of care standards and access to needed services. Many hospitals have responded to the prospective payment system by eliminating marginally profitable services with low utilization. This has enabled them to concentrate their resources (both medical and managerial) by specializing in those services and types of cases that the hospitals are best equipped to treat. By focusing their efforts on specific types of cases it appears that hospitals have achieved economic gains, while at the same time improving the quality of care provided to patients. Through specialization, medical personnel are able to refine their medical knowledge and skill in providing better care. For instance, open heart surgery is a well-documented example of the direct relationship between the number of procedures performed and the increased chances of a successful outcome from such a procedure.

At the same time that specialization results in better care for patients, it also generally results in lower costs. First, through repeated encounters with the same types of cases, hospital staffs learn the most effective and efficient treatment methods, thus improving the chances of a successful outcome with a minimum of wasted effort and resources. Secondly, as patient utilization increases, costs per case usually decline as a result of economies of scale. Thus, we expect that the prospective payment system can provide a stimulus for improving quality of care by fostering more rational and market oriented approaches to the treatment of patients that also result in lower costs for the Medicare program.

As discussed in section II.A.3.f. of the Addendum to this proposed rule, we have not found any systematic evidence of compromise or deterioration in the quality of or access to inpatient hospital care under the prospective payment system. Nonetheless, we are mindful of those cases involving inappropriate care that have been identified through the efforts of Utilization and Quality Control Peer Review Organizations (PROs) or brought to our attention through other sources. While the confirmed number of cases involving substandard or inappropriate care is small compared to the total number of Medicare patients discharged from hospitals each year, they have attracted considerable attention from both Congress and the public. The Office of the Inspector General and HCFA have thoroughly investigated all cases brought to our attention to determine the magnitude of the problems, their causes, and efforts taken to correct them.

Of the more than 4000 cases involving substandard or inappropriate care that we have investigated, we have found no evidence indicating systematic mistreatment of Medicare patients under the prospective payment system. While it is true that average lengths of stay have declined under the prospective payment system, and a greater number of patients are being treated in nonhospital settings, these changes, by themselves, do not indicate poorer quality care. Our concern, however, for ensuring that economic interests do not compromise quality care has led us to develop a number of short-and long-range initiatives directed at identifying and correcting immediate problems while engaging in studies of fundamental policy issues that could influence quality of care over the long haul.

As part of our initiative to improve PRO surveillance of hospital and physician treatment of Medicare patients, we have been reviewing our experience from the first two years of PRO review. This has led us to refine PRO efforts in the area of quality of care and further to focus review on poor performing providers and practitioners. Every case a PRO reviews, whether or not it is explicitly part of a quality review, will be subjected to a "generic" quality review. This will involve an examination of several key medical indicators that we believe reflect the quality of care provided to the patient. A "generic" review may include reviewing the patient's medical records to determine the medical stability of the patient at time of discharge, adequacy of discharge planning, or unscheduled return to surgery. These new quality of care requirements will be incorporated into PROs' contracts for their next contract cycle. We also plan to expand review of apparently premature discharges so that we can more easily detect inappropriate discharges and transfers.

In addition to improving the process for identifying substandard or inappropriate care through modifying the PROs' scope of work, we will be strengthening our efforts to correct problems of poor quality whenever violations of accepted medical practice standards are discovered. Corrective action may range from education of the individual physician or hospital, to intensified review, or to payment denials where actions are taken to circumvent the prospective payment system, or if otherwise appropriate. As a final measure, we are prepared to exclude serious or repeat offenders from the Medicare program entirely.

In order to ensure that PROs conduct reviews in accordance with HCFA contracts, we have contracted with Systemetrics, a leading firm in the area of quality of care assessments, to act as a "super PRO". Systemetrics will monitor PRO review activities and validate PROs' medical determinations and identify PRO performance issues.

In many respects, beneficiaries who are informed of their rights under the prospective payment system can help us to assure that providers and physicians furnish appropriate care. While beneficiaries may not be able to prevent abuses or poor quality care, they can assist PROs in their medical oversight responsibilities by filing appeals or contacting the PRO when they believe that either the hospital or physician has acted improperly. Also, providers and physicians are less likely to provide substandard care to beneficiaries who are informed of their rights. In our efforts to educate beneficiaries of their rights, we are conducting outreach programs and requiring hospitals to inform beneficiaries at the time of admission of their rights under Medicare and how to contact the local PRO should the need arise.

Improving the PRO review methodology is a central feature of our effort for assuring high standards of medical care. Nevertheless, we are developing initiatives in other areas that we expect will have long-range systemic effects on the quality of care furnished in all settings. For example, we are pursuing more aggressive Federal oversight of State survey and certification of hospitals, skilled nursing facilities, home health agencies and other types of health care facilities. Finally, to gain a better grasp of the broader long-term quality of care issues affecting all beneficiaries and those specific to certain groups of

beneficiaries, we have contracted with several major research organizations to conduct studies related to quality, for example, on outcomes of surgery in the Medicare aged population, the health status of beneficiaries at time of discharge, and an evaluation of the quality effects of the prospective payment system on beneficiaries suffering from End Stage Renal Disease.

These initiatives represent our own efforts to monitor and evaluate the impact of the prospective payment system on quality of care. There are, however, numerous other monitoring and inspection programs carried out by other Federal agencies, State and local governments and private organizations. For example, the Food and Drug Administration sets standards for radiation exposure levels from imaging and therapy equipment, while State health departments monitor compliance with licensure requirements. The Joint Commission on Accreditation of Hospitals and the American Osteopathic Hospital Association set general operating standards for member hospitals that we accept as sufficient for participation in the Medicare and Medicaid programs. The combined efforts of all these private and governmental bodies all help establish appropriate standards of patient care and serve as a network to see that these standards are maintained.

Although the trust of the prospective payment system is explicitly directed at payment reform, we are deeply concerned and mindful of our responsibility to safeguard the quality of care beneficiaries receive under the aegis of the Medicare program. We have been unrelenting in our efforts to ensure that providers and practitioners do not use the prospective payment system as an excuse to increase the risk to patients' health and safety beyond accepted standards of care. We believe that most providers and practitioners have not compromised the quality of care they provide. The few that have or that may in the future try to economize at the expense of patients' safety will be dealt with appropriately. We believe that most breaches of medical treatment standards are the result of unintentional errors or unfamiliarity with accepted norms and medical practice. Corrective action in these cases usually entails educating the offending institution or practitioner as to the appropriate method or standard of treatment. Other more serious offenses will require more strenuous corrective action. The Office of the Inspector General has agreed to coordinate its investigative efforts with the PROs to identify serious and repeated violations of the Medicare law and of accepted medical standards. We are confident that our efforts to identify and correct immediate problems will eliminate the majority of cases involving inappropriate care. Our initiatives to investigate long-term quality of care issues will enable us to refine our payment policies so as to more precisely target those areas that require special attention.

O. Alternatives Considered

Throughout the discussions in the preamble and this analysis, we have explained why we are proposing to do one thing rather than another. Many interrelated decisions are involved in this process, and the number of possible combinations of different DRG weights, different update factors, and other proposals is large. Further, there are additional alternatives that had to be considered in developing the proposed DRG classification changes, the proposed capital rates, and the update factor for the proposed Federal rates. Altogether, there is a potentially enormous number of permutations.

Nonetheless, we have been particularly concerned with the impact of certain main options, and we have reviewed them in the light of how they would interact with each other. We also considered all the ProPAC recommendations. Each of the factors taken into consideration in the development of the proposed FY 1987 standardized amounts has been reviewed both individually and in combination with other factors.

P. Summary and Conclusions

E.O. 12291 requires us to assess the benefits, costs and net benefits of all rules, major or otherwise. For major rules, we must discuss those costs and benefits in impact analyses, and show that the potential benefits outweigh the potential cost to society. In addition, we must discuss alternative methods of achieving the objectives we propose in our regulations. Throughout the preamble, addendum, and this impact analysis, such alternatives are discussed. In this summary, we assess the overall costs of the proposals we are making, the overall benefits, and the resulting net benefits.

For the most part, the costs and disadvantages that could result from these proposals would take the form of limiting the amount of payment to affected hospitals. Most of the proposals would have their major effect through their influence on the level of FY 1987 prospective payments.

As we have said before, the primary benefit expected to result from this proposed rule is the maintenance and effective management of the prospective payment system itself. The incentives of this system are expected to produce substantial benefits in the form of economy and efficiency of operation of participating hospitals, and as improvements in trends of the health care marketplace as a whole. As noted earlier, the objective of these proposals is to refine the prospective payment system. Whereas the system as a whole has had a large and dramatic impact, the proposed refinements, with the exception of the proposal to include capital-related costs under prospective payment rates, generally are of a marginal nature, rather than large-scale adjustments.

We believe that, from this perspective, the overall benefits to society more than offset any resulting liabilities. For the above reasons, we believe that this analysis meets the objectives of E.O. 12291 and the Regulatory Flexibility Act, as noted in the Introduction to this Regulatory Impact Analysis.

Stuart H. Altman, Ph.D.
Chairman

Donald A. Young, M.D.
Executive Director

April 1, 1986

Honorable Otis Bowen, M.D.
Secretary
Department of Health and Human Services
Washington, D.C. 20101

Dear Secretary Bowen:

I am pleased to transmit to you the second annual report of the Prospective Payment Assessment Commission as required by Section 1886(e)(4) of the Social Security Act as amended by Public Law 98-21. This report contains thirty-three recommendations updating the Medicare prospective payments and modifying the diagnosis-related group (DRG) classification and weighting factors.

The report also provides background on the Commission's priorities as well as an indication of its agenda for coming years.

Sincerely,

Stuart H. Altman, Ph.D.
Chairman

Enclosure

Executive Summary

In its April 1986 report, the Prospective Payment Assessment Commission (ProPAC) conveys its recommendations to the Secretary of the Department of Health and Human Services (HHS) on ways to update and improve the Medicare prospective payment system (PPS). The 33 recommendations reflect the key concerns of ProPAC's 15 commissioners. The proposed changes are necessary, in the Commission's view, to maintain access to high-quality health care, encourage hospital productivity and long-term cost-effectiveness, and facilitate innovation and appropriate technological change.

This summary highlights the major areas addressed in the recommendations.

Update Factor.—The Commission estimates that its update factor recommendation would result in a 2.8 percent increase in hospital payment per case for fiscal year 1987. That figure is derived from combining several components. These are: 1) increases for inflation in the hospital market basket (adjusted for forecast errors), scientific and technolgical advances in the hospital industry, and real case-mix changes; and 2) decreases for changes in hospital productivity, shifts in site of service, and reported changes in the case-mix index.

Sharing of Gains.—The Commission believes that hospitals, beneficiaries, and the Medicare program should share gains achieved under PPS. In this connection, the Commission urges legislative change in the formula determining Medicare beneficiaries' inpatient deductible. This change is necessary because of the inappropriate increase in the deductible caused by significant declines in the length of stay experienced since the beginning of PPS.

Capital.—The Commission recommends that beginning in fiscal year 1987 hospital capital payments be phased into PPS. The Federal portion of capital payments should be computed as a fixed percentage add-on to the standardized amounts based on a distinction between fixed and moveable capital. Such a system should be initiated in fiscal year 1987 with respect to moveable equipment. Federal payments for fixed plant and equipment, however, should replace cost reimbursement during a seven- to ten-year transition period.

Incorporating Technological Change.—The Commission recommends annual recalibration of diagnosis-related group (DRG) weights to reflect new technologies and other practice changes that affect the relative use of hospital resources among the DRGs. The Commission's recommendations on individual DRG classification and calculation of payment amounts would modify the current DRG system to incorporate costly new technologies, and respond to special problems like the high costs associated with increased use of sophisticated cardiac pacemakers.

Beneficiary Information.—Concerns and perceptions that PPS is adversely affecting the quality of care Medicare beneficiaries receive prompted the Commission's call for disseminating information to Medicare beneficiaries and providers about PPS and how it functions. Beneficiaries must understand how to utilize the Medicare appeals system to protect their right to appropriate hospital care. The Commission is deeply concerned about reports that DRG-specific average lengths of stay have been inappropriately used as maximum limits on hospital stays.

Quality of Care.—All of the Commission's recommendations regarding the update factor and DRG classifications were formulated with consideration of quality of care. The Commission is particularly concerned, however, about the role that Peer Review Organizations (PROs) play in this vital area. To the extent possible, PRO quality of care review should focus on the entire episode of care, including skilled nursing and home health care. In addition, the Commission recommends that PROs extend their review to selected outpatient surgery cases.

Adjustments to the Payment Formula.—The Commission reiterates its recommendation for prompt action on two PPS payment distribution problems. An adjustment to PPS rates should be implemented for hospitals serving a disproportionate share of low-income patients. Further-

more, the definition of hospital labor market areas should be improved, primarily by identifying additional labor markets within current definitions of urban and rural areas. The Commission is also concerned about the special problems of rural hospitals and the beneficiaries they serve.

AGENDA FOR THE FUTURE

The Commission's future analytic agenda calls for further study in three broad categories: improving the measurement of case mix, improving and updating hospital payment amounts, and assessing the effects of PPS on quality of care. Activities in these categories include the following:

- Improving the measurement of case mix:
  - —Analyses to support incorporation of new and changing technology and practice patterns into the DRG system.
  - —Examination of heterogeneity and case complexity on a DRG-specific basis, broadening the scope to all DRGs.
  - —Research on issues that cut across the measurement of case mix and payment amounts, such as outlier payment policy, and high device costs and the labor/nonlabor portion of the payment amounts.
- Improving and updating hospital payment amounts:
  - —Studies to further refine the discretionary adjustment factor (DAF), to improve the data and methods used to calculate the payment amounts, and to examine issues related to the hospital market basket.
  - —Analyses of issues related to the calculation of payment components, such as the area wage index adjustment.
  - —Evaluations of ProPAC's capital recommendations and the effects of paying for capital through PPS.
- PPS effects on quality of care:
  - —Studies using existing data to identify quality of care problems among targeted patient groups, such as the frail elderly.
  - —Research on hospital discharge planning services to assess how well hospitals link inpatient hospital care with needed post-discharge care.
  - —Assessment of methods to study the entire episode of illness in order to understand the relationship between shortened length of stay, the use of medical services at alternative sites of care, and health care outcomes.

This report appears shortly after publication of ProPAC's report to the Congress, *Medicare Prospective Payment and the American Health Care System*, which documents the impact of PPS during its first year. The two reports convey the Commission's conclusion that PPS is clearly achieving a number of its intended objectives. They also underscore the need for continued assessment of the consequences of PPS and for implementation of measures to improve the system.

REPORT ORGANIZATION

Chapter 1 discusses the Commission's role and the processes it uses to fulfill its mandate; changes in health care financing and public policy that occurred during 1985; and the commissioners' chief concerns. ProPAC's 33 recommendations for improving the prospective payment system are presented in Chapter 2 under three broad categories: improving DRG classification and case-mix measurement; improving and updating the payment amounts; and assessing the effects of PPS on care for beneficiaries. The Commission's proposed analytic agenda is outlined in Chapter 3, which describes areas and issues that ProPAC intends to study in 1987 and beyond.

The Technical Appendixes, a separate volume accompanying the report, contain both descriptive and analytical pieces developed by staff and outside experts that provided the groundwork for the Commission's recommendations.

BEST COPY AVAILABLE

RECOMMENDATIONS FOR FISCAL YEAR 1987

The Update Factor

Recommendation 1: Amount of the Update Factor for PPS Hospitals

For fiscal year 1987, the standardized amounts should be updated by the projected increase in the hospital market basket, adjusted by the following:

- A correction factor for substantial errors previously made in forecasting inflation for fiscal year 1986, and
- A discretionary adjustment factor of minus 0.5 percentage points composed of two allowances:
  - —A minus 1.4 percent allowance for scientific and technological advancement, productivity change, and site-of-care substitution, and
  - —A 0.9 percent allowance for real case-mix change.

In addition, the DRG weights should be adjusted to remove any increase in observed case mix occurring during fiscal year 1986.

This recommendation reflects the Commission's collective judgment of the appropriate change in the level of payment per Medicare discharge under PPS, assuming that the Commission's other concerns regarding the market basket component of the update factor, the DRG weighting factors, and the distribution of payments across PPS hospitals are also addressed. The Commission's recommendation regarding the level of capital payments would also affect per-discharge Medicare payments to hospitals.

Recommendation 2: Allowance for Scientific and Technological Advancement and Productivity Goals, and Site-of-Care Substitution

For the fiscal year 1987 payment rates, the allowance in the discretionary adjustment factor for scientific and technological advancement, productivity improvement, and substitution in the site of service from inpatient to out-of-hospital settings should be set at minus 1.4 percentage points.

Recommendation 3: Allowance for Real Case-Mix Change

Prospective payments should reflect real changes in case mix that are due to changes associated with the characteristics of patients and not changes simply due to better coding of records. The DAF allowance for real case-mix change should reflect both shifts in patients among the DRG categories, as measured by changes in the average case-mix index (DRG case-mix change), and changes in the mix of patients within DRG categories (patient complexity change). For the fiscal year 1987 payment rates, the allowance for real case-mix change should be set at 0.9 percent. This allowance represents a 0.2 percent adjustment for changes in the DRG case-mix index and a 0.7 percent adjustment for patient complexity changes.

Recommendation 4: Update Factor for Excluded Hospitals and Distinct-Part Units

For fiscal year 1987, the target rate of increase limits for the group of psychiatric, rehabilitation and long-term care hospitals and hospital distinct-part units excluded from PPS should be updated to reflect the projected increase in the hospital market basket for these hospitals (corrected for forecast errors) minus a 0.8 percentage point adjustment for productivity and scientific and technological advancement goals established for PPS hospitals.

The target rate of increase limit for children's hospitals and distinct-part units should be updated to reflect the projected increase in the hospital market basket for PPS hospitals (corrected for forecast errors) minus a 0.8 percentage point adjustment for productivity and scientific and technological advancement goals established for PPS hospitals.

Capital

Recommendation 5: Including Capital in the Prospective Payment System

Beginning in fiscal year 1987, the Secretary should initiate a transition to all-inclusive prospec-

tive prices that combine operating and capital cost components in a single prospective payment per case for hospitals.

Recommendation 6: Capital Payment Method

The Federal portion of capital payments should be computed as a fixed percentage add-on to the standardized amounts beginning in fiscal year 1987. The Secretary should immediately develop capital components to be added to the hospital market basket. When appropriate data become available, the components of PPS payments should be recomputed to reflect the addition of capital costs. The results of this recomputation should be implemented as soon as possible, but no later than fiscal year 1988.

Recommendation 7: Level of Federal Capital Payment

Capital payment should be added to the Federal portion of PPS payments for hospital accounting years beginning in fiscal year 1987 at the following levels:

- For building and fixed equipment, projected average Medicare actual capital costs per discharge for fiscal year 1985, trended forward to fiscal year 1987 by an index of construction capital costs.
- For moveable equipment, average actual Medicare capital costs per discharge for hospital accounting years beginning in fiscal year 1983, trended forward to fiscal year 1987 by an index of equipment capital costs.
- The proportion attributed to moveable equipment should be the lesser of the 1983 proportion or 40 percent.

Recommendation 8: Capital Payment Transition

The transition to Federal capital payments under PPS should begin in fiscal year 1987 in accordance with the following provisions:

- There should be no transition for moveable equipment. All payments for moveable equipment should be included as a fixed percentage add-on to the Federal standardized amounts beginning in fiscal year 1987.
- Payments for fixed plant and equipment should be phased in as a fixed percentage add-on to the Federal standardized amounts over a seven to ten year period on a straight-line basis.
- For plant and fixed equipment, hospital-specific capital payment portions should be the actual costs incurred during each year of the transition.
- During the transition, the Federal portion for plant and fixed equipment should be updated each year by an index of construction capital costs.
- The addition of capital to the Federal standardized amounts should reflect base year treatment of return on equity and interest offsets. Return on equity payments should be added to the hospital-specific portion of operating payments. Once the transition to national rates for operating payments ends, there should be no hospital-specific payment for return on equity.

Adjustments to the Payment Formula

Recommendation 9: Disproportionate Share Hospitals

An adjustment to the PPS rates for hospitals serving a disproportionate share of low-income patients should be implemented as soon as possible. This adjustment should specifically incorporate a definition and methodology in keeping with the character of the adjustments already being considered by the Congress. This adjustment should not change the total aggregate dollar amount paid to all hospitals.

Recommendation 10: Improving the Definition of Hospital Labor Market Areas

The Secretary should improve the definition of hospital labor market areas for fiscal year 1987, if possible, and no later than fiscal year 1988. For urban areas, the improved definitions should account for a greater amount of the wage variation between inner-city and suburban hospitals. For rural areas, the improved definitions should account for a greater amount of the wage variation between different rural areas within each state and

between states. The implementation of improved definitions should not result in any change in aggregate hospital payments.

Recommendation 11: Rural Hospitals

In the original PPS legislation of 1983 and the Deficit Reduction Act of 1985, the Congress required the Secretary to study and report on a number of rural hospital issues. To date, none of these studies has been submitted to the Congress. Preliminary studies by the Commission suggest that there are potential problems in the way rural hospitals are treated under PPS. To facilitate open and informed public debate of rural hospital issues, the Commission urges the Secretary to complete and publish the congressionally mandated studies as soon as possible. If the results of the Secretary's studies indicate that changes in payment policies affecting rural hospitals are warranted, appropriate modifications to current policy should be implemented as soon as possible, including legislative change, if necessary. The Commission will continue its analysis of rural hospital issues and make specific recommendations in the future if findings indicate that changes in PPS payment policy are desirable.

The Standardized Amounts

Recommendation 12: Earlier Availability of Medicare Cost Data

The Commission is pleased that the Secretary has taken steps to speed up the availability of Medicare Cost Report data from the first year of PPS. The Commission recommends that making cost data available as soon as possible be an ongoing effort, since these data are vital both to assess the relationship between PPS payments and hospital costs and to analyze the costs of individual DRGs. As part of this ongoing effort, alternative strategies for sampling hospital cost data should be considered. The necessary additional resources should be allocated for timely processing of these data.

Recommendation 13: Recalculating the Standardized Amounts

The standardized amounts used to determine hospital payments under PPS should be recalculated using cost data that reflect hospital behavior under PPS. The results of such a recalculation, with appropriate modifications, could be used in determining the update factor or in rebasing the standardized amounts.

Recalibration

Recommendation 14: Recalibrating the DRG Weights

The DRG weights should be recalibrated annually in order to reflect the use of new technologies and other practice pattern changes affecting the relative use of hospital resources among the DRGs.

Beneficiary Concerns

Recommendation 15: Beneficiary and Provider Information

The Secretary should take immediate action to provide more and better-written information about the Medicare prospective payment system to beneficiaries and providers of care. The Department should work with providers, beneficiaries, and associations of these groups to produce and disseminate this information. Associations of providers and beneficiaries should also increase their own efforts to better educate and inform their members about the Medicare prospective payment system.

Recommendation 16: Notice to Beneficiaries of Rights

Beneficiaries should be made aware of the process of reconsideration and appeal of a hospital denial of coverage for continued inpatient hospital care. Notification should be through a written notice or information bulletin. It should explain beneficiary rights in a clear, helpful, and understandable manner. In addition to a clear statement of rights, the bulletin should inform beneficiaries that they should not accept any oral communication to the effect that they must leave the hospital because their "coverage" has "run out" or because there is a limit on the number of days "allowed" by Medicare for a DRG. The bulletin should be distributed at the time of admission or as soon thereafter as is appropriate based on the

patient's clinical condition. However, additional avenues of distribution should also be developed.

Recommendation 17: PRO Episode of Care Review

The focus of PRO quality of care review should be, to the extent possible, on the entire episode of care. The PRO's review should include, in addition to the period of hospitalization, the quality of care (and outcome) related to the overall episode of illness, including, if appropriate, skilled nursing or home health care.

Recommendation 18: PRO Review of Outpatient Surgery

The Commission is concerned that efforts to shift surgical services from the inpatient to the outpatient setting could have an adverse impact on quality of care for certain Medicare beneficiaries. The PROs should be required to review and monitor the quality of care (and outcome) of outpatient surgery for selected patients and procedures. As a starting point, the PROs should be required to review outpatient surgery cases for those procedures that have been identified for preadmission review, including in particular a sample of those cases for which the PRO has denied payment on preadmission review.

Recommendation 19: Recalculating the Inpatient Hospital Deductible

The Secretary should seek legislative change to the formula for computing the inpatient hospital deductible so that the annual increase in the deductible is more consistent with the annual per-case increase in Medicare payments to hospitals. The proportion of the costs of inpatient hospital care borne by Medicare beneficiaries has inappropriately increased as a result of significant declines in length of stay experienced since the beginning of PPS. This proportion should be lowered to its calendar year 1983 level.

Patient Classification and Case Mix

Recommendation 20: Improving the Measurement of Hospital Case Mix

The Commission believes that the DRG system is currently the most appropriate of the available measures of hospital case mix for the Medicare PPS and should be retained in principle as the system upon which to base Medicare payments to hospitals. Resource use varies considerably, however, within some DRGs. Therefore, the Commission intends to continue its analysis of individual DRGs and to undertake a systematic evaluation of the entire system. The goal is to identify potential problems in DRG construction and classification and to recommend changes that will improve the homogeneity within DRGs and the equity of payments across hospitals.

Recommendation 21: Process for Maintaining and Updating ICD-9-CM

The Secretary should establish a mechanism for maintaining and updating ICD-9-CM diagnosis and procedure codes in a timely and effective manner. This process should include adequate educational support for all users.

Recommendation 22: Process for Interpretation and Assignment of Existing Codes

The Secretary should ensure that interpretation and assignment of existing ICD-9-CM diagnosis and procedure codes for payment purposes strictly adhere to coding rules and guidelines. In order to maintain the integrity and uniformity of the coding system while allowing flexibility for payment purposes, the process for interpretation and assignment of existing ICD-9-CM codes should be assigned to one authorized group.

Recommendation 23: Interim Mechanism for Coding Problems

The Secretary should establish an interim mechanism to allow early identification of new technologies, procedures, and diagnoses and more appropriate DRG assignment when ICD-9-CM codes cannot be updated in a timely manner.

DRG Classification and Weighting Factors

Recommendation 24: Adjustment of the Labor Portion of the Standardized Amounts for Some DRGs Involving Expensive Devices

The labor and nonlabor portions of the standardized amounts should be redefined for DRGs 39, 104, 105, 209, 471, and the newly defined DRGs for pacemaker implantation and replacement (Recommendations 25 and 26), implantable defibrillators (Recommendation 27), and penile prostheses (Recommendation 28). The new portions should more closely reflect the labor-related and nonlabor-related shares of costs for cases in each of these DRGs. These recalculations should be made so that total hospital payments remain unchanged.

The correct labor and nonlabor portions of the standardized amounts should be calculated from data currently being generated in the Health Care Financing Administration's (HCFA) study of the labor portion of costs by DRG. If this information proves to be incomplete, the portions should be calculated from available cost and charge data for these DRGs. The Secretary should study the need for adjustments to the labor and nonlabor portions of the standardized amounts in all DRGs.

Recommendation 25: Reclassification of Pacemaker Cases Based on Type of Device

Prior to recalibration, the DRGs involving implantation of cardiac pacemakers (currently DRGs 115 through 118) should each be restructured into two DRGs, one for cases involving dual-chamber or functionally similar pacemakers, and one for cases receiving other single-chamber pacemakers. New ICD-9-CM procedure codes should be created to distinguish between these types of cases. A mechanism should be established to evaluate the appropriateness of all implants involving dual-chamber or functionally similar pacemakers. In the initial year of this new classification, the weights for all pacemaker DRGs should be calculated using charge data from the PATBILL file and data on cost differences between pacemaker types.

Recommendation 26: Reclassification of Pacemaker Replacement Cases

Prior to recalibration, the cases involving replacement of a permanent cardiac pacemaker, except those with myocardial infarction, congestive heart failure or shock, should be reassigned to DRGs that include only pacemaker replacements.

Recommendation 27: Implantable Defibrillator

Implantable defibrillator cases should be assigned to a unique DRG. The labor and nonlabor portions of the standardized amounts should be redefined for this new DRG to reflect the labor-related and nonlabor-related shares of costs for these cases.

Recommendation 28: Penile Prostheses

Prior to recalibration, cases involving the implantation of a penile prosthesis should be removed from DRG 341 and reassigned to a unique DRG. The labor and nonlabor portions of the standardized amounts should be redefined for this new DRG to reflect the labor-related and nonlabor-related shares of costs for these cases.

Recommendation 29: Additional Payment for Magnetic Resonance Imaging

For a period of three years, Medicare should pay hospitals an additional amount (hereafter termed an add-on) for each covered magnetic resonance imaging (MRI) scan performed on an inpatient Medicare beneficiary in a PPS hospital. Under existing capital payment policy, the add-on for fiscal year 1987 should be $124 for each scan performed on beneficiaries in institutions where Medicare pays for the capital costs of an MRI scanner and $282 for each scan performed on beneficiaries in other PPS hospitals. In fiscal year 1988 and fiscal year 1989, the add-on amounts for all hospitals should be recalculated to reflect any change in the average cost of an efficiently produced scan and any changes in capital payment policy.

10

Recommendation 30: Extracorporeal Shock Wave Lithotripsy

Prior to recalibration, cases in which extracorporeal shock wave lithotripsy (ESWL) is the principal procedure should temporarily be removed from DRG 324 and reassigned to DRG 323. The payments and costs for all cases in this DRG should be monitored to determine the appropriateness of PPS payments for operating costs. A unique procedure code should be identified for ESWL.

Recommendation 31: Lymphomas and Leukemias

Prior to recalibration, cases currently assigned to DRGs involving lymphoma, leukemia, and other related diagnoses (DRGs 400-404) should be reclassified into one of five newly defined DRGs. The new classification should provide a unique DRG for acute leukemia cases not involving a major operative procedure, eliminate age as a criterion for DRG assignment, and modify present classification based on operative procedure, complications and comorbidity. Other ways of further improving these DRGs should continue to be explored.

Recommendation 32: Upper Extremity Procedures

Prior to recalibration, cases involving procedures of the upper extremity that are currently classified in DRGs 223, 224, 228, and 229 should be reassigned based on anatomical location and the presence of systemic collagen vascular disease or implantation of joint prostheses or complications and/or comorbidities. Nonsurgical hip fracture cases currently being assigned to DRGs 223, 224, 225, 228, and 229 should be reassigned to the appropriate medical DRG.

Data Development and Research

Recommendation 33: Maintaining a Commitment to Data Development and Research on PPS

The Secretary should continue to devote substantial resources to data development and research for monitoring and improving PPS and understanding its effects on the health care system. Studies mandated by the Congress that are already due should be completed and made public as soon as possible, and new studies that analyze more recent data should be designed and implemented as soon as possible. While ProPAC and other organizations will participate in this process, the major commitment to PPS data development and research must reside in the Department of Health and Human Services.

Chapter 1

Introduction and Commission Priorities

The Medicare prospective payment system (PPS) for payment of inpatient hospital services was enacted by the Social Security Amendments of 1983 (Pub. L. 98-21). In the same legislation, the Congress created the Prospective Payment Assessment Commission (ProPAC) to advise the executive and legislative branches on maintaining and updating PPS.

This report to the Secretary of the Department of Health and Human Services (HHS) contains the Commission's recommendations for updating and modifying Medicare's prospective payment system for inpatient hospital care. This chapter describes the Commission's role and responsibilities. It also summarizes major policy changes and issues in health care financing during the past year. Finally, it describes the priorities ProPAC has established to govern its functions and decision making. Chapter 2 contains the Commission's recommendations; Chapter 3 describes analyses and studies ProPAC has under way or plans for the future.

THE PROSPECTIVE PAYMENT ASSESSMENT COMMISSION: ITS ROLE, RESPONSIBILITIES, AND PROCESSES

The Congress established ProPAC as a permanent, independent commission with responsibilities related to maintaining and updating the new payment system. The 15 Commission members are appointed by the director of the Office of Technology Assessment (OTA), the Congress of the United States. Members are selected, as required by the law, to provide independent expertise in health care delivery, financing, and research. (Biographies of current Commission members appear in this report's appendix.)

Commission Role and Responsibilities

The role of the Commission is to function as a highly knowledgeable, independent panel that provides analysis of and advice on PPS to the executive and legislative branches of the Federal government. This report fulfills the Commission's two primary responsibilities mandated by Pub. L. 98-21. These are to:

- Recommend annually to the Secretary of the Department of Health and Human Services the appropriate percentage change in the Medicare payments for inpatient hospital care, called the "update factor," which is applied to the previous year's payment rates.
- Consult with and recommend to the Secretary of the Department of Health and Human Services necessary changes in diagnosis-related groups (DRGs), including advice about establishing new DRGs, modifying existing DRGs, and changing the relative weights of the DRGs.

Besides the report and recommendations submitted in April to the Secretary for consideration in rulemaking, each fall the Commission reports to the Congress its evaluations of adjustments made by the Secretary. ProPAC also reports to the Congress annually about the overall effects of PPS on American health care delivery and financing, and provides other reports and analyses to the Congress as requested.

Commission Processes

The Commission has established a subcommittee structure to facilitate its work. ProPAC holds open meetings and solicits comment and involvement from groups or people with information relevant to its responsibilities. To enhance the Commission's communications with the public, all meetings are announced in the *Federal Register*. ProPAC maintains a mailing list and schedules public comment periods at each open Commis-

sion and subcommittee meeting. Formal notice has been published in the *Federal Register* (50 Fed. Reg. 2657 [1985]) describing the process for interested parties to use in submitting information to the Commission. The Commission also has adopted a general policy statement. This statement, along with information about the subcommittee structure and Commission meeting dates, is published in this report's appendix.

The Commission requested and received, through the congressional appropriations process, a budget of $3.2 million to carry out its work in fiscal year 1985; a slight increase to approximately $3.3 million was approved for fiscal year 1986. These funds support the administrative, research, and analytic work of the Commission and an executive director and staff of no more than 25.

This report does not explain the background or operation of the prospective payment system. Rather, the Commission assumes that the reader has a general understanding of PPS. Historical perspectives on PPS and a full description of the system are found in the Commission's *Report and Recommendations to the Secretary, U.S. Department of Health and Human Services, April 1, 1985* and the report's *Technical Appendixes*. The 1985 report is available through the Government Printing Office, Superintendent of Documents.

CHANGES IN HEALTH FINANCING AND PUBLIC POLICY SINCE APRIL 1985

In the past year, the Federal policy debate has been dominated by the subject of reduction of the large national deficit. Because the Medicare program represents such a significant proportion of Federal spending (an estimated $74 billion in fiscal year 1986), the course of the debate is critical to those concerned about health financing policy, and the Commission monitored it closely. The debate culminated with the enactment in December 1985 of the Gramm-Rudman-Hollings Balanced Budget and Emergency Deficit Control Act of 1985, Pub. L. 98-177.

Congressional actions to reduce the deficit and to make other policy-related Medicare and PPS changes were similarly monitored. At the time the Commission adopted the recommendations contained in this report, 1986 Medicare PPS regulations had not been implemented due to congressionally mandated postponement.

While the Commission understands the reasons for the delay, it regrets that several major operational changes recommended by ProPAC and adopted by the Secretary in regulations were not implemented. The Commission is especially concerned about delays in the PPS recalibration process, which is designed to ensure that the system operates with DRG weights that represent the most current data base reflecting recent changes in medical practice patterns and technology.

Other policy concerns that surfaced during this time are of equal and continuing concern to the Commission. Many are addressed in ProPAC's recommendations and future priorities for work (see Chapters 2 and 3). Of particular importance to the Commission were congresssional hearings and media reports indicating that PPS might have adversely affected the quality of care that Medicare beneficiaries receive. While this subject is discussed elsewhere in this report, the Commission reiterates its commitment to continuing careful and thoughtful monitoring of this area.

There are serious methodological difficulties in measuring quality of care, and the definition of high-quality medical care may vary among individuals. The Commission believes, however, that there is a strong *perception* among some beneficiaries, physicians, and other providers that quality of care has already deteriorated under PPS or may deteriorate in the future. ProPAC will work to ensure that adequate systems are developed and implemented to monitor quality of care under PPS so that high-quality care will continue to be available to Medicare beneficiaries.

PRIORITIES AND CONCERNS OF THE PROSPECTIVE PAYMENT ASSESSMENT COMMISSION

In its April 1985 report, the Commission set forth a list of cross-cutting priorities to guide all of its analysis and decision making. These priorities have again served to form the underlying basis of ProPAC's work. They are to:

- Maintain access to high-quality health care,
- Encourage hospital productivity and long-term cost-effectiveness,
- Facilitate innovation and appropriate technological change,
- Maintain stability for providers, consumers, and other payers, and
- Base decisions on reliable, timely data and information.

Maintaining Access to High-Quality Health Care

The Commission's paramount concern with the maintenance of quality of care has been expressed. With its altered financial incentives for hospitals, PPS has created the challenge of maintaining quality health care while restraining health care costs. Hospitals that are paid a fixed amount per type of case by Medicare and other payers (who adopt PPS or use other competitive strategies like preferred provider organizations) can no longer be indifferent to the resources expended in patient care. PPS encourages a reduction of hospital inputs—tests, special procedures, supplies, equipment, personnel time, and hospital days—because hospitals can lower their costs only by controlling resources devoted to inpatient stays. Clearly, as the increase in hospital spending is slowed and cost savings are realized, the need to develop methods to detect adverse effects on quality and access is intensified.

The Commission strongly perceives its role as supporting the establishment of payment rates that will enable hospitals to continue to deliver high-quality health care. The DRG classifications and weights must be modified appropriately to reflect changes in medical practice. Similarly, the update factor must be adequate to enable hospitals to expend the resources required to maintain the appropriate amount and type of care.

As it is reflected in this report, the Commission has begun active examination of quality issues. ProPAC's work in this area will continue and will intensify in the future.

Encouraging Hospital Productivity and Long-Term Cost-Effectiveness

The Commission's concern for maintaining quality under PPS is accompanied by a parallel concern for promoting productivity and long-term cost-effectiveness of the health care system.

PPS uses the diagnosis-related groups to classify patients and define the hospital product. Hospital care is only one of many "products" that contribute to improvement in health status. Other modes of care outside of the hospital also contribute to improved health. Thus, the Commission will look beyond the hospital setting to assess and measure productivity in the context of PPS.

PPS provides incentives for improving productivity and cost-effectiveness of services. PPS also creates incentives to move services to other settings. If these services can be provided at lower cost and equal quality in other settings, such a move should be encouraged. Adjustments need to be made in hospital payments to reflect the movement of services to alternative sites, however, to avoid paying for services twice—once in the hospital DRG payment and again in payment for substitute services.

ProPAC is also concerned that the emphasis on reducing costs may deter the adoption of new services and technologies that may initially increase costs, even though in the long-run they may improve patient care, productivity, and cost-effectiveness. The Commission's work will continue to carefully assess this potential problem.

Facilitating Innovation and Appropriate Technological Change

The Commission believes the Medicare prospective payment system should have an unbiased effect on technological advancement. PPS payment levels should not inhibit the development or diffusion of new technologies and practices, nor should payment levels result in their inappropriate adoption. Instead, technology and practices should be examined in light of both long- and short-term potential effects on quality and productivity.

In reviewing the potential effects of PPS on the adoption of new technologies and practices, the Commission must consider whether payment policies and amounts are sufficient to enable hospitals to adopt them. ProPAC has addressed these concerns by examining a series of options for adjustments to PPS that could help foster the appropriate adoption of new technologies. Continued analysis of these types of problems is a high priority for the Commission. One approach is to adjust the current DRG weights to reflect changes in technology and practice patterns. In addition, the Commission has considered—and will continue to explicitly consider—scientific and technological advances as part of recommendations related to the update factor.

Maintaining Stability for Providers, Consumers, and Other Payers

The Commission believes that in an environment where health care delivery and financing are changing rapidly, its recommendations should provide as much predictability and stability as possible. During its deliberations, the Commission has identified many problems which are described throughout this report. Equitable and workable solutions are much more difficult to develop. The Commission has made only those recommendations it considers most important and amenable to well-informed decision making.

The Commission's philosophy in decision making has been to act where there is immediate need for change and to allow the new PPS to become fully mature and operational—and stable—before suggesting new approaches or significant alterations.

Decision Making Based on Reliable, Timely Data and Information

The Commission's major contribution to the maintenance and evolution of the maturing PPS is the development of recommendations grounded in quantitative data and analytic reasoning, tempered by judgment and experience. The availability and use of accurate, timely data and information, analyzed and presented without bias as a basis for decision making, are critical priorities of the Commission and its staff. The Commission will continue to strive to fulfill a role in which its approach is always to inform itself with the best and most timely information available before making recommendations.

Chapter 2

Recommendations

The Commission's recommendations for fiscal year 1987 are the result of a process of agenda-setting, information collection, analysis, and deliberation continuing from publication of the April 1985 report to the Secretary. ProPAC selects issues for consideration to conform with its statutory mission and to contribute to an open policy debate on matters of substantial importance to beneficiaries, hospitals, and the Medicare program. The Commission's recommendations, with the analysis and reasoning that accompany them, are intended to inform the policy debate that will result in both regulatory and statutory changes in PPS.

The recommendations reflect the collective judgment of the full Commission. In some cases, however, individual commissioners did not always agree with the majority opinion.

Some recommendations, such as those that pertain to the annual update of payment rates, will be repeated in similar format every year. Others, such as the definition of hospital labor market areas, are elaborations or extensions of recommendations that ProPAC developed before this year. Finally, several issues are addressed in the Commission's recommendations for the first time.

Recommendations made previously, but not yet implemented by the Secretary, are still in effect. For example, the Commission considers it important for the Secretary to implement the 1985 recommendations concerning the hospital market basket, even though there are no additional recommendations on this topic this year.

Concern for reducing the Federal deficit and attaining a balanced budget were dominant public policy issues during the period in which these recommendations were developed. It is the role of the Congress rather than the Commission, however, to determine the extent to which Medicare payments should be reduced in light of the Federal deficit. While ProPAC did not explicitly take these budgetary concerns into account, the recommendations were developed in recognition of a very constrained fiscal environment. Furthermore, the Commission believes that budgetary pressures intensify the need to address technical issues related to the updating and distribution of payments that may bear on the quality of care furnished to Medicare beneficiaries.

The following discussion presents an overview of the Commission's 33 recommendations for fiscal year 1987, which are discussed in detail later in the chapter. Background information, statistical analyses, and alternative options are in the Technical Appendixes. The issue areas addressed by the Commission are:

- The update factor,
- Capital,
- Adjustments to the payment formula,
- Standardized amounts,
- Recalibration,
- Beneficiary concerns,
- Patient classification and case mix,
- DRG classification and weighting factors, and
- Data development and research.

20

OVERVIEW OF THE COMMISSION'S RECOMMENDATIONS FOR FISCAL YEAR 1987

The Update Factor

The PPS statute requires the Commission to:

> . . . take into account changes in the hospital market basket . . ., hospital productivity, technological and scientific advances, the quality of care provided in hospitals (including the quality and skill level of professional nursing required to maintain quality care), and long-term cost-effectiveness in the provision of inpatient services,

in making its recommendations on the update factor. The Commission is required to report its recommendations on the update factor to the Secretary of Health and Human Services no later than April 1 of each year, and

> . . . taking into consideration the recommendations of the Commission, the Secretary shall determine . . . the percentage change . . . which will take into account amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality.

Recommendation 1 reflects the Commission's overall judgment of the appropriate change in the level of payment per Medicare discharge in PPS hospitals for fiscal year 1987. The Commission believes its responsibility under the statute is to be as specific as possible in making its recommendation on the update factor. Therefore, the Commission has provided an interim estimate of the recommended update. Because several of the components of the update factor will probably change as a result of the receipt of new data before publication of the final rules for fiscal year 1987, the Commission's overall numerical recommendation is likely to be modified. The Commission will publicize its revised recommendation on the update factor during the rulemaking process.

Recommendations 2 and 3 cover the discretionary components of the update factor, which reflect considerations other than inflation in the market basket of hospital input prices. Recommendation 2 consists of a combined allowance for scientific and technological advancement and productivity goals and for changes in the site of services delivered to Medicare hospital inpatients. Recommendation 3 is an allowance for changes in patient mix and complexity that are not otherwise provided for in the PPS payment structure. Recommendation 4 satisfies the Commission's statutory obligation to recommend an update factor for hospitals and distinct-part units of hospitals excluded from PPS.

Capital

When the Commission established its agenda for the April 1986 report, it decided to examine PPS capital payment issues, expecting that the Administration's congressionally mandated capital payment report and proposal would have been published by early 1986 at the latest. In the fall of 1985, ProPAC began its work on capital by reviewing issues and developing principles for evaluation of capital payment proposals advanced by the Administration and others. In late 1985, it became evident that the Administration planned to address capital payment under PPS through regulation, without early publication of a detailed plan and analysis of options. The Commission then decided to develop recommendations related to components of a system for paying for capital under PPS without committing itself to the construction of a complete proposal for capital payment.

Early in its deliberations on capital payment, the Commission developed principles to guide the development of its recommendations. The principles regarded as most important are that the capital payment system should:

- Provide neutrality between capital and operating cost trade-offs,
- Reflect capital intensity variations across the DRGs, and
- Contribute to controlling aggregate expenditures and the level of capital growth.

These principles, which are more fully described in Technical Appendix A, are reflected in the Commission's recommendations on capital payment.

Recommendations 5 through 8 address the following capital payment components:

- The inclusion of capital in an all-inclusive price,
- The method for incorporating a capital component into PPS payments,
- The level at which capital payment is brought into PPS, and
- The transition from individual hospital capital payments to a fully implemented prospective system.

Although the capital payment recommendations do not constitute a comprehensive proposal, and other decisions are necessary before implementation, the Commission thinks its recommendations are a solid foundation for a fair and efficient system. As the discussions accompanying Recommendations 5 through 8 and in Chapter 3 indicate, the Commission will continue to address technical and policy issues concerning capital payment after publication of this report. It will also carefully review the detailed proposal that will be published by the Administration in its proposed regulations covering PPS changes for fiscal year 1987.

As of this writing, hospitals are scheduled to be paid fully national rates for operating payments beginning in fiscal year 1987. Action on the fiscal 1986 reconciliation bill or other legislation may extend the transition for operating payments, however. If a delay is enacted, the Commission will consider implications for implementation of capital payment under PPS and whether the capital payment transition should be coordinated with the operating payment transition.

The Commission's recommendations should not be construed as an endorsement of the Secretary's intention to implement capital payment under PPS by regulation rather than by seeking statutory change. The PPS statute requires the Commission to make all of its April report recommendations to the Secretary. Legislative proposals for capital payment already have been introduced in the Congress, and further proposals and modifications are likely. ProPAC will continue to share its data and analyses on this issue with legislative offices that are examining alternative capital payment strategies.

Adjustments to the Payment Formula

The Commission believes that the ways in which the PPS payment formula distributes payments to hospitals are extremely important both to Medicare beneficiaries and to interhospital equity. Payments that are adequate, on average, may be insufficient for certain types of hospitals and the beneficiaries who depend on these hospitals. Recommendations 9 through 11 address the distributional consequences of the PPS payment formula.

Recommendations 9 and 10 concern issues that were addressed in the 1985 April report. In Recommendation 9, the Commission reaffirms its conviction that hospitals serving a disproportionate share of low-income patients should receive an allowance under PPS to cover the added Medicare costs associated with their care. ProPAC supports the way the Congress approached this problem during the 1985 reconciliation process. It believes, however, that a reiteration of the recommendation is called for because no payment adjustment had been implemented by the time this report was written. In Recommendation 10, the Commission expands its 1985 recommendation on the definition of hospital labor market areas. This year, based on information it has collected, ProPAC recommends more detailed changes and will be even more specific during the rulemaking period.

In Recommendation 11, the Commission addresses issues related to the treatment of rural hospitals under PPS. The Commission is concerned that PPS may unduly place these hospitals and the beneficiaries they serve at a disadvantage. More information needs to be collected, however, before determining whether specific changes in the payment system are necessary. ProPAC's concerns include both individual components of the payment system and broad issues, such as the appropriateness of perpetuating differences in payment rates based on the historically lower costs of rural hospitals and, more generally, the appropriateness of the payment system for hospitals that tend to be small and isolated.

The Standardized Amounts

In the April 1985 report, the Commission recommended recalculating the standardized amounts with cost data reflecting hospital experience under PPS. This year, ProPAC expands its position on the standardized amounts in Recommendations 12 and 13. It is important to have cost data available as soon as possible after the end of hospital accounting years, and in Recommendation 12 the Commission urges exploration of alternative strategies to ensure early availability of such data. In Recommendation 13, the Commission again recommends recalculation of the standardized amounts with more current data. The results of the recalculation might be used to rebase the standardized amounts or to help determine the update factor for the upcoming year.

Recalibration

In Recommendation 14, the Commission states its belief that the DRG weights should be recalibrated annually. The accompanying discussion presents recommended steps in the recalibration process and further adjustment of the weights to remove observed changes in the DRG case-mix index. Even though the PPS statute requires recalibration only every four years, the benefits of annual recalibration far outweigh the associated administrative costs. Annual recalibration is especially desirable in view of evidence of rapidly changing patterns of medical practice in recent years.

Beneficiary Concerns

Chapter 1 cited quality of care under PPS as a paramount concern of the Commission since its inception. In Recommendations 15 through 18, the Commission notes ways in which quality of care can be maintained or improved under PPS. These recommendations do not cover the full range of ProPAC's concerns about quality, however. The Commission will continue to address quality in its analytic agenda and in future recommendations.

In Recommendations 15 and 16, the Commission responds to evidence of misinformation that, if not corrected, may be detrimental to Medicare beneficiaries. The Commission believes that both beneficiaries and providers need to be better informed about PPS. Existing misperceptions, particularly about length of stay limits imposed by PPS, should be dispelled immediately. In addition, beneficiaries should be systematically informed of their rights when hospitalized, including the process for appealing hospital denial of continued inpatient services.

In Recommendations 17 and 18, the Commission focuses on expanding the review activities of Peer Review Organizations (PROs) to include a broader range of quality-of-care considerations than those limited to the inpatient stay. The Commission believes that the PROs should examine the entire episode of care, which includes, but is not always limited to, an inpatient stay. Further, when PROs determine that inpatient surgical services are unnecessary, they should be required to monitor quality of care when surgery is performed on an outpatient basis. Both recommendations derive from a concern that changes in medical practice patterns partially attributable to PPS incentives may be accompanied by deterioration in quality of care if the effects of these changes are not monitored.

The Commission's concern for beneficiary welfare under PPS is not confined to quality of care issues. In Recommendation 19, the Commission notes that the inpatient hospital deductible has inappropriately risen partly because of declining length of stay under PPS. It recommends that the formula for setting the deductible be changed to be more consistent with the per-case orientation of PPS. The deductible should be reduced to the same proportion of the cost of an inpatient stay as was in effect before PPS implementation. Although this reduction would increase government outlays, it was never intended that PPS would increase the proportion of Medicare expenditures borne by beneficiaries.

Patient Classification and Case Mix

The April 1985 report identified several potential problems with the use of DRGs for prospective payment. In Recommendations 20 through 23, the Commission addresses some of these problems and states its intention to continue to explore ways to improve the DRGs for payment pur-

poses. The current DRG system should be retained for the time being, with improvements effected through incremental change. As stated in Recommendation 20, however, the Commission will systematically evaluate the DRG system. The Commission also calls for improvements, in Recommendations 21 through 23, in the International Classification of Diseases (ICD- 9-CM) coding system and the ways in which its codes are adapted for use in PPS.

DRG Classifications and Weighting Factors

The PPS statute requires the Commission to:

> . . . consult with and make recommendations to the Secretary with respect to the need for adjustments [in classifications and weighting factors] . . . based on its evaluation of scientific evidence with respect to new practices, including the use of new technologies and treatment modalities.

These adjustments refer to the system for:

> . . . classification of inpatient hospital discharges by diagnosis-related groups and a methodology for classifying specific hospital discharges within these groups.

They also relate to the assignment of:

> . . . an appropriate weighting factor [to each diagnosis-related group] which reflects the relative hospital resources used with respect to discharges classified within that group compared to discharges classified within other groups.

To the extent possible, the Commission attempts to develop generic solutions to DRG classification and weighting problems so that its decisions will apply to several DRGs. In Recommendation 24, for example, the Commission addresses the general problem of pricing DRGs that include cases using expensive devices. Changes in the treatment of several specific DRGs are recommended, and the methodology the Commission proposes might also be applied to other DRGs.

Recommendations 25 through 32 concern DRG classification, weighting, and pricing issues covering a broad range of medical technologies and procedures:

- DRG classification of pacemaker cases (Recommendations 25 and 26),
- DRG classification and weighting for cases involving implantable defibrillators and penile prostheses (Recommendations 27 and 28),
- Supplementary payment for cases involving magnetic resonance imaging (Recommendation 29), and
- DRG classification and weighting for cases involving extracorporeal shock wave lithotripsy, lymphomas and leukemias, and upper extremity procedures (Recommendations 30 through 32).

The Commission realizes that its recommendations in these areas, if implemented, would add DRGs and increase the complexity of the PPS system. Nevertheless, ProPAC is convinced that these changes would improve payment equity and reduce hospital reluctance to adopt quality-enhancing new technologies. The benefits of these changes to beneficiaries would far outweigh any corresponding increases in administrative costs.

Data Development and Research

In Recommendation 33, the Commission expresses its belief that PPS requires extensive analysis with more recent data in order to understand its consequences for hospitals and beneficiaries and to effect improvements. Most of the analysis of PPS done by HHS and the Commission has utilized data that reflect only a relatively brief period of hospital payment under PPS. The Commission therefore recommends that HHS should continue to devote substantial resources to the PPS data development and research effort. The Commission's own plans for data development and research on PPS issues are described in Chapter 3.

24

RECOMMENDATIONS FOR FISCAL YEAR 1987

The Update Factor

Recommendation 1: Amount of the Update Factor for PPS Hospitals

For fiscal year 1987, the standardized amounts should be updated by the projected increase in the hospital market basket, adjusted by the following:

- **A correction factor for substantial errors previously made in forecasting inflation for fiscal year 1986, and**
- **A discretionary adjustment factor of minus 0.5 percentage points composed of two allowances:**
  - **—A minus 1.4 percent allowance for scientific and technological advancement, productivity change, and site-of-care substitution, and**
  - **—A 0.9 percent allowance for real case-mix change.**

In addition, the DRG weights should be adjusted to remove any increase in observed case mix occurring during fiscal year 1986.

This recommendation reflects the Commission's collective judgment of the appropriate change in the level of payment per Medicare discharge under PPS, assuming that the Commission's other concerns regarding the market basket component of the update factor, the DRG weighting factors, and the distribution of payments across PPS hospitals are also addressed. The Commission's recommendation regarding the level of capital payments would also affect per-discharge Medicare payments to hospitals.

The Commission's current estimate is that this recommendation is likely to lead to a 2.8 percent increase in the per-case PPS payment amounts for fiscal year 1987. The estimate includes the adjustment to the DRG weights for all observed changes in the DRG case-mix index. The numerical amount of the Commission's update factor recommendation will probably change in coming months as more recent market basket forecasts and more information regarding changes in hospital case mix become available. The table below summarizes the components of the Commission's update factor recommendation.

The update factor should be applied to the standardized amounts as they exist at the end of

Estimated Increase in PPS Payment Amounts For Fiscal Year 1987 Under Commission Recommendations

Fiscal Year 1987 Market Basket Increase		4.6%[a]
Correction For Market Basket Forecast Errors In Fiscal Year 1986		−0.3[b]
Discretionary Adjustment Factor		−0.5
Scientific And Technological Advancement	0.7[c]	
Productivity	−1.5	
Site Substitution	−0.6	
Real Case-Mix Change In Fiscal Year 1986	0.9	
DRG Case-Mix Index	0.2[d]	
Within-DRG Patient Complexity	0.7[e]	
Subtotal (Update In Standardized Amounts)		3.8
Observed Change In Case-Mix Index (Adjustment Made To DRG Weights After Recalibration)		−1.0[d]
Total Change In DRG Prices		2.8[f]

[a] Data Resources Inc. (DRI) forecasts based on actuals through calendar year 1985. This estimate takes into account the Commission's April 1985 recommendation for changing the treatment of wages in the hospital market basket. The DRI forecast for the current MCBA market basket is 4.4 percent.

[b] ProPAC estimate comparing DRI forecasts based on actuals through calendar year 1984 to forecasts based on actuals through the third quarter of 1985. The estimated adjustment here excludes errors in forecasting internal price proxies, as recommended by the Commission in its April 1985 report.

[c] In addition to this allowance, the Commission's recommended add-on for Magnetic Resonance Imaging scans would increase payments to hospitals. If capital is added to PPS in fiscal year 1987 at a level lower than projected under current law, this component should be higher.

[d] For this report, the Commission has incorporated a one percent reduction in the DRG weights to account for observed changes in the DRG case-mix index during fiscal year 1986, although this figure may change as more recent data are reported. Based on historical trends, we estimate that the portion of this increase due to real changes in DRG case mix is 0.2 percentage points.

[e] Estimate based on data from the Commission on Professional and Hospital Activities through 1984. The estimate may change once 1985 data become available.

[f] As recommended by the Commission, the addition of capital would increase PPS payment amounts. Compared to the current law projection, however, ProPAC estimates that its capital recommendation would reduce capital payments by 10 percent in fiscal year 1987 and about 22 percent over the next five years.

fiscal year 1986. The final level of the 1986 amounts depends on the outcome of the budget reconciliation legislation, which would increase the amounts by 0.5 percent, and the Supreme Court ruling on the constitutionality of the Gramm-Rudman-Hollings deficit-reduction act, which lowered payments to hospitals by 1 percent beginning in March 1986. The actual increase in per-case payments to hospitals may be higher than the update factor if the overall DRG case-mix index increases during fiscal year 1987.

The Commission's recommendation for fiscal year 1986 would have increased payment amounts by 1.5 percent. ProPAC does not believe, however, that the difference between that recommendation and the actual amounts hospitals received is significant enough to take directly into account in determining the fiscal year 1987 update factor. Payments to hospitals may have been higher than reflected in the update factor due to changes in the DRG case-mix index. Moreover, analysis by the Commission and others indicates that the Federal portions of the original PPS rates were higher than intended.

Furthermore, overall the hospital industry appears to be financially healthy. Medicare's policy of continued cost reimbursement for capital has contributed to this financial health. Because of these factors, the Commission believes that applying its recommended update factor for fiscal year 1987 to the actual fiscal year 1986 amounts would be appropriate. This update would provide an aggregate payment level adequate to ensure the provision of accessible, cost-effective, quality inpatient hospital care to Medicare beneficiaries. If, however, future updates received by hospitals are substantially different from recommended levels, the Commission will consider these differences in developing its update factor recommendations.

ProPAC believes that the principle of correcting for the previous year's market basket forecast errors should be applied in determining the update factor each year. It can be argued, however, that hospitals should not have rates adjusted downward in fiscal year 1987 because there was no increase in the payment amounts in fiscal year 1986. On the other hand, the market basket forecast was used by the Secretary in developing fiscal year 1986 recommendations, although the market basket increase was offset by other factors.

In the current environment of fiscal stringency, an estimated 2.8 percent increase in PPS payment amounts for fiscal year 1987 may seem unduly high. Hospitals received no increase for the first half of fiscal year 1986, and may receive a net reduction for the second half of the year if the Gramm-Rudman-Hollings deficit-reduction act is upheld. The President's proposed budget for fiscal year 1987 estimates a 2.0 percent increase in PPS payment rates. The Commission's recommended increase is very stringent compared to historical trends in Medicare payments to hospitals, however. Between 1972 and 1983, these payments averaged about 3 percentage points *above* inflation, whereas the Commission estimates its recommendation for fiscal year 1987 to be 1.5 percentage points *below* inflation.

In its April 1985 report, the Commission made a number of recommendations for change in the hospital market basket. It is pleased that the Health Care Financing Administration has these recommendations under study, and hopes that appropriate changes are made for the fiscal year 1987 update factor. In particular, the Commission believes that wages should be treated differently in the market basket. In addition, the forecast error correction should be applied only to substantial errors in the external price change measures, and the market basket weights should be rebased. Other components of the update recommendation are addressed in more detail in the discussions accompanying Recommendations 2 and 3. Adjusting the weights to remove all observed case-mix change is discussed in Recommendation 14.

Other recommendations would also affect Medicare payments to hospitals. Recommendations 5 through 8 address the inclusion of capital payments in PPS. The addition of capital would increase per-case PPS payment amounts. But because the level at which the Commission recommends the addition of capital payments is lower than that forecasted for fiscal year 1987 under the current pass-through, the recommendation represents an estimated 10 percent reduction in per-case capital payments to hospitals from the cur-

rent law projection. Over five years, the reduction would be about 22 percent compared to a continuation of cost pass-through payment for capital. This reduction would represent less than 3 percent of total Medicare payments to hospitals during the five-year period.

Recommendation 29 would implement additional payments to hospitals for patients receiving a magnetic resonance imaging scan (MRI). This add-on would have a limited financial effect in the first year of implementation. Under the Commission's approach, all such increases in payment would be offset by reductions in the scientific and technological advancement component of the discretionary adjustment factor.

Recommendation 2: Allowance for Scientific and Technological Advancement and Productivity Goals, and Site-of-Care Substitution

For the fiscal year 1987 payment rates, the allowance in the discretionary adjustment factor for scientific and technological advancement, productivity improvement, and substitution in the site of service from inpatient to out-of-hospital settings should be set at minus 1.4 percentage points.

The Commission's update factor is composed of two overall elements—the hospital market basket inflation factor and the discretionary adjustment factor. The discretionary adjustment factor (DAF) is the quantitative expression of the Commission's judgment regarding the rate at which the Medicare standardized amounts should increase or decrease beyond inflation in the hospital market basket. This judgment reflects considerations outlined in the statute as well as other factors that ProPAC determines are important.

The Commission believes that its recommendation for the DAF results in an update factor which represents the smallest rate of increase that is consistent with maintaining high-quality services and sufficient access to hospital care for Medicare beneficiaries. While the Commission's recommendations do not explicitly take into account budgetary considerations related to the Medicare Hospital Insurance Trust Fund's solvency or the Federal deficit, they were developed in recognition of a very constrained fiscal environment.

The Commission recognizes that actions to reduce the Federal deficit could have a significant effect on the fiscal year 1987 update factor. Nevertheless, the Commission believes that the DAF should reflect its best judgment about the amount necessary to provide efficient, effective hospital inpatient services after accounting for inflation.

In constructing the DAF, the Commission is concerned with identifying factors that produce a change in the average cost of a discharge and determining the effect of these changes on the standardized amounts. The Commission recognizes that many factors can affect the average cost per case, and that it is difficult to develop precise estimates for the effect of individual factors. Because these factors are so closely related, available data frequently reflect more than one DAF component. For example, length-of-stay reductions reflect hospital productivity changes as well as shifts of services from inpatient to out-of-hospital settings.

Nevertheless, the Commission has attempted to allocate its fiscal year 1987 estimate of the overall discretionary adjustment factor to the following four components considered in its development: (1) scientific and technological advancement, (2) hospital productivity change, (3) site-of-care substitution, and (4) real case-mix change. A numeric allowance was developed for each component, after consideration of the interrelationships among the components. These allowances represent broad guidelines; they do not imply a high degree of precision or specificity in the estimation of the individual components.

DAF component	*Percentage allowance*
Scientific and Technological Advancement	+0.7
Hospital Productivity	−1.5
Site-of-Care Substitution	−0.6
Net Adjustment (Before Inclusion of the Allowance for Real Case-Mix Change)	−1.4
Real Case-Mix Change (Recommendation 3)	+0.9
DAF Total	−0.5

In total, the Commission recommends that the fiscal year 1987 update factor include a 0.5 per-

cent reduction to accommodate the considerations outlined in the DAF recommendation, compared to a 0.2 percent reduction recommended for fiscal year 1986. The numeric value of the Commission's DAF recommendation is subject to change in the next few months as more recent information on hospital case-mix change becomes available.

The Commission began the development of an overall DAF recommendation by examining trends in net intensity per admission. Net intensity is a measure of hospital expenditure changes after taking inflation into account. Changes in net intensity per admission reflect changes in productivity, case mix, and patterns of practice as well as errors in the measurement of input prices and time lags between input price increases and expenditure increases. Measures of net intensity also reflect increases in capital expenses that are currently not included in the standardized amounts.

Net intensity per case grew 3.9 percent during the first eight months of 1985—a rate of growth that is consistent with the pre-PPS long-term trend of double the real growth in the general economy. The Commission continues to believe that future growth in hospital expenditures should be constrained to reflect a balance between long-term growth in the hospital industry and in the rest of the economy.

The continued intensity growth in the hospital industry, however, masks some important changes under PPS. Measures of intensity are highly volatile and sensitive to short-term shifts in volume. The recent increase in net intensity per case can be largely attributed to decreases in admissions rather than to increases in hospital expenses. While net intensity per case increased 3.9 percent in the first eight months of 1985 compared to 1.7 percent in 1984, hospital admissions decreased 6 percent. Total inpatient expenses adjusted for inflation decreased in 1985. This suggests that reductions in net intensity are achievable as the hospitals adjust their use of resources to a lower volume of admissions.

Based on these overall considerations, the Commission has recommended a small negative aggregate allowance for the DAF. The remainder of this discussion addresses the first three components of the DAF recommendation for fiscal year 1987. The fiscal year 1987 adjustment for real case-mix change is addressed in Recommendation 3 and its accompanying discussion.

Scientific and Technological Advancement.—The scientific and technological advancement allowance is a future-oriented policy target. It reflects the Commission's judgment of the financial requirements for hospitals to implement quality-enhancing, cost-effective, but cost-increasing health care technologies and practices. This allowance reflects the judgment that the hospital industry will not and should not experience the same rate of growth as in the past decade. Nevertheless, a sufficient allowance must be provided to allow the industry to keep pace.

The Commission believes that advances resulting in greater efficiency for the hospital do not require a special allowance since they should ultimately be reflected in lower costs. The Commission also believes that scientific and technological innovations that neither improve quality or effectiveness nor lower costs are not relevant for consideration under the DAF since these innovations do not represent any real advancement. Those that contribute to changing the effectiveness and quality of hospital services may or may not contribute to increasing the cost of care.

This allowance represents the Commission's judgment about the funds required to cover increased hospital operating expenses related to the addition of both low- and high-cost quality-enhancing, cost-effective technologies. It reflects ProPAC's recognition that most of the requirements for funding technology in any given year result from the diffusion of existing technologies rather than from the introduction of new technologies. This allowance also reflects increased expenses attributable to changes in practice patterns that enhance quality and effectiveness but are not included in the allowance for real case-mix change.

In addition to this allowance, the Commission's recommended add-on for magnetic resonance imaging scans would increase payments to hospitals for technological improvement. ProPAC believes that targeted adjustments of this type should be offset in the DAF so that the total amount allowed remains unchanged by an add-on payment.

The scientific and technological advancement allowance does not reflect the anticipated changes in capital payments recommended by the Commission. Of the 3.9 percent increase in net intensity per case during the first eight months of 1985, as much as 1.0 percentage points can be attributed to capital expenses. If capital is added to the standardized amounts in fiscal year 1987 at a level lower than projected under current law, the scientific and technological advancement component of the DAF should be increased to reflect the additional appropriate capital resources required for funding this component of the DAF.

In developing the scientific and technological advancement allowance, the Commission recognized that the DAF was not the only source of financing technology adoption. As noted previously, the Commission expects that, during fiscal year 1987, hospitals will continue to be able to finance a portion of expenditures for new technology and improved practice patterns from gains in productivity. In addition, the increased operating margins that many hospitals appear to be achieving in the initial years of PPS are available to finance the implementation of scientific and technological advances.

Hospital Productivity.—The hospital productivity allowance in the DAF reflects the Medicare program's share of the potential changes in both efficiency and productivity resulting from PPS incentives to reduce the number and cost of resources for treating patients. The Commission adopted the position that it is both desirable and appropriate for productivity and efficiency gains to be translated into price reductions. The Commission also adopted the principle that such gains should be shared between the Medicare program, the Medicare beneficiaries, and the hospital industry. Productivity decreases, however, should not be directly subsidized by PPS.

Hospital productivity is difficult to measure due to problems in defining an appropriate output or product. Under PPS, the hospital product is defined as a discharge, as classified and labeled by the DRG system. At present, available data serve as an indicator of the potential for productivity gains but should not be viewed as direct measures of such change. The same data also frequently reflect changes in the types of services provided in inpatient and outpatient settings.

The potential for productivity gains was examined from a variety of perspectives, including changes in staffing patterns and length of stay and changes in the use of ancillary services. Historical trends formed the foundation upon which the Commission developed its productivity target for fiscal year 1987.

Although length of stay continues to decline, the rate of decline in 1985 was much slower than in 1984 (2.9 percent compared to 7.8 percent). A 2.9 percent reduction in length of stay cannot be directly or immediately translated into a 2.9 percent reduction in costs. The Commission believes, however, that for fiscal year 1987 such a decline could result in a 2.2 percent cost reduction associated with productivity gains, after accounting for real changes in case mix (Recommendation 3). In addition, changes in the use of ancillaries could contribute to between a 0.6 and a 2.5 percent reduction in costs. Savings from ancillary productivity gains, however, cannot be added in their entirety to savings from length of stay reductions. The estimates of length of stay savings reflect a 60 percent marginal cost assumption that includes some ancillary costs.

Since the Commission considers it appropriate for the industry to continue to benefit from the gains made in productivity, only a portion of these potential productivity gains are adjusted for in the DAF (minus 1.5 percent). The remainder of the potential cost savings is available to the industry to purchase improved technologies, to increase operating margins to fund future investments, or to offset costs associated with caring for more seriously ill patients who are not reflected in the real case-mix change adjustment.

Site-of-Care Substitution.—PPS provides significant incentives to change the nature of the hospital product, including incentives to shift services from an inpatient to an out-of-hospital setting or to move patients out of the hospital more quickly. Consequently, the services previously provided to patients during their hospital stay are now increasingly produced by using a mix of inpatient and out-of-hospital services. The Commis-

BEST COPY AVAILABLE

sion has termed this type of product change "site-of-care substitution." For patients admitted to the hospital, this shift in services would reduce the cost to the hospital of DRG production. Under these circumstances, the Medicare program and the beneficiaries could be overpaying for services since the cost base used to calculate DRG rates includes the costs of services that are now being provided in other settings.

Because of the implications for overpayment, the Commission has included an adjustment in the DAF that reflects the impact of site-of-care substitution on average inpatient costs per case. The allowance is not meant to reflect how diverting an entire admission to other settings would affect costs. An impact of this type of shift would be more appropriately considered under the real case-mix change adjustment. Instead, the allowance reflects the provision of services before and after hospitalization, which formerly were provided during the patient's inpatient stay.

The Commission's allowance for site-of-care substitution began with analyses of 1980-1984 data from a study conducted for ProPAC by the Commission on Professional and Hospital Activities (CPHA). These data compare average length of stay before and after PPS implementation. They reflect the impact of discharging a higher proportion of patients to other organized care settings and the effects of discharging these patients earlier than was the case before PPS went into effect. The data indicate a reduction in length of stay associated with higher proportions of patients discharged to alternative settings.

The analyses were limited to formal sites of care (e.g., discharge to nursing homes, discharge to home with home health services). They do not, however, reflect the substantial changes in site of follow-up care to physicians' offices or outpatient departments, the results of earlier discharge to alternative care settings, or increased use of preadmission services. Moreover, many hospitals were not on PPS or were on PPS only for a short period during 1984, and thus had limited exposure to PPS incentives for site substitution. The Commission believes that these early data from CPHA represent only a fraction of the site substitution that has occurred under PPS. Consequently, the Commission has specified an allowance of 0.6 percent to reflect its best judgment about the total effect of site substitution on reducing Medicare cost per case.

The Commission recognizes that the potential for productivity increases and site-of-care substitution is likely to diminish over time. Nevertheless, ProPAC continues to believe that there are substantial opportunities for achieving productivity gains during fiscal year 1987. Furthermore, it believes that site-of-care substitution has occurred and should be reflected in a reduction in the DAF.

Although separate allowances for quality or long-term cost-effectiveness of care were not established, the Commission treated these factors as overarching considerations in setting the level of the DAF and in examining each of the DAF components. More specifically, the Commission viewed quality and long-term cost-effectiveness as objectives to be achieved by implementation of rational payment policies. For more information on this recommendation, see Technical Appendix A.

Recommendation 3: Allowance for Real Case-Mix Change

Prospective payments should reflect real changes in case mix that are due to changes associated with the characteristics of patients and not changes simply due to better coding of records. The DAF allowance for real case-mix change should reflect both shifts in patients among the DRG categories, as measured by changes in the average case-mix index (DRG case-mix change), and changes in the mix of patients within DRG categories (patient complexity change). For the fiscal year 1987 payment rates, the allowance for real case-mix change should be set at 0.9 percent. This allowance represents a 0.2 percent adjustment for changes in the DRG case-mix index and a 0.7 percent adjustment for patient complexity changes.

In the April 1985 report, the Commission concluded that since PPS payments automatically reflect all changes in reported DRG case mix as they occur, an adjustment would be necessary to ensure that only changes in real case mix are built into future payment rates. To accomplish this, the

BEST COPY AVAILABLE

Commission recommended lowering all DRG weights to adjust for changes in DRG distribution but returning a portion of the lower payments to the hospitals through the DAF adjustment for real case-mix change. This adjustment was also intended to reflect changes in the complexity of patients within DRG categories.

The Commission did not actually specify a quantitative adjustment for real case-mix change in the April 1985 report. Quantification of the adjustment was provided in the Commission's comment on the Secretary's Notice of Proposed Rulemaking in July 1985. The Commission's estimate of real case-mix change was based on a preliminary study by the Rand Corporation. The Commission estimated that a 2.0 percent increase in reported case mix would occur during 1985. Of this increase, 0.8 percent was attributed to real case-mix change. This estimate reflected consideration of historical trends in real case-mix change, recent shifts to outpatient treatment, and within DRG patient complexity changes that would not be reflected in the DRG case-mix index.

For this report, the Commission has incorporated a 1.0 percent reduction in the DRG weights to account for observed changes in the DRG case-mix index during fiscal year 1986. Based on historical trends, the Commission estimates that the portion of this increase due to real changes in DRG case mix is 0.2 percentage points.

These figures may change as more recent data are reported. Currently, no data on DRG case-mix change for fiscal year 1986 are available. The most recent information is provided in another study by the Rand Corporation, which reports that the overall DRG case-mix index did not change from the fourth quarter of fiscal year 1984 through the second quarter of fiscal year 1985. The Commission believes, however, that while changes in the DRG case-mix index may have leveled off, it is consistent with recent experience to expect a small increase due to more accurate coding as hospitals continue to adjust to PPS and as hospitals in formerly waivered states (i.e., New York and Massachusetts) are brought into PPS for the first time.

Based on a study that CPHA conducted for ProPAC, the Commission has specified a 0.7 percent adjustment for increases in patient complexity during fiscal year 1986. This adjustment is a reflection of historical trends in length of stay associated with patient complexity changes that occurred in the two years before implementation of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA). In that period, both Medicare and non-Medicare patients experienced approximately the same rate of increase in length of stay associated with increased complexity.

Between 1982 and 1983, significant increases in length of stay associated with greater complexity were found for both populations. The increase was substantially greater, however, for Medicare patients. During 1984, length of stay related to complexity decreased compared with 1983, but not to the level of the period preceding TEFRA enactment. The Commission has assumed that the increase between 1982 and 1984 was highly subject to the influence of improved hospital coding practices and may not represent actual changes in complexity. Thus, the Commission has based its estimate of real complexity change on hospitals' experience before 1983. The Commission has also assumed that a 0.7 percent increase in length of stay associated with increased complexity would translate into a 0.7 percent increase in costs. These estimates are subject to revision later in the year when data for 1985 will be available from CPHA. For more information on this recommendation, see Technical Appendix A.

Recommendation 4: Update Factor for Excluded Hospitals and Distinct-Part Units

For fiscal year 1987, the target rate of increase limits for the group of psychiatric, rehabilitation, and long-term care hospitals and hospital distinct-part units excluded from PPS should be updated to reflect the projected increase in the hospital market basket for these hospitals (corrected for forecast errors) minus a 0.8 percentage point adjustment for productivity and scientific and technological advancement goals established for PPS hospitals.

The target rate of increase limit for children's hospitals and distinct-part units should be updated to reflect the projected increase in the hospital market basket for PPS hospitals (corrected for forecast errors) minus a 0.8 percentage point adjustment for productivity and scientific and technological advancement goals established for PPS hospitals.

The PPS statute created two broad classes of hospitals—those that would be paid on the basis of DRGs and those that would not. Excluded hospitals—psychiatric, rehabilitation, pediatric, and long-term care hospitals (hospitals with unusually long average lengths of stay)—continue under cost reimbursement rules, which limit reimbursement per discharge. Both the PPS standardized amounts and the reimbursement limits for excluded hospitals are to be updated each year.

The types of patients seen and the treatment they receive vary significantly between PPS and excluded hospitals. The Commission believes it is appropriate to develop a separate update factor for the hospitals and units excluded from PPS but still subject to the target rate-of-increase limits. The Secretary has stated in the final rule governing PPS payments for fiscal year 1986 that the PPS statute requires application of the same update factor to both PPS and excluded hospitals. The Commission nevertheless reaffirms its position that the Secretary has the authority to establish a separate update factor for excluded hospitals. If, however, uncertainty about this authority remains, the Secretary should seek legislative change to obtain explicit authority for establishing separate rates of increase appropriate to the two different payment systems.

The update factor for excluded hospitals includes two allowances in addition to inflation: one for scientific and technological advancement, and another for productivity change. While it has been more difficult to quantify these concepts for excluded hospitals than for PPS hospitals, the Commission continues to believe that the update factors for both types of hospitals should include an adjustment for these elements.

Based on currently projected inflation rates, ProPAC estimates that this recommendation would lead to a 3.5 percent increase in the target limits for children's hospitals and distinct-part units, and a 3.7 percent increase for the rest of the excluded facilities. A summary of the Commission's recommendations for excluded hospitals appears in the table following this discussion.

These estimates are based on the assumption that capital expenses will not be brought under the target rate-of-increase ceiling. The Commission will reevaluate the appropriateness of its update recommendation if—and when—these payments are made subject to the target limits. In addition, the numeric value of the Commission's recommendations for excluded facilities will need to be modified as more recent forecasts of inflation become available.

The Commission reaffirms its 1985 recommendation calling for development of an inflation factor for the group of psychiatric and rehabilitation hospitals and units, and long-term care hospitals. The factor should reflect the mix of labor and nonlabor resources used by these hospitals rather than those used in PPS hospitals. This recommendation is based on the Commission's observation that the labor share of expenses in these hospitals is substantially higher than in PPS hospitals.

The Commission also continues to recommend using the PPS market basket to calculate inflation for children's hospitals. Analysis by ProPAC and others indicates that the labor share of total expenses in these hospitals is close to the overall average on which the current PPS weights are based. Thus, the PPS market basket weights are appropriate for children's hospitals.

The Commission currently estimates a fiscal year 1987 market basket inflation factor of 4.8 percent for psychiatric and rehabilitation hospitals and units, and long-term care hospitals, compared with 4.6 percent for PPS and children's hospitals. After applying a minus 0.3 percent factor to correct for errors in the 1986 market basket forecast, the net inflation-related adjustment in the fiscal year 1987 payment rates would be 4.3 percent for children's facilities and 4.5 percent for the remainder of the excluded facilities. This adjustment is likely to change after more current forecasts of market basket inflation are received later in fiscal year 1986.

While it might be appropriate to adopt scientific and technological advancement and productivity allowances reflecting the production functions of the various classes of excluded hospitals, insufficient evidence precluded doing so in this report. For fiscal year 1987 at least, the Commission has concluded that it is reasonable to incorporate the PPS allowances for scientific and technological advancement and productivity in

the excluded facilities' update factor. The Commission will continue to study the feasibility of developing separate allowances as a part of its long-term research agenda.

Two other adjustments included in the update factor for PPS hospitals, however, are not relevant to excluded hospitals.

First, the Commission reaffirms its 1985 decision not to incorporate any adjustment for real case-mix change in the DAF for excluded hospitals. Since excluded hospitals are not paid on a DRG basis, they have no incentive to upgrade the coding of cases. On the other hand, excluded hospitals may be experiencing increases in the acuity of illness in the patients they see due to the earlier transfer of sicker patients from PPS hospitals. At present, however, there are no data suitable for estimating the degree to which case mix may be changing in excluded hospitals.

Excluded hospitals are somewhat protected from these case-mix changes by an exceptions process that allows them to appeal their payment rates if they can demonstrate significant changes in case mix. The exceptions process is not only extremely cumbersome, however, but provides only retroactive relief. If relief is granted, it typically takes more than two years from the time excess costs are incurred. Therefore, it is unclear whether this exceptions process can adequately adjust for changes in case mix.

Second, the Commission believes that there is insufficient justification for including an adjustment for site substitution in the update factor for excluded hospitals. Compared with PPS hospitals, excluded hospitals have much weaker incentives and opportunities to shift services to other settings. As discussed above, these hospitals are much more likely to receive transfers from other facilities than to discharge patients early and refer them elsewhere. Under these circumstances, a positive adjustment for site substitution might be justified. At present, however, there are no data on which to base such an adjustment.

HCFA and others have conducted studies that have enhanced understanding of the differences between the PPS hospitals and excluded hospitals and units. Their relevance to development of the update factor is, however, limited. The Commission intends to continue to study excluded hospitals and to develop trend data relevant to the update factor. For more information on this recommendation, see Technical Appendix A.

Estimated Increase in Excluded Hospital Payment Limits For Fiscal Year 1987 Under Commission Recommendations

	Children's	Psychiatric/ Rehabilitation/ Long-term Care
Fiscal Year 1987 Market Basket Increase[a]	4.6%	4.8%
Correction For Market Basket Forecast Errors In Fiscal Year 1986[b]	−0.3	−0.3
Discretionary Adjustment Factor	−0.8	−0.8
Scientific And Technological Advancement	*0.7*	*0.7*
Productivity	*−1.5*	*−1.5*
Total Change	3.5	3.7

[a]DRI forecasts based on actuals through the calendar year 1985. This estimate takes into account the Commission's April 1985 recommendation for changing the treatment of wages in the hospital market basket.

[b]ProPAC estimate comparing DRI forecasts based on actuals through calendar year 1984 to forecasts based on actuals through the third quarter of 1985. The estimated adjustment here excludes errors in forecasting internal price proxies, as recommended by the Commission in its April 1985 report.

Capital

Recommendation 5: Including Capital in the Prospective Payment System

Beginning in fiscal year 1987, the Secretary should initiate a transition to all-inclusive prospective prices that combine operating and capital cost components in a single prospective payment per case for hospitals.

Retrospective cost-based reimbursement for capital lacks incentives for hospitals to restrain overall investment costs. Instead, it promotes insensitivity to interest rates and alternative financing methods. In addition, some hospitals may have invested in capital to produce services that exceed the demands of the inpatient hospital services market.

The combination of Medicare PPS and the capital pass-through has introduced additional distorted incentives to substitute capital for labor or other operating costs. As a result, the hospital that

can substitute capital for operating costs (and assume the risk of additional capital acquisition) receives more in total Medicare payments (i.e., hospitals receive fixed DRG payments plus increased cost reimbursement for capital expenditures).

The Commission strongly believes that the capital payment policy adopted should provide neutrality in capital/operating cost trade-offs. The payment method should not favor either capital or operating costs. Instead, it should encourage hospital managers to choose the optimal combination of these cost components. An all-inclusive payment rate would allow individual providers the flexibility to make what they consider to be the most cost-effective decisions based on the unique characteristics of their institutions.

The Commission is aware, however, that implementation of an all-inclusive rate at the levels set forth in its proposal may affect some hospitals disproportionately due to their individual financial positions. The Commission's proposal for capital payment, as explained in subsequent recommendations, may cause some hospitals to face significant cash shortfalls as a result of current and near-term obligations. ProPAC believes, however, that these shortfalls would not occur during the early years of the phase-in of its proposed capital policy. During this period, payments for capital should be sufficient to meet these hospitals' capital-related cash needs. Meanwhile, the Commission will monitor the implementation of the new capital payment system to identify potential problem areas for hospitals. Moreover, for reasons stated elsewhere, ProPAC believes that there should be no delay in implementing capital payment under PPS.

The Commission will continue to study the impact of its capital payment proposal on hospitals, focusing on those institutions that may be disproportionately affected by new capital payment policy. If the Commission determines that certain hospitals are unfairly treated by bringing capital payment into PPS, and that the quality and accessibility of care furnished to beneficiaries by these hospitals are jeopardized, it will develop and recommend appropriate remedies to the Secretary. For example, ProPAC will examine public and private sector options such as a hospital "borrow forward" program for financing capital expenditures.

The Commission intends to evaluate recent changes in hospital investment strategies and their impact on inpatient capital spending and the adequacy of future payments. Estimates of inpatient capital spending should be examined closely since recent capital expenditures may be heavily devoted to outpatient services. Furthermore, the addition of capital payments to PPS creates incentives for increased outpatient treatment due to the difference in reimbursement methods for inpatient and outpatient services. Finally, the Commission will study the impact of paying hospitals for capital based on the volume of Medicare services rather than on costs.

The Commission decided not to address the role of health planning in capital payment under PPS. It is aware that the PPS statute calls for required application of Section 1122 of the Social Security Act to regulate Medicare inpatient capital payment beginning in fiscal year 1987, and that proposals have been advanced to repeal this provision. The Commission expects that the Congress will deal with this issue in its legislative agenda for fiscal year 1987.

In summary, the Commission is concerned about these and other influences of new capital payment policy on all hospitals and specifically on disproportionately affected hospitals. ProPAC plans to study these issues and share its analysis with policymakers in order to achieve a capital payment policy that provides for the financial needs of hospitals while offering incentives for cost-effective decision making in the future. For more information on this recommendation, see Technical Appendix A.

Recommendation 6: Capital Payment Method

The Federal portion of capital payments should be computed as a fixed percentage add-on to the standardized amounts beginning in fiscal year 1987. The Secretary should immediately develop capital components to be added to the hospital market basket. When appropriate data become available, the components of PPS payments should be recomputed to reflect the addition of capital costs. The results of this recomputation should be implemented

as soon as possible, but no later than fiscal year 1988.

The Commission believes that developing an all-inclusive rate eventually requires recomputation of several components of the PPS system. Specifically, the addition of capital will result in new standardized amounts with new proportions for labor and nonlabor components. It may also require new adjustment rates for indirect medical education and any other adjustments in effect at the time capital is added.

The Commission's recommendation to recompute payment components will require data not currently available that reflect the addition of capital under PPS. The Commission believes, however, that distorted incentives exist under the current capital expenditures pass-through system that require a new payment policy to be implemented as quickly as possible. For this reason, the Commission recommends that an interim payment method of the percentage add-on to the standardized amounts be implemented beginning in fiscal year 1987. Recomputation of the payment system to reflect the addition of capital differs from the issue of recalculating the standardized amounts using new data for the purpose of changing the overall level of payments (Recommendation 13).

The Commission plans to study the impact of the addition of capital on other payment system components and appropriate proxies for capital costs in the hospital market basket. The Commission will also study whether adjustments for geographic variations in construction capital costs are appropriate.

The add-on should be applied in such a way that the distribution of capital payments will not be affected by the area wage index or the indirect teaching adjustment. Payment would, however, reflect case-mix variations and the differentiations associated with the national and regional standardized amounts. In addition, if the transition to national rates for operating payments is delayed, the Commission will consider whether the capital payment transition should be coordinated with the operating payment transition. For more information on this recommendation, see Technical Appendix A.

Recommendation 7: Level of Federal Capital Payment

Capital payment should be added to the Federal portion of PPS payments for hospital accounting years beginning in fiscal year 1987 at the following levels:

- **For building and fixed equipment, projected average Medicare actual capital costs per discharge for fiscal year 1985, trended forward to fiscal year 1987 by an index of construction capital costs.**
- **For moveable equipment, average actual Medicare capital costs per discharge for hospital accounting years beginning in fiscal year 1983, trended forward to fiscal year 1987 by an index of equipment capital costs.**
- **The proportion attributed to moveable equipment should be the lesser of the 1983 proportion or 40 percent.**

The Commission believes that the capital payment system should distinguish between two components: fixed capital (land, buildings, and fixed equipment) and moveable capital (major moveable equipment). This approach recognizes the differences between fixed and moveable capital expenditures and the differing effects of PPS payment incentives on hospital decisions regarding these cost components.

Moveable capital is purchased and turned over more frequently than fixed. For each year, in fact, the composition of moveable capital changes as assets are disposed of and replaced. Fixed capital is purchased infrequently and involves major capital expenditures, often requiring external review. Moveable capital purchase decisions often require hospital managers to make judgments regarding capital/operating cost trade-offs. Fixed capital, on the other hand, is not easily converted to another use, and related expenditures cannot be eliminated in the short-term. Financing of moveable capital may include leasing or use of a hospital's own funds in addition to borrowing. On the other hand, financing of fixed capital costs usually requires the use of debt or additional equity.

Furthermore, the time lag for purchase decisions, financing, and completion of fixed capital projects is typically several years. In some cases,

fixed capital expenditure decisions made by hospital managers before the introduction of PPS have not yet been fully implemented. Other fixed capital projects initiated in the early 1980s have just recently been completed, yet the related costs may not be fully reflected in current Medicare capital cost data.

For reasons stated above, the Commission believes that moveable equipment is more susceptible to the incentives of the current payment system for capital/operating cost trade-offs. ProPAC therefore recommends that 1983 be adopted as the base year for calculating moveable equipment payments since 1983 reflects a time when capital and operating costs were treated equally. Furthermore, the Commission believes that this approach would provide for control of Medicare expenditures without causing financial hardship for hospitals. This is because capital pass-through payments since 1983 have been sufficient for hospitals to recover a substantial portion of their 1983 moveable equipment costs.

The Commission recognizes, however, that hospitals recover fixed capital costs over an extended period. Moreover, since there is significant lag time for fixed capital projects, hospitals cannot respond as quickly to the incentives of a new payment system or to warnings about the future treatment of capital. The Commission selected the base year of 1985 because fixed capital costs reported in that year would reflect decisions made before PPS. For fiscal year 1987, the 1985 base year fixed capital costs will have to be estimated. When actual 1985 capital cost data become available, the Commission will compare these data with previous estimates and consider recommending adjustments, if appropriate.

The base year amounts for fixed and moveable capital should be trended forward to 1987. Separate indexes should be used that recognize the differences in cost trends between fixed and moveable capital. The Commission will study the data and application of these trending factors and will participate in determining the most appropriate indexes.

Federal payments for fixed and moveable capital should be based on Medicare's current definition of these cost components. All capital-related costs should be allocated to these components, including depreciation, interest, leases, rentals, insurance, return on equity, and taxes on depreciable assets used for patient care. The Commission believes that the current proportion of capital-related costs attributable to moveable equipment is no more than 40 percent. If, in monitoring the implementation process, it is determined that moveable equipment comprises more than 40 percent, the Commission recommends that the excess over 40 percent be included in the hospital-specific capital payments during the transition.

The Commission estimates that its proposal for the level of capital payment, combined with the transition plan (see Recommendation 8), will result in savings of approximately $8 billion compared to estimated cost pass-through payments during the next five years. For more information on this recommendation, see Technical Appendix A.

Recommendation 8: Capital Payment Transition

The transition to Federal capital payments under PPS should begin in fiscal year 1987 in accordance with the following provisions:

- **There should be no transition for moveable equipment. All payments for moveable equipment should be included as a fixed percentage add-on to the Federal standardized amounts beginning in fiscal year 1987.**
- **Payments for fixed plant and equipment should be phased in as a fixed percentage add-on to the Federal standardized amounts over a seven to ten year period on a straight-line basis.**
- **For plant and fixed equipment, hospital-specific capital payment portions should be the actual costs incurred during each year of the transition.**
- **During the transition, the Federal portion for plant and fixed equipment should be updated each year by an index of construction capital costs.**
- **The addition of capital to the Federal standardized amounts should reflect base-year treatment of return on equity and interest offsets. Return on equity payments should be added to the hospital-specific portion of operating payments.**

36

Once the transition to national rates for operating payments ends, there should be no hospital-specific payment for return on equity.

The purpose of a transition period for capital payments is to enable hospitals to position themselves to absorb the financial impact of the new capital payment system and to adjust their spending behavior accordingly.

The Commission considered several transition alternatives for moveable capital. It concluded that any transition period that would continue the cost pass-through for capital payments would perpetuate incentives for inappropriate hospital purchasing behavior. With the knowledge that moveable capital would eventually be included in PPS rates, hospitals would be encouraged to purchase and replace equipment unnecessarily during the transition, when a large portion of their hospital-specific costs would continue to be reimbursed.

The Commission believes that most of the costs related to moveable equipment acquired before the introduction of PPS have been already recovered. Therefore, a transition period is not necessary. A significant portion of payments for moveable capital would, in fact, support future purchases rather than the cash needs of prior purchases. Finally, the inclusion of moveable capital into the payment system without a transition provides funds immediately for hospitals that have not been able to afford equipment purchases.

The Commission believes that a relatively long transition period for fixed capital payments should be provided, however. The long-term commitments of individual hospitals for fixed capital must be recognized in the capital payment system. Unlike moveable capital, the costs related to fixed capital projects continue for many years. Hospitals must be provided the opportunity to position themselves in order to continue to meet the costs of fixed capital projects completed in the past. The Commission believes that a relatively long transition period will enable hospitals, regardless of their fixed capital commitments, to absorb the financial impact of the new capital payment system. If it is determined, however, that certain hospitals would be inappropriately disadvantaged during the transition, the Commission will consider options for assistance. (Refer to the discussion for Recommendation 5.)

Furthermore, hospitals should not be unduly penalized for fixed capital commitments made before the beginning of PPS, although it is difficult to determine the time of commitment due to the lags for fixed capital projects. In addition, some hospitals delayed fixed capital expenditures due to external constraints on construction or failure to secure needed funds. These factors make it difficult to select a threshold for fixed capital spending commitments. The Commission, therefore, recommends that hospitals' actual fixed capital costs be paid during each year of the transition. This will enable hospitals to meet their debt obligations while encouraging cost-effective decision making for construction and financing in the future.

The Commission recognizes that return-on-equity payments have been provided to investor-owned hospitals because cost reimbursement, in principle, does not afford an opportunity for these hospitals to earn profits. But DRG payments under PPS do provide opportunities for all hospitals to earn profits. The Commission believes it is unnecessary and undesirable to continue to pay return on equity in DRG prices. Therefore, return on equity should be phased out of hospital-specific payments for investor-owned hospitals in the same proportions and under the same schedule as the operating payment transition to national payment rates.

Proposals have been advanced to remove return on equity payments and to extend interest offset provisions to include interest earned on funded depreciation and donations. The Commission believes it would be inappropriate to remove these earnings from the Federal portion of capital payments to the hospital industry. Thus, it proposes including the associated revenues in the average capital payment per discharge calculations. Substantial reductions in capital payments, compared to current law, are already contained in the Commission's base year and trending recommendations. For more information on this recommendation, see Technical Appendix A.

Adjustments to the Payment Formula

Recommendation 9: Disproportionate Share Hospitals

An adjustment to the PPS rates for hospitals serving a disproportionate share of low-income patients should be implemented as soon as possible. This adjustment should specifically incorporate a definition and methodology in keeping with the character of the adjustments already being considered by the Congress. This adjustment should not change the total aggregate dollar amount paid to all hospitals.

This recommendation is a reaffirmation of a recommendation ProPAC made in the April 1985 report. The Commission remains convinced that hospitals serving a high volume of low-income patients (as measured by a variety of definitions) do incur higher Medicare costs per case. The update factor is likely to be constrained by broader government budget considerations. Consequently, the Commission is even more strongly convinced that a disproportionate share hospital adjustment should be implemented to provide equity to hospitals serving numerous low-income patients.

Although the Commission is pleased that the Congress addressed this issue as part of the reconciliation process, legislative change had not been enacted by the time this report was written. ProPAC is aware of the definition of disproportionate share hospitals published by the Secretary in the *Federal Register*, December 31, 1985. It believes, however, that this definition was not similar in character to the definition being developed in the Congress. In addition, the definition was not adequate to meet the special needs of disproportionate share hospitals and the beneficiaries they serve. The Commission hopes that further work by the Secretary will be more closely aligned with the intentions of the Congress.

Because the Commission is convinced of the seriousness of this issue, it intends to continue to study the consequences of changes in Medicare payment policies on the hospitals that serve disproportionate numbers of low-income patients. For more information on this recommendation, see Technical Appendix A.

Recommendation 10: Improving the Definition of Hospital Labor Market Areas

The Secretary should improve the definition of hospital labor market areas for fiscal year 1987, if possible, and no later than fiscal year 1988. For urban areas, the improved definitions should account for a greater amount of the wage variation between inner-city and suburban hospitals. For rural areas, the improved definitions should account for a greater amount of the wage variation between different rural areas within each state and between states. The implementation of improved definitions should not result in any change in aggregate hospital payments.

The Commission reiterates its belief that the current adjustment for area wage differences does not adequately account for the existence of separate labor markets within urban and rural areas.

In its April 1985 report, the Commission recommended that the Secretary develop and adopt improved definitions of hospital labor market areas. This recommendation was based on the results of studies that showed substantial variation between the wages paid by inner-city hospitals and the wages paid by suburban hospitals within the same Metropolitan Statistical Area (MSA). The Commission believed that the payment inequities resulting from this wage variation were substantial enough to warrant immediate correction.

Since this recommendation was made, the Commission has undertaken a study of hospital wage variation in both urban and rural areas using the most recently available HCFA data. The findings of this study, to date, support ProPAC's previous conclusion that substantial wage differences occur within many urban and rural areas.

The Commission believes that the most feasible approach for improving the definition of hospital labor market areas is to identify, wherever possible, additional labor markets within current area definitions. Alternative area definitions, such as the Bureau of Economic Analysis Areas (BEAAs) and Health Care Commuting Areas (HCCAs), do not account for a greater amount

of hospital wage variation than current area definitions. In the Commission's judgment, therefore, these alternative area definitions are not adequate replacements for the current area definitions.

The Commission's study suggests several promising and feasible approaches for identifying additional labor markets within current area definitions. Within urban areas, separating MSAs into central counties and surrounding counties accounts for a greater amount of hospital wage variation than the current areas. Within rural areas, the rural portions of BEAAs account for the greatest amount of hospital wage variation when compared to several alternatives. Separating rural counties into two groups (i.e., counties that are adjacent to MSAs and all others) accounts for an amount of wage variation comparable to the rural portions of BEAAs.

The Commission considers these approaches promising because they account for more hospital wage variation. In addition, they do not substantially increase the number of areas that contain only a few hospitals. ProPAC believes that labor market areas should contain a sufficient number of hospitals to prevent individual hospitals from having an inappropriate impact on their own area wage index. Therefore, the Commission recommends that any improvements in the definition of hospital labor market areas should not substantially increase the number of areas with a small number of hospitals.

The Commission is not yet prepared to make specific recommendations for improvements. Based on the preliminary findings of its study, however, it believes that improved definitions are warranted for both urban and rural areas. The Commission continues to believe that better definitions would substantially increase the equity of payments to some hospitals. ProPAC will provide specific recommendations to the Secretary before the completion of the rulemaking process for fiscal year 1987, if possible, and no later than April 1987. Furthermore, the Commission is prepared to share with the Secretary the preliminary findings of its ongoing study of hospital wage variation. For more information on this recommendation, see Technical Appendix A.

Recommendation 11: Rural Hospitals

In the original PPS legislation of 1983 and the Deficit Reduction Act of 1985, the Congress required the Secretary to study and report on a number of rural hospital issues. To date, none of these studies has been submitted to the Congress. Preliminary studies by the Commission suggest that there are potential problems in the way rural hospitals are treated under PPS. To facilitate open and informed public debate of rural hospital issues, the Commission urges the Secretary to complete and publish the congressionally mandated studies as soon as possible. If the results of the Secretary's studies indicate that changes in payment policies affecting rural hospitals are warranted, appropriate modifications to current policy should be implemented as soon as possible, including legislative change, if necessary. The Commission will continue its analysis of rural hospital issues and make specific recommendations in the future if findings indicate that changes in PPS payment policy are desirable.

Under PPS, various technical policies have been implemented that the Commission believes may adversely affect rural hospitals. Some of these effects result from policies applicable only to rural hospitals. Others result from policies that affect all hospitals, but that have a potentially stronger adverse impact on rural hospitals.

The PPS payment policy to calculate separate urban and rural standardized amounts reflects the historically lower average costs in rural hospitals. These cost differences remain even after adjusting for area wage differences, teaching activity, and DRG case mix. The cost differences partly reflect urban hospitals' larger size and wider range of services.

The differences also may be due to a triaging of more severely ill rural patients to urban hospitals, which is not reflected in the DRG case-mix index. A recent study by Health Economics Research, Inc. (HER) for HCFA suggests, however, that severity of illness explains no more than 1 percent of the cost difference between urban and rural hospitals. In contrast, the study indicates that a substantial portion of the cost difference can be accounted for by variations in medical practice patterns.

Whatever the underlying reasons for the cost differences, the establishment of separate standardized amounts has resulted in lower payments to rural hospitals. National standardized amounts were $2,985.05 for urban hospitals compared to $2,381.39 for rural hospitals in fiscal year 1985. The causes of the historical cost difference need further examination before permanently institutionalizing a two-tier payment system that potentially penalizes rural hospitals for historically achieving lower costs. This examination should include an assessment of the effects of a two-tier system on Medicare beneficiaries' access to or quality of care.

PPS payment policies related to outliers, area wage definitions, payments for DRGs with high device and low labor costs, and methods for calculating the standardized amounts further widen the difference between urban and rural average PPS payment levels. For further discussion of these policy issues, see Recommendation 10, 13, and 24 and Technical Appendixes A and B.

This discussion highlights technical issues related to the treatment of rural hospitals under PPS. Ultimately, however, the rural hospital policy debate may center on whether PPS, as currently structured, is appropriate for all rural hospitals. If it is not, the question is for which hospitals it is inappropriate.

In particular, the financial vulnerability of small rural hospitals to fluctuations in volume and case mix has caused concern. For larger institutions, minor fluctuations in volume and case mix are less critical. Larger hospitals can average these fluctuations from year to year and over a large number of cases. Small rural hospitals cannot take advantage of this "law of large numbers." If such hospitals are located in relatively isolated areas, and a deteriorating financial position results in closure of the facility, Medicare patients' access to services may be severely compromised.

Preliminary findings for 1984 indicate that hospitals in rural areas have experienced overall improvement in their financial position since implementation of PPS. The evidence regarding the first year of PPS should be viewed with caution, however. Given the reporting cycle of hospitals, many were not on PPS or were on PPS only for a short period in 1984. Moreover, recent evidence from the AHA's Panel Survey indicates that very small hospitals, the majority of which are rural, had negative patient revenue margins during 1985. Furthermore, these data provide little insight into the financial condition of hospitals under fully implemented national PPS payment rates or under all-inclusive rates encompassing capital and operating costs.

The Commission's PPS payments model indicates that, compared to the average experience of all hospitals, rural hospitals as a group would receive lower revenues per case as PPS moves to complete Federal rates. (See Technical Appendix C for further discussion of the effects of the transition.) Nevertheless, not all rural hospitals would lose under the system. Further analyses are required to determine which hospitals are jeopardized financially by Medicare's PPS policies and what, if any, technical adjustments would be appropriate.

In the end, the Congress or the Secretary or both may have to determine whether it is appropriate to pay slightly more money or to pay differently to avoid insolvency among certain small rural hospitals. That is, after correction for PPS' technical problems, small rural hospitals may still become insolvent due to declines or wide swings in volume or case mix or both. It may be cost-effective for Medicare to pay slightly more or slightly differently for care in these hospitals. This could be the case if, by doing so, rural patients are not required to seek care in distant urban hospitals where the care is less accessible and more costly. In this light, it will be important to analyze whether the current Sole Community Hospital provisions in PPS provide adequate adjustment for the problems of small, isolated rural hospitals.

In examining the potential cost-effectiveness of having Medicare pay more for services in isolated rural areas, it also will be important to assess the ability of other public funding sources to provide support for these hospitals. For example, 45 percent of the rural hospitals were government-owned in 1984. The question is the extent to which funding sources beyond PPS influence the continued ability of rural hospitals to provide services to Medicare beneficiaries.

40

Some of the policy issues outlined here are the subject of congressionally mandated studies. As a part of the legislation creating PPS (Pub.L. 98-21), the Congress required the Secretary to conduct studies on: 1) the feasibility and impact of eliminating or phasing out separate urban and rural rates; 2) an equitable method of reimbursing Sole Community Hospitals, taking into account their unique vulnerability to substantial variations in occupancy; and 3) appropriate payment policies for large rural teaching hospitals. In addition, the Deficit Reduction Act of 1985 (Pub.L. 98-369) required the Secretary to review and report to the Congress on the appropriateness of urban/rural differential payments as they apply to DRGs with high nonlabor costs (e.g., device and supply costs). These studies have not yet been submitted to the Congress.

While the studies do not address the complete range of issues outlined by the Commission, they are likely to provide valuable baseline information for analyzing the impact of PPS on rural hospitals. The Commission, therefore, urges the Secretary to complete and publish the findings from the congressionally mandated rural hospital studies as soon as possible. The Commission also will continue to analyze rural hospital issues. It is prepared to share with the Congress and the Secretary its findings as they are developed. For more information on this recommendation, see Technical Appendix A.

The Standardized Amounts

Recommendation 12: Earlier Availability of Medicare Cost Data

The Commission is pleased that the Secretary has taken steps to speed up the availability of Medicare Cost Report data from the first year of PPS. The Commission recommends that making cost data available as soon as possible be an ongoing effort, since these data are vital both to assess the relationship between PPS payments and hospital costs and to analyze the costs of individual DRGs. As part of this ongoing effort, alternative strategies for sampling hospital cost data should be considered. The necessary additional resources should be allocated for timely processing of these data.

More timely cost data are essential for improving PPS and understanding how it affects hospitals. Cost data are needed to assess the appropriateness of the overall level of PPS payments, to examine the ways in which hospitals have reacted to the PPS incentives to lower costs, and to analyze the costs of individual DRGs and services. The Commission has felt at a disadvantage in making recommendations based on 1981 cost reports because these data do not reflect the effects of PPS or other recent changes that are likely to have changed hospital costs.

Most hospitals have accounting years that begin after the Federal fiscal year. Consequently, there is a considerable lag in obtaining a complete set of cost reports. For example, the set of cost reports from the first year of PPS, which began in October 1983, will include hospitals with accounting years that ended as late as August 1985. Hospitals have three months to submit the report, and additional time is needed for the fiscal intermediary to enter the data into the automated data processing system. Even more time is needed to complete an audit. It can take up to a year after the end of the hospital accounting year until final settlement is made.

Because of this time lag in obtaining a complete set of cost report data, accelerating the availability of cost data requires developing a sample of hospitals. Data from a sample will not be as thorough as data ultimately received on all hospitals. The extent of the errors is predictable, however, and the benefits of having more recent information outweigh the disadvantages.

HCFA has tried to speed up the compilation of cost data from the first year of PPS. Unaudited cost report data for all PPS hospitals were expected centrally at HCFA by February 1986. In addition, audited data from a sample of 1,200 hospitals were expected by March 1986. Audits would normally be performed in the order in which hospitals submit their cost reports. This sample was chosen so that audited data on a representative group of hospitals would be available earlier. Unfortunately, neither data set was available in time for the Commission to use in its deliberations for this report.

Statistical analysis performed for the Commission by the Rand Corporation indicates that HCFA's audit sample, when weighted for sampling by census region and bedsize, is represent-

ative of those hospitals used to create the current standardized amounts. For the most part, the weighted audit sample differs little from the overall set of hospitals by urban and rural status, Census Division, or bedsize (see Technical Appendix A). Further analysis needs to be done, however, before the Commission can comment on the precision with which the sample could be used to estimate costs for different groupings of hospitals.

Alternative strategies for sampling as-submitted (unaudited) and audited cost report data should also be considered. In particular, analysis is necessary to test the feasibility of developing a representative sample of PPS hospitals from the subset of hospitals with relatively early accounting year end-dates. If such a sampling method is practical, a set of unaudited cost report data could be developed much earlier in the year. The Commission intends to examine this approach, and would like to work with the Secretary in determining its feasibility.

Recommendation 13: Recalculating the Standardized Amounts

The standardized amounts used to determine hospital payments under PPS should be recalculated using cost data that reflect hospital behavior under PPS. The results of such a recalculation, with appropriate modifications, could be used in determining the update factor or in rebasing the standardized amounts.

Periodic recalculation of the standardized amounts would provide information about the relationship between hospital costs and PPS payments that could be valuable in setting future payment levels. Even though PPS was designed to break the direct link between each hospital's costs and the payments it receives from Medicare, payments on average should be reasonably related to costs. Using cost data as an input to PPS price-setting decisions does not interfere with hospital incentives to achieve greater efficiency.

The goal is not to return to cost reimbursement, but to use information about costs to maintain the PPS incentives for efficiency without adversely affecting quality of care. If average payments are much higher than average costs, Medicare may be spending more than necessary. Payments that are equal to or below costs may create financial problems for hospitals, which ultimately could affect beneficiary access to quality care. Analyzing the relationship between average costs and average payments is particularly important in the early years of PPS. Decisions about the size of the update factor have partly been based on judgments about the extent to which hospitals could increase their productivity and lower their costs. Reviewing more recent cost data is the best way to assess the accuracy of these judgments.

Some information about the relationship between costs and payments can be gleaned from indicators of the overall financial condition of hospitals, such as financial ratios and evidence of hospital closures. This information is indirect, however, since many factors other than Medicare payments might be involved. In addition, the interpretation of financial ratios is often controversial.

Once the standardized amounts are recalculated, the results can be used in two ways. Recalculated standardized amounts could be one piece of information used to select an update factor. Alternatively, the standardized amounts could be rebased—that is, the recalculated amounts could be updated and substituted for the current published rates.

The distinction between using recalculated standardized amounts in determining the update factor and using them to rebase is not as great as it may appear. Rebasing is not a complete substitute for choosing an update factor, since the recalculated payment amounts would have to be updated from the data year to the payment year. For example, the most recent cost data available to HCFA are for hospitals' first year on PPS. These data would have to be updated by as much as three years—to the end of Federal fiscal year 1987.

If the decision is made to rebase the standardized amounts, several other choices must be made. These include the frequency of rebasing and the possibility of setting a limit on how much effect rebasing could have on the standardized amounts.

A further choice involves the method used to average the standardized amounts. The current standardized amounts are hospital-weighted, so

that the resulting standardized amount represents the costs in the average hospital. An alternative method would be to discharge-weight the average, so that the standardized amounts represent the average cost of treating a case.

The redistributional effects of changing the averaging method would have to be considered. Discharge-weighting the national urban and rural amounts would result in a 3 percent increase in payments to rural hospitals and a 0.5 percent decrease in payments to urban hospitals. This result happens because there are many very small, low-cost rural hospitals with relatively few Medicare discharges that count more toward the current hospital-weighted average than they would toward a discharge-weighted average. For more information on this recommendation, see Technical Appendix A.

Recalibration

Recommendation 14: Recalibrating the DRG Weights

The DRG weights should be recalibrated annually in order to reflect the use of new technologies and other practice pattern changes affecting the relative use of hospital resources among the DRGs.

Since the PPS statute requires recalibrating the DRG weights at least every four years, the decision to recalibrate more frequently could be made on an ad hoc basis each year. The Commission believes, however, that a recalibration schedule should be set in advance so that the hospital industry can anticipate when changes in the weights will occur. Such a schedule is consistent with the prospective nature of PPS, which is designed in part to make Medicare payments more predictable for both hospitals and the Federal government.

Moreover, the Commission believes that the schedule for recalibration should be annual. Given how quickly practice pattern changes that affect relative resource use among the DRGs can occur, the four-year maximum cycle is clearly too long to keep the weights current. Even with an annual cycle, the most current patient billing data will be two years older than the year for which the weights are set (e.g., fiscal year 1985 data for fiscal year 1987 payment).

Less frequent recalibration would lead to greater changes in weights when recalibration occurs, and would also require making a greater number of interim adjustments to individual DRGs in lieu of recalibration. The Commission expects that the weights for most DRGs would not change much under annual recalibration. Large changes are possible for a few DRGs if, for example, a new medical device is being used, or many patients are being shifted to outpatient treatment.

The Commission considered the extent to which annual recalibration would pose a burden on hospitals. Frequent recalibration would require hospitals that compute their case-mix index to modify computer software to reflect the new weights. In addition, annual changes in the weights may make it more difficult for hospitals to predict their Medicare revenue. In both cases, however, the feedback from hospitals indicates that the benefits of more current relative DRG prices far outweigh any costs associated with annual recalibration.

The Commission is aware that if a recalibration is carried out for fiscal year 1987, the 1986 weights would have been in place for only six months because implementation of the weights recalibrated for fiscal year 1986 was delayed. Nevertheless, the Commission believes that the DRG weights should be based on the most recent data possible and that, despite the delay in 1986, the annual recalibration cycle should be continued for fiscal year 1987.

The Commission defines recalibration as a two-step process. First, new DRG relative weights are computed using the most recently available data. Second, the new weights are normalized (adjusted by a scaling factor) so that the average case weight after recalibration is the same as it was before recalibration. The Commission considers normalization an integral step in recalibration to ensure that recalculation of the relative weights does not affect aggregate payments to hospitals.

After recalibration, the DRG weights should be adjusted to remove any demonstrable change in reported DRG case mix that occurred during the previous fiscal year. This adjustment would ensure that changes in DRG case mix due to im-

proved coding would not be built into future PPS payments. Changes in payments due to real changes in the types of patients treated should be allowed, however, as discussed in Recommendation 3.

For this report, the Commission has incorporated a 1 percent reduction in the DRG weights to account for observed changes in the DRG case-mix index during fiscal year 1986. This figure may change as more recent data are reported. Currently, no data on DRG case mix change for fiscal year 1986 are available. The most recent information is provided in a study by the Rand Corporation, which reports that the overall DRG case-mix index did not change from the fourth quarter of fiscal year 1984 through the second quarter of fiscal year 1985. The Commission believes, however, that while changes in the DRG case-mix index may have leveled off, it is consistent with recent experience to expect a small increase due to more accurate coding as hospitals continue to adjust to PPS. Moreover, hospitals in New York and Massachusetts would be particularly prone to coding improvement since they only recently began participating in PPS.

For fiscal year 1986, the Commission recommended recalibrating the DRG weights, using charge data alone. Prior to the beginning of fiscal year 1986, the most recently available cost data were from hospital accounting years ending during fiscal year 1982, two years before the implementation of PPS.

HCFA has attempted to collect Medicare Cost Report data for the first year of PPS in time to be used during the rulemaking process for fiscal year 1987. These cost data should be used along with the charge data from the fiscal year 1985 PATBILL data set for recalibrating the DRG weights for fiscal year 1987, if they are available. Otherwise, the charge data should be used alone. Analyses of 1981 data have shown that weights based solely on charges differ only slightly from weights based on charges adjusted for costs. Changes in charge-setting practices in recent years may lead to greater differences between the weights, but more recent data must be analyzed before reaching this conclusion. If capital is added to PPS, cost weights should reflect capital as well as operating costs.

Beneficiary Concerns

Recommendation 15: Beneficiary and Provider Information

The Secretary should take immediate action to provide more and better-written information about the Medicare prospective payment system to beneficiaries and providers of care. The Department should work with providers, beneficiaries, and associations of these groups to produce and disseminate this information. Associations of providers and beneficiaries should also increase their own efforts to better educate and inform their members about the Medicare prospective payment system.

Negative perceptions of the quality of care received under the prospective payment system are widely held and have received increasing attention. Some of these negative perceptions may not reflect the actual quality of the care received; rather, they may flow from misperceptions about PPS communicated to the beneficiary. The Commission particularly takes note of reported instances in which the average lengths of stay for the DRGs, as published in PPS regulations, have been used either implicitly or explicitly to limit a patient's hospital stay. The instances, for example, include patients being told it is time for them to leave because "their DRGs have run out." In addition, some hospital notices of noncoverage are apparently predicated on a notion that a patient's DRG length of stay limit has been reached. The Commission emphasizes that published lengths of stay for each DRG should be regarded as averages. It is inappropriate to apply them as absolute limits.

The Commission urges considerably greater educational efforts to inform beneficiaries about PPS. Although the payment system began in most hospitals during late 1983 and early 1984, it was not until the spring of 1985 that HCFA made available any general purpose information aimed at beneficiaries explaining some of the common misperceptions about the system. It was not until February 1986 that HCFA mandated that hospitals inform patients of their appeal rights with respect to discharge decisions. Even today, there is no general PPS fact sheet or information available nationally from HCFA, for either beneficiaries or providers, including physicians.

44

These groups badly need such information—particularly hospitals and physicians—because they are often called upon to explain the system to the beneficiaries, who have no other available information source. The Commission applauds HCFA's plans to develop such information for beneficiaries. It is not aware, however, of any plans for similar efforts to educate either hospital personnel or physicians. HCFA should make every effort to ensure that materials are widely available to both providers and beneficiaries.

In addition to an increased effort within HCFA and other appropriate HHS organizations, ProPAC also encourages other provider and beneficiary organizations to assist in this important but complex educational effort. The Commission commends efforts by groups such as the American Association of Retired Persons for the materials that they have already developed. It encourages other organizations to develop and disseminate educational materials to their members, patients, and the general public.

Recommendation 16: Notice to Beneficiaries of Rights

Beneficiaries should be made aware of the process of reconsideration and appeal of a hospital denial of coverage for continued inpatient hospital care. Notification should be through a written notice or information bulletin. It should explain beneficiary rights in a clear, helpful, and understandable manner. In addition to a clear statement of rights, the bulletin should inform beneficiaries that they should not accept any oral communication to the effect that they must leave the hospital because their "coverage" has "run out" or because there is a limit on the number of days "allowed" by Medicare for a DRG. The bulletin should be distributed at the time of admission or as soon thereafter as is appropriate based on the patient's clinical condition. However, additional avenues of distribution should also be developed.

HCFA provides, by regulation, that beneficiary coverage for continued inpatient care may be denied if a hospital determines that the beneficiary no longer requires this care. The beneficiary may appeal this denial. The hospital is not required to give such notice to a beneficiary routinely, but only when it intends to charge the beneficiary for continued stay. The PROs are responsible for monitoring the denial notices to see that they are correct and do not mislead the beneficiary or misstate the authority or responsibility of the hospital in issuing the notice.

In February 1986, HHS announced the development of a one-page summary of information describing the patient's rights. The hospital is to give this bulletin, entitled "An Important Message from Medicare," to each Medicare beneficiary upon admission. HHS developed the bulletin after careful consultation with a group of organizations representing Medicare beneficiaries and national health care provider organizations. The bulletin will fulfill the intent of this recommendation, and ProPAC commends the Secretary for the action that has been taken.

The Commission regards this bulletin as a critical first step in providing information to beneficiaries. Because it has not yet been distributed to hospitals, and its usefulness to beneficiaries is not yet known, the Commission has chosen to submit this formal recommendation. ProPAC will continue to monitor the use and usefulness of this bulletin.

Further, the Commission maintains that the Secretary should not limit distribution of the bulletin to the time of beneficiary admission. The Secretary should make every effort to distribute it at other appropriate times. Copies could be made available at offices of the Social Security Administration, for example, and in various Medicare program and Social Security Administration mailings to beneficiaries. They could also be distributed through the auspices of associations and other groups involved in health care for the elderly.

Recommendation 17: PRO Episode of Care Review

The focus of PRO quality of care review should be, to the extent possible, on the entire episode of care. The PRO's review should include, in addition to the period of hospitalization, the quality of care (and outcome) related to the overall episode of illness, including, if appropriate, skilled nursing or home health care.

A primary determinant of the quality of care administered to a hospital inpatient is the outcome

of the episode of care. Changed financial incentives under PPS, and changing patterns of care, are resulting in less frequent use of the hospital and more frequent use of skilled nursing facilities, other community facilities, and the patient's home for treatment.

The quality and level of care available to beneficiaries in these alternative settings directly influence, therefore, the outcomes of the illnesses or problems for which beneficiaries were originally hospitalized. They can directly affect the overall quality of care beneficiaries receive. The problem of premature discharge, for example, may not be insufficient hospital services, but rather inadequate clinical management of the post-acute patient.

The focus of PRO review should, therefore, be on quality of care and patient outcomes as measured over the entire spectrum of services provided—institutional and ambulatory. Quality-of-care monitoring during the course of inpatient care should be strengthened. Medical status at the time of discharge should be determined to deter and prevent premature discharges, and the availability of alternative services in the community should be determined. In addition, outcome measures such as follow-up data on patient survival and functional status should be established and applied. A pilot program of long-term review, based on an appropriate sample of beneficiaries and including outcome measures, should be instituted.

Recommendation 18: PRO Review of Outpatient Surgery

The Commission is concerned that efforts to shift surgical services from the inpatient to the outpatient setting could have an adverse impact on quality of care for certain Medicare beneficiaries. The PROs should be required to review and monitor the quality of care (and outcome) of outpatient surgery for selected patients and procedures. As a starting point, the PROs should be required to review outpatient surgery cases for those procedures that have been identified for preadmission review, including in particular a sample of those cases for which the PRO has denied payment on preadmission review.

An increasing number of surgical procedures that previously were performed on an inpatient basis are now being performed in ambulatory settings. The movement of surgical services from the inpatient to the outpatient setting has been further encouraged by HCFA policies requiring PROs to reduce admissions for procedures that could be performed in an ambulatory surgical setting. This has been accomplished through various review mechanisms, including preadmission review, random sampling for short stays, and the establishment of admission reduction objectives.

The Commission supports efforts to encourage performance of procedures in the most appropriate setting. It believes, however, that the impact of this shift on the quality of care furnished Medicare beneficiaries must be examined.

The Commission is aware that review of outpatient surgical cases is a significant expansion of the PROs' responsibilities. The PROs, however, are already required to perform preadmission review and to deny payment for procedures that could appropriately be furnished on an outpatient basis. The Commission believes that it is a reasonable next step to require the PROs to review the quality of outpatient care where payment for inpatient care has been denied. Further, since both HCFA and the PROs have developed criteria regarding procedures they deem appropriate for ambulatory settings, the cases undergoing outpatient surgery procedures established by these criteria should also be reviewed. In addition, categories of patients who may be at high risk because of outpatient surgery, such as the frail elderly, deserve special concern.

Recommendation 19: Recalculating the Inpatient Hospital Deductible

The Secretary should seek legislative change to the formula for computing the inpatient hospital deductible so that the annual increase in the deductible is more consistent with the annual per-case increase in Medicare payments to hospitals. The proportion of the costs of inpatient hospital care borne by Medicare beneficiaries has inappropriately increased as a result of significant declines in length of stay experienced since the beginning of PPS. This proportion should be lowered to its calendar year 1983 level.

Medicare beneficiaries pay a deductible for each hospital stay, unless they have already paid the deductible during a benefit period. A benefit

46

period, or spell of illness, begins on the first day of hospitalization and ends when the beneficiary has not been an inpatient in a hospital or a skilled nursing facility for 60 days or more.

The formula for computing the inpatient hospital deductible, currently specified by law to approximate the average cost of a hospital day, is updated annually on a calendar-year basis. For 1986 the deductible is $492, up from $400 in 1985. The HCFA actuaries have estimated that beneficiary liability will increase by about $1.1 billion as a result of this update. Although most beneficiaries have supplemental insurance coverage that pays the Medicare deductible, increases in the deductible are reflected in higher premiums for this coverage.

About half the increase in the deductible for 1986 is due to the decline in length of stay attributable to PPS incentives. The deductible calculation is based on data for calendar year 1984, when the average length of stay for the over 65 population was 9.0 days, compared to 9.7 days in 1983. In the *Federal Register* notice announcing the new deductible calculation, HCFA stated that the large increase in the deductible would probably be limited to 1986 because the decline in length of stay was expected to level off.

Data from the American Hospital Association Panel Survey indicate that length of stay for patients over age 65 declined slightly during 1985, however. This suggests that another increase in the deductible related to decreasing length of stay would occur for 1987 under the current formula. The Panel Survey reports that length of stay for the over 65 group fell from 9.0 days to 8.8 days in the first 11 months of 1985.

Although the deductible approximates the average cost of an inpatient day, it was never intended to increase as a result of shorter lengths of stay. The Senate report accompanying the original Medicare legislation stated that the deductible should ". . . keep pace with hospital costs." Further, the current regulation states that "the result of the deductible increase is that the beneficiary continues to pay about the same proportion of the hospital bill."

Savings from shorter length of stay have benefited both hospitals and the Federal government, and the Commission believes that Medicare beneficiaries should share in these gains as well. Hospitals have gained from the decline in length of stay because they keep the difference between the PPS payment and their costs for treating the Medicare patients. The Federal government has also benefited since the decline in length of stay has been one of the factors considered in limiting increases in PPS rates.

The deductible should be calculated so that the proportion of total payment per stay borne by the beneficiary is the same as it was in calendar year 1983. In this way, the increase in the deductible would reflect the increase in Medicare payments per case and would not be affected by changes in length of stay since PPS began. Medicare beneficiaries would also then benefit from reduced increases in Medicare payments to hospitals over time. ProPAC estimates that the 1983 beneficiary share of payments was about 8.5 percent. Applying this proportion to the current forecast of 1986 hospital payments would yield a 1986 deductible of $400.

A change in the deductible would also affect Medicare coinsurance. Medicare hospital inpatients pay coinsurance equal to 25 percent of the deductible for days 61 through 90 of the benefit period. After 90 days, beneficiaries can choose to draw from a lifetime reserve of 60 hospital days, which are subject to a coinsurance amount equal to 50 percent of the deductible. In addition, coinsurance on Medicare-covered days in skilled nursing facilities is equal to 12.5 percent of the inpatient hospital deductible.

It may be appropriate to reconsider the overall structure of beneficiary cost-sharing in light of PPS incentives and policies. For example, some of the patients who are required to pay coinsurance are outlier patients—those patients whose stays are sufficiently long to warrant additional payments to the hospital. The coinsurance payments in isolated cases may be equal to or greater than the outlier amount that Medicare would have paid the hospital for these days. The Commission will study issues related to restructuring beneficiary cost-sharing that are suggested by changes in hospital practice associated with the incentives of PPS.

Patient Classification and Case Mix

Recommendation 20: Improving the Measurement of Hospital Case Mix

The Commission believes that the DRG system is currently the most appropriate of the available measures of hospital case mix for the Medicare PPS and should be retained in principle as the system upon which to base Medicare payments to hospitals. Resource use varies considerably, however, within some DRGs. Therefore, the Commission intends to continue its analysis of individual DRGs and to undertake a systematic evaluation of the entire system. The goal is to identify potential problems in DRG construction and classification and to recommend changes that will improve the homogeneity within DRGs and the equity of payments across hospitals.

The Commission has previously identified potential weaknesses with the use of DRGs for prospective payment. In its April 1985 report, ProPAC outlined several areas for further analysis to improve the measurement of case mix. These areas included DRG construction and classification, heterogeneity within DRGs, and case-mix distribution across hospitals that results in inequitable payments.

The April 1986 report contains a number of analyses of specific technologies and DRGs. To date, such analyses have been on a case-by-case basis. In some instances, ProPAC has recommended reclassifying a subgroup of patients, such as those receiving penile protheses, into different DRGs. In others, the Commission has recognized the need to restructure a group of DRGs; for example, hand procedures, DRGs 228-229. The Commission has also concluded that some DRGs may be heterogeneous, but that further analysis is necessary before specific recommendations are made; DRGs 456-460, for burns, are illustrative.

ProPAC has examined three broad approaches for improving case-mix measurement. Described in the April 1985 report, these approaches were to: 1) retain the current system, but revise it in an incremental fashion as problems are revealed; 2) retain the current system in principle, but reconstruct it using a newer and more complete data base; and 3) consider an alternative case-mix measurement system, either in conjunction with DRGs or to replace DRGs.

The Commission believes that the assignment of cases into individual DRGs should continue to be monitored and updated in response to changes in medical practice, medical technologies, and diagnosis and procedure coding. The Commission will continue, therefore to evaluate the assignment of cases into specific DRGs.

Furthermore, ProPAC has concluded that additional evaluation and analysis are necessary before replacing or modifying the DRGs using an alternative case-mix system. Currently, there are no generally accepted criteria for evaluating alternative systems. In addition, a comprehensive, comparative evaluation of all the alternative case-mix systems has not yet been performed. The Commission is aware of several comparative studies that are under way. It will continue to monitor the results of these studies.

The Commission has identified problems in the DRG assignment criteria, which may produce heterogeneity within DRGs or result in an inequitable distribution of patients across hospitals. Nevertheless, ProPAC does not recommend a major reconstruction of the system at this time. Unless the assignment criteria are changed, reconstruction would not necessarily produce a more homogeneous DRG system.

In the short-term, a systematic evaluation of the DRG system can identify areas for improvement to the current system. The evaluation may identify the need for changes in DRG assignment criteria, such as alternative complications and comorbidities; modification in grouping methodology, such as combinations of diagnoses or identification of specific devices; or refinements in policies, such as outlier payments. In addition, the Commission is aware of several studies to evaluate modifications of the DRG system using additional clinical variables. It will continue to monitor the results of these studies.

Recommendation 21: Process for Maintaining and Updating ICD-9-CM

The Secretary should establish a mechanism for maintaining and updating ICD-9-CM diagnosis and procedure codes in a timely and effective manner. This process should include adequate educational support for all users.

The DRG system uses ICD-9-CM diagnosis and procedure codes to assign each Medicare hospital discharge to a specific DRG for payment purposes. In order for the DRG system to remain current and accurate as medical technologies and practices change, the ICD-9-CM coding system must be updated. However, the ICD-9-CM classification, developed almost ten years ago, is not due for a major official revision until 1993. The current timetable and process for revision will not provide users with new or revised codes in a timely and effective manner. While this lengthy revision process is necessary to meet international commitments and satisfy needs for international data compatibility, it is inadequate to address more immediate problems experienced by ICD-9-CM users in the United States.

The Commission recognizes recent efforts to accommodate the need for shorter-term revisions to the ICD-9-CM system. Especially noteworthy is the recent organization of a HCFA/National Center for Health Statistics (NCHS) ICD-9-CM Coordination and Maintenance Committee, which is composed of representatives from various Federal agencies. The committee is responsible for considering errata and addenda as well as other modifications of the ICD-9-CM to reflect new procedures and technologies, recently identified diseases, and other coding problems. It is also charged with promoting the use of Federal and non-Federal educational programs and other communication techniques to standardize coding applications and upgrade the quality of coded medical data.

The ICD-9-CM Coordination and Maintenance Committee has begun to address some of the same coding issues the Commission has studied. The committee's recommendations on proposed coding changes for fiscal year 1987 are expected to be published in the *Federal Register*. ProPAC supports the committee's efforts to effect revisions or modifications to the ICD-9-CM as soon as possible. The Commission recommends that such changes be made to coincide with Grouper changes.

The Commission is concerned, however, that the committee has not publicly identified the specific procedures and processes it will follow. The committee currently plans to consider, on an ad hoc basis, coding changes requested by members and other interested parties, such as industry representatives. The committee's decisions regarding modifications to the ICD-9-CM must be formally accepted and issued, however, by NCHS and HCFA.

It is unclear whether the committee can and will have revisions or modifications available for use in a timely manner. Further, there is no clear relationship between this committee and the AHA central coding office concerning ICD-9-CM. The Commission also questions the lack of representation on the committee of non-Federal users of ICD-9-CM, and the extent to which the committee will be able to resolve disputes about the use of existing codes.

The Commission believes that the need for accurate timely coding decisions is vital to PPS. It is concerned that the committee will be unable to carry out its many responsibilities in a timely and effective manner. ProPAC is further concerned that the committee will be unable to provide it with advice soon enough for the Commission to carry out its responsibilities to consult with the Secretary before rulemaking. If this process does not ensure timely and effective changes, the Commission recommends adopting an alternative mechanism expeditiously.

The Commission also recommends that appropriate educational material for users accompany all revisions or modifications to ICD-9-CM. Such educational support is necessary to ensure the dissemination of revision notification and to help ensure consistency in code assignments.

Recommendation 22: Process for Interpretation and Assignment of Existing Codes

The Secretary should ensure that interpretation and assignment of existing ICD-9-CM diagnosis and procedure codes for payment purposes strictly adhere to coding rules and guidelines. In order to maintain the integrity and uniformity of the coding system while allowing flexibility for payment purposes, the process for interpretation and assignment of existing ICD-9-CM codes should be assigned to one authorized group.

BEST COPY AVAILABLE

The Commission recognizes that it is important to maintain the integrity and uniformity of the ICD-9-CM coding system. At the same time, the system must provide a consistent mechanism for data reporting for Federal users and others. The system must also be flexible enough to be used by Medicare for payment purposes. Coding decisions related to payment should not violate coding rules and guidelines.

Decisions related to the interpretation and assignment of existing codes are critical for all the purposes for which codes are used. Besides maintaining and updating ICD-9-CM diagnosis and procedure codes discussed in Recommendation 21, there is a continuing need for interpreting and assigning existing codes. The AHA has performed this service since the mid-1960s under contract with NCHS. NCHS, HCFA, and the American Medical Record Association (AMRA) must concur with all of AHA's decisions. However, other groups, such as commercial abstracting services, also make coding decisions and provide coding information. This may have led to the dissemination of conflicting coding advice.

The expanded use of ICD-9-CM for payment intensifies the need for a central authorized source to address concerns about coding. The overlapping activities of AHA's central coding office, the HCFA/NCHS ICD-9-CM committee, and other groups should be clarified; the responsibilities of each group should be clearly defined. The designated group should also be responsible for providing official endorsement of coding manuals. A number of written coding references now exist without any official authorization.

Recommendation 23: Interim Mechanism for Coding Problems

The Secretary should establish an interim mechanism to allow early identification of new technologies, procedures, and diagnoses and more appropriate DRG assignment when ICD-9-CM codes cannot be updated in a timely manner.

The Commission's experience with coding problems, including inadequate coding of new and changing technologies and procedures, has illustrated the deficiencies and rigidities inherent in the current ICD-9-CM coding system. Besides the long-term improvements proposed in Recommendations 21 and 22, the Commission thinks a rapid, responsive interim mechanism is necessary to permit early identification of new technologies, procedures, and diagnoses. Such a mechanism would allow more flexibility—and therefore more appropriate DRG assignment—as problems are identified. The mechanism could also be used at times independent of changes in Medicare coverage policy or changes in the Grouper program. Such a mechanism would also facilitate the earlier collection of specific data needed when payment or policy changes are considered or implemented.

The interim mechanism selected should be significantly different from the ICD-9-CM format and codes to avoid confusion both while the interim mechanism is in use and again after a permanent ICD-9-CM code is assigned. It is anticipated that interim mechanisms would be utilized only until appropriate permanent ICD-9-CM codes could be established.

DRG Classification and Weighting Factors

Recommendation 24: Adjustment of the Labor Portion of the Standardized Amounts for Some DRGs Involving Expensive Devices

The labor and nonlabor portions of the standardized amounts should be redefined for DRGs 39, 104, 105, 209, 471, and the newly defined DRGs for pacemaker implantation and replacement (Recommendations 25 and 26), implantable defibrillators (Recommendation 27), and penile prostheses (Recommendation 28). The new portions should more closely reflect the labor-related and nonlabor-related shares of costs for cases in each of these DRGs. These recalculations should be made so that total hospital payments remain unchanged.

The correct labor and nonlabor portions of the standardized amounts should be calculated from data currently being generated in the HCFA study of the labor portion of costs by DRG. If this information proves to be incomplete, the portions should be calculated from available cost and charge data for these DRGs. The Secretary should study the need for adjustments to the labor and nonlabor portions of the standardized amounts in all DRGs.

BEST COPY AVAILABLE

PPS currently adjusts individual hospital payments to reflect differences in area wage rates. This adjustment is applied equally to all cases in all DRGs and is based on labor-related costs of approximately 60 percent in the average discharge.

Hospital cases involving expensive devices are atypical. The devices are usually sold in a national market, resulting—in these cases—in a higher proportion of costs that are unrelated to local wage rates. Hospitals in high wage rate areas therefore receive a significantly higher payment, relative to cost, for cases in these DRGs when compared to hospitals with lower wage rates. ProPAC has studied this payment inequity in the 35 DRGs with the greatest number of cases involving expensive devices. The financial effect is most significant in DRGs with the highest proportion of cases involving expensive devices and with a ratio of supply costs to total costs of approximately 20 percent or more. These include DRGs 39, 104, 105, 209, 471, and the newly defined DRGs for cases involving pacemaker implantation and replacement (Recommendations 25 and 26), implantable defibrillators (Recommendation 27), and penile prostheses (Recommendation 28).

The payment inequity can be corrected if the labor and nonlabor portions of the standardized amounts are redefined for each of the DRGs mentioned above. It is important, however, that this change not affect total hospital payments. Therefore, after all DRG weights are recalibrated in a standard manner, the weights for the device DRGs should be recalculated (using the new labor-related portion for standardizing charges). This recalculation would offset the effect of changing the labor and nonlabor portions of the standardized amounts.

The new labor and nonlabor portions of the standardized amounts should be calculated from data currently being developed in HCFA's study of the labor portion of costs by DRG. If this new information is incomplete or unavailable in time for this recommendation to be implemented, the portions of the standardized amounts should be calculated from available cost and charge data. ProPAC will furnish the Secretary with the information it used to develop this recommendation.

Although the inequities of the area wage index adjustment are most important in cases involving expensive devices, there may be a similar problem in many more DRGs. In addition, the average labor-related share of costs for all discharges, which HCFA estimates at roughly 60 percent, may have changed significantly with declining length of stay and hospital responsiveness to PPS incentives. The Secretary should, therefore, complete the congressionally mandated analysis of the impact of the area wage index adjustment as soon as possible, ensuring that these issues are thoroughly addressed. For more information on this recommendation, see Technical Appendix B.

Recommendation 25: Reclassification of Pacemaker Cases Based on Type of Device

Prior to recalibration, the DRGs involving implantation of cardiac pacemakers (currently DRGs 115 through 118) should each be restructured into two DRGs, one for cases involving dual-chamber or functionally similar pacemakers, and one for cases receiving other single-chamber pacemakers. New ICD-9-CM procedure codes should be created to distinguish between these types of cases. A mechanism should be established to evaluate the appropriateness of all implants involving dual-chamber or functionally similar pacemakers. In the initial year of this new classification, the weights for all pacemaker DRGs should be calculated using charge data from the PATBILL file and data on cost differences between pacemaker types.

Under PPS, a hospital receives the same DRG payment regardless of the type or model of pacemaker implanted. The implantation of a dual-chamber cardiac pacemaker, however, differs significantly from the implantation of a single-chamber model in at least two ways. First, use of a dual-chamber model leads to greater hospital costs. This difference in costs is due to a number of factors, including the cost of the device, the need for a second cardiac lead, and the longer operative time required for implantation. The Commission estimates that in 1984 a dual-chamber pacemaker and the extra lead cost an additional $1,736 over single-chamber implants.

Second, some patients requiring dual-chamber pacemakers are clinically distinct from other pacemaker patients. Although expert physicians differ in their judgments about certain indications

for dual-chamber pacing, there are some universally accepted criteria. The patients meeting these criteria are therefore clinically distinct from other pacemaker patients. To retain the clinical coherence of the pacemaker DRGs, cases involving dual-chamber pacemakers should be classified into separate DRGs.

The Commission would have preferred to recommend a revised classification based on patient characteristics rather than on the therapy provided. Unfortunately, the accepted criteria for implantation of dual-chamber pacemakers cannot all be described with specific diagnostic labels. Therefore, until such diagnoses and related codes are identified, classification must be based on the type of pacemaker implanted. Although current ICD-9-CM codes are inadequate to distinguish between types of pacemaker models, new codes should be developed in time for implementation of this recommendation by October 1, 1986.

The Commission recognizes that this recommendation will likely lead to increased use of dual-chamber pacemakers. Failure to reclassify pacemaker discharges based on type of device, however, could result in limiting the access of Medicare beneficiaries to this important technology. The Secretary can restrain the inappropriate use of the more expensive pacemakers by developing a mechanism to evaluate all implants involving dual-chamber or functionally similar pacemakers. In addition, ProPAC plans to follow closely the issues surrounding cardiac pacing and especially the further refinement of clinical criteria for implantation of different types of pacemakers. The Commission will review the subject completely within the next three years as necessary.

The Commission understands that some single-chamber pacemaker models now undergoing clinical investigation may be functionally similar to dual-chamber pacemakers. That is, in some cases, these new single-chamber pacemakers could substitute for the more expensive dual-chamber models. Because ProPAC does not wish to inhibit the development of such alternative technologies, the Secretary should consider classifying new pacemaker models into DRGs based on both device function and cost.

Since current ICD-9-CM codes are inadequate to distinguish among pacemaker models, calculation of the initial weights for these new pacemaker DRGs cannot be based entirely on currently existing Medicare data bases. During the first year this policy is in effect, the Secretary should calculate weights based on relative charges or costs in the pacemaker DRGs and the difference between dual-chamber and single-chamber implants, which ProPAC estimates to be about $1,740. For more information on this recommendation, see Technical Appendix B.

Recommendation 26: Reclassification of Pacemaker Replacement Cases

Prior to recalibration, the cases involving replacement of a permanent cardiac pacemaker, except those with myocardial infarction, congestive heart failure or shock, should be reassigned to DRGs that include only pacemaker replacements.

Data from the 1984 PATBILL indicate that, on average, cases involving pacemaker replacement use fewer hospital resources than cases undergoing initial implant, but more resources than cases involving revision without replacement. The only exception to this finding is for patients with myocardial infarction, congestive heart failure, or shock. The costs of pacemaker replacement for these patients are similar to the costs of initial implantation.

Despite these important distinctions, the Grouper program is not consistent in classifying these replacement discharges. A case with pulse generator replacement only (i.e., no change in pacemaker leads) is generally classified into DRG 118, and a replacement that also involves a lead change is generally classified into DRG 117. Either kind of replacement, however, can be grouped into the higher-paying DRG 116 if the hospital uses certain ICD-9-CM procedure codes. Finally, any pacemaker case (initial implant or replacement) in a patient with congestive heart failure, myocardial infarction, or shock is classified into DRG 115.

This inconsistency in classification of pacemaker replacements has led to substantial pay-

ment inequities across hospitals. One hospital, for example, may be paid significantly more for a case than another hospital providing a similar patient with a similar service. The Commission strongly believes that this error should be corrected. The Secretary should develop specific coding guidelines for cases involving replacement and change the Grouper program to classify these cases into distinct DRGs.

It is important, however, that these changes be combined with those proposed in Recommendation 25. There is significant variability in the resources used in replacement cases. Patients can have a single-chamber model replaced with another single-chamber model, a dual-chamber model replaced with another dual-chamber model, or a single-chamber model replaced with a dual-chamber model and its additional cardiac lead. This variation among replacement cases can most appropriately be reduced by classifying DRGs based on pacemaker type.

Recommendations 25 and 26, combined, lead to seven newly defined DRGs for pacemakers. They are summarized below. For more information on this recommendation, see Technical Appendix B.

Description of the Proposed New Pacemaker DRGs Based on Recommendations 25 and 26

- Initial implantation or replacement of a dual-chamber or functionally similar cardiac pacemaker in a patient with myocardial infarction, congestive heart failure, or shock.
- Initial implantation or replacement of other cardiac pacemaker in a patient with myocardial infarction, congestive heart failure, or shock.
- Initial implantation of a dual-chamber or functionally similar cardiac pacemaker in a patient without myocardial infarction, congestive heart failure, or shock.
- Initial implantation of other cardiac pacemaker in a patient without myocardial infarction, congestive heart failure, or shock.
- Replacement of cardiac pacemaker with a dual-chamber or functionally similar cardiac pacemaker in a patient without myocardial infarction, congestive heart failure, or shock.
- Replacement of cardiac pacemaker with other cardiac pacemaker in a patient without myocardial infarction, congestive heart failure, or shock.
- Permanent cardiac pacemaker system revision except replacement.

Recommendation 27: Implantable Defibrillator

Implantable defibrillator cases should be assigned to a unique DRG. The labor and nonlabor portions of the standardized amounts should be redefined for this new DRG to reflect the labor-related and nonlabor-related shares of costs for these cases.

The implantable defibrillator is a new medical device used in the treatment of some life-threatening ventricular arrhythmias. Discharges involving the implantation of this device are now a covered Medicare service and have been assigned to DRG 104 (cardiac valve procedure with pump and with cardiac catheterization).

The Commission believes that implantable defibrillator cases should be assigned to a unique DRG. The diagnoses and procedures for these cases are unlike those of discharges in other DRGs. More importantly, the costs of the defibrillator cases are themselves unique: more than 50 percent of the total costs are due to the device. To avoid significant payment inequities across hospitals in such cases, the labor and nonlabor portions of the standardized amounts should be redefined to reflect the labor-related and nonlabor-related shares of costs (see Recommendation 24). This can be accomplished only if the defibrillator cases are assigned to a unique DRG. The weight for the DRG should be calculated from available data so that hospital payments approximate costs.

The implantable defibrillator is a new technology that is undergoing rapid change. As the device becomes more widely used, additional adjustments to DRG classification may be required for cases involving percutaneous implantation of the device and lead, replacement of a device, or the revision or removal of an existing device or

lead. It will be important that new ICD-9-CM codes currently under consideration allow differentiation and monitoring of these cases. For more information on this recommendation, see Technical Appendix B.

Recommendation 28: Penile Prostheses

Prior to recalibration, cases involving the implantation of a penile prosthesis should be removed from DRG 341 and reassigned to a unique DRG. The labor and nonlabor portions of the standardized amounts should be redefined for this new DRG to reflect the labor-related and nonlabor-related shares of costs for these cases.

The cases in DRG 341 (penis procedures) involving implantation of a penile prosthesis should be reclassified into a unique DRG for several reasons. First, as currently defined, DRG 341 is not clinically coherent. Although all the patients undergo an operation related to the penis, many of the procedures are quite distinct from one another and are performed for markedly different medical indications.

Second, penile prosthesis cases utilize significantly greater hospital resources than other cases in the same DRG. The difference in charges, estimated from the 1984 PATBILL at about 35 percent, is due largely to the cost of the prosthesis. Such a large difference was probably not recognized during the development of the DRGs. Hospital resources were originally measured using length of stay whereas these cases have high costs despite short lengths of stay.

Third, as discussed in detail under Recommendation 24, the high nonlabor costs in the prosthesis cases result in payment inequities across hospitals. To avoid these inequities, cases with expensive devices should not be classified with non-device cases. In addition, the labor and nonlabor portions of the standardized amounts should be redefined to reflect the high nonlabor costs of the device. For more information on this recommendation, see Technical Appendix B.

Recommendation 29: Additional Payment for Magnetic Resonance Imaging

For a period of three years, Medicare should pay hospitals an additional amount (hereafter termed an add-on) for each covered magnetic resonance imaging (MRI) scan performed on an inpatient Medicare beneficiary in a PPS hospital. Under existing capital payment policy, the add-on for fiscal year 1987 should be $124 for each scan performed on beneficiaries in institutions where Medicare pays for the capital costs of an MRI scanner and $282 for each scan performed on beneficiaries in other PPS hospitals. In fiscal year 1988 and fiscal year 1989, the add-on amounts for all hospitals should be recalculated to reflect any change in the average cost of an efficiently produced scan and any changes in capital payment policy.

Magnetic resonance imaging is an important new diagnostic technology that has been approved for marketing by the Food and Drug Administration (FDA) for imaging the internal structure of the head and body. It has proven efficacy in a number of medical conditions and has tremendous potential for use in many more areas.

ProPAC believes that an alternative payment mechanism is necessary for MRI for several reasons. First, although MRI has recently become a covered service for most indications in Medicare beneficiaries, hospital payments have not been increased to reflect the additional costs of using the technology.

Second, while the increased costs of new technologies such as MRI will automatically be reflected in the DRG weights in subsequent years through recalibration, this process will also increase payments for cases in which no MRI scan is performed. Since MRI scanners are currently available to only a small number of hospitals, this averaging effect will tend to underpay hospitals utilizing MRI and overpay those not using the technology. This inequity may discourage hospitals from providing MRI scans.

Finally, ProPAC is concerned that the incentives inherent in current payment policy may result in an inappropriate distribution of MRI scanners. Approximately 50 percent of the scanners in this country are located outside of hospitals in a variety of outpatient settings. This distribution is atypical of most expensive medical technologies and has likely occurred due to a number of factors. These include delays in coverage by many third-party payers, certificate-of-need requirements, the incentives under PPS, and characteristics of the technology itself.

The recent Medicare decisions to cover MRI scanning, reimbursing for each outpatient scan but not increasing inpatient payments, may inappropriately encourage scanning to be performed on an outpatient basis. Under current policy, these outpatient scans are reimbursed through Medicare Part B, with the beneficiary responsible for a 20 percent copayment. ProPAC believes that an additional payment for inpatient MRI scans will encourage hospitals to perform the scan as part of an inpatient hospital stay when it is more appropriate to do so.

The add-on would be paid to the hospital where the beneficiary is an inpatient. This policy encourages the hospital to provide scans in the most cost-effective manner. The proposed add-on amounts are estimates of the average cost of a scan at an efficiently run facility, adjusted for the degree to which MRI may substitute for other hospital resources. The Commission believes that the amount of the add-on should not bias a hospital's decision about whether to purchase an MRI scanner or to obtain scanning services from another provider. Thus, since institutions that own scanners receive an additional payment for the capital related costs of MRI, a higher add-on amount is provided for hospitals that do not own scanners.

With this approach, the total payment per scan for both types of institutions would include capital as well as operating costs. Furthermore, the add-on to either type of hospital should be adjusted over the next three years to reflect changes in the average costs of efficient scanning and any changes in capital payment policy. At the end of three years, the Commission will reevaluate the adequacy of PPS payments for MRI and the need for continuing an add-on.

In Recommendation 5, ProPAC proposes that the Secretary initiate a transition to all-inclusive prospective prices that combine operating and capital cost components in a single prospective payment per case. The exact timing and nature of any future changes in capital payment policy are not yet clear, however. If capital has not been included in PPS within three years, the Commission will consider the desirability of a single add-on payment for all hospitals and the exclusion of cost-based capital payments for MRI.

The Commission strongly believes that this add-on payment should not lead to an increase in total Medicare payments beyond that calculated for the scientific and technological advancement component of the discretionary adjustment factor (Recommendation 2). Targeted payment adjustments of this type should be offset in the DAF so that the total amount allowed remains unchanged by the add-on payment. When the appropriate data become available, the Commission will also recommend adjustments in DRG weights to account for the add-on. This should not be a significant problem in the interim, however, because MRI scans are performed in relatively few cases.

ProPAC recognizes that this recommendation departs from the concept of a single payment per discharge regardless of the resources used during the admission. The importance of MRI, however, and the potentially serious consequences of not providing the appropriate financial incentives for this technology have led the Commission to its decision. For more information on this recommendation, see Technical Appendix B.

Recommendation 30: Extracorporeal Shock Wave Lithotripsy

Prior to recalibration, cases in which extracorporeal shock wave lithotripsy (ESWL) is the principal procedure should temporarily be removed from DRG 324 and reassigned to DRG 323. The payments and costs for all cases in this DRG should be monitored to determine the appropriateness of PPS payments for operating costs. A unique procedure code should be identified for ESWL.

Extracorporeal shock wave lithotripsy is a new, noninvasive technology that uses shock waves to remove urinary tract stones. When DRGs were initially developed, ESWL was not a covered service for Medicare beneficiaries. In 1985, ESWL was covered and the cases were assigned to the medical DRGs 323 (urinary stones, age >69 and/or CC) and 324 (urinary stones, age <70 w/o CC).

The Commission examined data on ESWL costs, charges, and utilization rates from many different sources and concluded that payments for DRG 324 are inappropriately low. Payments for ESWL cases in DRG 323 more closely reflect operating costs. Neither clinical nor financial data were

found to justify splitting ESWL cases based on age, complications, or comorbidities. The newly defined DRGs could have the following proposed title changes:

DRG 323 Lithotripsy or urinary stones, age >69 and/or CC, and
DRG 324 Urinary stones, age <70 w/o CC, w/o lithotripsy.

While classification in DRG 323 results in the most appropriate payments for these cases, the average cost of treating a patient with ESWL is extremely sensitive to the number of procedures performed. The cost data used in the ProPAC analysis reflect, on average, a relatively low volume of cases in institutions with lithotripters. As hospitals utilize their equipment more efficiently, costs per case are likely to decrease. The Commission, therefore, recommends continued monitoring of ESWL procedure costs and other routine and ancillary hospital service charges over the next year.

ESWL does not have a unique ICD-9-CM procedure code. Cases involving ESWL are distinguished from cases undergoing other kinds of lithotripsy by combinations of two procedure codes. The Commission recommends establishing a unique code for ESWL so that these procedures can be monitored more accurately in the future. For more information on this recommendation, see Technical Appendix B.

Recommendation 31: Lymphomas and Leukemias

Prior to recalibration, cases currently assigned to DRGs involving lymphoma, leukemia, and other related diagnoses (DRGs 400-404) should be reclassified into one of five newly defined DRGs. The new classification should provide a unique DRG for acute leukemia cases not involving a major operative procedure, eliminate age as a criterion for DRG assignment, and modify present classification based on operative procedure, complications and comorbidity. Other ways of further improving these DRGs should continue to be explored.

The current lymphoma/leukemia DRGs (400-404) are very heterogeneous in terms of resource consumption. This is evident not only from public comment but also from high coefficients of variation obtained when studying charges and costs.

Alternative ways of grouping these cases have been considered in depth. Principal diagnosis, age, major and other operating room procedures, complications/comorbidity, and discharge status have been studied. Based on a number of considerations, including the intent and design of PPS and the amount of within-DRG heterogeneity that can be reduced, the Commission believes lymphoma and leukemia patients should be classified into the following groups:

DRG 400 Lymphoma/leukemia with major operating room procedure,
DRG 401 Acute leukemia without major operating room procedure,
DRG 402 Lymphoma/non-acute leukemia with other operating room procedure and complication/comorbidity,
DRG 403 Lymphoma/non-acute leukemia with other operating room procedure or complication/comorbidity, and
DRG 404 Lymphoma/non-acute leukemia without operating room procedure or complication/comorbidity.

The proposed DRGs would be an improvement over the current DRG classification in reducing heterogeneity. Cases in these DRGs should be monitored to determine if additional adjustments will be necessary. Other methods for improving these DRGs should continue to be studied. For more information on this recommendation, see Technical Appendix B.

Recommendation 32: Upper Extremity Procedures

Prior to recalibration, cases involving procedures of the upper extremity that are currently classified in DRGs 223, 224, 228, and 229 should be reassigned based on anatomical location and the presence of systemic collagen vascular disease or implantation of joint prostheses or complications and/or comorbidities. Nonsurgical hip fracture cases currently being assigned to DRGs 223, 224, 225, 228, and 229 should be reassigned to the appropriate medical DRG.

The current classification of cases in DRGs 223, 224, 228, and 229 fails to distinguish adequately between groups of cases with markedly different resource use according to meaningful clinical criteria.

The Commission studied many alternative groupings of these cases, using combinations of selected principal diagnoses, specific procedures, age, and complications. Based on a number of considerations, including the intent and design of PPS and the amount of within-DRG heterogeneity that can be reduced, the Commission believes patients with upper extremity procedures should be reclassified into the following groups:

DRG 223 Upper extremity procedure except humerus and hand; with joint prosthesis or complications and/or comorbidities,
DRG 224 Upper extremity procedure except humerus and hand; w/o joint prosthesis or complications and/or comorbidities,
DRG 228 Hand procedure; with joint prosthesis or collagen vascular disease or complications and/or comorbidities, and
DRG 229 Hand procedure; w/o joint prosthesis or collagen vascular disease or complications and/or comorbidities.

Currently, patients with the principal diagnosis of hip fracture who are treated medically but who also undergo a procedure on the upper extremity or foot are classified into DRGs 223, 224, 225, 228, or 229 based upon the procedure. The Grouper should be changed to assign these cases to the appropriate DRG for nonsurgical hip fractures. For more information on this recommendation, see Technical Appendix B.

Data Development and Research

Recommendation 33: Maintaining a Commitment to Data Development and Research on PPS

The Secretary should continue to devote substantial resources to data development and research for monitoring and improving PPS and understanding its effects on the health care system. Studies mandated by the Congress that are already due should be completed and made public as soon as possible, and new studies that analyze more recent data should be designed and implemented as soon as possible. While ProPAC and other organizations will participate in this process, the major commitment to PPS data development and research must reside in the Department of Health and Human Services.

For the foreseeable future, continued data development and research should be viewed as an intrinsic part of PPS. While new policy directions may require major investments in data collection and analysis, such investments should not displace needed further data development and research on PPS.

The Commission has identified a number of areas in which current data and analysis are sorely needed both for understanding the consequences of PPS and for the development of solutions to problems. A prime example is to determine the effects of PPS on the quality of care received by Medicare beneficiaries. Most of the research to date has been done with data that includes only a short period of time corresponding to hospital payment under PPS. Moreover, because the transition to Federal payments under PPS is incomplete, data collection and research must continue until the full effect of a completely phased-in system can be assessed.

It would be contrary to Medicare beneficiaries' interests to reduce the commitment to understanding PPS at a time when the potential for achieving this understanding is increasing. The Commission will continue to devote its resources to data development and research on PPS issues. It welcomes the opportunity to work with the Secretary on plans for the HHS agenda. The Commission will continue to make public the results of its research and hopes that the Secretary will also continue to share the results of HHS research.

Chapter 3

Analytic Plans for Improving the Prospective Payment System

This chapter summarizes the Commission's immediate and long-term analytic plans to improve the prospective payment system. These plans reflect a continuation and expansion of the studies supporting the recommendations presented in Chapter 2.

Improving and updating PPS are essential to make prospective payment an equitable system that enables hospitals to continue to deliver high-quality care in a cost-effective manner. Thus, through its analytic agenda, the Commission will identify and analyze problems and recommend improvements in current methods of DRG classification, case-mix measurement, and calculation of payment amounts. These improvements are necessary to ensure equitable payments to hospitals and to reflect changes in medical technology and practice patterns.

In some cases, the recommendations made this year called for temporary adjustments. Although it would have been desirable to propose permanent adjustments, the lack of current data as well as changes in medical practice since PPS implementation prevented this. The Commission intends to continue to monitor changes in medical practice and to collect and analyze additional data in order to recommend more permanent adjustments in the future.

The delivery of high-quality care in a cost-effective manner is one of ProPAC's chief priorities. While the Commission believes that implementation of PPS has so far been successful, some incidents have been reported that require particular attention to monitoring and measuring quality of care. The thrust of much of ProPAC's analytic work is designed to study this key area.

The first section of this chapter describes analyses aimed at improving DRG classification and case-mix measurement. Some of the issues discussed in this section emerge as cross-cutting problems between case-mix measurement and the establishment of payment amounts. The second section discusses methods to improve and update the payment amounts. The final section presents an overview of the Commission's strategy for research related specifically to quality of care and other beneficiary concerns.

IMPROVING DRG CLASSIFICATION AND CASE-MIX MEASUREMENT

In the April 1985 report, the Commission outlined problems related to the DRG patient classification system as it is used to measure hospital case mix. Three broad approaches for improving case-mix measurement were suggested:

- Retaining the current system but revising it incrementally as problems emerge,
- Retaining the system in principle but reconstructing it using newer, more complete data bases, and
- Considering an alternative system, either in conjunction with DRGs or to replace DRGs.

Based on the work undertaken since the April 1985 report, ProPAC has recommended retaining the current DRG system for the present along with making several incremental modifications and improvements to the system. The analyses completed by the Commission and others, however, have demonstrated that resource use varies considerably within some DRGs. The causes of the variations are complex and need to be better understood before recommending a major restructuring of the DRGs. To this end, the Commission has developed an analytic plan for systematically evaluating the heterogeneity of the DRGs. This evaluation will provide empirical evidence for

evaluating the principles of case-mix measurement.

Because of substantial differences in case complexity observed within individual DRGs, alternative case-mix measurement systems—especially those focusing on severity-of-illness measures—have gained considerable attention as a possible method for improving or replacing DRGs. While understanding of the complexities and deficiencies of the current system is increasing, much remains to be learned about the advantages and disadvantages of alternative systems. Currently, generally accepted criteria for evaluating these systems are nonexistent. Further, a comprehensive, comparative evaluation of DRGs as well as alternative case-mix systems has not yet been performed.

The Commission's analytic plans to improve the measurement of case mix will continue to follow the same approaches mentioned above. The major study areas are summarized here and discussed more fully in the rest of this section.

- Analysis and evaluation of new and changing technologies and practice patterns will continue. Incremental improvements to the current DRGs will be developed that reflect the results of these studies.
- The current studies of heterogeneity and case complexity for specific DRGs and groups of DRGs will continue. Further studies will expand the scope to a broader examination of all DRGs. Specifically, these studies will examine the adequacy and appropriateness of existing and alternative DRG assignment criteria. They will be designed to identify areas to improve DRG homogeneity and better account for case complexity and severity of illness.
- The analyses of specific DRGs and groups of DRGs have pointed to additional topics that will require further study. These topics relate to the measurement of case mix as well as the calculation of the payment amounts and include:
  - —Outlier payment policy,
  - —Geographic variations in resource use,
  - —High device costs and the labor/nonlabor portions of the payment amounts,
  - —Allocation of nursing costs, and
  - —Transfers and readmissions.
- Monitoring the development and comparative evaluation of alternative case-mix measurement systems will continue.

Technologies and Practice Patterns

The Commission and many others have been concerned about the need to incorporate new technologies and medical advances into the system. Part of ProPAC's resources have been and will be devoted to recommending appropriate adjustments in DRG classifications and weights in order to incorporate new technologies as they become Medicare-covered services. The Commission will also examine the need for adjustments to reflect changes in the use of existing technologies or changes in practice patterns. It will recommend improvements on an incremental basis when necessary.

The Commission is pleased that the Secretary has implemented procedures for making changes to the DRG classifications. Under these procedures, most changes will be made when annual PPS regulations are promulgated. Some new technologies will become covered services at other times, however, and the Commission will consult with HCFA on issues related to DRG assignment as these technologies are covered by Medicare.

Incorporating new technologies and practices into PPS may be difficult. The Commission recognizes that there are unique problems for new technologies that are expensive but enhance quality of care. The Commission is concerned about the mechanisms for providing timely and appropriate payments (e.g., recalibration and reclassification). These mechanisms may not always provide the appropriate incentives for the development, adoption, and diffusion of new technologies. Likewise, the Commission wishes to avoid financial incentives that result in the adoption of technologies that are unproven or unnecessary for the efficient delivery of high quality care.

Based on its evaluation of two new and costly technologies, ESWL and MRI, the Commission recommended two very different adjustments to the system: a reclassification of patients undergoing ESWL and an add-on payment for patients undergoing MRI scanning. The Commission will continue to address the special problems associated with costly new medical technologies on a case-by-case basis, recognizing that solutions may vary significantly depending on the technology.

The Commission will focus on improvements using existing payment policies, such as reweighting or "pricing" of certain DRGs. It is likely, as is the case for ESWL and MRI, that adjustments will be recommended on a temporary basis or for an interim period. This will permit the development of better data bases for accurately measuring costs and efficiency changes as technologies diffuse. ProPAC will continue monitoring these technologies as they are incorporated in medical practice.

While the financial incentives under PPS may adversely affect the development, adoption, and diffusion of costly new technologies, the objective evidence available to document such effects is limited. The Commission will monitor studies being conducted by other organizations and consider implementing a study to evaluate the effects of PPS in this area.

Improvements in the DRG system to incorporate changes in medical technologies and practice patterns, as well as general improvements in DRG homogeneity, must be achieved within the constraints of the current ICD-9-CM coding system for procedures and diagnoses. For some technologies or practices, new codes will need to be developed. In other instances, administrative mechanisms to identify specific procedures or conditions in the absence of an appropriate code will need to be devised. The Commission has made several recommendations this year regarding maintenance and updates to the ICD-9-CM system for payment purposes. ProPAC will continue to monitor changes in the coding system, recommending improvements that are necessary to keep the system up to date.

The availability of data bases for accurately pricing new technologies and services is a critical need for determining appropriate weights for new technologies. Typically, manufacturers are the only sources of data. These data bases provide limited information. The Commission has found it necessary in some cases, such as ESWL, to make temporary recommendations while monitoring the use of the technology and gathering additional data. In other cases, such as burn DRGs, the Commission has withheld recommendations until better data become available. ProPAC will continue to monitor the development of data for these technologies and use new data sources as they become available.

Heterogeneity

The Commission has identified significant heterogeneity problems in the DRG system as a result of its examination of classification problems for specific DRGs or groups of DRGs. Heterogeneity is a source of concern because of its association with payment inequities. (Heterogeneity is defined as the degree of dissimilarity among cases within a patient category.) These case-by-case analyses, prompted by concerns that case complexity varies widely within certain DRGs, have led the Commission to recommend structural changes in some DRGs. These include DRGs for lymphomas and leukemias, as well as DRGs involving upper extremity procedures. These case examples of heterogeneity reflect the inability of DRGs to capture differences in case complexity that may be due to: inadequate measures of complications and/or comorbidities; lack of specificity in operating room procedures performed; or other underlying problems with the DRG assignment criteria.

ProPAC will continue to examine the causes of heterogeneity and to develop recommendations for improvements to the DRG system on two levels. On a general level, the DRGs will be systematically evaluated to determine the global changes in the DRG assignment criteria necessary to increase the homogeneity of the DRG system. The Commission will also continue to study individual DRGs or groups of DRGs on a case-by-case basis and recommend improvements. In its efforts to improve the DRG system, the Commission will focus on the following heterogeneity issues.

62

DRG Assignment Criteria

The analyses completed to date have provided evidence of variation in case complexity within DRGs. Much of this variation can be linked to inadequacies in the underlying principles, or assignment criteria, of the DRG system.

Complications and/or Comorbidities.—The use of complications and/or comorbidities (CCs)—particularly the sequence or combination of one or more diagnoses—needs to be carefully reviewed. Currently, one list of complications and/or comorbidities applies to all DRGs. These are not specific to DRGs or Major Diagnostic Categories (MDCs). Payment may not reflect the resources required to treat specific complications and/or comorbidities. Preliminary evidence from ProPAC analyses suggests that modifying the use of complications and/or comorbidities in DRG assignment may reduce heterogeneity within some DRGs. Creating DRG- or MDC-specific lists on the basis of resource intensity is a possible approach to DRG improvement.

Patient Age.—Patient age is used in a number of DRGs for assignment. As an assignment criterion, age is typically used in conjunction with the presence of a complication and/or comorbidity (e.g., "Age >69 and/or CC"). Some researchers have argued that to reduce DRG heterogeneity, other age splits may be more appropriate to identify older patients (e.g., persons who are at least 80 years of age), who are presumably sicker. Preliminary analyses of heterogeneity within DRGs indicate that age is probably less important than the presence of complications and/or comorbidities. Additional work is necessary to determine the validity of this finding for all DRGs and the appropriateness of combining the age criterion with the presence of complications and/or comorbidities. Moreover, if revised lists are developed, age splits may not be necessary.

Operating Room Procedures.—The list of operating room procedures and surgical hierarchies within MDCs should also be reviewed. Currently, cases are assigned to DRGs on the basis of the presence or absence of an operating room procedure within MDCs. ProPAC analyses (e.g., for DRGs involving upper extremity procedures) have suggested that heterogeneity can be reduced by further separating patients on the basis of specific operating room procedures.

Patient Disposition at Discharge.—Relatively few DRGs are defined on the basis of patient disposition at discharge. For example, only a few DRGs use death in the assignment criteria. Preliminary analyses of a sample of DRGs confirm that, on average, costs incurred in the care of patients who die in the hospital are much greater than costs incurred in the care of patients in the same DRG who do not die. Furthermore, for some DRGs (e.g., burn DRGs) patients who died were concentrated in certain types of hospitals. The inclusion of discharge disposition could be used more extensively as an assignment criterion if the severity of patients who die is not adequately measured using the current classification variables.

Other Assignment Criteria.—Other problems with the current assignment criteria for DRGs include the determination of principal diagnosis, the presence of multiple diseases during the same admission, and the definition of DRG 468 (operating room procedure unrelated to principal diagnosis). ProPAC will continue to consider changes in these areas that may improve homogeneity within DRGs.

Other Case-Mix Measurement Issues

In addition to the topics discussed above, the Commission's continuing efforts to improve the measurement of case mix will focus on several general issues that are also related to the determination of the payment amounts. These issues are discussed below.

Outlier Payment Policy

Analyses of specific DRGs (e.g., burn DRGs) have identified considerable differences in outlier rates among hospitals. These findings were supported by statistics for a broad range of DRGs, where outlier rates varied significantly across DRGs and by type of hospital within DRG. Differences in outlier rates across institutions may occur for various reasons. These include severity-of-illness differences not currently measured by the DRG system; hospital or physician inefficien-

cies, or both; or other problems in case-mix measurement, such as ICD-9-CM coding limitations.

Thus, the Commission believes that changes in the payment mechanism for outlier cases may be an important method for addressing the problems of heterogeneity. This may be true, for instance, for DRGs where the severity of illness for outlier patients is not adequately measured by the current system. It may be appropriate to adjust the outlier payment rates to more accurately account for the additional costs of treating these patients beyond outlier thresholds.

While changes in outlier payment policy will not make the DRGs more homogeneous, modifying the payment mechanism for outliers may limit the need for improving DRG homogeneity to only inlier cases. ("Inlier cases" are all cases that are not in the outlier category.) That is, the combination of homogeneous DRGs for *inlier* cases and adequate payment mechanisms for *outliers* may solve the inequity problems caused by heterogeneous DRGs. The Commission will continue to examine outlier cases in its analysis of DRG heterogeneity and to consider appropriate changes to outlier payment policies, including marginal payment rates and the outlier thresholds.

Geographic Variations in Resource Use

Geographic variations in resource use are another important source of heterogeneity within DRGs. During 1985, the Commission began examining the extent of geographic variations within DRGs using the existing Medicare data bases. In future analyses, ProPAC will attempt to determine the amount of geographic variations resulting from differences in severity or complexity that the DRG system does not capture adequately.

Documenting and understanding the sources of geographic variations in resource use are also important considerations for many of the other issues facing the Commission. Geographic variations must be considered when new and changing technologies or practice patterns are incorporated into the system. These variations are also important in the analyses of hospital efficiency and productivity to support the empirical basis for the DAF, and in the analysis of changes in the hospital product. Further, studies related to quality of care and the impact of PPS must also take geographic variations into account. The Commission will continue its efforts to document the extent and causes of geographic variations.

High Device Costs and the Labor/Nonlabor Portions of the Payment Amounts

In its 1985 report on the appropriateness of hospital payments for pacemaker implantation, the Commission identified several problems due to the high cost of pacemaker units and unique cost structure of hospital discharges involving pacemaker implantation. Subsequent analyses revealed similar problems with other expensive implantable devices including intraocular lenses, cochlear implants, penile prostheses, and artificial urinary sphincters. Analysis of DRGs involving expensive devices led the Commission to make several recommendations this year.

The Commission has examined the atypical cost structure for discharges involving expensive devices. Adjustments to the labor and nonlabor portions of the standardized payment amounts have been recommended for several DRGs (e.g., cardiac pacemakers) as a result of this analysis. The current methodology for the payment mechanism and for DRG weight calculation assumes that roughly 80 percent of the cost is labor-related. Since this percentage is adjusted for local wage rates, large distortions in payments occur for DRGs where device (nonlabor) costs account for much more than 20 percent. The Commission will continue to study the appropriateness of the current 80/20 policy for labor and nonlabor costs across all DRGs and will recommend improvements where necessary.

Allocation of Nursing Costs

In making its recommendations for improvements in case-mix measurement, the Commission will consider the ability of the DRG system to promote appropriate levels of nursing services to maintain quality care. The Commission has previously expressed concern that the methods used to allocate nursing costs have produced significant inaccuracies in the DRG weights, possibly requiring adjustments to the DRGs to better meas-

ure nursing intensity. Further, the Commission believes that adjusting for nursing intensity may be a useful mechanism for improving DRG homogeneity. The accuracy of the payment amounts may also be improved by incorporating measures of nursing intensity and skill mix into the current costing mechanism.

The Commission has completed, through a contract with Health Economics Research, Inc., a comprehensive evaluation of existing nursing patient classification systems. This contract also provided a review of the literature regarding alternative costing methods for nursing services, the effects of PPS on the quality of nursing care, and the relationship between nursing intensity and patient severity of illness. ProPAC will use this information and results from preliminary empirical analyses in the development of its research strategy for addressing the nursing intensity issue. The Commission will also monitor the empirical research on the allocation of nursing costs funded by HCFA and incorporate those findings into its planned research.

Transfers and Readmissions

The Commission recognizes the responsibility of the PROs to review the transfer and readmission of patients as part of their overall review of medical practice under PPS. The Commission's concern regarding transfers and readmissions relates to the severity difference of patients who are transferred and the adequacy of payments for these patients. The adequacy of payments between the transferring and receiving hospitals and the incentives provided by transfer payment policy will be examined in the context of specific DRG analyses (e.g., burn DRGs) and as part of the Commission's overall analysis of case-mix measurement issues.

As outcome measures, changes in readmission and transfer rates (for the same conditions) may provide empirical evidence about how PPS affects the quality of patient care. The Commission will analyze Medicare data bases to document changes in transfer and readmission rates as hospitals continue to respond to PPS incentives.

Alternative Case-Mix Measurement Systems

As discussed above, the Commission believes that the DRG classification system should be retained, for the present, as the most appropriate measure of hospital case mix. The Commission recognizes that, in the long-term, it may be necessary to consider alternative case-mix measurement systems. This would be the case if the DRG system proves to be inadequate for incorporating new and changing technologies and practice patterns, or for measuring case complexity and severity of illness. The Commission has examined possible criteria for evaluating alternative case-mix measurement systems and will continue to examine these systems as they are developed and improved. If the DRG system is to be replaced or combined with an alternative system, ProPAC believes that an evaluation of the alternative systems against a uniform set of criteria using a single data base would be necessary.

IMPROVING AND UPDATING THE PAYMENT AMOUNTS

The Commission seeks improvement in current methods of DRG classification and case-mix measurement so that PPS payments are distributed in a manner consistent with variations in the resource requirements of treating patients. ProPAC's approach to improving case-mix measurement focuses on both methods for incorporating new technologies and changing practice patterns, and generic improvements in the system necessary to maintain quality care.

In addition to accurate distribution of payments, the Commission is concerned about whether the PPS payment levels are adequate to enable hospitals to provide high-quality care to Medicare beneficiaries. Adequate payments may not ensure that individual hospitals will maintain quality care. The Commission believes, however, that PPS should provide appropriate incentives and payments to encourage hospitals to provide high-quality care.

The standardized amounts are the foundation of PPS payments and a major focus of ProPAC's work. The Commission's efforts include identifying appropriate updates to the standardized amounts as well as considering the effects of recalculating the amounts using more recent data. Furthermore, the Commission plans to perform analyses of other payment issues related to the standardized amounts.

Updating the Standardized Amounts

ProPAC's mandate includes the development of recommendations regarding an appropriate annual percentage change in the standardized amounts. This change, referred to as the update factor, is comprised of a market basket adjustment (with corrections for forecast error) and the discretionary adjustment factor. The Commission's work to refine these components and to assess strategies for recalculating them are discussed below.

The Discretionary Adjustment Factor

The DAF is a quantitative factor that reflects the Commission's judgment of an appropriate allowance for changes in hospital productivity, site-of-care substitution, real case-mix change, and scientific and technological advances. The underlying purpose of the DAF is to ensure that, in combination with ProPAC's other recommendations, the Medicare program continues to provide adequate payments for high-quality hospital care that promotes long-term cost-effectiveness.

The Commission has devoted significant resources toward developing more precise measures of changes in hospital practice patterns. During 1986, it will continue refining the information used to determine the allowance. Furthermore, ProPAC will explore new data sources to enhance the foundation for the discretionary adjustment factor.

Many of the indicators used to determine the DAF are influenced by multiple, cross-cutting factors. Changes in case complexity, for example, may be due to scientific and technological advances that enable hospitals to treat a wider range of patients. For each DAF component, the Commission will attempt to develop more precise indicators that take into account the interrelationships among the components. In this way, ProPAC can more precisely relate trends in overall expenditure patterns with the individual allowances it establishes for each component.

The following section describes specific analytic activities planned by the Commission to support development of the DAF.

Productivity.—The Commission will expand its consideration of changes in productivity to include the use of *total* inputs. This will require assessing the role of labor, capital, and other nonlabor costs in changes in hospital productivity. In addition, the data used to measure productivity will be refined. Specifically, ProPAC will examine more accurate methods to derive costs from existing charge data.

Site-of-Care Substitution.—Measuring site-of-care substitution requires knowledge of the services provided outside the hospital setting to patients who are hospitalized. While data are available to measure resources consumed in the inpatient setting, little information is available on services provided out of the hospital. The Commission plans to explore improved data sources that reflect care provided to patients for an entire episode of illness. Efforts will focus on refining Medicare Part B data and linkage of Medicare Part A and Part B data, by beneficiary, for episodes of illness.

Real Case-Mix Change.—In addition to observed shifts in patients among DRGs, the resource consumption of patients within a DRG may be changing. The Commission will refine its measure of changes in patient complexity within DRGs and associated changes in resource consumption. Analyses will focus on distinguishing real case-mix changes from coding changes, the relationship between case complexity and resource requirements, and measurement of changes in resources consumed.

Scientific and Technological Advances.—The Commission will emphasize studies to estimate the costs associated with new technologies and the ability of the DAF to support the diffusion of these technologies. It will also explore the broader implications of changes in practice patterns on scientific and technological advances. Changes in the application of new technologies in patient care and

the cross-cutting effects of new practice patterns on resources consumed will be analyzed.

The Hospital Market Basket

The hospital market basket index reflects inflation in goods and services purchased by hospitals. It is constructed by determining the inputs that hospitals purchase, the relative weight of each input, the appropriate proxy to measure price changes of each input, and estimates of price changes. Developing the market basket index involves judgments about the appropriate components and price change measures. Often, trade-offs are made between the validity of the measurements and the availability of data.

Recognizing the judgments and trade-offs made in developing the market basket index, the Commission plans further study of possible refinements. In its April 1985 report, ProPAC stated its intent to study certain features of the hospital market basket used to update the PPS standardized amounts. The studies described below will be used in the Commission's deliberations during 1986.

The Number of Market Baskets.—This study will update earlier HCFA analyses of regional market baskets. Information on regional variation in hospital expenses and price differences will first be developed. Then comparisons will be made of regional market basket indexes with the national index.

Effects of the Minimum Wage Law.—Initially, a survey will be conducted to determine existing data sources for comparing the effects of changes in the Federal minimum wage law on hospital workers compared with workers in other industries. If appropriate data are available, the relative effects of changes in the minimum wage law on hospital workers will be analyzed.

Correction of Errors in Forecasting Hospital Wage Increases.—A review will be conducted to determine the extent to which industry-specific wage information is used by public utility commissions or other regulators to set prices in regulated industries. The study will include an analysis of the conditions under which hospital behavior, including hospital response to PPS incentives, could affect the forecasted increase in the market basket.

Measurement of Employee Benefits.—A study will be conducted on the treatment of employee benefits in the PPS market basket. This will include a comparison of the current measure of employee benefits and alternative measures, such as those used by state prospective payment programs.

Recalculating the Standardized Amounts

The Commission believes that, in updating the payment amounts, information reflecting the relationship between hospital costs and PPS payments would be valuable. The Commission has also stressed the importance of more recent cost data on which to make judgments about appropriate payment amounts. ProPAC will continue to monitor the efforts of HCFA to produce more timely cost data. In addition, the Commission plans to examine other issues related to recalculating the standardized amount, which are described below.

Alternative Methods for Recalculation.—The original standardized amounts were calculated giving each hospital the same weight; that is, "hospital-weighted" averages were calculated. The Commission has documented significant distributional shifts in PPS payments if "discharge-weighted" averages were computed instead, giving hospitals with a greater share of Medicare discharges more weight. The Commission will continue to study this issue to determine the most appropriate method of calculation and to further document the distributional effects of each method.

Sampling Hospital Cost Data.—The Commission, through a contract with the Rand Corporation, has completed a preliminary evaluation of HCFA's sample of unaudited cost report data for 1,200 hospitals for the first year of PPS. While Rand found the sample to be representative of those hospitals used to create the standardized amounts, future analyses will determine the precision of estimates generated from this sample. The Commission also plans to examine the feasibility of developing a sample of PPS cost reports from the subset of hospitals with accounting year-end dates earlier in the fiscal year.

Analysis of Cost Data for the First Year of PPS.—The Commission expects to soon receive from HCFA the Medicare Cost Report data for the first year of PPS. A complete set of unaudited reports and audited reports for the sample of 1,200 hospitals (mentioned above) are expected. ProPAC plans to use these data for a number of analyses:

- Recalculating the standardized amounts,
- Updating the comparison of DRG weights calculated by using only charges, with weights calculated by using charges adjusted by costs,
- Documenting changes in costs by cost center since 1981,
- Studying the causes of differences in hospital costs, and
- Analyzing capital costs.

Other Issues Related to the Payment Amounts

Besides updating the PPS payment amounts to reflect changes in the cost of providing care, the Commission recognizes that problems exist in the calculation of certain payment components. Additional complexities arise from failure to reflect capital costs in the payment mechanism. The Commission plans to address these issues through improved understanding of historical cost differences among hospitals and the nature of these costs. Efforts to address other payment amount issues are described in this section.

Hospital Labor Market Areas and Wage Indexes

The urban and rural Federal portion of PPS payment amounts are adjusted to reflect variations in hospital employee wages based on hospital labor market areas. The Commission is concerned about the deficiencies in the current hospital labor market areas. Specifically, ProPAC questions whether they adequately reflect hospital wage variations within urban areas (that is, inner-city versus suburban areas) and variations within the rural areas of a state.

The Commission is studying this issue and has obtained preliminary evidence to justify its concern. Analysis will continue in an effort to develop specific improvements. ProPAC will also study whether current labor and nonlabor proportions of the standardized amounts are appropriate. In addition, it will examine factors that measure the difference in skill mix of hospital employees.

Furthermore, the Commission will continue to monitor the results of HHS evaluations related to hospital labor market areas and will consider these results in formulating improved definitions. Specific recommendations on improved definitions of hospital labor market areas will be made by the Commission no later than April 1987, and possibly in time for the fiscal year 1987 rulemaking process.

The Hospital Product

Understanding changes in the hospital product is important in updating payment amounts, improving DRG classifications and weights, and determining the health outcomes of beneficiaries. The definition of the hospital product, however, is subject to wide interpretation. The product can be characterized as a DRG, the inpatient stay, an entire episode of illness, or patient health outcomes. The Commission will continue to study the nature of the hospital product in order to more precisely define and measure product changes in the future.

Changes in the hospital product may be the result of shifts in the treatment provided during the inpatient stay or shifts in the site of care. The measurement of these changes requires associating hospital costs with the products produced. The Commission plans to study the factors influencing changes in the hospital product as well as alternative costing methodologies. This effort will provide insight regarding needed refinements to PPS and the potential effect of future policy decisions on the production function of hospitals.

Excluded Hospitals

Hospitals excluded from PPS by statute include psychiatric, rehabilitation, pediatric, and long-term care facilities. HCFA and others have con-

ducted studies to determine the differences between PPS hospitals and excluded hospitals. Little of the information developed to date, however, can be used to determine an appropriate payment update for excluded hospitals. The types of patients seen and the treatment provided vary significantly between PPS hospitals and excluded hospitals. The data for excluded hospitals, however, are significantly limited.

During 1986, ProPAC will continue to refine the data used to make its recommendations regarding excluded hospitals. This will include the development of trend data relevant to the update factor. The Commission also intends to continue its study of excluded hospitals in an effort to understand the unique production function of these institutions. Emphasis will be placed on better understanding changes in case mix, productivity, and the impact of scientific and technological advances on the care these hospitals provide. In addition, ProPAC will focus on improving methods for distinguishing between excluded hospitals and excluded units and their products. Finally, the Commission will examine the implications for the DAF of incorporating capital payments into the target rate of increase limits established for excluded hospitals and distinct part units.

Rural Hospitals

The Commission believes that several PPS policies may adversely affect rural hospitals. Some of the policies apply solely to rural hospitals. Others affect all hospitals, yet may have a stronger impact on rural providers. ProPAC, therefore, will focus on differences between urban and rural hospitals in the study of issues mentioned previously, such as hospital labor market areas, DRG classification and case-mix measurement, outlier payments, DRGs with high device costs, and calculation of the standardized amounts. In addition, the Commission will continue efforts to identify problems related to the treatment of rural hospitals under PPS.

Beyond the efforts described above, ProPAC is interested in identifying the reasons for the suspected vulnerability of rural hospitals. Analysis will focus on identifying factors contributing to lower costs, characteristics of access, and organizational trends of rural hospitals, with an emphasis on small rural hospitals. This information is necessary in order to determine the extent of problems facing rural hospitals and whether adjustments can be made to PPS, as currently structured, to alleviate these problems.

Disproportionate Share Hospital Adjustment

The Commission has completed analyses supporting its recommendation to develop a definition of hospitals that serve a disproportionate share of low-income patients and implement a payment adjustment for these hospitals. ProPAC will continue to monitor efforts by the Secretary and the Congress to implement such an adjustment.

Capital Payments Under PPS

ProPAC conducted and reviewed a number of analyses to support its recommendations on capital payment under PPS. The Commission also identified several additional areas for analysis of capital payment under PPS. Thus, the Commission intends to include the following topics on its near-term analytic agenda.

Impact of the Capital Payment Proposal.—The Commission will continue to examine the effects of its capital payment proposal on hospitals. Efforts will focus on identifying types of hospitals that may be disproportionately affected by the proposal due to their unique financial positions. ProPAC will examine appropriate provisions for these hospitals in the event that remedies are required.

The Commission will also examine recent hospital capital investment strategies and their effect on capital spending. For example, ProPAC is interested in the extent to which recent capital expenditures are related to expansion of outpatient services. If recent capital purchases are more heavily devoted to outpatient services, estimates of Medicare inpatient capital-related spending may be overstated.

Finally, the Commission intends to study the impact of incentives introduced by the proposed capital payment system. Specifically, by incorporating capital into PPS, hospitals may increase

outpatient services in order to recover more of their capital costs. Furthermore, the Commission is concerned about the impact of implementing a capital payment system that pays hospitals based on volume rather than on costs. The Commission will identify instances where the proposed payment basis might produce undue hardships for some hospitals and beneficiaries.

The Capital Component of the Hospital Market Basket and Capital Trend Factors.—Under an all-inclusive rate, as recommended by ProPAC, the hospital market basket must be revised to reflect the inclusion of capital. The Commission intends to examine proxies for changes in fixed and moveable capital and their appropriateness for inclusion in the hospital market basket. In addition, the Commission will participate in determining the most appropriate indexes for trending base year fixed and moveable capital amounts forward to 1987. Efforts will focus on identifying data to be used for the trending factors and the application of the factors to baseline amounts.

Construction Capital Cost Variations.—Using existing data sources, ProPAC will study the extent to which construction capital costs vary across regions of the country. This study is designed to determine whether capital market areas exist and, if so, how they relate to the labor market areas defined under PPS. Results of this analysis will enable the commissioners to make judgments about the need for payment adjustments for geographic variations in construction capital costs.

Effects of the Addition of Capital on Payment Components.—The Commission recommendation regarding the method of capital payment requires recomputing the components of PPS payments when appropriate data become available. ProPAC will analyze what effect the addition of capital has on the standardized amounts and the proportions for labor and nonlabor components. Analysis will include determination of the impact of capital inclusion on PPS adjustments, such as the indirect teaching and disproportionate share adjustments.

Separation of Fixed and Moveable Capital.—The Commission will examine technical issues concerning identification and separation of costs related to fixed and moveable capital. This will include an examination of the methods used to allocate fixed and moveable capital on the Medicare Cost Report. The Commission will also examine potential effects of the different treatment of these capital components on hospital behavior during the capital transition period.

DRG Capital Intensity Variations.—One of the capital payment evaluation criteria that the Commission regards as most important is that the payment mechanism should reflect capital intensity variations across DRGs. Many believe that existing charge-based weights reflect accurately the relative capital intensity of the DRGs because hospitals' billed charges include operating and capital expenses. The Commission will analyze this issue and recommend appropriate adjustments if needed.

Hospital-Level Effects of PPS

The Commission has developed a microsimulation model of PPS payments, based on HCFA data bases, to study the distributional effects of PPS payment policies on hospitals. This model was used in the Commission's analysis of the transition to national rates. It will also be used to evaluate the effects of future policy changes on hospitals.

In particular, the model will be used to analyze the effects of policy changes on different groups of hospitals or hospital types; that is, by region, bedsize, teaching status, urban/rural status, and disproportionate share status. Furthermore, the model will be expanded to incorporate other data bases, such as the American Hospital Association Annual Survey and the Area Resource File.

70

ASSESSING THE EFFECTS OF PPS ON CARE FOR BENEFICIARIES

The Commission strongly believes that implementation of its recommendations will enable hospitals to maintain delivery of high-quality care for beneficiaries. It will, however, devote a significant portion of its resources to studying access and quality. While payment levels are currently adequate for the provision of quality inpatient care, changes in hospital services could diminish access to needed care or affect the quality of that care. Therefore, it is essential to continue to examine the relationship between payment levels and access to quality health care.

Unfortunately, no generally accepted basis for judging the effects of PPS on quality of care exists, and empirical evidence is limited. The Commission is keenly aware that the financial incentives of PPS may lead hospitals to undertake actions that could compromise quality of care. Furthermore, ProPAC is aware that incidents of compromises in quality have been reported and that there are perceptions among some beneficiaries and providers that quality has suffered. Recognizing this, during the past year the Commission has evaluated how it can best contribute to analyzing the effects of PPS on quality of care. This section outlines the Commission's strategy.

Developing ProPAC's Analytic Strategy for Quality of Care

The Commission recognizes that, with limited resources, consideration of quality issues needs to be carefully defined and targeted. The Commission, therefore, allocated staff resources during the past year to the following activities:

- Monitoring studies related to quality of care undertaken by organizations inside and outside of the federal government,
- Consulting with individuals with different perspectives on the quality issue to discuss ProPAC's role in analyzing quality of care,
- Assessing the activities of the PROs in measuring and maintaining quality of care for Medicare beneficiaries, and
- Conducting a study to provide information to support future judgments about the existence of problems and define areas for future studies.

The Commission's study consisted of a systematic review of anecdotal evidence and perceptions related to quality of care. Evidence, in the form of reported incidents and interviews with industry and beneficiary representatives, identified areas most sensitive to changes in quality. The following perceptions were most frequently cited:

- Patients are being discharged "quicker and sicker."
- Appropriate alternative providers are not routinely accessible or available.
- Providers misunderstand how PPS is supposed to work and may risk compromising quality, while beneficiaries are not informed of their rights of appeal within the system.
- PROs have focused on utilization review and do not have sufficient resources to adequately monitor quality of care.

The information obtained from the activities described above enabled the Commission to develop recommendations regarding the PROs, beneficiary and provider information, and beneficiary rights. Furthermore, this information served as the foundation for the Commission's quality of care research strategy.

Analysis of Beneficiary Cost Sharing

The Commission is concerned that changes in health care delivery, including shorter inpatient stays and increased reliance on outpatient surgery, may reduce beneficiary access to medical services. This may occur because beneficiaries have become financially responsible for a larger portion of the cost of their care. If services are not provided during an inpatient stay, beneficiaries pay a larger proportion of Medicare-covered services that are not provided during an inpatient hospital stay. For example, beneficiaries are responsible for 20

BEST COPY AVAILABLE

percent of the approved charge for outpatient surgery covered under Medicare Part B. Though "Medigap" coverage pays this coinsurance for most beneficiaries, beneficiaries must pay higher premiums for these policies. In addition, Medicare coverage for services received in post-discharge settings is extremely limited. Most Medicare supplemental insurance policies do not cover services excluded from Medicare. ProPAC will continue to examine the increasing proportion of health care costs paid by beneficiaries and the effects of this shift.

The Commission believes that Medicare beneficiaries should share in cost reductions resulting from PPS incentives. It has recommended a change in the method of computing the beneficiary inpatient hospital deductible. The current deductible formula is based on the cost of an average hospital day. As a result, the recent declines in hospital length of stay have accounted for half the increase in the deductible for 1986. The Commission will examine alternative methods for structuring beneficiary cost sharing as the incentives of PPS change hospital practice. For example, the Commission will examine the relationship between outlier cases and Medicare coinsurance.

Analytic Agenda for Quality of Care Research

ProPAC's quality of care analytic agenda focuses on two major research activities. First, the Commission will attempt to detect possible problems related to quality by conducting a series of studies targeted at specific patient groups. Second, the Commission will examine hospital discharge planning practices under PPS to obtain insight into patients' conditions at discharge and their access to post-discharge care. The Commission is also interested in other methods for examining the post-discharge needs of patients, assessing the outcomes of episodes of illness, and disseminating beneficiary information and appeal rights. ProPAC's current direction for quality of care research and its developing analytic agenda are presented below.

Targeted Studies

The Commission's objective in conducting targeted studies is to monitor indirect measures of quality in order to isolate possible problem areas that merit more in-depth review. The studies will focus on changes in specific quality indicators for all beneficiaries and for targeted beneficiary groups believed to be most vulnerable to quality problems.

Quality Indicators.—Using routinely collected data, ProPAC will compare quality indicators during pre- and post-PPS periods. Indicators, or quality proxies, will include length of stay, readmissions, transfers, use of selected ancillary services, complication rates, mortality rates (overall and in-hospital), and emergency visits per discharge. Analysis of quality indicators will use the most current PPS data. In addition, the Commission will monitor the development of improved data bases by HCFA and others for use in its studies. While analysis of quality proxies has limitations, it nonetheless may identify areas for further study or improvement.

Selected Beneficiary Groups.—A major concern related to quality of care is that certain groups of patients with higher-than-average resource needs are more vulnerable to access and quality problems. The Commission will target its analysis of quality indicators on these groups.

One such group, the "frail elderly," is of particular concern to the Commission. This group can be characterized in several ways: the old elderly (e.g., 80 years of age of older), elderly patients having multiple illnesses; or poor elderly beneficiaries. ProPAC's review of anecdotal evidence related to quality indicated several incidents involving the "frail elderly." In addition, industry representatives, beneficiary groups, and health care researchers have expressed concerns for these patients. They fear that the frail elderly are more susceptible to the incentives for hospitals to treat the profitable patients and refer the unprofitable patients elsewhere.

Study of Discharge Planning Under PPS

The Commission has chosen to examine the discharge arrangements hospitals make for beneficiaries from the many possible subjects for quality of care assessment. It is concerned about perceptions that hospitals are prematurely discharging patients and that appropriate post-discharge care is not consistently accessible or available.

To examine this aspect of health care quality, ProPAC will examine hospital discharge planning —an activity intended to connect inpatient hospital care with needed post-discharge care. Discharge planning activity is one measure that can be used to judge the availability of appropriate post-discharge care for beneficiaries. Results of this study may provide guidance for developing quality of care studies that focus on the complete episode of illness.

In its study, the Commission expects to learn how well local health care services are matched with Medicare patients who need post-discharge services. Initially, the Commission will look at the methods, resources, and criteria that hospitals use to discharge patients. The study will evaluate how discharge planning is organized within the hospital, including staffing patterns. It will also examine how available post-discharge services are identified. Finally, the Commission will explore how patients are channelled to appropriate post-discharge services, particularly for patients in areas with limited local supply of post-discharge services.

ProPAC's future research on access and quality will build on findings from this study.

Additional Efforts To Monitor Quality of Care

The dramatic decline in length of stay since the introduction of PPS requires careful monitoring. While this trend was emerging before the introduction of the system, PPS offers extraordinary incentives for hospitals to discharge patients earlier. The Commission is interested in the relationship between shortened hospital stays, the use of medical services at alternative sites of care, and health care outcomes.

Using information derived from the studies described above, ProPAC will develop post-discharge analyses that look more closely at this issue. Specifically, the Commission is interested in observed changes in patient case mix, disposition, health status, functional status, and satisfaction as well as sources and adequacy of care.

In the long-term, the Commission will focus on patients episode of illness. This type of analysis includes assessing all care provided to the beneficiary—preadmission services, acute care, acute after-care, long-term care, home health care, and ambulatory services. Conducting this type of analysis requires combining data that reflect all care the patient receives. ProPAC believes that the primary measure of quality care is the outcome of the episode of illness. The Commission recognizes, however, that development of appropriate data bases will require extensive resources and time. Nevertheless, the Commission will monitor activities in this area and contribute to this effort where appropriate.

ProPAC's review of beneficiaries' perceptions of hospitalization under PPS, as well as information obtained from other sources, clearly indicate a misunderstanding of the basic mechanics of PPS among hospitals, physicians, and beneficiaries. The Commission has made specific recommendations to address this problem. ProPAC will continue to monitor the dissemination of clear, accurate, and helpful information about PPS.

BILLING CODE 4120-01-C

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[BERC-357-FN]

Medicare Program; Changes to the DRG Classification System

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final notice.

SUMMARY: In the final rule published September 3, 1985 on the prospective payment system for inpatient hospital services (50 FR 35646), we stated that we would publish a later notice addressing issues related to the Diagnosis-Related Group (DRG) classification system. On March 13, 1986 we published that notice in the Federal Register (51 FR 8762). In that proposed notice, we responded to comments received on the DRG classification system, discussed Medicare coverage changes affecting the DRG system, listed procedures for which new identifying codes (in the coding system of the International Classification of Diseases—9th Edition—Clinical Modification (ICD-9-CM) on which DRG assignments are based) have been proposed, and proposed certain changes in the DRG classification system to resolve some of the problems identified by comments and our analysis up to that time.

This final notice responds to comments received on the March 13 proposed notice and makes final the proposals contained in that notice.

FOR FURTHER INFORMATION, CONTACT: Linda Magno, (301) 594-0360.

EFFECTIVE DATE: These classification and coding changes are effective for discharges occurring on or after October 1, 1986.

SUPPLEMENTARY INFORMATION:

I. Background

A. Prospective Payment System—General

Under section 1886(d) of the Social Security Act (the Act), enacted by the Social Security Amendments of 1983 (Pub. L. 98-21) on April 20, 1983, a prospective payment system (PPS) for Medicare payment for inpatient hospital services was established effective with hospital cost reporting periods beginning on or after October 1, 1983. Under this system, Medicare payment is made at a predetermined, specific rate for each discharge; that payment varies by the diagnosis-related group (DRG) to which a beneficiary's stay is assigned. The list of DRGs currently contains 471 specific categories. All but 3 DRGs are categorized into 23 major diagnostic categories (MDCs). Most MDCs are based on a particular organ system of the body. A few, such as MDC 14 (Pregnancy, Childbirth and the Puerperium) and MDC 22 (Burns), are not, because they involve multiple organ systems.

The formula used to calculate payment for a specific case takes a hospital's payment rate per case and multiplies it by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG relative to the national average resources consumed per case by the average hospital. Thus, cases in a DRG with a weight of 2.0 would, on average, require twice as many resources as the average case for the average hospital.

B. Basic DRG Classification System

The method of classifying cases into DRGs for payment under the prospective payment system involves a number of steps. First, the physician enters into a patient's medical record the principal diagnosis, any additional diagnoses, and any procedures performed during the stay. This information is expressed by the hospital using codes from the International Classification of Diseases, Ninth Edition, Clinical Modification (ICD-9-CM). The principal diagnosis, as many as four additional diagnoses, the principal procedure, and as many as two additional procedures are reported, along with a patient's age, sex, and discharge status, to the hospital's fiscal intermediary on the hospital request for payment.

The intermediary then enters the information into its claims system and subjects it to a series of automated screens called the Medicare Code Editor (MCE). These screens are designed to identify cases that require further review before classification into a DRG can be accomplished.

After screening through the MCE and any further development of the claims cases are classified by the GROUPER software program into the appropriate DRG. The GROUPER program was developed as a means of classifying each case into a DRG on the basis of the diagnosis and procedure codes and demographic information (that is, sex, age, and discharge status). It is used to classify past cases in order to measure relative hospital resource consumption to establish the DRG weights, and to classify current cases for purposes of determining payment.

Principal diagnosis determines MDC assignment. Within most MDCs, cases are then divided into surgical DRGs (based on a surgical hierarchy that orders individual procedures or groups of procedures by resource intensity) and medical DRGs. Medical DRGs are differentiated on the basis of diagnosis, age, and presence or absence of complications or comorbidities only. Generally, GROUPER does not look at other procedures; that is, those not surgical or those minor surgical procedures generally not done in an operating room and therefore not recognized as surgical by GROUPER.

C. Changes to the DRG Classifications and Weighting Factors

1. General

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resource consumption. In addition, Congress provided the Secretary with authority to reclassify diagnoses and procedures within the DRG system to take into account changes in medical technology and treatment patterns. Accordingly, section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and weighting factors effective for discharges occurring in FY 1986 and at least every four fiscal years thereafter. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources. The intention of Congress was that we would make changes as often as needed to achieve the objectives of the prospective payment system, including the need to keep current with developments in the areas of coverage and medical technology.

2. Publication of Proposed and Final Rules—1985

On June 10, 1985, we published a notice of proposed rulemaking (NPRM or proposed rule) in the Federal Register (50 FR 24366) to update the prospective payment system in general. As part of that NPRM, and as required by section 1886(d)(4)(C) of the Act, we proposed to adjust the DRG classifications and weighting factors for discharges beginning with Federal fiscal year (FY) 1986.

On September 3, 1985, we published a final rule in the Federal Register (50 FR 35646) concerning the prospective payment system. We included in that rule the classification changes proposed in the June 10 proposed rule as we had modified them in response to comments and suggestions we received on the NPRM. We also included some

additional changes that followed the principles discussed in the proposed rule or that were similar to them. (As a result of the Emergency Extension Act of 1985 (Pub. L. 99–107) and subsequent extensions of that Act (Pub. Laws 99–181, 99–189, 99–201, and 99–272), the classifications and weights established by the September 3, 1985 final rule did not go into effect until May 1, 1986.)

We indicated in the final rule that we could not address certain classification issues that were raised in the NPRM comment period for various reasons; we also noted that those comments would be analyzed and reviewed during the several months after publication of the September 3 final rule and that actions on them would be published in a notice early in 1986. Also, we solicited comments on any other proposed classification changes, and provided an address for such comments.

II. Provisions of the Proposed Notice

In keeping with our commitment just discussed, we published a proposed notice in the Federal Register on March 13, 1986 (51 FR 8762). In that proposed notice we responded to comments received on the DRG classification system, discussed Medicare coverage changes affecting the DRG system, listed procedures for which new ICD–9–CM codes had been proposed, and proposed certain changes in the DRG classification system to resolve some of the problems identified by comments and our analysis up to that time. The provisions of the proposed notice follow.

A. Proposed Changes Resulting from Comment Process

1. *MDC 4: Diseases and Disorders of the Respiratory System.* We proposed to remove diagnosis code 4838 (Bacterial pneumonia not elsewhere classified) from DRGs 89, 90, and 91 (Simple Pneumonia and Pleurisy: Age over 69 and/or complications or comorbidities[1], Age 18–69 without C.C., and Age 0–17, respectively). We would place this code into DRGs 79, 83, and 84 (Respiratory Infections and Inflammations: Age over 69 and/or C.C., Age 18–69 without C.C., Age 0–17 with C.C., respectively.

2. *MDC 13: Diseases and Disorders of the Female Reproductive System.* We proposed to reconfigure DRGs 353, 354, 355, 357, 358, 359, 360, 361, and 362 to increase homogeneity and thus more accurately reflect resource intensity of cases assigned to these DRGs.

3. *MDC 20: Substance Use and Substance Induced Organic Mental Disorders.* We proposed to change the titles of DRGs 433 through 437 in MDC 20. Wherever the term "substance" appears in those DRGs we would substitute the term "alcohol/drug".

B. New Coverage Decisions

1. *Background.* Under § 412.16(c) of the regulations, we may make interim changes in the DRG classifications to reflect new additions to coverage made by the Medicare program. Such classification changes are to be included in the next annual notice of DRG classification changes and be subject to public comment.

Effective for procedures performed on or after January 24, 1986, Medicare coverage was extended to implantation of cardiac defibrillators under certain circumstances.

2. *Proposals.* We stated in our proposed notice that on an interim basis we will pay for this procedure using the weight for DRG 104 (Cardiac Valve Procedure with Pump and with Cardiac Catheter) for the time being and we solicited comments as to whether it may be more appropriate to use another DRG, such as DRG 109 (Cardiothoracic Procedures without Pump) or DRGs 115 and 116 (Permanent Cardiac Pacemaker Implant; with AMI, Heart Failure or Shock, and without AMI, Heart Failure or Shock, respectively).

Discrete ICD–9–CM procedure codes for this new technology had not yet been adopted. Consequently, for the present, we stated that payment will be made for such claims only on a manual basis when accompanied by appropriate documentation. We indicated that the ICD–9–CM Coordination and Maintenance Committee (a description of this committee is contained in section C, following) was considering new ICD–9–CM procedure codes for the implantation of cardiac defibrillators and that if these proposed new codes were adopted, we proposed to add the new procedure codes to the appropriate DRG.

C. New Coding Changes

1. *Background.* A Federal inter-agency committee, the ICD–9–CM Coordination and Maintenance Committee, has been formed to evaluate the International Classification of Diseases—9th Edition—Clinical Modification, (ICD–9–CM) updating and use for Federal programs. This committee holds public meetings quarterly for discussion on educational issues and proposed coding changes. Many of the proposed coding changes will result in one or more specific codes to identify discretely those diagnoses or procedures that are currently being coded under a more general diagnosis or procedure.

We noted in the proposed notice that new ICD–9–CM codes had been proposed to identify the following:

A. *Cochlear Prosthetic Device Implant.*

B. *Percutaneous Transluminal Coronary Angioplasty.*

C. *Cardioverter/Defibrillator.*

D. *Thoracoabdominal Aortic Aneurysm Repair.*

E. *Lithotripsy.*

F. *Artificial Urinary Sphincter Implant (AUS).*

G. *Penile Prosthesis—Inflatable and Non-Inflatable.*

H. *Chemonucleolysis.*

I. *Magnetic Resonance Imaging (MRI) and Intraoperative Ventricular Mapping.*

2. *Proposals.* In order to prevent the unwarranted delay of recognition of new codes by the Medicare program, we proposed to modify the GROUPER program, to the extent feasible, to recognize any new ICD–9–CM codes adopted in the future by the ICD–9–CM Coordination and Maintenance Committee and, in most cases, to classify discharges with such codes initially in the same DRG as the previous coding assignment. That is, any coding changes adopted by the committee prior to July 1, 1986 would be included in the Medicare GROUPER program for Federal fiscal year 1987 (October 1986 through September 1987), but would not necessarily result in changes to the classification of cases using these new codes. In addition, we indicated that we would consider interim revisions of the GROUPER to recognize new ICD–9–CM codes, should the volume of cases indicate it is appropriate. Because the use of most new ICD–9–CM codes would not result in DRG classification changes initially, the new codes would not be published for public comment. Of course, should reclassification become necessary, we stated we would follow the procedures set forth at § 412.10 of the regulations.

D. Effective Dates

We proposed that the changes in DRG classification and adoption of new ICD–9–CM codes set forth in the proposed notice would become effective for discharges occurring on or after October 1, 1986.

III. Summary of Comments on Proposed Notice

We received 19 public comments concerning changes to the DRG classification system. These comments were from health care associations, hospitals, The Prospective Payment Assessment Commission (ProPAC),

---

[1] Complications or comorbidities is henceforth abbreviated C.C.

physicians and physician associations, businesses, researchers, and medical record administrators. ProPAC incorporated by reference its recommendations on DRG classifications included in its April 1, 1986 report to the Secretary. These recommendations are discussed in detail in the proposed rule setting forth PPS rate and changes for fiscal year 1987.

In addition to the specific comments discussed in sections IV through VII, below, we received some comments of a general nature.

Comment: One commenter expressed concern with our failure to provide what he believes to be sufficient information on changes affecting the Medicare program and the inadequate time period given to the industry to respond. The commenter recommended that full disclosure be made of the methodologies, criteria, calculations, supporting documentation and underlying assumptions used to reach conclusions. He stressed the need for independent evaluation of proposed changes using non-billing abstract data such as that maintained by CPHA. Finally, he requested that revised software and associated documentation be made available to the industry prior to the publication of final changes.

Response: We responded to a similar concern regarding availability of data in the September 3, 1985 final rule on the prospective payment system (50 FR 35657). As we pointed out in that publication, we have not provided the level of detail requested by the commenter due to the fact that such data is quite voluminous and would be of limited interest to the majority of readers. We believe we provided information in sufficient detail to allow for informed public comment. In this regard, we believe we have complied with the Administrative Procedure Act (5 U.S.C. 553). Moreover, more detailed information is available, to the extent it is disclosable under the Freedom of Information Act, to interested parties upon request.

We do not believe it is necessary or appropriate to revise GROUPER software prior to the publication of final changes based on proposed changes. This process could involve substantial costs in modifying and testing software for proposed changes that may never occur. Further, were we to develop the software changes at the time of a proposed notice, making classification changes beyond those originally proposed as a result of public comments or ProPAC's recommendations would further increase the number of software modifications necessary. Duplicating software modification costs by preparing one revision of GROUPER for proposed changes and a final revision to GROUPER once the final rule is prepared clearly is not cost effective.

Based on the specificity contained in the proposed notice, interested parties can identify cases that would be moved and assess how they would be affected. We believe this is sufficient to allow the industry to evaluate proposed changes.

Further, we do not agree that independent evaluation of the Medicare DRG classification system using non-Medicare claims data is necessary or advisable. As we pointed out in the June 10, 1985 Federal Register (50 FR 24373), "other payors of health care services that may be interested in using a hospital prospective payment system should recognize that DRG classifications and weights developed from Medicare discharges may not be appropriate for use in the payment of non-Medicare cases." We continue to believe it is inappropriate to revise the Medicare DRGs based on analysis of their effect on non-Medicare patient populations.

Finally, with regard to the length of the comment period, we emphasize that we recognize the importance of affording the public the opportunity to analyze the many issues raised in the document and to express their views. However, givens our commitment to publish a final DRG reclassification notice prior to or simultaneous with the proposed rule setting forth prospective payment system rates and changes for FY 1987, we had little alternative to limiting the comment period to 30 days. In order to analyze as many issues as possible and provide as complete a document as possible, extensive lead time is necessary. If we published the proposed notice earlier so as to provide for a longer comment period, it is likely that fewer classification changes would be considered because the time available to perform necessary analysis would be reduced. Finally, we note that the March 13, 1986 notice proposed only a small number of changes. We believe 30 days should be sufficient time to review and comment upon these few issues. We should point out, however, that comments are accepted and considered at any time, not just during the formal public comment period. Any proposed DRG classification changes should be made in writing. They should state succinctly the issue of concern. Any rationale for the change or supporting documentation should be included in the proposal and sent to the following address: The Health Care Financing Administration, Department of Health and Human Services, Grouper Changes, P.O. Box 26681, Baltimore, Maryland 21207.

IV. Comments and Responses on Proposed DRG Classification Changes

A. MDC 2: Diseases and Disorders of the Eye

Comment: One commenter disagreed with our position regarding classification of lens extractions involving anterior chamber injections to DRG 39 (Lens Procedures). The commenter believes that since DRG 42 procedures (Intraocular Procedures Except Retina, Iris and Lens) are ordered above lens procedures in the surgical hierarchy, lens procedures involving anterior chamber injections should be classified based on the higher weighted procedure. The commenter believes the current classification penalizes hospitals for clinical problems of their patients over which they have no control.

Response: We continue to believe, based on our analysis of the data, that anterior chamber injections in lens extractions cases are incidental procedures. As such, they should not drive the DRG classification of the cases. Moreover, we believe that it is clinically inconsistent to classify lens extraction cases to a DRG which specifically excludes lens procedures.

In addition, were we to classify lens extraction cases involving anterior chamber injection to DRG 42, they would represent approximately 15 percent of the total volume of cases in this DRG. To the extent that the average charge for such cases is lower than the average charge for intraocular procedures currently assigned to DRG 42, such a process would inappropriately reduce the weighting factor for this DRG.

B. MDC 5: Diseases and Disorders of the Circulatory System

Comment: One commenter objected to our decision (set forth in the September 3, 1985 final rule) to reclassify all procedures coded 360 (removal of coronary artery obstruction) that do not require a heart pump to DRG 112 (Vascular Procedures Except Major Reconstruction, Without Pump). He recommended instead that an edit be performed on all procedures coded 360. Only those cases involving percutaneous transluminal coronary angioplasty (PTCA) should be classified to DRG 112.

Response: The ICD-9-CM Coordination and Maintenance Committee has approved a unique code for PTCA. GROUPER will recognize and

assign such cases to DRG 122 effective for discharges on or after October 1, 1986. The new procedure code for open chest coronary angioplasty will be reassigned to DRG 106 as it was before the FY 86 change. Thus, cases involving open chest coronary angioplasty, such as endarterectomy, will be assigned to DRGs 106 (Other Cardiovascular or Thoracic Procedures, With Pump) or 109 (Cardio Thoracic Procedures Without Pump) depending upon the use of extracorporeal circulation. Since this issue will be remedied within a few months, we do not believe it is necessary to develop the edit procedure suggested.

Comment: One commenter suggested that the problem with the pacemaker DRGs 115, 116, 117, and 118) may be related to ICD-9-CM limitations rather than with proper application of existing codes.

Response: We agree that the ICD-9-CM procedure codes for pacemaker implantation and revision need review and may need modification. The ICD-9-CM Coordination and Maintenance Committee is evaluating this issue in conjunction with the recommendation presented by ProPAC.

If revised codes are adopted prior to July 1, 1986, they will be recognized by the GROUPER program for discharges on or after October 1, 1986.

Comment: One commenter expressed concern that the difficulty with the weight for several of the DRGs in MDC 5 was related to both a misunderstanding of coding guidelines and the quality of PRO review when applying the guidelines. He specifically cited the increase in the number of cases assigned to DRG 140 (Angina Pectoris) as evidence of this problem. However, no specific information was provided as to which coding guidelines were being misapplied.

Response: We share the commenter's concern that appropriate coding guidelines be consistently applied in reporting diagnoses and procedures on Medicare claims. As the commenter points out, inappropriate coding of cases can adversely affect the homogeneity of the DRGs and produce inappropriate weighting factors at recalibration.

This is largely an educational problem that requires the cooperation of the industry as well as the government to correct. We have been working with the American Hospital Association's editorial advisory board for the *Coding Clinic for ICD-9-CM* in reviewing and reemphasizing appropriate coding guidelines. We also participate on the ICD-9-CM Coordination and Maintenance Committee, which has as one of its missions educational activities related to appropriate use of ICD-9-CM codes. In addition, each PRO is being required to include a registered record administrator (RRA), or accredited record technician (ART) as the individual responsible for the overall DRG evaluation process and will utilize individuals trained and experienced in ICD-9-CM coding to perform the DRG validation process. Finally, we have established an internal coding workgroup to review coding issues. Through all these avenues, we are striving to improve the quality of data available for analysis or classification issues and recalibration of the DRGs. However, without specific information on which coding guidelines are being misapplied in these cases, we are not able to assist in correction of the alleged problem.

Comment: One commenter noted that in his review of hospital records, he found that physicians were recording thrombophlebitis when the medical record documentation indicated thrombosis was present. He believes that lack of specificity on the part of the attending physician is largely responsible for the disparity in the weighting factors for DRGs 129 (Deep Vein Thrombophlebitis) and 130 (Peripheral Vascular Disorders; Age Over 69 and/or C.C.) which are .9456 and .9254, respectively. He recommended further study in this area.

Response: We support the commenter's concern that physicians be attuned to accuracy and specificity in description of a patient's diagnosis. This is an educational problem that cannot be addressed by HCFA alone. Rather, improvement in this area requires the support of the entire medical community. Educational activities conducted by hospitals and reports in medical journals are likely to be more successful in this regard than any action on the part of the government. However, the Utilization and Quality Control Peer Review Organizations (PROs) do correct claims data and make educational contacts with physicians and hospital staff when they discover errors or lack of specificity in recording diagnosis and procedures.

However, we should note that certain types of both thrombosis and thrombophlebitis are included in both DRGs 128, 130, and 131. For example, both vena cava thrombosis (diagnosis code 4532) and thrombophlebitis leg, not otherwise specified (diagnosis code 4512) are included in DRG 128, while both venous thrombosis, not otherwise specified (code 4539) and thrombophlebitis, not otherwise specified (code 4519) are classified into one of the DRG pair 130–131 (Peripheral Vascular Disorders). Thus, it is not clear that the coding problem cited by the commenter is responsible for the minimal difference in the weighting factors for these DRGs.

Comment: One commenter objected to the length of stay data for infective endocarditis and osteomyelitis. The commenter stated that texts recommend a minimum interval of therapy for osteomyelitis of 28 days and for infective endocarditis of 28 to 42 days. He believes that the weighting factors are based on 12 and 18 days of care respectively, and therefore encourage premature discharge of a patient or force hospitals to incur substantial losses.

Response: The crux of this commenter's concern centers on the recurring issue of inappropriate reference to the length of stay data. The DRG classification system has established separate DRGs for acute and subacute endocarditis (DRG 126) and osteomyelitis (DRG 238). The weighting factors for these DRGs are based on average standardized hospital charges for all Medicare cases with these diagnoses. Consequently, payment levels reflect resources used in the actual average treatment patterns for such cases.

While it is true that the geometric mean length of stay, which is used only for purposes of calculating outlier or transfer payments, shows mean lengths of stay for endocarditis and osteomyelitis of 18.1 and 11.1 days, respectively, the arithmetic mean length of stay for each of these DRGs is considerably higher (23.8 and 15.8, respectively), indicating that there are some very long stays in these DRGs. As we have stated many times, the mean length of stay data for any DRG are not intended to reflect treatment protocols. Rather, each patient should be treated based on his or her medical needs.

We also wish to point out that during 1985 ProPAC investigated a similar allegation concerning treatment of infective endocarditis. They discovered, "It appears that the arithmetic mean length of stay for patients being treated for infective endocarditis was appropriate." (Technical Appendixes to the Report and Recommendations to the Secretary, U.S. Department of Health and Human Services April 1, 1986, page 60, topic number 17–85.)

C. MDC 6: Diseases and Disorders of the Digestive System

Comment: One commenter objected to our analysis concerning our decision not to include procedure code 5499 (abdominal region operation, not elsewhere classified) as an operating

room procedure. The commenter acknowledged that the code is broad in scope and covers a number of procedures, some of which do not require use of an operating room. However, he believes this should not be used to penalize hospitals. He also recommended that percutaneous extraction of common duct stones (procedure code 5196) be added to the list of operating room procedures.

Response: The problem of broad procedure codes that are used to identify numerous kinds of procedures, only some of which require an operating room, affects numerous DRGs. We are studying this issue generically, rather than on a DRG-specific level. We are working to develop an administrative mechanism whereby we can identify procedures that involve the use of an operating room, percutaneous approaches, endoscopic methods, etc. If such a mechanism is adopted, the DRGs may be revised accordingly once data are available.

D. MCD 8: Diseases and Disorders of the Musculoskeletal System and Connective Tissue

Comment: One commenter reemphasized the need for separate DRGs involving multiple procedures. He specifically recommended that multiple limb reattachments be classified into DRG 471 (Bilateral or Multiple Major Joint Procedures of the Lower Extremities).

Response: We believe the creation of separate DRGs for multiple procedures is best addressed on an individual basis, although we would note that the general issue of additional resources associated with multiple procedures is being considered in our research on severity of illness. With regard to the specific need to include multiple limb reattachments into DRG 471, we will investigate this matter using more recent Medicare data and report our findings in the future.

Comment: One commenter continues to believe that replacing or repairing a major joint prosthesis should be assigned to DRG 209 (Major Joint and Limb Reattachment Procedures), rather than to one of the DRG pair 442–443 (Other O.R. Procedures for Injuries), in MDC 21. He argues that the procedures are equivalent from a resource perspective and that the differences are merely semantic.

Response: We must emphasize that the DRG classification system is a *diagnosis* based system, not a procedure based classification system. As we have pointed out previously, we can consider reclassification actions only to the extent that they comport with the basic framework of the classification system. Given the way the ICD-9-CM classification system is structured, numerous procedure and diagnosis codes may affect multiple organ systems. For example, infections, poisoning, toxic effects of drugs, burns, shock, and complications all may affect multiple organ systems. The DRG system responds to these multiple system diagnosis codes through the creation of several MDCs that are not organ-system specific, such as MDC 21 (Injury, Poisoning and Toxic Effects of Drugs), MDC 22 (Burns), MDC 23 (Factors Influencing Health Status), etc.

Moreovgr, the DRG system is structured so that each diagnosis code occurs in only one MDC. Thus, were we to reassign the nonspecific complication codes to MDC 8, all complications would be assigned to the musculoskeletal system, regardless of what organ was affected. Such an occurrence would seriously disrupt the clinical coherence of the DRGs as well as the homogeneity of resources associated with the DRGs. However, if future revision of the coding system should permit more precise identification of the organ system involved in infection and complication diagnoses, we will consider classification changes at that time.

Comment: One commenter noted ProPAC's recommendation (Recommendation 32: Upper Extremity Procedures on page 55 of ProPAC's April 1, 1986 Report) concerning reclassification of hand procedures. The commenter urges HCFA to adopt ProPAC's suggested classification.

Response: We believe the ProPAC recommendation has merit and are proposing to adopt reclassification of DRGs 223–224 (Upper Extremity Procedures Except Humerus and Hand) 228 (Ganglion (Hand) Procedures), and 229 (Hand Procedures Except Ganglion). For further details on this issue see the proposed rule on PPS changes for FY 1987.

E. MDC 9: Diseases and Disorders of the Skin, Subcutaneous Tissue, and Breast

Comment: One commenter continues to object to the addition of procedure codes 0722 (unilateral adrenalectomy), 073 (bilateral adrenalectomy), 0763 (partial excision of pituitary gland), 0769 (total excision of pituitary gland), and 6561 (removal of both ovaries and tubes at same operative episode) to the DRG pair 269–270 (Other Skin, Subcutaneous Tissue, and Breast O.R. Procedures), contending that they change the clinical homogeneity of the DRGs.

Response: We have responded to this comment in both the September 3, 1985 and March 13, 1986 Federal Registers. We continue to believe this change is appropriate. Unless presented with specific evidence, as opposed to a mere allegation, that homogeneity is altered, we do not have a basis to study this issue further. We should point out that when we compared the effect of this change to retaining the FY 1985 classification structure, we found that the addition of all 10 procedures to DRG 269 resulted in 886 cases being assigned to this DRG, in addition to the 19,553 cases that would have been assigned absent these changes. The average standardized charge of DRG 269 was altered by less than 3 percent as a result. The change impacted DRG 270 by adding 431 cases, with only a one-percent resulting change in the average standardized charge. We believe the minimal effect of these changes supports our conclusion that addition of these procedures is appropriate.

F. MDC 10: Endocrine, Nutritional and Metabolic Diseases and Disorders

Comment: One commenter objected to a change in GROUPER logic that was included in the September 3, 1985 final rule pertaining to classification of diabetes mellitus. Basically, GROUPER now classifies diabetic cases with a manifestation of a disease process, which is coded using one of the combination codes in the 250 series, into the organ system in which the disease manifestations occur. The commenter objected to this change with regard to reclassification of cases out of DRG 285 (Amputation of Lower Limb for Endocrine, Nutritional, and Metabolic Disorders). She believed amputations for diabetic patients should be classified to DRG 285 as they were previously.

Response: We can appreciate the commenter's desire that amputations on diabetic patients be classified into the highest weighted DRG. However, we do not believe it is appropriate to establish different GROUPER logic for manifestations of different disease in diabetic patients. That is, we do not believe it is appropriate to classify diabetic patients with renal manifestations into the kidney and urinary tract MDC, based on the renal manifestation, and diabetic patients with circulatory manifestations into the endocrine, nutritional and metabolic MDC, instead of the circulatory MDC. In order for a classification to be successful, it must be consistent in its basic underlying logic.

Although this logic change has resulted in classification to a lower weighted DRG in amputation cases, we should point out that in other cases the

change resulted in classification to higher weighted DRGs. For example, this change resulted in reassignment of Kidney transplants on diabetic patients from DRG 468 (weight of 2.4542) to DRG 302 (weight of 4.6273). In addition, we should point out that the reclassification of cases took place before the weights for the DRGs were recalibrated. In this regard, we note that the reclassification of diabetic patients with circulatory manifestation is largely responsible for the significant differences in the weighting factors for DRGs 113 (Amputation for Circulatory System Disorders Except Upper Limbs and Toe) and 285. The FY 1985 weighting factors for DRG 113 (2.6522) and DRG 285 (2.860) were much more closely aligned when diabetic patients with circulatory manifestations were included in DRG 285, than they were in FY 1986 when such patients were classified based on the manifestation (2.5406 for DRG 113 and 3.2724 for DRG 285.) Had diabetic patients with circulatory manifestations not been removed from DRG 285, the FY 1986 weight for this DRG would have been 2.7374.

G. MDC 11: Diseases and Disorders of the Kidney and Urinary Tract

Comment: One commenter complained about GROUPER logic. She noted that a patient admitted for a urinary tract infection could be classified into DRGs 320 (Kidney and Urinary Tract Infections; Age over 69 and/or C.C.). However, if this same patient also received a transurethral bladder biopsy, the case was classified into DRG 310 (Transurethel Procedures; Age over 69 and/or C.C.), which carries a lower weighting factor.

Response: We have received similar correspondence recently from other sources nothing what they consider to be an anomolous situation of surgical procedures driving classification of a case into a lower weighted. DRG than a medical DRG. We can appreciate the concern about this logic in those cases. However, given the construction of the DRG classification system, it is the presence or absence of surgical procedures, and not the level of weighting factors, that determines whether a case is clasified into a surgical or a medical DRG. Once cases are thus classified, it is the actual average resource intensity of cases in each DRG, relative to the average case in the average hospital, that determines the weighting factors. Revision of the basic GROUPER logic to ensure assignment of a surgical case to a medical DRG only when the medical DRG has a higher weighting factor would radically modify the entire classification structure and may create significant problems in other DRGs. Nonetheless, we will be investigating this issue further throughout the upcoming year.

Comment: One commenter submitted a detailed study of the cost of extracorporeal shock wave lithotripsy (ESWL). In the cases studied, Medicare payment at both DRGs 323 and 324 significantly understated the cost of ESWL. He recommended a separate DRG be established for ESWL cases.

Response: As we noted in the September 3, 1985 final rule, ESWL cases were classified into these DRGs on the basis of both clinical and resource-utilization considerations. That is, the procedure is noninvasive and, as such, belongs in a medical DRG. Moreover, the clinical course of patients treated with lithotripsy, particularly length of stay, more closely resembles that of nonsurgical rather than surgical patients in the renal MDC.

While the study presented interesting findings, the study's conclusions were based on data gathered from fifteen unidentified major medical centers. (There are over 50 hospitals currently providing ESWL.) We are not able to assure that such sampling is statistically valid, or that the study's results represent typical Medicare costs per case. Furthermore, the study's findings regarding the cost per case differed considerably from that of the ProPAC. We have decided, for the interim, to accept ProPAC's recommendation. (See full discussions in the proposed rule on PPS changes for FY 1987.)

H. MDC 12: Diseases and Disorders of the Male Reproductive System

Comment: One commenter noted ProPAC's recommendation concerning implantation of penile prostheses (Recommendation 28: Penile Protheses: page 53 of the April 1, 1986 report). The comment urged us to accept ProPAC's suggestion and establish a separate DRG for penile prosthesis implants.

Response: We do not believe it is appropriate to establish a separate DRG for implant of a penile prosthesis. Readers should see our response to this ProPAC recommendation in the proposed rule on PPS changes for FY 1987.

Comment: One commenter stated that clinical review of patients classified into DRGs 336 (Transurethral Prostatectomy) and 341 (Penis Procedures) support the greater resource intensity of the transurethral prostatectomy cases, given the intensity of ongoing therapy required by these patients. He continues to believe that patients undergoing both an internal urethrotomy and a transurethral prostatectomy should be assigned to DRG 336.

Response: FY 1984 data on Medicare beneficiaries indicate that penis procedures as currently grouped are slightly more intensive than transurethral prostatectomy cases. Should this relationship change, that is, should prostatectomies prove to be more resource-intensive than penis procedures at some time in the future, we would consider modifying the surgical hierarchy to reflect such change. At the present time, however, we do not believe it is appropriate to revise the classification system to provide less payment for cases involving both procedures than would have been available had the patient undergone the internal urethrotomy alone based on the clinical review of unspecified cases by a commenter. Consequently, we have not modified the DRG classifications based on this comment. Moreover, should this comment be arising out of concern that the geometric mean length of stay is lower for DRG 341 than for DRGs 336, we note that Medicare payment is not based on the actual length of stay unless the case meets the outlier threshold. In that regard, we note that the 16-day outlier threshold for DRG 341 is lower than the 18-day threshold for DRG 336. Consequently, outlier payments would be higher for DRG 341 than for 336, because cases would qualify earlier and the payment per day would be higher.

I. MDC 13: Diseases and Disorders of the Female Reproductive System

Comment: One commenter stated that she had modeled the classification changes for MDC 13. She noted that 59 percent of the cases studied that currently are assigned to one of DRGs 354 and 355 (Non Radical Hysterectomy; Age over 60 and/or C.C., and Age under 70 without C.C., respectively) were regrouped to DRG 356 (Female Reproductive System Reconstructive Procedure), which did not make sense clinically. She also noted that 25 percent of the patients who were regrouped into the new DRG 354 fell into this group because they had an incision of the uterus for the purpose of radium implantation, without further comment as to the impact of this observation.

Response: We are not aware of the exact methodology the commenter used in regrouping cases for purposes of her analysis. However, it appears that the methodology may be flawed. All patients currently grouped to DRGs 354 and 355 have undergone a hysterectomy, which is ordered above reconstructive procedures in both the current and proposed DRG surgical hierarchy.

Therefore, all of the hysterectomy cases would be searched out and assigned to DRGs 354, 355, 357, 358 or 359 before GROUPER would consider any reconstructive procedure that may also have occurred. In addition, since we suspect the methodology for analysis of this proposed change was flawed and since no conclusion was drawn from the comment concerning radium implantation, we are not able to respond to this portion of the comment.

J. MDC 14: Pregnancy, Childbirth, and the Puerperium

Comment: One commenter continues to object to the classification of any operating room procedure to MDC 14 (DRGs 378–384) and MDC 17 (DRGs 401, 402 and 403). The commenter believes that the logic that precludes classification to DRG 468 (Unrelated O.R. Procedure) in such cases violates the basic premise of the DRG system.

Response: There is little that we can add to our past responses on these issues. Our medical consultants have advised us that the nature of lymphoma is such that almost any surgical procedure can be performed in relation to the principal diagnosis. However, we are proposing other changes to these DRGs in response to ProPAC's recommendation. [See publication of proposed notice of PPS changes for FY 87].

With regard to MDC 14, it is so rare, especially among the Medicare population, to experience a case where none of the operating room procedures are related to the pregnancy principal diagnosis in appropriately coded claims that it was determined the classification to DRG 468 is unnecessary. We recognize that, despite the attendant risks, surgery is sometime unavoidable during pregnancy, particularly for medical emergencies. However, in most of those cases, the medical condition necessitating the surgery-and *not* the pregnancy-would be the principal diagnosis. We should point out that we are not aware of a single Medicare case for which assignment to DRG 468 would have occurred but for the GROUPER logic as it applies to surgical procedures.

We do not believe this logic violates the basic concept of the classification system. Rather, we believe this logic supports the concept of the establishment of DRG 468 as a unique classification category where none of the surgical procedures are related to the principal diagnosis.

K. MDC 15: Newborns and Other Neonates With Conditions Originating in the Perinatal Period

Comment: One commenter disagreed with our decision to remove diagnosis code 7746 (fetal/neonatal; jaundice, not otherwise specified) from the list of complications and comorbid conditions. He believes newborns afflicted with this condition consume substantially more resources.

Response: Due to the paucity of Medicare data on newborns, our decision in this regard was based primarily on the advice of our medical consultants. While it may be true that some newborns with severe fetal/neonatal jaundice require substantially more resources than other normal newborns, generally this is a transient physiologic condition with minimal resource impact. In addition, since this condition as a principal diagnosis, or as the only secondary diagnosis occurring with a principal diagnosis classified to DRG 391, is considered a normal newborn, it seems logical that this same diagnosis would not be viewed as a significant complication or comorbid condition.

Finally, when considered as part of the entire classification structure of MDC 15, it is very unlikely that the removal of diagnosis code 7746 from the list of complications and comorbidities alters the classification of any cases. Unlike most MDCs, which are partitioned based on the presence or absence of any C.C., MDC 15 is organized by type of C.C. Since fetal/neonatal jaundice, NOS (7746) has never been included in any of the complicated newborn and neonatal DRGs, its presence on the list of C.C.s would affect only cases assigned to other MDCs. In summary, we view the removal of diagnosis code 7746 from the list of C.C.s as a "housekeeping" change, in that its effect upon classification of cases should be negligible.

L. MDC 17: Myeloproliferative Diseases and Disorders, and Poorly Differentiated Neoplasms

(See the Comment under MDC 14, which also refers to this MDC.)

Comment: One commenter continues to dispute our conclusion regarding DRG 410 (Chemotherapy). The commenter believes admissions for chemotherapy have historically been coded by the cancer diagnosis, not the chemotherapy. Therefore, the number of cases in the data base was not truly representative of the actual population of chemotherapy cases, which was therefore responsible for the low weighting factor.

Response: If a case is coded with cancer as the principal diagnosis, the claim would be paid in the appropriate DRG for the organ system in which the cancer occurred. Only cases for which chemotherapy is reported as the principal diagnosis are paid using the weighting factor for DRG 410. It would be extremely inappropriate for us to search out all cases in which chemotherapy was used for treatment of another principal diagnosis to be used in calculation of the weighing factor for DRG 410. We believe that the weighting factor for a particular DRG should be based exclusively on data from cases in that DRG relative to the average. We find no merit to the suggestion that the cost of chemotherapy in other DRGs be used for determining payment rates for DRG 410. Moreover, to the extent that the current weighting factor reflects coding practices that are no longer in use, the next recalibration of the DRG weights will reflect the relative resource intensity of cases as they were coded in the period from which the recalibration data base is drawn.

Comment: One commenter believes that our conclusions regarding DRGs 411 (History of Malignancy, Without Endoscopy) and 412 (History of Malignancy With Endoscopy) were based on erroneously coded data. He maintains that many hospitals did not routinely code endoscopies previously. He recommended a complete review of medical records should be initiated.

Response: If it is true that hospitals did not generally code endoscopic procedures in FY 1984, but have since modified coding, the data used in the next recalibration will reflect this. The weighting factors for DRGs 411 and 412, as for all other DRGs, were based upon the best data available at the time of the last recalibration. Any erroneous coding of data was beyond HCFA's control and will require further educational efforts on the part of coders, hospitals, and the PROs. Given the prospective nature of the prospective payment system, we do not believe it is necessary or appropriate to initiate a costly administrative review of the over 8,000 Medicare claims in these DRGs to verify if all endoscopic procedures were reported. Moreover, in light of the time period necessary to conduct such a review, it is quite likely that the next recalibration of the DRGs would take place simultaneously with or before such a review could be completed and the DRGs reweighted to correct for any coding errors.

M. MDC 20: Substance Use and Substance Induced Organic Mental Disorders

Comment: One commenter objected to the current policy regarding the exclusion of alcohol/drug hospitals and units. The commenter believes the current classification of the DRGs within MDC 20 has not been sufficiently tested. The commenter urged that the exclusion of alcohol/drug hospitals and units be extended until ProPAC has completed its evaluation of these DRGs.

Response: We addressed the issue of extension of the exclusion of alcohol/drug hospitals and units in the proposed rule setting forth changes to the prospective payment system for FY 1987. Readers are referred to that document for more information on our position in this regard.

N. MDC 23: Factors Influencing Health Status and Other Contacts with Health Services

Comment: One commenter believes that the alleged anomaly in the weighting factors for DRGs 465 (Aftercare With History of Malignancy as Secondary Diagnosis) and 466 (Aftercare Without History of Malignancy as Secondary Diagnosis) is due to coding errors.

Response: As with the responses to several previous comments, we do not believe it is necessary or appropriate to retrospectively review medical records of the claims in our data base to seek out coding omissions. A sample of Medicare claims are reviewed currently for DRG validity and coding accuracy. We believe review of current claims is more productive and valuable as an educational tool for PROs to identify and hospitals to correct coding problems. We simply do not have administrative funds available to intensively review medical records that are nearly 2 years old to test this commenter's hypothesis. As hospitals continue to improve coding of Medicare claims, the quality of program data on which future recalibrations are based will be superior, and the revised weighting factors in the future will reflect these differences. We will continue to work with the industry to educate medical records personnel on the importance of accurate, consistent and complete coding.

O. DRG 468: Unrelated OR Procedure

Comment: One commenter agreed with our decision not to establish a separate new technology DRG. However, the commenter urged that we develop an effective mechanism to respond to new technology more swiftly.

Response: We agree that it is important to respond to changing technologies promptly. We believe the establishment of the ICD-9-CM Coordination and Maintenance Committee will significantly contribute to our ability to be able to identify and gather necessary data on new technologies. In addition, we are considering the development of an administrative mechanism for ICD-9-CM procedure codes that would provide for more rapid recognition of new technologies. Once these processes are in place, we expect our ability to reflect new technologies in DRG assignment will be much more timely than in the past.

Comment: One commenter disagreed with our classification of lymphangioma and supported separate classification for lymphangioma and excision of lymphatic structure so that cases involving both would group to DRG 468. He said that current classification of the diagnosis does not take into account the location or complexity of the lymphangioma.

Response: We and other commenters continue to believe that lymphangioma treated surgically with excision of lymphatic structures should not be assigned to DRG 468. This DRG is appropriate only where none of the surgical procedures is related to the principal diagnosis. Clearly, excision of a lymphatic structure is related to treatment of lymphangioma in many cases, and, therefore, the treatment of this diagnosis with this procedure should not result in DRG 468 assignment.

Comment: One commenter supported an earlier comment pertaining to assignment of all pacemaker implants to DRG 115 or 116 rather than to DRG 468, regardless of the principal diagnosis. This commenter believes that continuing to assign pacemaker procedures to DRG 468 will adversely affect quality of care.

Response: As pointed out earlier, the fundamental principal of the DRG system is classification based on principal diagnosis. We do not believe it is appropriate to make an exception to this basic premise. In addition, we must point out that, while there is a substantial difference between the weighting factors for DRGs 115 and 468, the difference between the weighting factors for DRGs 116 and 468 is considerably smaller (.5167). Given the availability of outlier payments and the relatively low frequency of cardiac pacemaker cases assigned to DRG 468, we do not believe this decision will adversely affect the quality of services available.

Comment: One commenter stated that due to the enormous costs of transplants, the limited number of facilities performing them, and the realities of potential rejections, HCFA should develop a classification which accurately reflects the cost of performing re-transplants.

Response: We are continuing to study the impact of the DRG classification system on transplants and re-transplants. Until our analysis is completed we believe the current classification is an appropriate interim mechanism. If the results of our study indicate revision is necessary, changes will be proposed in the Federal Register for public comment.

Comment: One commenter disagreed with our decision not to include procedure code 8699 (Other operations on skin and substaneous tissue, not otherwise specified) as an O.R. procedure. He stated that "if procedure code 8699 must be used to describe any procedure that must be performed in an O.R., then the GROUPER must recognize this code as a valid O.R. procedure."

Response: The issue at hand is whether the case should be classified to a surgical DRG based on procedure code 8699 when no operating room procedure occurred. We continue to believe that, due to the variability in procedures coded as 8699, it is inappropriate to classify this an operating room procedure. As we have indicated elsewhere, we are working to develop an administrative approach that would permit us to further distinguish many types of procedures or approaches when several are identified by the same ICD-9-CM code.

V. Comments and Responses on New Coverage Decision

Comment: Six comments were received concerning our interim classification of Automatic Implantable Cardioverter—Defibrillators (AICDs). All commenters urged that classification to a lower weighted DRG not be considered. In addition, three commenters supported the creation of a new DRG exclusively for AICD.

Response: In the absence of a significant volume of claims data, we have decided to maintain classification of implantation of total system AICD cases to DRG 104 for Federal fiscal year 1987. A unique ICD-9-CM procedure code has been assigned to this procedure (see section VI) and appropriate GROUPER changes will be made to allow for the routine claims processing and data collection of such cases. We continue to be concerned with the appropriateness of

classification of this procedure into DRG 104. Once we have gathered sufficient Medicare data on this procedure, we will re-evaluate classification of this procedure. If the data indicate that DRG 104 classification is not appropriate, we will reclassify AICD cases as soon as practicable.

ProPAC had also recommended the creation of a new DRG devoted exclusively to AICD cases. We do not believe there is sufficient Medicare data as yet to permit appropriate evaluation of this proposal. We will consider this suggestion more fully in the future. For a more detailed explanation of our position in this regard, see our response to ProPAC comments in the proposed rule on prospective payment rates and changes for FY 1987.

VI. Comments and Responses on New Coding Changes

Comment: Two commenters objected to our decision not to publish precise ICD–9–CM rubrics for new codes for public comment. The commenters believe that, since new codes may ultimately contribute to DRG refinement, the codes should be subject to comment. One commenter also believes such a comment period would contribute to maintaining consistency and integrity of the coding system.

Response: We do not agree that it is necessary to publish the precise ICD–9–CM rubric for new codes for public comment. All proposed new ICD–9–CM codes are discussed at length in a public meeting of the ICD–9–CM Coordination and Maintenance Committee. The meetings are announced in the Federal Register and all interested members of the public are invited to submit agenda items, written comments and to attend the meeting.

Each past meeting has been attended by staff from ProPAC, the American Medical Records Association, the American Hospital Association, the Commission on Professional and Hospital Activities, as well as many other private parties. All comments presented, both oral and written, are considered by the Committee. We believe this process permits adequate opportunity for public input into the development of new ICD–9–CM codes.

In addition, the general areas for which new codes are being considered have been announced in the proposed notice of DRG classification changes. Further public comment on specific topics could be, and, in fact, was submitted for consideration at that time. In light of the fact that no DRG classification or payment changes are proposed, we do not feel it is essential to identify proposed ICD–9–CM rubrics in order to meet our commitment to the public of adequate notice and opportunity for suggestions. If, once the new codes are in use and data are available, we believe DRG refinement or classification change is appropriate, the proposed change will be published for review and comment in accordance with the procedures in § 412.10 of the regulations.

Comment: One commenter noted our statement that there are no explicit instructions or guidelines on coding bilateral procedures. The commenter suggested that we initiate action to establish such guidelines.

Response: As we also pointed out in the same discussion of coding bilateral procedures, it appears from review of claims data that the major portion of hospitals are coding the same procedure twice to indicate bilateral procedures. Consequently, we do not believe that in general hospitals are having difficulty coding bilateral procedures. Thus, this topic does not appear to represent a serious coding issue. Nonetheless, we have referred the commenter's recommendation to the ICD–9–CM Coordination and Maintenance Committee for consideration.

Comment: One commenter noted that new ICD–9–CM codes were proposed for cochlear prosthetic device implants. The commenter suggested specific ICD–9–CM rubrics and descriptions for appropriate identification of cochlear implants. He was particularly concerned that the new codes distinguish between single-channel and multi-channel devices.

Response: We share the commenter's concern that the new ICD–9–CM codes for cochlear prosthetic device implants adequately differentiate procedures with significant differences in resource utilization. The new codes for this procedure, as set forth below, allow for the identification of single, dual and not otherwise specified channel cochlear implants.

Comment: One commenter objected to the coding guideline that prohibits coding of surgical approaches. The commenter believes that coding of the surgical approach is often necessary to describe the procedure factually on the claim form to the Peer Review Organization (PRO). She specifically cited craniotomy and arthrotomy as issues.

Response: Volume 3 of the ICD–9–CM specifically directs that both arthrotomy (code 8016) and craniotomy (code 0124) not be coded when used as an operative approach. We do not believe the failure to code operative approaches in accordance with coding conventions interferes with appropriate PRO review of claims. The PROs have access to the medical records of patients in reviewing cases. The medical record should contain adequate information to allow the PROs to make appropriate determinations as to the medical necessity of the admission. In this regard, we would point out that the operative approach would be identified in the operating room report.

In addition, we would point out that coding of procedures used as surgical approaches can result in inappropriate DRG classification. For example, the coding of craniotomy when used as a means of access to perform cranial vascular or nerve procedures would result in classification of such cases to DRG 1 or 3 (Craniotomy Except for Trauma, Age Greater Than 17, and Craniotomy Under Age 18, respectively). Since DRG weighting factors are determined from past cases classified into each DRG, a preponderance of less intensive procedures classified into DRG 1 due solely to the coding of surgical approaches would inappropriately drive down the weight for this DRG. The result might be grossly inadequate payment for more intensive cranial procedures classified into DRG 1 or 3.

VII. Changes To Be Effective October 1, 1986

We are retaining, with slight modification, the provisions of the proposed notice, as discussed in section II. of this document.

A. DRG Classification Changes Resulting From Comment Process

1. *MDC 4: Diseases and Disorders of the Respiratory System.* Diagnosis code 4828 (Bacterial pneumonia not elsewhere classified) is removed from DRGs 89 (Simple Pneumonia and Pleurisy, Age over 69 and/or C.C.), 90 (Simple Pneumonia and Pleurisy; Age 18–69 without C.C.) and 91 (Simple Pneumonia and Pleurisy; Age 0–17). Code 4828 is included in DRGs 79 (Respiratory Infections and Inflammations Age over 69 and/or C.C.), 80 (Respiratory Infections and Inflammations, Age 18–69 without C.C.), and 81 (Respiratory Infections and Inflammations, Age 0–17).

2. *MDC 5: Diseases and Disorders of the Circulatory System.* Open chest coronary angioplasty (procedure code 3603) is assigned to DRG 109 (cardiothoracic procedures without pump). This procedure had previously been assigned to DRG 109, but had been removed in the September 3, 1985 reclassification changes due to the inability to distinguish it from PTCA through ICD–9–CM coding. Unique ICD–

9–CM codes have now been approved to distinguish the procedures; therefore, it is appropriate that open chest coronary angioplasty performed without extracorporeal circulation be classified to DRG 109.

3. *MDC 13: Diseases and Disorders of the Female Reprodcutive System.* We have revised the surgical hierarchy of this MDC, and, as proposed, have reconfigured DRGs 353, 354, 355, 357, 358, 359, 360, 361, and 362 to increase homogeneity and thus more accurately reflect resource intensity of cases assigned to these DRGs.

Unilateral vulvectomy (procedure code 7161) and bilateral vulvectomy (procedure code 7162) are removed from DRG 353 (Pelvic Evisceration, Radical Hysterectomy and Vulvectomy). These procedures are now assigned to DRG 360 (Vagina, Cervix and Vulva Procedures).

We are reconfiguring DRGs 354, 355, 357, 358, and 359 as follows:

- Uterus and adnexa procedures (except for incisional tubal interruption: procedure codes 6631, 6632, 6639, and 6663) are moved to the same section of the surgical hierarchy for MDC 13 as non-radical hysterectomies are currently in, above reconstructive procedures.
- Cases involving non-radical hysterectomies, uterus and adnexa procedures are divided into those with a principal diagnosis of malignancy and those without.
- Cases with a principal diagnosis of malignancy are further subdivided.

—Those with ovarian and adnexal malignancies (diagnosis codes 1830, 1832, 1833, 1834, 1835, 1836, 1839, 1858 and 2362) will be assigned to the new DRG 357 (Non-Radical Hysterectomy, Uterus and Adnexa Procedures, for Ovarian and Adnexal Malignancy).

—Those cases with a principal diagnosis of malignancy except ovarian and adnexal malignancy will be split on age and complications/comorbidities, and will be assigned to the new DRGs 354 and 355 (Non-Radical Hysterectomy, Uterus and Adnexa Procedures for Malignancy Except Ovarian/Adnexal Malignancy; Age over 69 and/or C.C., and Age under 70 without C.C., respectively).

- Cases with a principal diagnosis of other than malignancy also are divided on age and complications/comorbidities, will be assigned to the new DRGs 358 and 359 (Non-Radical Hysterectomy, Uterus and Adnexa Procedures for Non-Malignancy; Age over 69 and/or C.C., and Age under 70 without C.C., respectively).

We also are modifying DRGs 361 and 362 as follows:

- The procedure codes for incisional tubal interruption (6631, 6632, 6639 and 6663) are moved from DRG 359 and the uterine and adnexa part of the hierarchy to the laparoscopy section of the hierarchy.
- Cases involving these surgical procedures or laparoscopy (code 5421), are assigned to DRG 361.
- Cases involving endoscopic tubal interruption (procedure codes 6621, 6622, and 6629) are moved below the D & C, conization and radioactive implant section of the surgical hierarchy and are assigned to new DRG 362 (Endoscopic Tubal Interruption).

In order to accomplish this reconfiguration, it was necessary to reorder the surgical hierarchy of MDC 13. The revised surgical hierarchy for MDC 13 is as follows:

- Pelvic evisceration, radical hysterectomy and radical vulvectomy (DRG 353);
- Uterus and adnexal procedures (DRG 354, 355, 357, 358 and 359);
- Reconstruction (DRG 356);
- Vagina, cervix and vulva (DRG 360);
- Laparoscopy and incisional tubal interruption (DRG 361);
- D and C, conization and radioimplant (DRG 363 and 364);
- Endoscopic tubal interruption (DRG 362); and
- Other female reproductive system operating room procedures (DRG 365).

4. MDC 20: Substance Use and Substance Induced Organic Mental Disorders. The titles of MDC 20 and DRGs 433 through 437 are revised. Wherever the term "substance" appears in those DRGs, the term "alcohol/drug" is substituted.

B. New Coverage Decisions

Effective for procedures performed on or after January 24, 1986, Medicare coverage was extended to implantation of cardiac defibrillators under certain circumstances. On an interim basis, we will assign this procedure to DRG 104 (Cardiac Valve Procedure with Pump and with Cardiac Catheter).

Discrete ICD–9–CM procedure codes for this new technology had not yet been adopted at the time of publication of the proposed notice, but the ICD–9–CM Coordination and Maintenance Committee now has adopted new ICD–9–CM procedure codes for the implantation of cardiac defibrillators. The new procedure codes will be incorporated into the GROUPER software and thus classified into the appropriate DRG for discharges occurring on or after October 1, 1986. For discharges prior to October 1, 1986, payment will be made for such claims only on a manual basis when accompanied by appropriate documentation.

C. New Coding Changes

The following new ICD–9–CM codes have been approved for use effective October 1, 1986.

Cochlear Prosthetic Device Implant

20.96 Implantation of cochlear prosthetic device, not otherwise specified
20.97 Implantation or replacement of chochlear prosthetic device, single channel
20.98 Implantation or replacement of cochlear prosthetic device, multiple channel

Removal of Coronary Artery Obstruction

36.00 Unspecified
36.01 Percutaneous transluminal coronary angioplasty (PTCA) without mention of thrombolytic agent
36.02 Percutaneous transluminal coronary angioplasty (PTCA) with thrombolytic agent
36.03 Open chest coronary angioplasty
36.04 Intracoronary thrombolytic infusion
36.09 Other specified

Cardioverter/Defibrillator

37.94 Implantation or replacement of cardioverter/defibrillator, total system
37.95 Implantation of cardioverter/defibrillator lead(s) only
37.96 Implantation of cardioverter/defibrillator pulse generator only
37.97 Replacement of cardioverter/defibrillator lead(s) only
37.98 Replacement of cardioverter/defibrillator pulse generator only

Resection of Vessel with Replacement

(removal of the section mark allows the following unique fourth digit subclassification)

38.44 Aorta, abdominal
38.45 Thoracic vessels

Percutaneous Nephrostomy

55.03 Percutaneous nephrostomy without mention of fragmentation
55.04 Percutaneous nephrostomy with fragmentation of stone

Artificial Urinary Sphincter Implant

59.93 Implantation of artificial urinary sphincter (AUS)

Extracorporeal shockwave lithotripsy (ESWL)

59.96 Extracorporeal shockwave lithotripsy (ESWL)

Penile Prostheses

64.95 Insertion or replacement of internal non-inflatable prosthesis of penis
64.97 Insertion or replacement of internal inflatable prosthesis of penis

Chemonucleolysis

80.50 Excision or destruction of intervertebral disc, not otherwise specified
80.51 Excision

80.52 Chemonucleolysis
80.59 Unspecified

Magnetic Resonance Imaging (MRI)

88.90 Unspecified
88.91 Magnetic resonance imaging of brain and brain stem
88.92 Magnetic resonance imaging of chest and myocardium
88.93 Magnetic resonance imaging of spinal canal and contents, cervical, thoracic, and lumbar
88.94 Magnetic resonance imaging of musculoskeletal
88.95 Magnetic resonance imaging of pelvis, prostate and bladder
88.99 Magnetic resonance imaging, other and unspecified sites

As we pointed out in the March 13, 1986 proposed rule, these new codes will not result in DRG classification changes. Consequently, these new codes will be classified into the same DRGs that the procedure is currently classified using the previous coding rubric. We note that magnetic resonance imaging is not considered an operating room procedure and, therefore, will not affect the DRG classification of a case.

In order to prevent the unwarranted delay of recognition of new codes by the Medicare program, we will modify the GROUPER program, to the extent feasible, to recognize any new ICD–9–CM codes adopted in the future by the ICD–9–CM Coordination and Maintenance Committee and, in most cases, to classify discharges with such codes initially in the same DRG as the previous coding assignment. That is, any coding changes adopted by the committee prior to July 1, 1986 will be included in the Medicare GROUPER program for Federal fiscal year 1987 (October 1986 through September 1987), but will not necessarily result in changes to the classification of cases using these new codes. (See the proposed notice of PPS changes for FY 1987 for a list of other diagnoses and procedures for which new ICD–9–CM codes are being considered.) Coding changes approved subsequent to July 1, 1986 will be accommodated in future revisions of the GROUPER program. We will consider interim revisions of the GROUPER to recognize new ICD–9–CM codes, should the volume of cases indicate it is appropriate. Because the use of most new ICD–9–CM codes will not result in DRG classification changes initially, the new codes will not be published for public comment. Of course, should reclassification become necessary, we stated we would follow the procedures set forth at § 412.10 of the regulations.

D. Effective Dates

The changes in DRG classification and adoption of new ICD–9–CM codes are effective for discharges occurring on or after October 1, 1986.

VIII. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 requires us to prepare and publish a regulatory impact analysis for notices such as this if the implementation of the notice would meet the criteria of a "major rule". A notice would be considered a major rule if its implementation would be likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

These changes to the DRG classification system and GROUPER program will not meet any of these criteria. Therefore, a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

We prepare and publish a regulatory flexibility analysis, consistent with the Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601 through 612), for notices such as this unless the Secretary certifies that implementation of the notice would not have a significant economic impact on a substantial number of small entities. We treat all hospitals under the prospective payment system as small entities for purposes of the RFA. Therefore, this notice clearly would affect a substantial number of small entities. However, it is our practice not to consider an economic impact on small entities to be significant unless their annual total costs or revenues would be increased or decreased by at least 3 percent. These changes to the DRG classification system and the GROUPER program would not have results meeting this threshold. Therefore, we have determined and the Secretary certifies that a regulatory flexibility analysis is unnecessary.

IX. Information Collection Requirements

This final rule contains no information collection requirements. Consequently, it does not need to be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

(Secs. 1102, 1871, and 1886(d)(4) of the Social Security Act (42 U.S.C. 1302, 1395hh, and 1395ww(d)(4)); 42 CFR 412.10)

(Catalog of Federal Domestic Assistance Program No. 13.774, Medicare-Supplementary Medical Insurance)

Dated: May 27, 1986

William L. Roper,
Administrator, Health Care Financing Administration.

Approved: May 28, 1986.

Otis R. Bowen,
Secretary.

Office of Science and Technology Policy

Proposed Model Federal Policy for Protection of Human Subjects; Response to the First Biennial Report of the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research; Notice

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Proposed Model Federal Policy for Protection of Human Subjects; Response to the First Biennial Report of the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research

AGENCY: Office of Science and Technology Policy, Executive Office of the President.

ACTION: Notice of proposed model policy for department/agency implementation.

SUMMARY: This Notice sets forth the Office of Science and Technology Policy response to the recommendations in the *First Biennial Report* of the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research. This response, made on behalf of all affected federal departments and agencies, is based on the work of the *Ad Hoc* Committee for the Protection of Human Research Subjects and further deliberations of the Interagency Human Subjects Coordinating Committee. The *First Biennial Report* was published in the Federal Register on March 29, 1982 (47 FR 13272–13305). Responses of the *Ad Hoc* Committee were reviewed by the Science Advisor to the President and, with some modifications, accepted by affected department and agency heads in May 1985. This Notice includes in response to the first and most important recommendation, a Model Federal Policy for the Protection of Human Research Subjects (Model Policy) involved in research conducted, supported or regulated by federal departments and agencies. The Notice also contains a list of departments and agencies that intend to adopt the Model Policy and describes what, if any, departures from the Model Policy departments and agencies propose to make at the time of their policy implementation in order to meet particular statutory requirements or program needs.

Public comment and that of the federal departments and agencies is requested on the Proposed Model Policy, proposed department and agency departures, and other aspects of this Notice. Based upon these comments, a Final Model Policy will be published in the Federal Register. Each department and agency will expeditiously and in a coordinated fashion promulgate the Final Model Policy through its normal procedures for implementing such policies, e.g., through publication of regulations in the Federal Register.

DATES: Comments must be received on or before August 4, 1986. The Interagency Human Subjects Coordinating Committee will consider these comments and refer them to the Office of Science and Technology Policy for use in development of a Final Model Policy and to departments and agencies for use in their policy implementation.

ADDRESSES FOR COMMENT AND FURTHER INFORMATION: Comments and requests for further information should be addressed to: Joan P. Porter, Staff Director, Interagency Committee for the Protection of Human Subjects, Building 31, Room 4B09, Bethesda, Maryland 20892 (301–496–7041). Please specify which recommendations or sections of the Model Policy to which the comments pertain.

John P. McTague,

Acting Director, Office of Science and Technology Policy.

- Concurrences of Department and Agency Heads and Proposed Departures from the Model Policy

Background

The President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research was established on November 9, 1978, by Pub. L. 95–622. One of the charges to the President's Commission was to report biennially to the President, the Congress, and appropriate federal departments and agencies on the protection of human subjects of biomedical and behavioral research. In carrying out that charge, the President's Commission was directed to conduct a review of the adequacy and uniformity (1) of the rules, policies, guideline, and regulations of all federal departments and agencies regarding the protection of human subjects of biomedical or behavioral research which such departments and agencies conduct or support, and (2) of the implementation of such rules, policies, guidelines, and regulations by such agencies, such review to include appropriate recommendations for legislation and administrative action.

In December 1981 the President's Commission issued its *First Biennial Report on the Adequacy and Uniformity of Federal Rules and Policies, and their Implementation, for the Protection of Human Subjects in Biomedical and Behavioral Research, Protecting Human Subjects.* In transmitting the Report to the President, Morris B. Abram, Chairman of the Commission noted:

> The Commission does not propose any major changes in the substance of the rules on human research, although a number of adjustments are recommended to recognize the flexibility needed by research institutions, particularly in responding to allegations of wrongdoing or other problems. We also propose a simple improvement in the reports filed by researchers, to provide information on the number of subjects and on any that are adversely affected by participation in a research project.
>
> The Commission does recommend one major organizational change, namely that a uniform core of regulations be adopted, based upon the present rules of the Department of Health and Human Services, and that HHS become the lead agency in this field. This consolidation would eliminate needless duplication in the rules of the 23 other Federal entities that support or regulate research, thereby simplifying both local compliance with the rules and Federal oversight of the system. Copies of this report are being sent to all affected Federal agencies, with a request for action, pursuant to the Commission's enabling legislation.

In accord with Pub. L. 95–622, each federal department or agency which receives recommendations from the President's Commission with respect to its rules, policies, guidelines or regulations, must publish the recommendations in the Federal Register and provide an opportunity for interested persons to submit written data, views and arguments with respect to adoption of the recommendations. On March 29 1982, (47 FR 13272–13305) the Secretary, HHS, published the report on behalf of all the departments and agencies affected by the recommendations.

In May 1982 the Chairman of the Federal Coordinating Council for Science, Engineering and Technology (FCCSET), appointed an *Ad Hoc* Committee for the Protection of Human Research Subjects under the auspices of the FCCSET. The Committee, chaired by Dr. Edward N. Brandt, Jr., Assistant Secretary for Health, HHS, was composed of the representatives and *Ex Officio* members of affected departments and agencies. In consultation with the Office of Science and Technology Policy (OSTP) and the Office of Management and Budget, the *Ad Hoc* Committee, after considering all public comments, developed responses to the recommendations of the President's Commission. After further review and refinement, OSTP responded on behalf of all affected department and agency heads to the recommendations of the President's Commission.

The first and most far-reaching recommendation of the President's Commission resulted in the development of a Proposed Model Federal Policy for the Protection of Human Research Subjects based on the January 1981 HHS regulations for the protection of human subjects (45 CFR Part 46):

> The President should, through appropriate action, require that all federal departments and agencies adopt as a common core the regulations governing research with human subjects issued by the Department of Health and Human Services (codified at 45 CFR Part 46), as periodically amended or revised, while permitting additions needed by any department or agency that are not inconsistent with these core provisions.

The *Ad Hoc* Committee agreed that uniformity is desirable among departments and agencies to eliminate unnecessary regulation and to promote increased understanding and ease of compliance by institutions that conduct federally supported or regulated research involving human subjects. Therefore, the *Ad Hoc* Committee developed a Model Policy, which applies to research involving human subjects that is conducted, supported or regulated by federal departments and agencies. In accordance with the Commission's recommendation, the Model Policy is based on Subpart A of the regulations of the Department of Health and Human Services (HHS) for the protection of human research subjects (45 CFR Part 46). The Proposed Model Policy developed by the *Ad Hoc* Committee was later modified by OSTP to enhance uniformity of implementation among the affected federal departments and agencies and to provide consistency with other related policies. The revised Policy was concurred in by all affected federal departments and agencies heads in March 1985.

The President's Commission also recommended that the President authorize and direct the Secretary, HHS, to designate an office with governmentwide jurisdiction to coordinate, monitor and evaluate the implementation of all federal regulations governing research with human subjects. For the reasons set forth in its response, the *Ad Hoc* Committee recommended that the Office for Protection from Research Risks (OPRR), National Institutes of Health, serve in a federal coordinating role for the protection of human subjects. The Director, OPRR, chairs the Interagency Human Subjects Coordinating Committee described below.

The Proposed Model Policy and the other responses to the President's Commission accepted by OSTP and the affected department and agency heads, are set forth below. After a public comment period and publication of a Final Model Policy, each department and agency will promulgate the Model Policy expeditiously through whatever procedures are normally utilized for the implementation of policies or regulations, e.g. through publication as regulations in the Federal Register. Instances in which the policies of certain departments and agencies propose to depart from the Model Policy during their rulemaking or other implementation processes to accommodate statutory or program requirements are also described herein.

The Interagency Human Subjects Coordinating Committee chartered in October 1983 under the auspices of FCCSET, is composed of representatives of all federal departments and agencies that conduct, support or regulate research involving human subjects. The Committee is advisory to department and agency heads, and among other responsibilities, evaluates the implementation of the Model Policy and recommends changes as necessary. OSTP responses to the recommendations of the President's Commission based on the report of the *Ad Hoc* Committee; the Proposed Model Policy; and the concurrences and intended departures of each affected federal department or agency head are presented below.

Response to Recommendations of the President's Commission

Response of the Office of Science and Technology Policy (OSTP) to the recommendations of the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research in *Protecting Human Subjects; the First Biennial Report on the Adequacy and Uniformity of Federal Rules and Policies, and their Implementation for the Protection of Human Subjects in Biomedical and Behavioral Research* (December 1981).

This response is based on the work of the *Ad Hoc* Committee for the Protection of Human Research Subjects of the Federal Coordinating Council for Science, Engineering, and Technology which was modified to incorporate OSTP policy considerations in and accepted by affected Federal department and agency heads in June 1984.

Recommendation 1

> *The President should, through appropriate action, require that all federal departments or agencies adopt as a common core the regulations governing research with human subjects issued by the Department of Health and Human Services (codified at 45 CFR Part 46), as periodically amended or revised, while permitting additions needed by any department or agency that are not inconsistent with these core provisions.*

(A timetable of 180 days should be established by the President to provide an incentive for the interagency group to resolve any remaining questions about the HHS core regulations and identify an initial set of special rules beyond the core that are needed by various departments and agencies. If action is not prompt, the Commission suggests that Congress enact legislation directing the Executive branch to establish by a specified date a uniform set of regulations under a lead agency.)

The *Ad Hoc* Committee agreed in principle with this recommendation and developed a Model Federal Policy (Model Policy) statement based upon adaptations of HHS regulations for the protection of human subjects involved in research (45 CFR Part 46). The Office of Science and Technology Policy has made several modifications to increase uniformity of procedures among the federal departments and agencies and to increase compatibility with other current federal policies.

The Model Policy represented the *Ad Hoc* Committee's attempt to meet the concerns of the Commission that unnecessary and confusing regulations impose burdens on institutions that conduct or support research involving human subjects. The Committee attempted to make the Model Policy consistent with the HHS regulations while allowing for flexibility and adaptability in its application to the programs of diverse federal departments and agencies.

The *Ad Hoc* Committee believed that, insofar as possible, federal departments and agencies should employ consistent policies and procedures in dealing with nonfederal research institutions. Accordingly, the Model Policy was drafted in a mode that strives for uniformity in assurance and certification procedures; in all matters pertaining to the establishment, membership, functions and responsibilities of Institutional Review Board (IRBs); and in procedural requirements including informed consent. Nevertheless, the Model Policy will allow agencies to continue to utilize time-tested directives and procedures in the conduct of their intramural research so long as these procedures are consistent with the Model Policy and adequately protect the rights and welfare of human research subjects.

Similarly, the Policy is designed to apply to research conducted, supported or regulated by United States departments or agencies in foreign situations. However, department or agency heads may accept other recognized standards in lieu of this Policy so long as these standards offer at least equivalent protections for research subjects.

The *Ad Hoc* Committee concurred with the findings of the President's Commission that there is already close correlation between the major provisions of the HHS regulations and current policies and procedures of other federal departments and agencies for protecting human subjects. The Model Policy is intended to further reduce the diversity so that nonfederal research institutions will not have to face inconsistent or contradictory requirements in their dealings with federal departments and agencies. The *Ad Hoc* Committee fully expected that adoption of the Policy will reduce the administrative burdens on institutions that conduct research involving human subjects.

The Model Policy document has been drafted in the form of a policy statement rather than in the form of a regulation so that it may be referenced by departments and agencies that will implement the Policy within a reasonable time and in a manner customary to each department or agency. In the future, department or agency heads may amend their policies so long as they note in advance in the Federal Register or other appropriate publications the way in which their amendments relate to provisions of the Model Policy.

Assuming a department or agency adopts the Model Policy it will retain the flexibility to waive individual requirements if waiver decisions are published in advance in the Federal Register or other appropriate publication. The *Ad Hoc* Committee believed that instances of waiver will be infrequent, and the requirement that each waiver be published will prevent inappropriate use of the waiver authority.

Highlights of key elements of the Model Policy for federalwide use are as follows:

Consistency with HHS Regulations

As noted previously, the *Ad Hoc* Committee Model Policy is patterned after HHS regulations. The word "Secretary" has been changed to "department or agency head" throughout the draft. Most of the provisions of the following subject areas are the same in the Model Policy and HHS regulations:

(1) The characteristics of IRBs; (2) the role of IRBs in providing prior review of research protocols, including their duties and authorities in relation to investigators, to their institutions, and to the sponsors of research; (3) the standards and procedures that should govern IRB decision making and investigators' behavior; (4) the provisons of assuring compliance with the policy; (5) the procedures for expedited review; (6) the the provisions for obtaining and documenting informed consent; and (7) the provisions for early termination of research support and evaluation of applications. The following highlights the major areas in which there is a difference in the Model Policy and Current HHS regulations.

Applicability

Sec. 101(a) specifies that

. . . .[The policy] includes research conducted, supported, or otherwise subject to regulation by the federal government outside the United States.

(1) Research that is conducted or supported by a federal department or agency whether or not it is regulated as defined in Sec. 102(e) must comply with all sections of this policy.

(2) Research that is neither conducted nor supported by a federal department or agency but is subject to regulation as defined in Sec. 102(e) must be reviewed and approved, in compliance with Secs. 101, 102 and 107 through 117 of this policy, by an institutional review board (IRB) that operates in accordance with the pertinent requirements of this policy.

It should be noted that federal support of an activity does not necessarily render the policy applicable to that activity. Federal "support" must be used in "research" involving "human subjects" as defined in the policy. For example, a private physician who conducts research unrelated to the Medicaid program would not come under this policy solely because the sevices he/she provides some of his/her patients are reimbursed by Medicaid. Nor would a research project sponsored by a State agency be covered solely because nonresearch services administered by the same agency are federally reimbursed. Alternatively, if a privat physician or a State agency does employ federal support for research involving human subjects or if the physician or State agency voluntarily adopt this policy through the assurance mechanism, this policy would be applicable.

The Model Policy contains a definition of regulated research and indicates which sections of the policy are applicable to regulated research.

Sec. 102(e) defines regulated research.

'Research subject to regulation' and similar terms are intended to encompass those research activities for which a federal department or agency has specific responsibility for regulating as a research activity, (for example, Investigational New Drug requirements administered by the Food and Drug Administration). It does not include research activities which are incidentally regulated by a federal department or agency solely as part of the department's or agency broader responsibility to regulate certain types of activities whether research or non-research in nature (for example, Wage and Hour requirements administered by the Department of Labor).

The provision in the HHS regulations which allows the Secretary to waive certain provisions is adapted to the Model Policy in the following manner:

Sec. 101(i) provides that

Unless otherwise required by law, department or agency heads may waive the applicability of some or all of the provisions of this policy to specific research activities or classes of research activities otherwise covered by this policy. Except when otherwise required by statute or Executive Order, the department or agency head shall forward advance notices of these actions to the Office for Protection from Research Risks, Department of Health and Human Services (HHS), and shall also publish them in the Federal Register or in such other manner as provided in department or agency procedures.

Consequently, waiver determinations must normally be published in the Federal Register, thus subjecting them to public scrutiny.

Changes in Exemptions

Sec. 101(b) sets forth exemptions for certain research activities from coverage of the Model Policy. The Model Policy combines exemptions 45 CFR 46.101(b)(2),(3) and (4) of the HHS regulations dealing with the use of educational tests, survey and interview procedures and observation of public behavior. The HHS exemptions are reflected in Model Policy exemptions sec. 101(b)(2) and (3):

(2) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior, unless:

(1) information obtained is recorded in such a manner that human subjects can be identified, directly or through identifiers linked to the subjects; and

(ii) any disclosure of the human subjects' responses outside the research could reasonably place the subjects at risk of criminal or civil liability or be damaging to the subjects' financial standing or employability.

(3) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures,

interview procedures or observation of public behavior that is exempt under paragraph (2), if:

(i) the human subjects are elected or appointed public officials or candidates for public office; or

(ii) Federal statute(s) require(s) without exception that the confidentiality of the personally identifiable information will be maintained throughout the research and thereafter.

Thus, provision is made in the Model Policy for exempting certain social science research when federal statutes require without exception that the confidentiality of the personally identifiable information will be maintained.

Sec. 101(b)(6) is a new exemption

Taste and food quality evaluation studies, if wholesome foods without chemical additive are consumed or if a limited amount of a food is consumed that contains a food additive or agricultural chemical at or below a level approved by the Food and Drug Administration, the Environmental Protection Agency, or the Animal Plant Health Inspection Service of the U.S. Department of Agriculture.

This exemption, requested by the U.S. Department of Agriculture (USDA) but appropriate for several other agencies as well, is intended to exempt certain taste and food quality evaluation studies from IRB review. The current USDA policy exempts taste and food quality evaluation studies which involve consumer acceptance testing and quality evaluation studies if a limited amount of food will be consumed containing a food additive or agricultural chemical at a level approved by the Food and Drug Administration (FDA), the Environmental Protection Agency (EPA) or the Animal Plant Health Inspection Service (APHIS) of the USDA; or if the food chemical is normally found in food at concentrations at least equal to those being tested. The exemption is not intended to apply to task tests and quality evaluation studies if the food additive is being tested and the test chemical is *not* (1) on FDA's Generally Recognized as Safe (GRAS) list; (2) a permitted food additive as tested; or (3) normally found in food at concentrations being tested. In addition, the exemption is not intended to apply if a pesticide or other chemical residue is present and the acceptable level has not been established by FDA, EPA or APHIS.

Foreign Research

Sec. 101(g) states clearly what is only implicit in the HHS regulations, namely that the Model Policy does not affect any foreign laws or regulations which may otherwise be applicable and which provide additional protections for human subjects. Furthermore, it allows department and agency heads discretion in accepting equivalent procedures for research carried out in foreign countries.

Sec. 101(h) provides that

When research covered by this policy takes place in foreign countries, procedures normally followed in the foreign countries to protect human subjects may differ from those set forth in this policy. [An example is a foreign institution which complies with guidelines consistent with the 1975 World Medical Assembly Declaration (Helsinki II) issued either by sovereign states or by an organization whose function for the protection of human research subjects is internationally recognized.] In these circumstances, if a department or agency head determines that the procedures prescribed by the institution afford protections *that are at least equivalent* to those provided in this policy, the department or agency head may approve the substitution of the foreign procedures in lieu of the procedural requirements provided in this policy. Except when otherwise required by statute, Executive Order, or the department or agency head, notices of these actions as they occur will be published in the Federal Register or such other publications as provided by department or agency procedures. (Italics supplied)

Assuring Compliance with the Model Policy

Sec. 103(a) requires that

Each institution engaged in research which is covered by this policy and which is conducted or supported by a federal department or agency shall provide written assurance satisfactory to the department or agency head that it will comply with the requirements set forth in this policy.

Current HHS regulations permit institutions which hold an approved assurance to delay submission of certification of IRB review and approval until 60 days after submission of an application or proposal for financial support. The Model Policy does not include a grace period.

Sec. 103(g) requires that

Certification is required when the research is supported by a federal department or agency and not otherwise exempted or waived under Secs. 101(b) or (i). Along with the submission of an application or proposal for approval or support, an institution with an approved assurance covering the research shall certify that the application or proposal has been reviewed and approved by the IRB. Institutions without an approved assurance covering the research shall certify within 30 days after receipt of a request for such a certification from the department or agency, that the application or proposal has been approved by the IRB. If the certification is not submitted within these time limits, the application or proposal may be returned to the institution.

IRB Membership

Sec. 107(a) includes a provision that

. . . The IRB shall be sufficiently qualified through the experience and expertise of its members, and the diversity of the members including consideration of race, gender, and cultural backgrounds and sensitivity to such issues as community attitudes, to promote respect for its advice and counsel in safeguarding the rights and welfare of human subjects. . . .

Sec. 107(a) of the Model Policy also replaces the current HHS requirement that if an IRB regularly reviews research that involves a vulnerable category of subjects, the IRB must include one or more individuals who are primarily concerned with the welfare of those subjects. Consideration of inclusion of such an individual(s) is left to the institution (or other authority) establishing the IRB in the Model Policy.

The Model Policy requires instead in 107(a) that

. . . If an IRB regularly reviews research that involves a vulnerable category of subjects, such as children, prisoners, pregnant women or mentally disabled persons, consideration shall be given to the inclusion of one or more individuals who are knowledgeable about and experienced in working with these subjects.

45 CFR 46.107(b) of the 1981 HHS regulations indicates that no IRB may consist entirely of men or entirely of women, or entirely of members of one profession.

Section 107(b) of the Model Policy reads

Every nondiscriminatory effort will be made to ensure that no IRB consists entirely of men or entirely of women, including the institution's consideration of qualified persons of both sexes, so long as no selection is made to the IRB on the basis of gender. No IRB may consist entirely of members of one profession.

This language was developed in consultation with the Department of Justice.

In seeking diverse membership on the IRB, the institution must consider both men and women who can contribute to the work of the IRB. Given the ready availability of well qualified persons of both genders, OSTP expects that only rarely, if ever, will an IRB consist solely of men or solely of women. In any event, no selection shall be made to the board on the basis of gender.

Recommendation 2

The President should authorize and direct the Secretary of Health and Human Services to designate an office with government-wide jurisdiction to coordinate, monitor and evaluate the implementation of all regulations governing research with human subjects

of Federal departments that conduct, support or regulate such research.

The *Ad Hoc* Committee endorsed the concept of the designation of an office to coordinate the implementation of the Model Policy developed under Recommendation 1. However, the *Ad Hoc* Committee did not believe that it is either necessary or useful to assign the coordinating office "government-wide jurisdiction to *monitor* and *evaluate* the implementation of *all* regulations governing research with human subjects." For example, the Food and Drug Administration (FDA) has jurisdiction over nearly 30 different categories of test articles—each covered by appropriate regulations governing clinical research. It would be entirely impractical to expect a central HHS office to monitor and evaluate each of these specialized regulations, but it is feasible and desirable that rules governing IRB review and informed consent be consistent throughout all of these regulations and consistent with procedures required by other departments and agencies. As the President's Commission notes, most departments and agencies already follow the HHS rules pertaining to IRBs and informed consent. To date, uniformity has been developing on a voluntary basis with assistance from OPRR.

Reporting Requirements for Institutions

In consideration of Recommendations 7 and 8 in the *Biennial Report*, language has been included in Sec. 103(b)(5) to indicate that assurances negotiated with supporting federal agencies or departments must specify

Written procedures for ensuring prompt reporting the IRB, appropriate institutional officials, and the department or agency head (i) any unanticipated problems or scientific misconduct involving risks to human subjects or others; (ii) any allegation or finding of serious or continuing noncompliance with this policy or the requirements or determinations of the IRB; and (iii) any suspension or termination of IRB approval.

This sets forth the requirement that all concerned parties be informed of problems and misconduct based on noncompliance with the Policy for the protection of human subjects. It allows research institutions flexibility in developing procedures compatible with their organizational structures, while requiring them to meet a reasonable standard of accountability. (See discussion of Recommendations 7 and 8, following.)

Role of the Office for Protection from Research Risks (OPRR)

In anticipation of designation of OPRR as a key coordinating office (described below in the *Ad Hoc* Committee's response to Recommendation 2), the following responsibility for OPRR has been made explicit in the Model Policy.

Sec. 103(f) requires that

In lieu of negotiating a separate assurance, individual department or agency heads shall accept the existence of a current assurance, appropriate for the research in question, approved by and on file with the Office for Protection from Research Risks, HHS.

This provision will considerably reduce the administrative burden on institutions conducting research and on federal departments and agencies conducting or supporting research.

The *Ad Hoc* Committee, therefore, recommended that the President's Science Advisor request the Secretary, HHS, to direct the OPRR to exercise federalwide coordination of policies and procedures for the protection of human research subjects. The Model Policy has been drafted to reflect an OPRR role.

The coordinating responsibilities of OPRR include at least the following:

(1) OPRR shall continue to negotiate and approve Assurances of Compliance with the HHS regulations based on the Model Policy for HHS conducted and supported research. In lieu of negotiating a separate assurance, individual departments and agencies shall accept a current HHS assurance approved by and on file in OPRR if it is appropriate to the research in question.

(2) OPRR shall facilitate an exchange of information among all federal departments and agencies that conduct, support or regulate research involving human subjects.

(3) OPRR shall, when appropriate, amend and republish the list of categories of research that may be reviewed under the expedited procedures outlined under Sec. 110 of the Model Policy.

(4) OPRR shall continue to develop educational materials and programs for the benefit of (a) research investigators; (b) research administrators; (c) IRB members; and (d) federal officials with responsibility for research involving human subjects.

(5) Department and agency heads shall forward to OPRR for review and comment all proposed department or agency policies and regulations for the protection of human research subjects. OPRR shall within 90 days of receipt call to the attention of any department or agency issuing a proposed rule or policy any provisions inconsistent with the Model Policy.

(6) The Director, OPRR, shall chair an Interagency Human Subjects Coordinating Committee to facilitate coordination of federal policies and regulations for the protection of human subjects. (This Committee was established in October 1983 by the Director, OSTP, under the auspices of the Federal Coordinating Council for Science, Engineering and Technology and is advisory to department and agency heads.)

The *Ad Hoc* Committee believed that if these coordinating steps are taken (including advising, guiding, educating and reviewing as described), the purposes of the recommendations of the President's Commission will be accomplished. The Interagency Committee is well-positioned to evaluate the implementation of the Model Policy when necessary and appropriate.

The *Ad Hoc* Committee further believed that over many years the OPRR has established sound credentials in the protection of human subjects. It noted that OPRR has operated effectively with all necessary backing from the Office of the Secretary, HHS. Because OPRR is located in a research milieu, it has ready access to experts in biomedical and behavioral research with experience in dealing with the delicate balance of promoting high quality research while maintaining proper safeguards for human subjects.

By designating OPRR as the coordinating office, the *Ad Hoc* Committee believed that the Secretary, HHS, would give emphasis to the importance of the coordinating function to be exercised. Establishment of a permanent federalwide advisory group assures the continuation of this emphasis. By designating an existing office in HHS rather than creating a new office, the Secretary is able to accomplish the goals of the President's Commission with only minimal increases in monetary and personnel expenditures.

Recommendation 3

Each Federal department or agency should have a comprehensive set of rules and procedures governing research with human subjects that applies consistently to all submits within the department or agency.

No action required on Recommendation 3 will be needed if the procedures outlined in response to Recommendations 1 and 2 are adopted.

Recommendation 4

All Federal departments and agencies that conduct or support research with

human subjects should require principal investigators to submit, as part of their annual reports to the IRB and the funding agency, information regarding the number of subjects who participated in each research project as well as the nature and frequency of adverse effects.

The *Ad Hoc* Committee questioned the feasibility of developing a major data collection of numbers of human subjects who participate in Federally conducted or supported research. It acknowledged the importance of sound data relating to research injuries and adverse reactions and recognized such data would be helpful in making sound policy decisions concerning compensation for research injuries. Nevertheless, the *Ad Hoc* Committee recognized serious definitional problems associated with the collection of such data.

The President's Commission has acknowledged the difficulty in defining research-related injury. The Veterans Administration (VA) has made efforts to collect data of the type recommended by the President's Commission. The VA program, attempted as a pilot effort, has been fraught with technical difficulties.

The VA has described certain difficulties recently encountered in collecting data on human research subjects. The VA had issued circulars to its medical centers which were conducting research involving human subjects. The circulars requested that the centers collect data regarding the incidence of adverse results "or effects" of participation in biomedical and behavioral research. The collected data were forwarded to the central VA office. Figures received in November 1981 provided the VA with unreliable and incomplete reports of human subjects injured or otherwise adversely affected as the result of participation in research projects. Because of definitional problems, misunderstandings on the part of field research personnel, confounding of therapeutic and research data and instances of both underreporting and overreporting, the data were considered misleading or meaningless. The data were not amenable to synthesis.

Given the existing definitional problems and the expected poor quality of resulting data, the *Ad Hoc* Committee believed that the expenditure of scarce resources for data collection was not warranted at this time. In fact, implementation of this recommendation could produce results that are misleading and could generate inappropriate policies and procedures. Therefore, the *Ad Hoc* Committee recommended that the matter of data collection be addressed by an Interagency Human Subjects Coordinating Committee.

Recommendation 5

The Department of Health and Human Services and all other relevant Federal departments and agencies should proceed promptly to take action on the National Commission's recommendations concerning research involving children and research involving those institutions as mentally disabled, and other Federal agencies should also act on the final regulations of HHS governing such research. . . .

In early February 1983 HHS Secretary Schweiker approved Subpart D of Title 45 CFR Part 46, "Additional Protections for Children Involved as Subjects in Research." These were published as a Final Rule in the Federal Register on March 8, 1983, and became effective June 6, 1983. HHS is now considering action on the proposed regulations addressing research involving those institutionalized as mentally disabled.

Recommendation 6

Congress should attach the following condition to any direct appropriations for "private" research entities: "No funds appropriated under this Act may be used, directly or indirectly, to support research involving human subjects unless such research is reviewed and conducted in compliance with either (1) appropriate regulations of (the disbursing agency) or (2) the regulations of the Department of Health and Human Services (45 CFR Part 46)."

The *Ad Hoc* Committee was unaware of any "private" research entity which receives direct appropriations other than the Gorgas Memorial Institute of Tropical and Preventive Medicine, Inc. OPRR has negotiated an HHS Multiple Project Assurance of Compliance with Gorgas Memorial Institute which has indicated its intention to comply with HHS regulations. Consequently this recommendation has been met by administrative action, and no legislation is required. If other such entities are identified, the federal disbursing agency should arrange for a proper Assurance of Compliance with HHS or Model Policy requirements.

Recommendations 7 and 8

7. 45 CFR 46.103, which specifies the minimum requirements for an institutional assurance, should be amended by inserting two new clauses under (b) (5) and (6): to—

- *designate a specific office at each institution that will be responsible for: (i) receiving reports of alleged misconduct in research involving human subjects; (ii) investigating promptly and fairly; and (iii) reporting formal findings of misconduct both to the institution's IRB which approved the research and to the Secretary. The institutional office so designated need not be created specifically for this purpose but may be the relevant IRB itself or another existing office already having responsibility for quality assurance with the institution. Such office shall report on all ongoing investigations of alleged research misconduct involving human subjects as well as formal findings to the IRB, and shall consult with the IRB on all matters relating to the conduct of research with human subjects.* (paraphrased)
- *require written procedures for insuring prompt reporting to designated institutional officials, and by them to the Secretary, of the results of any investigation or inquiries carried out under the preceding subsection or under Sec. 46.109(c) that reveal research misconduct or serious or continuing noncompliance with Federal or institutional requirements for the protection of human subjects.* (paraphrased)

8. *45 CFR 46.109(c) should be revised to read as follows: (In order to fulfill the requirements of these regulations, each IRB shall) (c) be responsible for reporting to the appropriate institutional officials any serious or continuing noncompliance by investigators with the requirements and determinations of the IRB, or with the provisions of the regulations, or with good research practices, that is revealed during the IRB's continuing or annual review of research or through reports made directly to a member of the IRB or its staff (and that each IRB); (d) establish procedures for receiving and acting upon findings of misconduct in research involving human subjects, made in the office designated pursuant to Sec. 46.103(b)(5).* (paraphrased)

After careful review of the recommendations of the President's Commission, the testimony to the Commissioners leading to these recommendations, and public and interagency comment, the *Ad Hoc* Committee proposed the following: *Sec. 103(b)(5)* of the proposed Model Policy requires that in assurances submitted to heads of departments or agencies conducting or supporting research involving human subjects institutions must include

Written procedures for ensuring prompt reporting to the IRB, appropriate institutional officials, and the department or agency head (i) any unanticipated problems or scientific misconduct involving risk to human subjects or others, (ii) any allegation or finding of

BEST COPY AVAILABLE

serious or continuing noncompliance with this policy or the requirements or determinations of the IRB, and (iii) any suspension or termination of IRB approval.

The *Ad Hoc* Committee concluded that addition of this language would permit deletion of the current 45 CFR 46.108(c) which states that an IRB ". . . be responsible for reporting to the appropriate institutional officials and the Secretary any serious or continuing noncompliance by investigators with the requirements and determination of the IRB."

By modification of current language in the HHS regulations, the *Ad Hoc* Committee believed that (a) any implication is eliminated that the IRB is required to be an investigatory and reporting body in the institution. Institutions may develop their own procedures to assure that allegations are promptly investigated and reported to appropriate institutional officials as well as to supporting federal department or agency officials, and (b) the establishment of reporting lines is assigned to the institutions; and groups which need to be informed are identified. Institutions are, therefore, afforded flexibility in meeting requirements of the Policy. The assurance is the appropriate document for identifying the specific offices to be notified and the timing and nature of reporting which may be tailored to each institution's organizational structure. The *Ad Hoc* Committee members noted that the language proposed in Recommendations 7 and 8 was perhaps too detailed for verbatim incorporation into the Model Policy.

Recommendation 9

Federal departments and agencies should establish government-wide procedures for making determinations on suspension and debarment of grantees and contractors alleged to have engaged in misconduct in Federally supported research with human subjects. Final determinations and sanctions imposed should be entered onto a consolidated list of individuals and made known to all Federal agencies involved with human research, to state licensing boards, and to appropriate professional societies.

The *Ad Hoc* Comment generally concurred with the recommendation for the establishment of government-wide procedures for making determinations on suspension and debarment of grantees and contractors alleged to have engaged in misconduct in federally-supported research with human subjects. However, the *Ad Hoc* Committee believed that this recommendation should be carried out as a part of an Executive Branch consideration of government-wide suspension and debarment procedures encompassing misconduct under all types of federal support.

The Executive Branch has undertaken several initiatives in this regard. With respect to contracts (i.e., procurement) the Office of Federal Procurement Policy on the OMB issued, on June 24, 1982, a Policy Letter setting forth government-wide policies and procedures for suspension and debarment of government contractors and for the establishment of a consolidated government-wide listing of these suspensions and debarments (47 FR 28854). The Policy Letter became effective on August 30, 1982, and the General Services Administration become responsible for maintaining the consolidated listing of suspensions and debarments of contractors on that date. The Policy Letter has now been incorporated in the Federal Acquisition Regulation (48 CFR Chapter 1) as Subpart 9.4, and on February 26, 1985 HHS published implementing procedures in 48 CFR 309.4.

With respect to grants and other forms of financial assistance (i.e., nonprocurement), on February 18, 1986, President Reagan signed Executive Order 12549 mandating the establishment, under the guidance of OMB, of a government-wide system for debarment and suspension from federal assistance programs. OMB published proposed Guidelines simultaneously with the Executive Order, which provided 60 days opportunity for comment. OMB is currently reviewing the comments and expects to publish the final Guidelines within six months. The Executive Order calls for implementing agency regulations within 12 months of the final OMB Guidelines. This will result in separate government-wide procedures for the suspension and debarment of contractors and of recipients of financial assistance. Although federally-supported research with human subjects is not specifically mentioned in the government-wide procedures, one or more of the specifically stated causes for suspension and debarment could arise in the course of such research. The Interagency Human Subjects Coordination Committee will monitor any suspension or debarment actions arising from research involving human subjects.

Model Federal Policy for Protection of Human Research Subjects

Sec. 101 To What Does This Policy Apply?
Sec. 102 Definitions.
Sec. 103 Assuring compliance with this Policy—research conducted or supported by any Federal Department or Agency.
Sec. 104 Section Reserved.
Sec. 105 Section Reserved.
Sec. 106 Section Reserved.
Sec. 107 IRB membership.
Sec. 108 IRB functions and operations.
Sec. 109 IRB review of research.
Sec. 110 Expedited review procedures for certain kinds of research involving no more than minimal risk, and for minor changes in approved research.
Sec. 111 Criteria for IRB approval of research.
Sec. 112 Review by institution.
Sec. 113 Suspension or termination of IRB approval of research.
Sec. 114 Cooperative research.
Sec. 115 IRB records.
Sec. 116 General requirements for informed consent.
Sec. 117 Documentation of informed consent.
Sec. 118 Applications and proposals lacking definite plans for involvement of human subjects.
Sec. 119 Research undertaken without the intention of involving human subjects.
Sec. 120 Evaluation and disposition of applications and proposals for research to be conducted or supported by a Federal Department or Agency.
Sec. 121 Section reserved.
Sec. 122 Use of Federal funds.
Sec. 123 Early termination of research support; Evaluation of applications and proposals.
Sec. 124 Conditions.

Sec. 101 To What Does This Policy Apply?

(a) Except as provided in paragraph (b) below, this policy applies to all research involving human subjects conducted, supported or otherwise subject to regulation by any federal department or agency which takes appropriate administrative action to make the policy applicable to such research. This includes research conducted by federal civilian employees or military personnel, except that each department or agency head may adopt such procedural modifications as may be appropriate from an administrative standpoint. It also includes research conducted, supported, or otherwise subject to regulation by the Federal government outside the United States.

(1) Research that is conducted or supported by a federal department or agency whether or not it is regulated as defined in Sec. 102(e) must comply with all sections of this policy.

(2) Research that is neither conducted nor supported by a federal department or agency but is subject to regulation as defined in Sec. 102(e) must be reviewed and approved, in compliance with Secs. 101, 102, and 107 through 117 of this policy, by an institutional review board

(IRB) that operates in accordance with the pertinent requirements of this policy.

(b) Unless otherwise required by department or agency heads, research activities in which the only involvement of human subjects will be in one or more of the following categories are exempt from this policy:

(1) Research conducted in established or commonly accepted educational settings, involving normal educational practices, such as (i) research on regular and special education instructional strategies, or (ii) research on the effectiveness of or the comparison among instructional techniques, curricula, or classroom management methods.

(2) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior, unless: (i) information obtained is recorded in such a manner that human subjects can be identified, directly or through identifiers linked to the subjects; and (ii) any disclosure of the human subjects' responses outside the research could reasonably place the subjects at risk of criminal or civil liability or be damaging to the subjects' financial standing or employability.

(3) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior that is not exempt under paragraph (2), if: (i) the human subjects are elected or appointed public officials or candidates for public office; or (ii) federal statute(s) require(s) without exception that the confidentiality of the personally identifiable information will be maintained throughout the research and thereafter.

(4) Research involving the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens, if these sources are publicly available or if the information is recorded by the investigator in such a manner that subjects cannot be identified, directly or through identifiers linked to the subjects.

(5) Research and demonstration projects which are conducted by or subject to the approval of department or agency heads, and which are designed to study, evaluate, or otherwise examine: (i) public benefit or service program; (ii) procedures for obtaining benefits or services under those programs; (iii) possible changes in or alternatives to those programs or procedures; or (iv) possible changes in methods or levels of payment for benefits or services under those programs.

(6) Taste and food quality evaluation studies, if wholesome foods without chemical additives are consumed or if a limited amount of a food is consumed that contains a food additive or agricultural chemical at or below a level approved by the Food and Drug Administration, the Environmental Protection Agency, or the Animal Plant Health Inspection Service of the U.S. Department of Agriculture.

(c) Department or agency heads retain final judgment as to whether a particular activity is covered by this policy.

(d) Department or agency heads may require that specific research activities or classes of research activities conducted, supported, or otherwise subject to regulation by the department or agency but not otherwise covered by this policy, comply with some or all of the requirements of this policy.

(e) Compliance with this policy requires compliance with pertinent federal laws or regulations which provide additional protections for humans subjects.

(f) This policy does not affect any state or local laws or regulations which may otherwise be applicable and which provide additional protections for human subjects.

(g) This policy does not affect any foreign laws or regulations which may otherwise be applicable and which provide additional protections to human subjects of research.

(h) When research covered by this policy takes place in foreign countries; procedures normally followed in the foreign countries to protect human subjects may differ from those set forth in this policy. [An example is a foreign institution which complies with guidelines consistent with the 1975 World Medical Assembly Declaration (Helsinki II) issued either by sovereign states or by an organization whose function for the protection of human research subjects is internationally recognized.] In these circumstances, if a department or agency head determines that the procedures prescribed by the institution afford protections that are at least equivalent to those provided in this policy, the department or agency head may approve the substitution of the foreign procedures in lieu of the procedural requirements provided in this policy. Except when otherwise required by statute, Executive Order, or the department or agency head, notices of these actions as they occur will be published in the Federal Register or will be otherwise published as provided in department or agency procedures.

(i) Unless otherwise required by law, department or agency heads may waive the applicability of some or all of the provisions of this policy to specific research activities or classes of research activities otherwise covered by this policy. Except when otherwise required by statute or Executive Order, the department or agency head shall forward advance notices of these actions to the Office for Protection from Research Risks, Department of Health and Human Services (HHS), and shall also publish them in the Federal Register or in such other manner as provided in department or agency procedures.

Sec. 102 Definitions.

(a) "Department or agency head" means the head of any federal department or agency and any other officer or employee of any department or agency to whom authority has been delegated.

(b) "Institution" means any public or private entity or agency (including federal, state, and other agencies).

(c) "Legally authorized representative" means an individual or judicial or other body authorized under applicable law to consent on behalf of a prospective subject to the subject's participation in the procedure(s) involved in the research.

(d) "Research" means a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge. Activities which meet this definition constitute "research" for purposes of this policy, whether or not they are conducted under a program which is considered research for other purposes. For example, some "demonstration" and "service" programs may include research activities.

(e) "Research subject to regulation," and similar terms are intended to encompass those research activities for which a federal department or agency has specific responsibility for regulating as a research activity, (for example, Investigational New Drug requirements administered by the Food and Drug Administration). It does not include research activities which are incidentally regulated by a federal department or agency solely as part of the department's or agency's broader responsibility to regulate certain types of activities whether research or non-research in nature (for example, Wage and Hour requirements administered by the Department of Labor).

(f) "Human subject" means a living individual about whom an investigator (whether professional or student)

conducting research obtains (1) data through intervention or interaction with the individual, or (2) identifiable private information. "Intervention" includes both physical procedures by which data are gathered (for example, venipuncture) and manipulations of the subject or the subject's environment that are performed for research purposes. "Interaction" includes communication or interpersonal contact between investigator and subject. "Private information" includes information about behavior that occurs in a context in which an individual can reasonably expect that no observation or recording is taking place, and information which has been provided for specific purposes by an individual and which the individual can reasonably expect will not be made public (for example, a medical record). Private information must be individually identifiable (i.e., the identity of the subject is or may readily be ascertained by the investigator or associated with the information) in order for obtaining the information to constitute research involving human subjects.

(g) "IRB approval" means the determination of the IRB that the research has been reviewed and may be conducted at an institution within the constraints set forth by the IRB and by other institutional and federal requirements.

(h) "Minimal risk" means that the probability and magnitude of harm or discomfort anticipated in the research are not greater in and of themselves than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests.

(i) "Certification" means the official notification by the institution to the supporting department or agency, in accordance with the requirements of this policy, that a research project or activity involving human subjects has been reviewed and approved by an IRB in accordance with an approved assurance.

Sec. 103 Assuring compliance with this Policy—research conducted or support by any Federal Department or Agency.

(a) Each institution engaged in research which is covered by this policy and which is conducted or supported by a federal department or agency shall provide written assurance satisfactory to the department or agency head that it will comply with the requirements set forth in this policy.

(b) Departments and agencies will conduct or support research covered by this policy only if the institution has an assurance approved as provided in this section, and only if the institution has certified to the department or agency head that the research has been reviewed and approved by an IRB provided for in the assurance, and will be subject to continuing review by the IRB. Assurances applicable to federally supported or conducted research shall at a minimum include:

(1) A statement of principles governing the institution in the discharge of its responsibilities for protecting the rights and welfare of human subjects of research conducted at or sponsored by the institution, regardless of whether the research is subject to federal regulation. This may include an appropriate existing code, declaration, or statement of ethical principles, or a statement formulated by the institution itself. This requirement does not preempt provisions of this policy applicable to department- or agency-supported or regulated research and need not be applicable to any research exempted or waived under Secs. 101 (b) or (i).

(2) Designation of one or more IRBs established in accordance with the requirements of this policy, and for which provisions are made for meeting space and sufficient staff to support the IRB's review and recordkeeping duties.

(3) A list of the IRB members identified by name; earned degrees; representative capacity; indications of experience such as board certifications, licenses, etc., sufficient to describe each member's chief anticipated contributions to IRB deliberations; and any employment or other relationship between each member and the institution; for example: full-time employee, part-time employee, member of governing panel or board, stockholder, paid or unpaid consultant. Changes in IRB membership shall be reported to the department or agency head.

(4) Written procedures which the IRB will follow (i) for conducting its initial and continuing review of research and for reporting its findings and actions to the investigator and the institution; (ii) for determining which projects require review more often than annually and which projects need verification from sources other than the investigators that no material changes have occurred since previous IRB review; and (iii) for ensuring prompt reporting to the IRB of proposed changes in a research activity, and for ensuring that such changes in approved research, during the period for which IRB approval has already been given, may not be initiated without IRB review and approval except when necessary to eliminate apparent immediate hazards to the subject.

(5) Written procedures for ensuring prompt reporting to the IRB, appropriate institutional officials, and the department or agency head (i) any unanticipated problems or scientific misconduct involving risks to human subjects or others; (ii) any allegation or finding of serious or continuing noncompliance with this policy or the requirements or determinations of the IRB; and (iii) any suspension or termination of IRB approval.

(c) The assurance shall be executed by an individual authorized to act for the institution and to assume on behalf of the institution the obligations imposed by this policy and shall be filed in such form and manner as the department or agency head prescribes.

(d) The department or agency head will evaluate all assurances submitted in accordance with this policy through such officers and employees of the department or agency and such experts or consultants engaged for this purpose as the department or agency head determines to be appropriate. The department or agency head's evaluation will take into consideration the adequacy of the proposed IRB in light of the anticipated scope of the institution's research activities and the types of subject populations likely to be involved, the appropriateness of the proposed initial and continuing review procedures in light of the probable risks, and the size and complexity of the institution.

(e) On the basis of this evaluation, the department or agency head may approve or disapprove the assurance, or enter into negotiations to develop an approvable one. The department or agency head may limit the period during which any particular approved assurance or class of approved assurances shall remain effective or otherwise condition or restrict approval.

(f) In lieu of negotiating a separate assurance, individual department or agency heads shall accept the existence of a current assurance, appropriate for the research in question, approved by and on file with the Office for Protection from Research Risks, HHS.

(g) Certification is required when the research is supported by a federal department or agency and not otherwise exempted or waived under Secs. 101 (b) or (i). Along with the submission of an application or proposal for approval or support, an institution with an approved assurance covering the research shall certify that the application or proposal has been reviewed and approved by the IRB. Institutions without an approved assurance covering the research shall certify within 30 days after receipt of a

request for such a certification from the department or agency, that the application or proposal has been approved by the IRB. If the certification is not submitted within these time limits, the application or proposal may be returned to the institution.

Sec. 104 Section reserved.

Sec. 105 Section reserved.

Sec. 106 Section reserved.

Sec. 107 IRB Membership.

(a) Each IRB shall have at least five members, with varying backgrounds to promote complete and adequate review of research activities commonly conducted by the institution. The IRB shall be sufficiently qualified through the experience and expertise of its members, and the diversity of the members, including consideration of race, gender, and cultural backgrounds and sensitivity to such issues as community attitudes, to promote respect for its advice and counsel in safeguarding the rights and welfare of human subjects. In addition to possessing the professional competence necessary to review specific research activities, the IRB shall be able ascertain the acceptability of proposed research in terms of institutional commitments and regulations, applicable law, and standards of professional conduct and practice. The IRB shall therefore include persons knowledgeable in these areas. If an IRB regularly reviews research that involves a vulnerable category of subjects, such as children, prisoners, pregnant women or mentally disabled persons, consideration shall be given to the inclusion of one or more individuals who are knowledgeable about and experienced in working with these subjects.

(b) Every nondiscriminatory effort will be made to ensure that no IRB consists entirely of men or entirely of women, including the institution's consideration of qualified persons of both sexes, so long as no selection is made to the IRB on the basis of gender. No IRB may consist entirely of members of one profession.

(c) Each IRB shall include at least one member whose primary concerns are in scientific areas and at least one member whose primary concerns are in nonscientific areas.

(d) Each IRB shall include at least one member who is not otherwise affiliated with the institution and who is not part of the immediate family of a person who is affiliated with the institution.

(e) No IRB may have a member participate in the IRB's initial or continuing review of any project in which the member has a conflicting interest, except to provide information requested by the IRB.

(f) An IRB may, in its discretion, invite individuals with competence in special areas to assist in the review of issues which require expertise beyond or in addition to that available on the IRB. These individuals may not vote with the IRB.

Sec. 108 IRB functions and operations.

In order the fulfill the requirements of this policy each IRB shall:

(a) Follow written procedures in the same detail as described in Sec. 103(b)(4) and, to the extent required by, Sec. 103(b)(5).

(b) Except when an expedited review procedure is used (see Sec. 110), review proposed research at convened meetings at which a majority of the members of the IRB are present, including at least one member whose primary concerns are in nonscientific areas. In order for the research to be approved, it shall receive the approval of a majority of those members present at the meeting.

Sec. 109 IRB review of research.

(a) An IRB shall review and have authority to approve, require modifications in (to secure approval), or disapprove all research activities covered by this policy.

(b) An IRB shall require that information given to subjects as part of informed consent is in accordance with Sec. 116. The IRB may require that information, in addition to that specifically mentioned in Sec. 116, be given to the subjects when in the IRB's judgment the information would meaningfully add to the protection of the rights and welfare of subjects.

(c) An IRB shall require documentation of informed consent or may waive documentation in accordance with Sec. 117.

(d) An IRB shall notify investigators and the institution in writing of its decision to approve or disapprove the proposed research activity, or of modifications required to secure IRB approval of the research activity. If the IRB decides to disapprove a research activity, it shall include in its written notification a statement of the reasons for its decision and give the investigator an opportunity to respond in person or in writing.

(e) An IRB shall conduct continuing review of research covered by this policy at intervals appropriate to the degree of risk, but not less than once per year, and shall have authority to observe or have a third party observe the consent process and the research.

Sec. 110 Expedited review procedures for certain kinds of research involving no more than minimal risk, and for minor changes in approved research.

(a) The Secretary, HHS, has established, and published in the **Federal Register**, a list of categories of research that may be reviewed by the IRB through an expedited review procedure. The list will be amended, as appropriate after consultation with other departments and agencies, through periodic republication by the Secretary, HHS, in the **Federal Register**.

(b) With the approval of department or agency heads, an IRB may use the expedited review procedure to review either or both of the following: (1) Some or all of the research appearing on the list and found by the reviewers to involve no more than minimal risk, (2) minor changes in previously approved research during the period for which approval is authorized. Under an expedited review procedure, the review may be carried out by the IRB chairperson or by one or more experienced reviewers designated by the chairperson from among members of the IRB. In reviewing the research, the reviewers may exercise all of the authorities of the IRB except that the reviewers may not disapprove the research. A research activity may be disapproved only after review in accordance with the non-expedited procedure set forth in Sec. 108(b).

(c) Each IRB which uses an expedited review procedure shall adopt a method for keeping all members advised of research proposals which have been approved under the procedure.

(d) The department or agency head may restrict, suspend, terminate, or choose not to authorize an institution's or IRB's use of the expedited review procedure.

Sec. 111 Criteria for IRB approval of research.

(a) In order to approve research covered by this policy the IRB shall determine that all of the following requirements are satisfied:

(1) Risks to subjects are minimized: (i) By using procedures which are consistent with sound research design and which do not unnecessarily expose subjects to risk, and (ii) whenever appropriate, by using procedures already being performed on the subjects for diagnostic or treatment purposes.

(2) Risks to subjects are reasonable in relation to anticipated benefits, if any, to subjects, and the importance of the knowledge that may reasonably be expected to result. In evaluating risks

and benefits, the IRB should consider only those risks and benefits that may result from the research (as distinguished from risks and benefits of therapies subjects would receive even if not participating in the research). The IRB should not consider possible long-range effects of applying knowledge gained in the research (for example, the possible effects of the research on public policy) as among those research risks that fall within the purview of its responsibility.

(3) Selection of subjects is equitable. In making this assessment the IRB should take into account the purposes of the research and the setting in which the research will be conducted and should be particularly cognizant of the special problems of research involving vulnerable populations, such as children, prisoners, pregnant women, mentally disabled persons, or economically or educationally disadvantaged persons.

(4) Informed consent will be sought from each prospective subject or the subject's legally authorized representative, in accordance with, and to the extent required by Sec. 116.

(5) Informed consent will be appropriately documented, in accordance with, and to the extent required by Sec. 117.

(6) When appropriate, the research plan makes adequate provision for monitoring the data collected to ensure the safety of subjects.

(7) When appropriate, there are adequate provisions to protect the privacy of subjects and to maintain the confidentiality of data.

(b) When some or all of the subjects are likely to be vulnerable to coercion or undue influence, such as children, prisoners, pregnant women, mentally disabled persons, or economically or educationally disadvantaged persons, additional safeguards have been included in the study to protect the rights and welfare of these subjects.

Sec. 112 Review by institution.

Research covered by this policy that has been approved by an IRB may be subject to further appropriate review and approval or disapproval by officials of the institution. However, those officials may not approve the research if it has not been approved by an IRB.

Sec. 113 Suspension or termination of IRB approval of research.

An IRB shall have authority to suspend or terminate approval of research that is not being conducted in accordance with the IRB's requirements or that has been associated with unexpected serious harm to subjects. Any suspension or termination of approval shall include a statement of the reasons for the IRB's action and shall be reported promptly to the investigator, appropriate institutional officials, and the department or agency head.

Sec. 114 Cooperative research.

Cooperative research projects are those projects covered by this policy which involve more than one institution. In the conduct of cooperative research projects, each institution is responsible for safeguarding the rights and welfare of human subjects and for complying with this policy. With the approval of the department or agency head, an institution participating in a cooperative project may enter into a joint review arrangement, rely upon the review of another qualified IRB, or make similar arrangements for avoiding duplication of effort.

Sec. 115 IRB records.

(a) An institution, or when appropriate an IRB, shall prepare and maintain adequate documentation of IRB activities, including the following:

(1) Copies of all research proposals reviewed, scientific evaluations, if any, that accompany the proposals, approved sample consent documents, progress reports submitted by investigators, and reports of injuries to subjects.

(2) Minutes of IRB meetings which shall be in sufficient detail to show attendance at the meetings; actions taken by the IRB; the vote on these actions including the number of members voting for, against, and abstaining; the basis for requiring changes in or disapproving research; and a written summary of the discussion of controverted issues and their resolution.

(3) Records of continuing review activities.

(4) Copies of all correspondence between the IRB and the investigators.

(5) A list of IRB members in the same detail as described in Sec. 103(b)(3).

(6) Written procedures for the IRB in the same detail as described in Secs.103(b)(4) and 103(b)(5).

(7) Statements of significant new findings provided to subjects, as required by Sec. 116(b)(5).

(b) The records required by this policy shall be retained for at least 3 years, and records relating to research which is conducted shall be retained for at least 3 years after completion of the research. All records shall be accessible for inspection and copying by authorized representatives of the department or agency at reasonable times and in a reasonable manner.

Sec. 116 General requirements for informed consent.

Except as provided elsewhere in this policy, no investigator may involve a human being as a subject in research covered by this policy unless the investigator has obtained the legally effective informed consent of the subject or the subject's legally authorized representative. An investigator shall seek such consent only under circumstances that provide the prospective subject or the representative sufficient opportunity to consider whether or not to participate and that minimize the possibility of coercion or undue influence. The information that is given to the subject or the representative shall be in language understandable to the subject or the representative. No informed consent, whether oral or written, may include any exculpatory language through which the subject or the representative is made to waive or appear to waive any of the subject's legal rights, or releases or appears to release the investigator, the sponsor, the institution or its agents from liability for negligence.

(a) Basic elements of informed consent. Except as provided in paragraph (c) or (d) below, in seeking informed consent the following information shall be provided to each subject:

(1) A statement that the study involves research, an explanation of the purposes of the research and the expected duration of the subject's participation, a description of the procedures to be followed, and identification of any procedures which are experimental;

(2) A description of any reasonably foreseeable risks or discomforts to the subject;

(3) A description of any benefits to the subject or to others which may reasonably be expected from the research;

(4) A disclosure of appropriate alternative procedures or courses of treatment, if any, that might be advantageous to the subject;

(5) A statement describing the extent, if any, to which confidentiality of records identifying the subject will be maintained;

(6) For research involving more than minimal risk, an explanation as to whether any compensation and an explanation as to whether any medical treatments are available if injury occurs and, if so, what they consist of, or where further information may be obtained;

(7) An explanation of whom to contact for answers to pertinent questions about

the research and research subjects' rights, and whom to contact in the event of a research-related injury to the subject; and

(8) A statement that participation is voluntary, refusal to participate will involve no penalty or loss of benefits to which the subject is otherwise entitled, and the subject may discontinue participation at any time without penalty or loss of benefits to which the subject is otherwise entitled.

(b) Additional elements of informed consent. When appropriate, one or more of the following elements of information shall also be provided to each subject:

(1) A statement that the particular treatment or procedure may involve risks to the subject (or to the embryo or fetus, if the subject is or may become pregnant) which are currently unforeseeable;

(2) Anticipated circumstances under which the subject's participation may be terminated by the investigator without regard to the subject's consent;

(3) Any additional costs to the subject that may result from participation in the research;

(4) The consequences of a subject's decision to withdraw from the research and procedures for orderly termination of participation by the subject;

(5) A statement that significant new findings developed during the course of the research which may relate to the subject's willingness to continue participation will be provided to the subject; and

(6) The approximate number of subjects involved in the study.

(c) An IRB may approve a consent procedure which does not include, or which alters, some or all of the elements of informed consent set forth above, or waive the requirement to obtain informed consent provided the IRB finds and documents that:

(1) The research or demonstration project is to be conducted by or subject to the approval of state or local government officials and is designed to study, evaluate, or otherwise examine: (i) Public benefit or service programs; (ii) procedures for obtaining benefits or services under those programs; (iii) possible changes in or alternatives to those programs or procedures; or (iv) possible changes in methods or levels of payment for benefits or services under those programs; and

(2) The research could not practicably be carried out without the waiver or alteration.

(d) An IRB may approve a consent procedure which does not include, or which alters, some or all of the elements of informed consent set forth above, or waive the requirements to obtain informed consent provided the IRB finds and documents that:

(1) The research involves no more than minimal risk to the subjects;

(2) The waiver or alteration will not adversely affect the rights and welfare of the subjects;

(3) The research could not practicably be carried out without the waiver or alteration; and

(4) Whenever appropriate, the subjects will be provided with additional pertinent information after participation.

(e) The informed consent requirements in this policy are not intended to preempt any applicable federal, state, or local laws which require additional information to be disclosed in order for informed consent to be legally effective.

(f) Nothing in this policy is intended to limit the authority of a physician to provide emergency medical care, to the extent the physician is permitted to do so under applicable federal, state, or local law.

Sec. 117 Documentation of informed consent.

(a) Except as provided in paragraph (c) below, informed consent shall be documented by the use of a written consent form approved by the IRB and signed by the subject or the subject's legally authorized representative. A copy shall be given to the persons signing the form.

(b) Except as provided in paragraph (c) below, the consent form may be either of the following:

(1) A written consent document that embodies the elements of informed consent required by Sec. 116. This form may be read to the subject or the subject's legally authorized representative, but in any event, the investigator shall give either the subject or the representative adequate opportunity to read it before it is signed; or

(2) A "short form" written consent document stating that the elements of informed consent required by Sec. 116 have been presented orally to the subject or the subject's legally authorized representative. When this method is used, there shall be a witness to the oral presentation. Also, the IRB shall approve a written summary of what is to be said to the subject or the representative. Only the short form itself is to be signed by the subject or the representative. However, the witness shall sign both the short form and a copy of the summary, and the person actually obtaining consent shall sign a copy of the summary. A copy of the summary shall be given to the subject or the representative, in addition to a copy of the "short form."

(c) An IRB may waive the requirement for the investigator to obtain a signed consent form for some or all subjects if it finds either:

(1) That the only record linking the subject and the research would be the consent document and the principal risk would be potential harm resulting from a breach of confidentiality. Each suject will be asked whether the subject wants documentation linking the subject with the research, and the subject's wishes will govern; or

(2) That the research presents no more than minimal risk of harm to subjects and involves no procedures for which written consent is normally required outside of the research context.

In cases in whch the documentation requirement is waived, the IRB may require the investigator to provide subjects with a written statement regarding the research.

Sec. 118 Applications and proposals lacking definite plans for involvement of human subjects.

Certain types of applications for grants, cooperative agreements, or contracts are submitted to departments or agencies with the knowledge that subjects may be involved within the period of support, but definite plans would not normally be set forth in the application or proposal. These include activities such as institutional type grants when selection of specific projects is the institution's responsibility; research training grants in which the activities involving subjects remain to be selected; and projects in which human subjects' involvement will depend upon completion of instruments, prior animal studies, or purification of compounds. These applications need not be reviewed by an IRB before an award may be made. However, except for research exempted or waived under Sec. 101 (b) or (i), no human subjects may be involved in any project supported by these awards until the project has been reviewed and approved by the IRB, as provided in this policy, and certification submitted to the department or agency.

Sec. 119 Research undertaken without the intention of involving human subjects.

In the event research is undertaken without the intention of involving human subjects, but it is later proposed to involve human subjects in the research, the research shall first be reviewed and approved by an IRB, as provided in this policy, a certification submitted to the department or agency, and final

approval given to the proposed change by the department or agency.

Sec. 120 Evaluation and disposition of applications and proposals for research to be conducted or supported by a Federal Department or Agency.

(a) The department or agency head will evaluate all applications and proposals involving human subjects submitted to the department or agency through such officers and employees of the department or agency and such experts and consultants as the department or agency head determines to be appropriate. This evaluation will take into consideration the risks to the subjects, the adequacy of protection against these risks, the potential benefits of the research to the subjects and others, and the importance of the knowledge gained or to be gained.

(b) On the basis of this evaluation, the department or agency head may approve or disapprove the application or proposal, or enter into negotiations to develop an approvable one.

Sec. 121 Section reserved.

Sec. 122 Use of Federal funds.

Federal funds administered by a department or agency may not be expended for research involving human subjects unless the requirements of this policy have been satisfied.

Sec. 123 Early termination of research support; Evaluation of applications and proposals.

(a) The department or agency head may require that department or agency support for any project be terminated or suspended in the manner prescribed in applicable program requirements, when the department or agency head finds an institution has materially failed to comply with the terms of this policy.

(b) In making decisions about supporting or approving applications or proposals covered by this policy the department or agency head may take into account, in addition to all other eligibility requirements and program criteria, factors such as whether the applicant has been subject to a termination or suspension under paragraph (a) of this section and whether the applicant or the person who would direct or has directed the scientific and technical aspects of an activity has in the judgment of the department or agency head materially failed to discharge responsibility for the protection of the rights and welfare of human subjects (whether or not the research was subject to federal regulation).

Sec. 124 Conditions.

With respect to any research project or any class of research projects the department or agency head may impose additional conditions prior to or at the time of approval when in the judgment of the department or agency head additional conditions are necessary for the protection of human subjects.

Concurrences of Departments and Agencies Including Proposed Departures From the Model Policy

No Departures

Agency for International Development (AID)

Consumer Product Safety Commission (CPSC)

Department of Agriculture (USDA)

Department of Commerce (DOC)

Department of Defense (DOD)

Department of Housing and Urban Development (HUD)

Department of Justice (DOJ)

Department of Transportation (DOT)

Environmental Protection Agency (EPA)

National Aeronautics and Space Administration (NASA)

National Science Foundation (NSF)

Comment

Central Intelligence Agency (CIA)

The Central Intelligence Agency (CIA) is required by Executive Order 12333 to conform to the guidelines issued by the Department of Health and Human Services (HHS). Currently, the CIA follows the HHS regulations codified in 45 CFR Part 46. If, with respect to the CIA, HHS incorporates the Model Policy, the CIA will follow the model policy. The CIA fully concurs with the principles established in the Model Policy.

Proposed Departures

Department of Education (ED)

A departure for ED only that pertains only to research involving the use of educational tests, survey procedures, interview procedures, or observation of public behavior, conducted under a program subject to the General Education Provisions Act: *Revise* the exception to the Model Policy stated in Section 101(b)(3)(ii) to read as follows: "The research is conducted under a program subject to the protections of the General Education Provisions Act (GEPA), including GEPA Sections 400A (20 U.S.C. 1221–3), 438 (20 U.S.C. 1232g), and 439 (20 U.S.C. 1232h)."

Department of Health and Human Services (HHS)

1. Section 101(b)(6) of the HHS regulations (which becomes Section 101(b)(5) of the Model Policy) now has a qualifier found at 45 CFR 46.101(i): "(i) If, following review of proposed research activities that are exempt from these regulations under paragraph (b)(6), [of the HHS regulations] the Secretary determines that a research or demonstration project presents a danger to the physical, mental, or emotional well-being of a participant or subject of the research or demonstration project, then federal funds may not be expended for such a project without the written informed consent of each participant or subject."

HHS intends to retain this qualifier to exemption 6 in future regulations.

2. Section 103(g)—The Model Policy requires that institutions holding an approved assurance which covers a proposed research projects submit certification of IRB review and approval *along with* an application for funding. Current HHS regulations permit institutions to submit such certification along with the application or within 60 days of application for funding [45 CFR 46.103(f)]. At the time HHS publishes proposed rules and technical amendments designed to implement the Model Policy, HHS will request comment on whether or not the "60-day grace period" should be reduced or eliminated.

Food and Drug Administration (FDA)

1. Section 101(h)—The section of the Model Policy addresses research that takes place in foreign countries. FDA must diverge from the Model Policy with regard to those clinical investigations that take place in a foreign country and are conducted under a research permit granted by FDA. Such investigations must be carried out in accordance with the Federal Food, Drug, and Cosmetic Act (FD&C Act), which establishes certain requirements for the conduct of such investigations [see, e.g., 21 U.S.C. 355(i), 357(d)(3), and 360(g)]. For these investigations, FDA does not have the authority to accept the procedures followed in a foreign country in lieu of the procedures required by the FD&C Act.

2. Section 110(d)—This section of the Model Policy permits altering or waiving of the informed consent requirements. FDA must depart from this provision of the Model Policy (See 21 CFR 50.20). The FD&C Act requires that informed

consent be obtained from all subjects of clinical investigations except in very limited circumstances [see e.g., 21 U.S.C. 355(i), 357(d)(3), and 360(g)(3)(D)], which establish requirements for the conduct of clinical investigations for drugs, antibiotic drugs, and medical devices, respectively. FDA does not have authority under the FD&C Act to waive this requirement.

Veterans Administration (VA)

VA will continue intramural research and development practices of not permitting exempted research [Section 101(2)(b)] or expedited review [Section 110], not permitting waiver of informed consent [Section 116(c)] or "short form" written consent [Section 117(b)(2)], and not requiring written institutional assurances from VA medical centers [Section 103(a)]. Further, regarding cooperative research efforts under Section 114, VA requires that each VA medical center which participates in a cooperative or multi-hospital project must obtain the approval of its own Human Studies Subcommittee for such research.

Part VI

Department of Housing and Urban Development

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 511

Rental Rehabilitation Program; Revised Minimum Allocation Amounts; Final Rule

Formula Allocations for the Rental Rehabilitation Program for Fiscal Year 1986 and Deadlines for Submission of Program Descriptions; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 511

[Docket No. R-86-1290; FR-2250]

Rental Rehabilitation Program: Revised Minimum Allocation Amounts

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Final rule.

SUMMARY: The current regulations for the Rental Rehabilitation Program impose a $50,000 minimum allocation amount for any city, urban county, or consortium otherwise eligible for a formula allocation under the program. The Department is concerned that the application of this minimum allocation amount to a city, urban county, or consortium that has a developed and operating local rental rehabilitation program would have a disruptive effect on the administration of the Rental Rehabilitation Program. To remedy this problem, the Department is revising the Rental Rehabilitation Program regulations to allow a city, urban county, or consortium that received a formula allocation in the preceding fiscal year and that has a formula allocation in the current fiscal year that is less than $50,000 to elect to receive its formula allocation.

EFFECTIVE DATE: July 21, 1986.

FOR FURTHER INFORMATION CONTACT: Mary Kolesar, Acting Director, Rental Rehabilitation Division, Office of Urban Rehabilitation, Room 7164, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410-7000, telephone (202) 755-5970. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Section 17 of the United States Housing Act of 1937 (the 1937 Act), 42 U.S.C. 1437o, established the Rental Rehabilitation Program. This Program provides grants to States and units of general local government to help support the rehabilitation of privately owned real property to be used for primarily residential rental purposes. The program is designed to increase the supply of standard housing units affordable to lower income families. This objective is achieved by: (1) Providing Rental Rehabilitation grant amounts to assist in the rehabilitation of existing units, and (2) authorizing the use of rental housing assistance, provided under section 8 of the 1937 Act, to lower income families to help them afford the rent for units in projects assisted with program funds, or to find alternative housing.

Section 511.31 establishes a $50,000 minimum for direct formula allocations of Rental Rehabilitation funds, except for States. A city or urban county that has a formula allocation below $50,000 (and is not part of a consortium described in § 511.05), may participate in the Program only through the State Program under Subpart F of Part 511. Such participation is dependent on meeting the criteria developed by each State for its particular program.

Reductions in program funding, as in fiscal year 1986, may cause many cities, urban counties, and consortia that have previously received formula allocations of $50,000 or more and have developed rental rehabilitation programs, to fail to meet the $50,000 minimum. In fiscal year 1986, these grantees would have to compete for funding through the applicable State Program, and would have to terminate their programs if they were not funded under the State Program.

The original purpose of the $50,000 minimum was to ensure that reasonable economies of scale existed with respect to the development and administration of local rental rehabilitation programs. These programs can be a time-consuming and costly undertaking and are frequently paid for by Community Development Block Grant funds under 24 CFR 570.202(b)(10). However, once programs have been developed and are operating, local administrative costs are lower and there is less need for such economies of scale. Therefore, to minimize the disruption of city, urban county, and consortium rental rehabilitation programs already developed in reliance on direct formula allocations, the Department is revising § 511.31 to allow a city, urban county, or consortium to elect to receive a formula allocation below $50,000 if the city, urban county, or consortium received a formula allocation in the preceding fiscal year. (Such an entity could also choose not to receive its formula allocation, which would then be added to the State's allocation. Then, the city, urban county, or jurisdictions making up the consortium, could participate in the State Program under the terms established by the State in question.

A city, urban county, or consortium that elects to receive a formula allocation below $50,000 must provide HUD written notification of its decision to receive the allocation. Such a city, urban county, or consortium has 30 days from the date of notification of the formula allocation in which to notify HUD of its decision. If it elects to receive the allocation, it has 45 days from the same date to submit its program description. For fiscal year 1986, the Department has provided notification of the formula allocations by publication, elsewhere in today's issue of the Federal Register, of its Notice of Formula Allocations for the Rental Rehabilitation Program for Fiscal Year 1986 and and Deadlines for Submission of Program Descriptions.

Other Information

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implements section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the General Counsel, Rules Docket Clerk, at the above address.

This rule does not constitute a "major rule" as that term is defined in Section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. Analysis of the rule indicates that it would not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In accordance with the provisions of 5 U.S.C. 605(b), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities, because statutorily eligible grantees and State recipients are relatively larger cities, urban counties or States and the rental rehabilitation grant amounts to be made available to any grantee are relatively small in relation to other sources of Federal funding for State and local government and in relation to private investment in rental housing.

The subject matter of this rulemaking action relates to grants and is therefore exempt from the notice and public comment requirements of section 553 of the Administrative Procedure Act. As a matter of policy, the Department submits many rulemaking actions

containing such subject matter to public comment either before or after effectiveness of the action, notwithstanding the statutory exemption.

The Secretary has determined that notice and prior public procedure are impracticable and contrary to the public interest and that good cause exists for making this rule effective as soon after publication as possible because publication of this rule for earliest practicable effect is needed to prevent potential disruptions in the rental rehabilitation programs of those cities and urban counties that would otherwise be unable to receive a formula allocation in fiscal year 1986.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on April 21, 1986, (51 FR 14036) under Executive Order 12291 and the Regulatory Flexibility Act.

The information collection requirements contained in § 511.31 of this rule have been submitted to the Office of Management and Budget for review under the provisions of the Paperwork Reduction Act of 1980. No person may be subjected to a penalty for failure to comply with these requirements until they have been approved and assigned an OMB control number. The OMB control number, when assigned, will be announced by separate notice in the Federal Register.

The Catalog of Federal Domestic Assistance program number is 14.230.

List of Subjects in 24 CFR Part 511

Administrative practice and procedure, Grant programs—Housing and community development, Low and moderate income housing, Rental rehabilitation grants, Reporting and recordkeeping requirements.

Accordingly, the Department amends 24 CFR 511 as follows:

PART 511—RENTAL REHABILITATION GRANT PROGRAM

1. The citation of authority for Part 511 continues to read as follows:

Authority: Sec. 17, U.S. Housing Act of 1937 (42 U.S.C. 1437o); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. Section 511.31 is revised to read as follows:

§ 511.31 Minimum allocation amount.

(a) Except as provided in paragraph (b) of this section, the minimum allocation for any city, urban county, or consortium determined under the formula contained in § 511.30 for any fiscal year is $50,000. Cities, urban counties, and consortia with formula allocations of $50,000 or more will be deemed to meet this threshold, even if performance adjustments under § 511.32 reduce their grant amounts below $50,000. A formula allocation that is below $50,000 and is not received by a city, urban county, or consortium under paragraph (b) of this section will be added to the allocation for the State Program in which the city, urban county, or consortium is located. A city or urban county, or the jurisdictions in a consortium with a formula allocation below $50,000 that elects not to receive its allocation may participate in the State Program, as provided in Subpart F of this part.

(b) A city, urban county, or consortium that (1) received a formula allocation in the preceding fiscal year, and (2) has a formula allocation in the current fiscal year that is less than $50,000, may elect to receive its formula allocation by submitting written notification to HUD of its decision to do so within 30 days of the date of written notification of its proposed allocation for the fiscal year. If such a city, urban county, or consortium does not notify HUD within this period, HUD will regard the city, urban county, or consortium as having elected not to receive its formula allocation and will notify the appropriate State of its additional allocation. This election procedure does not affect the deadline for submitting program descriptions under § 511.20(a).

Dated: May 27, 1986.

DuBois L. Gilliam

Acting General Deputy Assistant Secretary for Community Planning and Development.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-86-1614; FR-2547]

Notice of Formula Allocations for the Rental Rehabilitation Program for Fiscal Year 1986 and Deadlines for Submission of Program Descriptions

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This notice announces the allocations of Rental Rehabilitation Program funds for cities with populations of 50,000 or more, urban counties, consortia of units of general local government, and States for Fiscal Year 1986. It also sets the dates by which Program Descriptions must be submitted to HUD for these potential grantees to be considered for actual grants based upon these allocations.

FOR FURTHER INFORMATION CONTACT: Mary Kolesar, Acting Director, Rental Rehabilitation Division, Room 7162, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. Telephone (202) 755-5970. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Formula Allocations

The Rental Rehabilitation Program is authorized by section 17 of the United States Housing Act of 1937 (42 USC 1437o), hereafter referred to as section 17. The Program's interim regulations are published at 24 CFR Part 511 (49 FR 16936, April 20, 1984). Section 511.30 contains the formula for allocating Rental Rehabilitation Program funds. Cities having a population of 50,000 or more, urban counties, and consortia of units of general local government having a combined population of 50,000 or more and States are eligible to receive formula allocations. Since the amount of funding available for allocation in Fiscal Year 1986 is $71,775,000 instead of the $149,000,000 available in both Fiscal Year 1984 and Fiscal Year 1985, most cities, urban counties and consortia will receive less than half the amount they received in Fiscal Year 1985.

Appendix A to this notice contains the formula allocations for cities, urban counties and consortia that receive an allocation of $50,000 or more. Appendix B to this notice contains the minimum formula allocations for States. Appendix C to this notice contains formula allocations for localities that participated in the Rental Rehabilitation Program last year as formula grantees that may elect to participate as formula grantees in Fiscal Year 1986 (see discussion of this election in the following paragraphs).

The eligibility of cities with populations of 50,000 or more and urban counties for formula allocations is determined by whether they were so classified for purposes of the Community Development Block Grant Entitlement Program (24 CFR Part 570) for Federal Fiscal Year 1985. For city, urban county and consortium allocations, grant amounts have been rounded to the nearest thousand. The formula factors for allocating the Fiscal Year 1986 funds are the same as those used in Fiscal Years 1984 and 1985.

In the two prior years of the Rental Rehabilitation Program, a minimum allocation of $50,000 applied to all of these entities except States. For Fiscal Year 1986, because only $71.775 million is available for allocation, many entities that received a formula allocation and participated in the Program last year would, under current regulatory provisions, be excluded as direct formula grantees in Fiscal Year 1986 because their formula allocations are less than the $50,000 minimum allocation (see Appendix C). In order to avoid disruption to city and urban county rental rehabilitation programs that have been developed in reliance on direct formula allocations, the Department is allowing a city, urban county, or consortium that received a formula allocation in Fiscal Year 1985 and has a formula allocation in Fiscal Year 1986 that is less than 50,000 to elect to receive its formula allocation or to participate in a State Program or, if the State elects not to administer the Program, in a HUD-administered Rental Rehabilitation Program for Small Cities. The Department is implementing this revision by final rule published elsewhere in today's issue of the Federal Register.

The rationale for the existing minimum allocation policy in 24 CFR 511.31 is that it is not cost-effective for a grantee to set up a Rental Rehabilitation Program for only the very small number of units that are being rehabilitated using a total grant of less than $50,000. However, this rationale does not apply to grantees that have already set up their programs and then receive less than $50,000 for a fiscal year because of a general reduction in funds available for the program.

The allocations indicated for States are the minimum amounts that they would receive. Amounts for those localities listed in Appendix C that do not elect to receive their formula allocations will also be allocated to the appropriate States.

Localities that would receive a formula amount of less than $50,000 must decide by July 3, 1986, whether to participate as a formula grantee (see discussion of deadlines for submission of program description below). If a locality elects to participate in a State Program (whether State-administered or HUD-administered), there is no assurance that it will receive funding since funding in such programs is under procedures set by the State grantee (or HUD if the State's program is HUD-administered).

Section 17(b) provides that the Secretary shall allocate rental rehabilitation funds based on a formula prescribed by the Secretary by regulation, taking into account various "objectively measurable conditions" and "excluding data relating to . . . areas eligible for assistance under Title V of the Housing Act of 1949." 24 CFR 511.30(d) currently provides that HUD will exclude data concerning rental units located in Title V-eligible areas from *all* formula allocations. Since the statutory prohibition on the use of rental rehabilitation funds in Title V-eligible areas pertains only to States' allocations (see section 17(e)(1)), HUD has concluded that Title V-area data should be excluded only from the calculation of formula allocations for States' and consortia, but not from urban counties' allocations. (There are no cities that contain Title V-eligible areas.) Retention of the existing Title V-area data exclusion for urban counties tends to understate urban county allocations and adversely affects achievement of the purposes of the Rental Rehabilitation Program in urban counties, and it is therefore waived in Fiscal Year 1986. However, the Department emphasizes that States' allocation funds, even if they result from an urban county not qualifying for a minimum allocation under § 511.31 or from a reallocation under § 511.33(b), may not be used in a Title V-eligible area, no matter where located.

Section 511.50 of the interim rule authorizes a State that elects to administer a Rental Rehabilitation Program to carry out eligible activities (1) in cities having populations of less than 50,000, and (2) in cities and urban counties whose allocations are below a minimum specified amount. Section 103(e)(1) of the Housing and Community Development Technical Amendments Act of 1984 (Pub. L. 98-479), amended the range of section 17(e)(1) of the United States Housing Act of 1937 by

eliminating reference to "cities with populations of less than fifty thousand" and substituting "units of general local government and areas of the State that do not receive allocations under subsection (b)."

The Assistant Secretary for Community Planning and Development has determined that this legislatively mandated change must be implemented for all Fiscal Years 1984, 1985 and 1986. This change was designed to permit Rental Rehabilitation activities to be carried out in all areas that contributed demography in determining the States' allocations, including urban counties. Language in § 511.30 that reflects the previous statute and that is inconsistent with the 1984 amendment is inapplicable by operation of law. Areas eligible for assistance under Title V of the Housing Act of 1949, of course, do not contribute demography to States' allocations and are specifically barred by section 17(e)(1) from participating in the program through a States' allocation, whether administered by the State or by HUD. The Department notes that jurisdictions that are the subject of a published allocation of $50,000, or more, and that decline that allocation, are also barred from participating in their States' program. Such declined funds are available for reallocation pursuant to § 511.33 (c) and (d).

Concerning the 1984 legislative amendment that the Secretary assure that an equitable share of funds be used to provide units for families with children, particularly large families requiring three or more bedroom units, the Department has determined for Fiscal Year 1986 that the three or more bedroom priority can be satisfied if at least 15 percent of the Rental Rehabilitation Program grant amounts expended nationwide are expended for rehabilitation of units of three or more bedrooms. In addition, the existing requirement in § 511.10(k) that grantees use at least 70 percent of their grant funds to provide two or more bedroom units, unless otherwise approved by HUD under the criteria in that section, remains in effect. If Fiscal Year 1987 funds are made available, each grantee's performance in achieving a high percentage of rehabilitation of three-bedroom units among all units rehabilitated will also be publicly rated through the "performance adjustment system" (see 24 CFR 511.32). As part of this system, grantees will be financially rewarded or penalized based in part on the extent to which they rehabilitate three-bedroom units, as well as two-bedroom units.

The Department reserves the right to establish a mandatory standard for each grantee for achievement of three-bedroom and larger units should the data (which will be continually available) indicate any substantial prospect that the Secretary will not achieve the mandated minimum within any 2-year period.

Deadline for Submitting Program Descriptions

Section 511.20(a) of the Program regulations states that cities, urban counties and consortia eligible to receive a grant based on a formula allocation must submit a Program Description to the appropriate HUD Field Office within 45 days of written notification of their Rental Rehabilitation fund allocation, and that States have 75 days from the date of written notification of their allocations to submit their Program Descriptions. Because HUD is publishing allocations this year, HUD regards the date of written notification to all grantees to be the date of this notice. However, since those entities listed in Appendix C, that would receive less than $50,000 have the option this year of applying directly to HUD or participating in a State Program, they must notify the appropriate HUD Field Office of their decision within 30 days of publication of this notice, to allow HUD more time to advise the affected States of any additional moneys that they will be allocated. However, if entities listed in Appendix C decide to participate as formula grantees, they still must submit a Program Description to the appropriate HUD Field Office within 45 days of written notification of their allocation. States that elect to participate in the Rental Rehabilitation Program must submit a Program Description to the appropriate HUD Field Office within 75 days of written notification of their original allocation, and HUD will endeavor to notify States as soon as possible of any additional allocation amounts resulting from the elections of entities listed in Appendix C not to participate as direct grantees in Fiscal Year 1986. In addition, HUD will administer the allocation for any State that does not notify the responsible HUD Field Office of its election to administer the Rental Rehabilitation Program within 30 days of written notification of its initial allocation.

Thus, all cities, urban counties and consortia receiving a formula allocation must deliver their Program Descriptions to the appropriate HUD Field Office or have them postmarked no later than July 18, 1986 to be considered for a grant. If a formula-eligible unit of general local government that would receive less than a $50,000 formula allocation chooses to participate as a formula grantee, it must notify HUD in writing of its decision as soon as possible, but no later than July 3, 1986 to facilitate HUD's notification to the affected State of the additional allocation. If a State elects to administer the Rental Rehabilitation Program in Fiscal Year 1986, it must notify HUD in writing of its intent to participate in the program by July 3, 1986 and must deliver its Program Description or have it postmarked by August 9, 1986 to be considered for a grant.

If a State chooses not to participate in the Rental Rehabilitation Program, eligible units of general local government located in the State that wish to participate in the HUD-Administered State Program must submit a Program Description to the responsible HUD Field Office within 45 days of the date stated in a written notification from HUD to such potential grantees of fund availability under the program for the fiscal year. These notifications will be directly issued by HUD Field Offices when it is known which States, if any, are not participating in Fiscal Year 1986.

Particularly close attention must be paid to these deadlines in Fiscal Year 1986 since under current law all unobligated Rental Rehabilitation budget authority lapses at close of business on September 30, 1986.

Section 8 Vouchers in Support of the Rental Rehabilitation Program

When Field Offices approve Program Descriptions for formula grantees, or as soon as possible thereafter, they should also reserve the appropriate amount of Section 8 funds in support of the locality's Rental Rehabilitation Program. If they have not already been received, the Section 8 funds will be assigned to Field Offices soon. Up to one Section 8 Housing Voucher will be provided for each $5,000 of rehabilitation grant funds allocated to a grantee.

If there are city/urban county formula grantees that had Rental Rehabilitation Program grant funds deobligated for poor performance earlier this fiscal year, adjustments should be made in the Section 8 funds allocated to those grantees for this fiscal year. Thus, if a grantee had $50,000 taken away for poor performance, that grantee should receive approximately 10 fewer Section 8 Vouchers this fiscal year. On the other hand, the grantee that received a $50,000 reallocation of additional Rental Rehabilitation grant funds for good performance, should receive, if possible, 10 additional Vouchers this fiscal year

to compensate for its not receiving any additional Vouchers for previously reallocated rehabilitation grant funds. Further instructions will be sent to Field Offices concerning adjustments that should be made for reallocations of Rental Rehabilitation grant funds, but Field Offices need to be aware that these adjustments are to be made.

If a locality that would receive less than a $50,000 formula amount of Rental Rehabilitation grant funds elects not to participate as a formula grantee, the Section 8 funds allocated for that locality would be added to the State balance amount along with the Rental Rehabilitation grant funds, as described above in this notice.

Other Matters

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, DC, 20410-0500.

The Catalog of Federal Domestic Assistance program number is 14.230 Rental Housing Rehabilitation.

The collection of information requirements contained in this notice have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520) and have been assigned OMB Control No. 2502-0075.

Authority: Sec. 17, United States Housing Act of 1937, 42 U.S.C. 1437o; Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: May 27, 1986.

Dudley L. Gilliam,

Acting General Deputy Assistant Secretary for Community Planning and Development.

Part VII

Department of Education

Educational Media Research, Production, Distribution, and Training; Proposed Funding Priority for Fiscal Year 1986; Notice

DEPARTMENT OF EDUCATION

Educational Media Research, Production, Distribution, and Training; Proposed Funding Priority for Fiscal Year 1986

AGENCY: Department of Education.

ACTION: Notice of Proposed Funding Priority for Fiscal Year 1986.

SUMMARY: The Secretary proposes an annual funding priority for the Educational Media, Research, Production, Distribution, and Training program. To ensure a continuing supply of Line 21 television decoders for the Nation's hearing-impaired population, the Secretary proposes to establish a single funding priority for fiscal year 1986 for a project to manufacture at least 33,000 additional Line 21 decoders. The Secretary would give an absolute preference to applications that meet the terms of the proposed priority.

DATE: Comments must be received on or before July 3, 1986.

ADDRESS: All written comments and suggestions should be sent to Dr. Malcolm J. Norwood, Division of Innovation and Development, Department of Education, 400 Maryland Ave., SW. (Room 4088, Switzer Building), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Dr. Malcolm J. Norwood, Telephone: (202) 732-1177.

SUPPLEMENTARY INFORMATION: The Educational Media, Research, Production, Distribution and Training program is designed to promote the educational advancement of handicapped persons by providing assistance for: (a) Conducting research on the use of educational media and technology for handicapped persons; (b) Producing and distributing educational media for the use of handicapped persons, their parents, their actual or potential employers, and other persons directly involved in work for the advancement of handicapped persons; and (c) training persons in the use of educational media for the instruction of handicapped persons.

In 1972 the Federal Government, through the former Office of Education, initiated the development of the closed-captioned Line 21 system to make television accessible to the Nation's hearing-impaired population. Closed-captioning is a system that uses Line 21 of the broadcasting signal for the benefit of viewers with hearing impairments to transmit captions (subtitles) which may be made visible only on television sets that are equipped with decoders.

Upon completion of the development of the system, the Department supported the creation of the National Captioning Institute to provide captioning services to the broadcasting industry and helped subsidize 100,000 large-scale integrated-circuit chips which made the manufacture of Line 21 decoders possible.

The system was implemented in March 1980 and has resulted in cooperative efforts between the public and private sectors to provide closed-captioned television to hearing-impaired Americans. All major networks are making closed-captioned programs available. Federal funding supports approximately 50% of current programming, the networks support approximately 30%, and corporate advertisers, foundations, and contributions account for the remaining 20%. Closed-captioning provides the only acceptable system that makes television access for deaf persons possible. Open captioning which would appear on all television sets is disturbing to the general viewing audience and, therefore, is not an acceptable alternative to the broadcasting industry and private sector supporters of captioning services.

The original stock of Line 21 decoders was depleted during 1985. The Congress, provided $1.5 million during fiscal year 1985 to assist in the underwriting of the manufacture of 50,000 more chips to ensure a continuing supply.

More recently the Senate Committee on Appropriations directed the Secretary to provide $1.0 million during fiscal year 1986 for the purpose of manufacturing additional Line 21 decoders to assure that these devices will be available to meet a continuing need.

Proposed Priority

In accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(3), the Secretary proposes to give an absolute preference to applications submitted under the Educational Media, Research, Production, Distribution, and Training program in fiscal year 1986 that respond to the priority described below. An absolute preference is one which permits the Secreary to select only those applications that meet the described priority.

All applications submitted under the Educational Media, Research, Production, Distribution and Training program must address the priority for a project to manufacture at least 33,000 additional Line 21 decoders to ensure a continuing supply of these devices for the Nation's hearing-impaired population.

The selection of this proposed priority is based upon the Congressional appropriation report language indicating that $1.0 million should be spent under Pub. L. 98-619 to underwrite the production of 50,000 additional Line 21 decoders before the current supply is exhausted. The proposed priority provides for the production of at least 33,000 additional Line 21 decoders rather than 50,000. At this level, a subsidy of $30 per decoder would be provided, thereby reducing the retail price of decoders. The Department believes that pricing at a lower level is necessary in order to promote the sale of decoders.

This proposed priority will support a cooperative agreement with an organization which has the technical expertise and knowledge to assure that the hearing-impaired population will have a continuing supply of Line 21 decoders available.

The applicant shall submit a working plan for the subsequent production of at least 33,000 additional Line 21 decoder modules as part of the application. The plan shall provide for a fully assembled unit (i.e., large-scale-integrated (LSI) circuit chip set, circuit board, and adapter unit) with evidence of commitment from one or more manufacturers and retailers to assure production and sale of the units. The plan shall contain a timeline for testing and production and an estimated retail price for the assembled units to be marketed to hearing-impaired consumers. The plan shall also provide assurances that at least 33,000 Line 21 decoders will be produced for marketing to consumers at the estimate price. An applicant, however, could propose a project for more than 33,000 Line 21 decoders if provisions can be made for the production and marketing of that number of decoders at an acceptable price.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 24, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local governmental coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding the proposed priority. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the 30th day after publication of this document will be considered before the Secretary issues the final notice of priority. All comments submitted in response to this proposed priority will be available for public inspection, during and after the comment period, in room 4088, Mary E. Switzer Bldg., 330 C Street, SW., Washington, DC between the hours of 8:30 a.m. and 4:30 p.m. (local time), Monday through Friday of each week, except Federal holidays..

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 1, 15, 30, 31, 52, and 53

Federal Acquisition Regulation (FAR); FAR System, Contracting by Negotiation, Cost Accounting Standards, Contract Cost Principles and Procedures, Solicitation Provisions, Contract Clauses, and Forms; Proposed Rules

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule; notice of availability and requests for comments.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering changes to FAR Part 30 which will incorporate into the FAR as regulations, the Cost Accounting Standards (CAS) and certain rules and regulations promulgated by the Cost Accounting Standards Board (CASB) under Pub. L. 91–379.

DATE: Comments should be submitted to the FAR Secretariat at the address shown below on or before August 4, 1986 to be considered in the formulation of a final rule.

ADDRESS: Interested parties may obtain copies of the proposed text from the FAR Secretariat and written comments should be submitted to:

General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW, Room 4041, Washington, DC 20405

Please cite FAR Case 86–31 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Background

The proposed revisions to FAR Part 30 incorporating the CAS and CASB rules into the FAR as regulations require corollary changes to FAR Parts 1, 15, 31, 52, and 53. No changes to the substance of the Cost Accounting Standards or existing rules and regulations are being proposed at this time. However, it is anticipated that future revisions of the CAS as restated in Subpart 30.4 of this proposal will be processed as FAR revisions in accordance with normal procedures for revising the FAR.

The procedures for administering Facilities Capital Cost of Money under CAS 414 and previously included in DFARS 30.70 and 30.71, and FPR Subpart 1–3.13, have been rewritten with no material change in content and are relocated in FAR Subpart 30.8. Also, Form CASB–CMF, Facilities Capital Cost of Money Factors Computation, and Form CASB–DS–1, Disclosure Statement, are being changed to DOD forms with no change in format. Both forms will be illustrated in FAR Part 53. Finally, the clauses at FAR 52.215–30, Facilities Capital Cost of Money, and 52.215–31, Waiver of Facilities Capital Cost of Money, have been rewritten to facilitate their use.

It is recognized that proposed FAR 30.301 duplicates some definitions already contained in FAR 31.001. This will be adjusted in the final rule.

B. Regulatory Flexibility Act

The proposed revisions to FAR Parts 1, 15, 30, 31, 52, and 53 are not expected to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because the changes cover Cost Accounting Standards (CAS) and associated rules and regulations from which small business concerns are exempt.

C. Paperwork Reduction Act

The proposed revisions to FAR Parts 1, 15, 30, 31, 52, and 53 incorporate into the FAR as regulations the Cost Accounting Standards (CAS), and associated rules and regulations promulgated by the CAS Board under Pub. L. 91–379 and codified at 4 CFR Part 331. The rules do not change or otherwise affect the collection of information by Federal agencies from offerors, contractors, or members of the public because the rules previously existed as CAS Board Standards and Rules and Regulations. A request for a one-year extension of the recordkeeping and information requirements in Part 30 was submitted to the Office of Management and Budget on February 20, 1986.

List of Subjects in 48 CFR Parts 1, 15, 30, 31, 52, and 53

Government procurement.

Dated: May 29, 1986.

Lawrence J. Rizzi,

Director, Office of Federal Acquisition and Regulatory Policy.

Department of Commerce

International Trade Administration

Oil Country Tubular Goods From Argentina; Final Determination of Sales at Not Less Than Fair Value; Notice

DEPARTMENT OF COMMERCE

International Trade Administration

[A-357-601]

Oil Country Tubular Goods From Argentina; Final Determination of Sales at Not Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that oil country tubular goods from Argentina are not being, nor are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. We have also directed the U.S. Customs Service to discontinue the suspension of liquidation of all entries of oil country tubular goods (OCTG) from Argentina that are entered, or withdrawn from warehouse, for consumption, on or after January 27, 1986.

EFFECTIVE DATE: June 3, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1769.

Final Determination

We have determined that oil country tubular goods (OCTG) from Argentina are not being, nor are likely to be, sold in the United States at less than fair value, as provided in section 735(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act). We made fair value comparisons on all sales of the class or kind of merchandise to the United States by the respondent during the period of investigation. The weighted-average margin is 0.05 percent which is *de minimis*.

Case History

On July 22, 1985, we received a petition from the Lone Star Steel Company (Lone Star) and CF&I Steel Corporation (CF&I) on behalf of the OCTG industry. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of OCTG from Argentina are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that these imports are materially injuring, or threatening material injury to, a United States industry. The petition also alleged that sales of the subject merchandise were being made at less than the cost of production.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. The petitioners, however, did not provide information sufficient to justify our initiating a cost of production investigation. We notified the ITC of our action and initiated such an investigation on August 12, 1985 (50 FR 33388). On September 11, 1985, the ITC determined that there is a reasonable indication that imports of OCTG from Argentina are materially injuring, or are threatening material injury to, a U.S. industry (10 FR 37008).

On September 3, we presented an antidumping duty questionnaire to Dalmine Siderca S.A.I.C. (Dalsid) the only known exporter of OCTG in Argentina. The respondent was requested to answer the questionnaire in 30 days. However, at the request of the company we granted an extension of time for the response submission, and on October 31, 1985, we received Dalsid's response to the questionnaire. After receipt of the response, the petitioners alleged that the reported sales were at prices below cost of production. We found that petitioners' allegation contained elements necessary for us to initiate a cost of production investigation, and did so on December 27, 1985.

On December 5, 1985, the petitioners requested that the Department postpone the preliminary determination until not later than January 21, 1986. The Department granted the request on December 10, 1985 (50 FR 51275). On December 26, 1985, the petitioners alleged that "critical circumstances" exist with respect to imports of OCTG from Argentina.

On January 27, 1986, we published a preliminary determination that OCTG from Argentina were being sold at less than fair value in the United States and that critical circumstances did not exist (51 FR 3367).

After the preliminary determination, the respondent in this investigation requested a postponement of the final determination date. We granted the request and postponed our final determination until May 21, 1986 on March 3, 1986 (51 FR 7977).

On February 14 through 17, 1986, we verified the information provided by the respondent at its facilities outside of Buenos Aires, Argentina on April 4, 1986, Houston, Texas. On April 21, 1986, we held a hearing to provide all interested parties with an opportunity to comment on the preliminary determination.

Products Under Investigation

The products covered by this investigation are oil country tubular goods (OCTG). The term OCTG covers hollow steel products of circular cross section intended for use in the drilling of oil or gas. It concludes oil well casing, tubing and drill pipe of carbon or alloy steel, whether welded or seamless, to either American Petroleum Institute (API) or non-API specifications (such as proprietary) as currently provided for in the Tariff Schedules of the United States Annotated (TSUSA) items 610.3216, 610.3219, 610.3233, 610.3242, 610.3243, 610.3249, 610.3252, 610.3254, 610.3256, 610.3258, 610.3262, 610.3264, 610.3721, 610.3722, 610.3751, 610.3925, 610.3935, 610.4025, 610.4035, 610.4225, 610.4235, 610.4325, 610.4335, 610.4942, 610.4944, 610.4946, 610.4954, 610.4955, 610.4956, 610.4957, 610.4958, 610.4967, 610.4968, 610.4969, 610.4970, 610.5221, 610.5222, 610.5226, 610.5234, 610.5240, 610.5242, 610.5243, and 610.5244.

This investigation includes OCTG that are finished and unfinished.

This investigation covers the period from February 1 to July 31, 1985.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price to the foreign market value.

United States Price

As provided in section 772(b) of the Act, we used the purchase price of the subject merchandise to represent the United States price because the merchandise was sold to unrelated U.S. purchasers prior to its importation into the United States.

We calculated the purchase price for Dalsid based on the C.I.F., duty paid, price to unrelated U.S. purchasers. We made deductions for port charges, inland freight, brokerage, duties, wharfage, marine insurance and ocean freight costs incurred in delivering the product to the United States.

Foreign Market Value

We determined that there were insufficient sales of OCTG in the home market for purposes of determining foreign market value. Therefore, we looked to third-country sales as the basis of comparison. We found that Bolivia and Canada were the third-country markets with sales of merchandise at the greatest degree of similarity and largest volumes to which Dalsid sold such or similar merchandise. We have based such or similar product

groupings on advice from Department of Commerce steel experts.

Petitioners alleged that the sales to third countries were made at prices below the cost of production. We examined production costs, including materials, labor and general expenses as reported in the response. In computing costs of production, we used actual cost for fiscal year 1984 based on the adjusted standard costs rather than 1985 standard costs, since the 1985 standard costs were implemented during the last days of the period of investigation and it was the 1984 standards that were in effect for virtually the entire period. Fixed overhead was adjusted to reflect depreciation expense indexed on a monthly rather than year-end basis.

Selling, general and administrative expenses (SG&A) were adjusted to include all financial effects except primary indexation of sales and non-operating income from investments. Imputed credit expense was included in SG&A expense after deducting a portion of the interest expense attributable to the accounts receivable, which portion was calculated on the basis of total trade receivables to total assets.

In comparing the cost of production to third county sales, we converted Argentine currency to U.S. dollars using the certified exchange rate in effect on the date of third country sale. We found that all such or similar merchandise sold to Bolivia and Canada was sold at prices below the cost of production over an extended period of time, in substantial quantities, and at prices that did not permit recovery of all costs within a reasonable period of time in the normal course of trade. Therefore, we disregarded these sales in our analysis in accordance with section 773(b) of the Act since there were insufficient sales at or above cost of production. Instead, we used constructed value to determine foreign market value. In accordance with section 773(e) of the Act, we calculated constructed value by adding the costs of materials, fabrication, SG&A expenses, as described above, and profit. We used the actual SG&A expenses since they exceeded the statutory minimum of ten percent. We used the statutory minimum of eight percent for profit prescribed in section 773(e)(1)(B) of the Act, since actual profit was less than eight percent of the sum of manufacturing costs and SG&A expenses. We added U.S. packing costs. We made an adjustment for differences in circumstances of sale for credit terms in accordance with § 353.15 of our regulations.

In calculating foreign market value, we made currency conversions from Argentina australs to U.S. dollars using certified exchange rates in accordance with section 353.56(a)(1) of our regulations.

Verification

We verified the information used in making our final determination in accordance with section 776(a) of the Act. We used standard verification procedures, including examination of relevant sales and financial records of the company.

Petitioners' Comments

Comment 1. Petitioners assert that there are discrepancies between the U.S. sales prices reported by Dalsid to the Department and certain data submitted by respondent relative to its U.S. sales such as the customs duty reported in the response and commissions.

DOC Response. We have verified the information submitted relative to Dalsid's U.S. sales and found the information to be complete and accurate. Therefore, we have relied on that data in our determination.

Comment 2. Petitioners argue that Dalsid did not sell the "green shell," which is reported in the response, prior to its importation. This assertion is based on the following facts: (1) Some of the pipe has not been delivered to the U.S. customer and the long period between the contract and delivery is unusual in the trade and (2) some of this pipe has been offered to another U.S. customer.

DOC Response. We verified all aspects of the reported sales of "green shell." In the course of the verification we reviewed the contract, export and import documentation and other relevant documentation. The subject pipe has been shipped into the United States. It is being stored for the account of the customer identified by Dalsid with storage costs accruing to the customer's account. The customer also paid U.S. inland freight costs. Title has transferred with respect to some of the reported sales. Title has not transferred on some of the pipe because of a downturn in the oil industry. However, the contractual obligation is fixed. It is correct that Dalsid offered some of this pipe to another U.S. customer. However, if any pipe had been delivered to the second customer, Dalsid would have been obligated to replace that pipe for delivery to the original customer on the same terms. The proposed sale to the second customer was not completed. Based on the foregoing, we have treated the sales of "green shell" as sales which were made during the period of investigation and completed prior to importation.

Comment 3. Petitioners argue that, since Dalsid has not provided data quantifying adjustments for differences in physical characteristics between "green shell" and finished OCTG which was sold to third countries, the Department should assume that the "green shell" is identical to the finished OCTG.

DOC Response. Since we did not use third country prices as our basis of comparison, the issue is moot.

Comment 4. Petitioners claim that Dalsid has failed to provide certain necessary cost of production data, including product-specific cost data and meaningful explanations of allocation methods used to develop cost.

DOC Response. We disagree. Product-specific cost data were provided in the January 31, 1986 submission. Explanations of allocation methodologies were obtained during verification and described in the verification report.

Comment 5. Petitioners argue that meaningful participation by petitioners was precluded by Dalsid's failure to provide requested information which tied submitted cost information to the financial statements.

DOC Response. As the submission was prepared on a current cost basis, which is the Department's methodology for accounting for the effects of inflation on costs, the submitted costs were not traceable through the company's product cost accounting to the financial statements. However, during verification the submission was reconciled to the general ledger, disbursement records, and source documents.

Comment 6. Petitioners state that details of Dalsid's allocation of financial expenses to cost of production must be available under administrative protective order, so that the petitioners can comment on Dalsid's allocation of financial expenses to SG&A expense.

DOC Response. The petitioners have received a full narrative description which identifies discrete categories of financial expenses. These are sufficient to allow petitioners to comment on the appropriate classification of these expenses for purposes of our calculations.

Comment 7. Petitioners assert that the Plan Austral has not altered significantly the inflationary adjustments that need to be made to Dalsid's costs.

DOC Response. Because the submission was prepared on a current cost basis, we believe that the submitted costs adequately took into account inflation.

Comment 8. Petitioners argue that it is unclear whether the respondent's current cost methodology represented costs of material inputs at the time of purchase or at time of actual usage. Consequently, petitioners cannot assess whether the full effects of inflation have been captured. In addition, petitioners are unable to determine if Dalsid's current cost methodology adjusts for the carrying costs of inventory and materials inputs.

DOC Response. The submitted current costs for materials were calculated by using actual costs of purchases in the month of shipment of the OCTG. Inventory carrying costs were effectively included in the submission through allocation of financing expenses and manufacturing overhead.

Comment 9. Petitioners contend that in periods of high inflation, Dalsid's use of standard material usage and scrap recovery rates may obscure the true costs of production.

DOC Response. For the submission only standard material usage and scrap recovery rates, both of which approximate the actual expenses of the company, were used. As the actual costs for materials, for scrap and for the credits for scrap recovery were used, inflation has been taken into account.

Comment 10. Tax credits on Dalsid's sales to third country markets do not offset the value added tax (VAT) that Dalsid must pay on its input materials. Therefore, the VAT on raw materials should be included in the cost of production.

DOC Response. We disagree, since the company is reimbursed for the VAT paid on raw materials which are used for exported finished goods.

Comment 11. Petitioners argue that the Department must ensure that Dalsid does not understate its costs by valuing its scrap at market value. The per unit value of scrap must be reduced by Dalsid's cost of reclaiming and reprocessing its scrap or the credit will be overstated.

DOC Response. The process of reclaiming and reprocessing scrap is part of the normal operations of OCTG production and therefore is included in the cost of manufacturing.

Comment 12. Petitioners argue that the Department has not chosen the most suitable third-country sales for comparison with Dalsid's U.S. sales. They believe Bolivian sales would be more comparable than Colombian for "green shell" comparisons.

DOC Response. We have reviewed the submitted data and determined that sales to Bolivia constitute sales of the most comparable OCTG sold in adequate commercial quantities to a free market. Therefore, we have made comparisons with these sales.

Comment 13. Petitioners argue that because of the recent finding of Revenue Canada that Argentine casing was being sold at the time in question at approximately 40 percent below fair value, those sales may not present a fair basis for comparison. Other third-country sales would, therefore, form a more appropriate basis for comparison.

DOC Response. Since we found the sales to Canada were at less than cost, we used constructed value as our basis of comparison. Therefore, the issue is moot.

Comment 14. Petitioners contend that the methodology described in Dalsid's questionnaire response to calculate the credit adjustment on third-country sales appears to be inappropriate. They contend that the interest rate found at verification should be used to calculate the third-country credit adjustment. In addition, they claim that the interest rate used to calculate credit costs on U.S. sales, by Dalsid, is totally inappropriate.

DOC Response. We based our credit calculations on actual interest rates charged to Dalsid for equivalent borrowings and the days outstanding, which were verified.

Respondent's Comments

Comment 1. Respondent contends that Dalsid's sale of green shell is a purchase price sale made during the period of investigation.

DOC Response. See our response to Petitioners' Comment 2.

Comment 2. Respondent contends that its cost information is complete.

DOC Response. We believe that the submitted cost data and the cost data obtained during verification were sufficient to be used for purposes of our final determination.

Comment 3. Respondent argues that green shell is not similar merchandise to finished OCTG.

DOC Response. We disagree. Based on analysis performed by Department of Commerce industry experts, we have determined that green shell is similar to certain grades of finished OCTG. We compared the green shell sales to sales of similar OCTG to Bolivia with adjustments for differences in physical characteristics. In reaching our conclusion, we determined that green shell is made of essentially the same component materials with variations in proportions of those materials, can be used for the same purposes as finished OCTG, is commercially interchangeable with finished OCTG, and that the further processing is done at the option of the purchaser.

Comment 4. Respondent argues that if the Department is going to compare green shell with Dalsid's finished OCTG, it should be compared with J–55 grade, because it is more similar than any other finished OCTG based on physical characteristics, potential uses, and commercial value.

DOC Response. We agree that J–55 is the most similar grade to the green shell which was sold to the United States. There were insufficient sales of this grade in comparable sizes to free market third countries during the period of investigation. Therefore, we chose sales of N–80, the next most comparable grade, as our basis of comparison. We found that these sales were made at prices which were below the cost of production.

Comment 5. Respondent claims that N–80 grade cannot be considered similar to green shell because it does not have facilities to upgrade the green shell to that grade. Dalsid produces N–80 by another process.

DOC Response. Based on advice from our commodity experts, we have determined that N–80 meets the criteria for merchandise similar to green shell. The adjustments for differences in physical characteristics are based on direct manufacturing costs incurred; therefore, respondent's ability to upgrade the green shell is irrelevant.

Comment 6. Respondent argues that in making price-to-price comparisons, we should use the most comparable products sold to third countries.

DOC Response. See our responses to Petitioners' Comments 12 and 13 and Respondent's Comment 4.

Comment 7. Respondent argues that the Department was correct in its preliminary finding that critical circumstances do no exist.

DOC Response. Since this determination is negative, the issue is moot.

Comment 8. Respondent argues that in evaluating whether critical circumstances exist, we should not consider the March-June period in determining whether there were massive imports over a relatively short period. Respondent argues that there were no imports during this period because of the disruption in the market caused by a previous antidumping duty investigation of OCTG from Argentina. That investigation was terminated when the ITC found no injury on May 22, 1985 (50 FR 21147).

DOC Response. Since this determination is negative, the issue is moot.

Final Determination of Critical Circumstances

Since this determination is negative, the issue of whether critical circumstances exist is moot.

Discontinuance of Suspension of Liquidation

In accordance with section 735(c)(2)(A) of the Act, we are directing the United States Customs Service to discountinue the suspension of liqudation for all entries of OCTG from Argentina that were entered, withdrawn from warehouse, for consumption, on or after January 27, 1986. Accordingly all bonds should be cancelled and estimated antidumping duties deposited should be refunded.

ITC Notification

In accordance with section 735(d) of the Act, we will notify the ITC of our determination.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673(d)).

Paul Freedenberg,

Assistant Secretary for Trade Administration.

Briefings on How To Use the Federal Register—
For information on briefings in Seattle, WA, and San Francisco, CA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium, Fourth Floor, Federal Building, 915 2nd Avenue, Seattle, WA.

RESERVATIONS: Call the Portland Federal Information Center on the following local numbers:

Seattle 206-442-0570
Tacoma 206-383-5230
Portland 503-221-2222

SAN FRANCISCO, CA

WHEN: July 24; at 1:30 pm.

WHERE: Room 2007, Federal Building, 450 Golden Gate Avenue, San Francisco, CA.

RESERVATIONS: Call the San Francisco Federal Information Center, 415-556-6600

Rules and Regulations

Federal Register
Vol. 51, No. 107
Wednesday, June 4, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 400

[Doc. No. 3350S]

General Administrative Regulations; Late Planting Agreement Option Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby revises and reissues the Late Planting Option (7 CFR Part 400, Subpart A), effective with the 1987 and succeeding crop years. The intended effect of this rule is to: (1) Delete the adverse weather condition requirement; (2) publish a corrected list of crop insurance regulations to which the Late Planting Option applies; and (3) provide availability of the Late Planting Option beginning with 1987 crop year fall-planted crops. The authority for the promulgation of this rule is contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: July 7, 1986.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 447–3325.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Departmental Regulation 1512–1. This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is January 1, 1991.

E. Ray Fosse, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Other than minor changes in language and format, the principal changes in the Late Planting Option Regulations are:

1. Section 400.5.—Delete the Tobacco (Dollar Plan) Crop Insurance Regulations (7 CFR Part 434) as this plan is no longer offered under the provisions of Part 434.

Add Pea Crop Insurance Regulations (7 CFR Part 416) and Sweet Corn (Canning and Freezing) Crop Insurance Regulations (7 CFR Part 437) as crops eligible for the Late Planting Option.

Allow the Late Planting Agreement (LPA) to be used for fall-planted crops beginning with 1987 crop year. The LPA will be available on fall-planted crops and only in those areas where wheat, barley, oats and rye are not usually planted in the spring. The availability of this option to most spring planted crops has allowed FCIC to avoid extension of final planting dates with the concurrent reduction in yields. The Agreement allows an extension of the final planting date with a reduction in guarantee and is more actuarially sound than the previous procedure. FCIC has allowed the program in a limited winter wheat area and the results have been favorable for both the Corporation and the insured.

This change will allow the LPA to be used for fall planted wheat, barley, oat and rye areas provided these crops are insurable under the basic policy. All others areas will have the LPA available on a spring-planted basis only.

2. Section 400.6—Delete the adverse weather conditions requirement. It is difficult to determine if the planting delay is due to adverse weather conditions or some other factor. Since no actuarial basis exists for the restriction, FCIC deletes the requirement and allows an option regardless of the reason. This change will allow the Lake Planting Option to be used whenever the otherwise insurable crop is planted after the final planting date without regard to the reason.

On Friday, March 21, 1986, FCIC published a Notice of Proposed Rulemaking in the Federal Register at 51 FR 9826 to revise and reissue the Late Planting Agreement Option Regulations (7 CFR Part 400, Subpart A), effective for the 1987 and succeeding crop years. The public was given 30 days in which to submit written comments, data, and opinions on the rule, but none were received.

In reviewing the list of crops eligible for the LPAO, FCIC found that the Pea Crop Insurance Regulations (7 CFR Part 416) should have been included as a crop eligible for LPA. Accordingly, the Pea Crop Insurance Regulations are added as a crop determined to be eligible for the LPA.

Therefore, with the exception of minor language changes, the proposed rule, amended as outlined above, is hereby adopted as a final rule.

List of Subjects in 7 CFR Part 400

Crop insurance; Late planting agreement option.

Final Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby revises and reissues the Late Planting Agreement Option Regulations, Subpart A of Part 400, Title 7 of the

Code of Federal Regulations, effective for the 1987 and succeeding crop years, as set forth below:

PART 400—GENERAL ADMINISTRATIVE REGULATIONS

Subpart A—Late Planting Agreement Option; Regulations for the 1987 and Succeeding Crop Years

Sec.

400.1 Availability of the late planting option.
400.2 Definitions.
400.3 Responsibilities of the insured.
400.4 Applicability to crops insured.
400.5 The Late Planting Agreement.

Authority: Secs. 506, 516, Pub. L. 75-430, 52 Stat. 73, 77, as amended (7 U.S.C. 1506, 1516).

§ 400.1 Availability of the late planting option.

The Late Planting Option shall be offered under the provisions contained in 7 CFR Part 402, *et seq.*, within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), only on those crops identified in § 400.4 of this subpart. All provisions of the applicable contract for the insured crop apply, except those provisions which are in conflict with this subpart.

§ 400.2 Definitions.

For the purposes of the Late Planting Option:

(a) "Final planting date" means the final planting date for the insured crop contained in the actuarial table on file in the service office.

(b) "Late Planting Agreement" means that agreement executed by the final planting date, between the FCIC and the insured whereby the insured elects, and FCIC provides, insurance on acreage planted for up to 20 days after the applicable final planting date. The production guarantee applicable on the final planting date will be reduced on the acreage planted after the final planting date by 10 percent for each 5 days that the acreage is planted after the final planting date.

(c) "Production guarantee" means the guaranteed level of production under the provisions of the applicable contract for crop insurance (sometimes expressed in amounts of insurance).

§ 400.3 Responsibilities of the insured.

The insured is solely responsible for the completion of the Late Planting Agreement and for the accuracy of the data provided on that Agreement. The provisions of this subsection shall not relieve the insured of any responsibilities under the provisions of the insurance contract.

§ 400.4 Applicability to crops insured.

The provisions of this subpart shall be applicable to the provisions of FCIC policies issued under the following regulations for insuring crops:

7 CFR Part 416	Pea
7 CFR Part 418	Wheat
7 CFR Part 419	Barley
7 CFR Part 420	Grain Sorghum
7 CFR Part 421	Cotton
7 CFR Part 422	Potatoes
7 CFR Part 423	Flax
7 CFR Part 424	Rice
7 CFR Part 425	Peanuts
7 CFR Part 427	Oats
7 CFR Part 428	Sunflowers
7 CFR Part 429	Rye
7 CFR Part 430	Sugar Beets
7 CFR Part 431	Soybeans
7 CFR Part 432	Corn
7 CFR Part 433	Dry Beans
7 CFR Part 435	Tobacco (Quota Plan)
7 CFR Part 436	Tobacco (Guaranteed Production Plan)
7 CFR Part 437	Sweet corn (Canning and Freezing)
7 CFR Part 438	Tomatoes (Canning and Processing)
7 CFR Part 443	Hybrid Seed
7 CFR Part 447	Popcorn

The Late Planting Option shall be available in all counties in which the Corporation offers insurance on these crops.

§ 400.5 The Late Planting Agreement.

The provisions of the Late Planting Agreement are as follows:

U.S. DEPARTMENT OF AGRICULTURE

Federal Corp Insurance Corporation

Late Planting Agreement

Insured's Name _____
Contract No. _____
Address _____
Crop Year _____

_____

Crop _____

Notwithstanding the provisions of section 2 of the policy regarding the insurability of crop acreage initially planted after the final planting date on file in the service office, I elect to have insurance provided on acreage planted for 20 days after such date. Upon my making this election, the production guarantee or amount of insurance, whichever is applicable, will be reduced 10 percent for each five days or portion thereof that the acreage is planted after the final planting date. Each 10 percent reduction will be applied to the production guarantee or amount of insurance applicable on the final planting date.

The premium will be computed based on the guarantee or amount of insurance applicable on the final planting date; therefore, no reduction in premium will occur as a result of my election to exercise this option.

If planting continues under this Agreement after the acreage reporting date on file in the service office, the acreage reporting date will be extended to 5 days after the completion of planting the acreage to which insurance will attach under this Agreement.

Insured's Signature _____
Date _____

Corporation Representative's Signature and Code Number _____

Collection of Information and Data (Privacy Act)

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552(a)).

The authority for requesting the information to be supplied on this form is the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and regulations promulgated thereunder (7 CFR 400 *et seq.*). The information requested is necessary for FCIC to institute the Late Planting Agreement Option. The information may be furnished to FCIC contract agencies and loss adjusters, reinsured companies, processors, other U.S. Department of Agriculture agencies, the Internal Revenue Service, Department of Justice, other State and Federal law enforcement agencies, U.S. Government contract collection agencies and in response to orders of a court, magistrate, or administrative tribunal. Furnishing the information requested on this form is voluntary. However, failure to furnish the complete requested information may result in the Late Planting Agreement not being accepted by the Corporation.

Done in Washington, DC, on April 22, 1986.

E. Ray Fosse,

Manager, Federal Crop Insurance Corporation.

7 CFR Part 417

[Doc. No. 0069A]

Sugarcane Crop Insurance Regulations; Correction

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule, correction.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) published a final rule in the Federal Register on Tuesday, April 29, 1986, at 51 FR 15871, revising and reissuing the Sugarcane Crop

Insurance Regulations (7 CFR Part 417). In that publication the provision to cover the insurance attachment period in areas having three or more years' of stubble cane was inadvertently omitted. This notice is published to correct that error.

ADDRESS: Written comments on this correction may be sent to the Office of Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447-3325.

SUPPLEMENTARY INFORMATION: FR Doc. No. 86-9488, appearing at page 15871, is corrected by adding a provision for an insurance period in those areas having three or more years' stubble cane (appearing on page 15873 in the right column) to read as follows:

PART 417—[AMENDED]

1. The authority citation for 7 CFR Part 417 continues to read as follows:

Authority: Secs. 508, 516, Pub. L. 75-430, 52 Stat. 73, 77, as amended (7 U.S.C. 1508, 1516).

2. In §417.7(d), paragraph 7.a. of the Federal Crop Insurance Corporation Policy is amended by adding subparagraph (3) to read as follows:

§ 417.7 The application and policy.

* * * * *

(d) * * *

7. * * *

a. * * *

(3) All other stubble cane on the later of April 15 following normal harvest or 30 days after harvest.

* * * * *

Done in Washington, DC on May 29, 1986.

E. Ray Fosse,

Manager, Federal Crop Insurance Corporation.

[FR Doc. 86-12587 Filed 6-3-86; 8:45 am]

BILLING CODE 3410-08-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 111

Pollution Control; Eligibility Policy

AGENCY: Small Business Administration

ACTION: Final rule.

SUMMARY: This final rule provides that waste disposal concerns are not eligible for pollution control financing assistance under this Part.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Robert C. Tallon, Director, Pollution Control Financing Staff (202) 653-2543.

SUPPLEMENTARY INFORMATION: On January 8, 1986, the Small Business Administration (SBA) published in the **Federal Register** (51 FR 966), a notice of proposed rulemaking which provided that waste disposal concerns are not eligible for pollution control financing assistance. The Agency received 21 written responses.

During the early stages of the Pollution Control Financing Guarantee (PCFG) program, SBA interpreted the legislative history of its guarantee authority to preclude assistance for the acquisition of a pollution control facility designed to control pollution caused by others than the applicant itself. For this reason applications from waste disposal concerns were considered ineligible.

Upon request of the (then) Administrator of SBA, the Comptroller General of the United States reviewed this conclusion. In an unpublished decision (B-149685) dated November 14, 1978, the Comptroller General stated that SBA could extend the benefit of the program to waste disposal concerns, if it chose to do so, because

> SBA is free, in the exercise of its discretion, to choose a definition of "pollution control facilities" which it feels will most effectively implement congressional intent and carry out the purposes of its guarantee program for such facilities.

But the Comptroller General cautioned that the legislative history did not necessarily support the eligibility of waste disposal concerns:

> It is possible to infer from these references [in the legislative history] that the Congress intended to exclude from guarantee benefits under Section 404, those small business concerns that provide pollution abatement services to others for profit, because investments made by these firms in facilities would be productive and income producing and could provide a satisfactory return. SBA apparently made that inference in the past, and construed the language of the second portion of the definition of "pollution control facilities" set forth above, as limiting solid waste facility coverage to those facilities ameliorating pollution problems caused by the small business concern's own solid waste.

In reexamining the question of the eligibility of waste disposal concerns for the PCFG program, SBA has concluded, after reviewing the responses, that the purposes of the PCFG program, as set forth in the legislative history and the statute, are better served by excluding such businesses from eligibility. Therefore, by the promulgation of this final rule SBA returns to its prior view that waste disposal concerns are not eligible for financial assistance under the PCFG program.

As both the Senate and House reports make clear, PCFG assistance, which is 100 percent underwritten by the Government, is intended for small concerns required to comply with ecological standards by installing nonproductive pollution abatement equipment, purchased incident to their other profit-oriented activities. Where pollution abatement is the main purpose of a concern, such equipment is dedicated to the profit-making activity itself, and is indistinguishable from equipment of any other industry providing a product or service. SBA believes that the purchase of such equipment by firms in the pollution control business is contrary to the purposes of the pollution control financing guarantee authority. The acquisition of such equipment by small concerns is properly assisted by either non-SBA programs or by SBA programs under Titles III and V of the Small Business Investment Act (15 U.S.C. 661 *et seq.*).

Of the 21 written comments, one respondent stated the regulation would preclude assistance to landfill, gas, etc., emissions; one stated that financial institutions would hesitate to lend to businesses which face clean up problems; three stated that the change would foster and encourage monopolization; three stated that expansion would be impossible without SBA assistance; four stated that the 7(a) Business Loan Program does not meet the needs of small business; nine were carbon copies that gave no reasons for their objections.

While there have been various interpretations of "pollution control facilities" over the years, the regulatory language, in accordance with such history, should clarify the distinction between the eligibility of those businesses providing pollution abatement services to others for profit and those businesses having a need to correct ongoing pollution problems caused by their own waste.

The final rule will not have a significant economic impact on a substantial number of small entities. It is not possible to predict the number of small concerns that would be affected by this final rule because our statistics are not kept on that basis, but if the final rule had been in effect during the time that the current rule was in effect (1980 to present), about one fifth, overall, of the pollution control guarantees would not have been made under this program:

Year	Total pollution control guarantees	Waste disposal concerns
1980	92	[1] 16
1981	83	[1] 15
1982	3	1
1983	4	1
1984	4	0
1985	5	2

[1] Estimate.

The final rule will not cause any increase in cost for consumers, Federal, State or local government agencies or geographic regions. As for a cost increase to the waste disposal industry, it is not possible to predict that there will or will not be such increase. On the one hand, the pollution control program offers fixed rate long-term 100% guaranteed financings up to $5 million, including tax-exempt financings, with a guarantee fee authorized by statute at one (1) percent to three and one-half (3½) percent. On the other hand, the regular business loan program offers two (2) percent guarantee fees for guaranteeing up to 85% on loans up to $500,000 for SBA's share and a term tailored to the borrower's ability to repay.

There are no reporting, recordkeeping or other compliance requirements inherent in this rule, nor does the rule duplicate, overlap or conflict with any other Federal rule.

This is not a major rule for purposes of E.O. 12291 because the annual economic effect will be less than $100 million. The maximum financing under the PCPG is $5 million. The total authority for PCPG in FY 1986 is $150 million. If the prior ratio of waste disposal concern financings to total PCPG authority were maintained, such financings would not exceed $30 million.

List of Subjects in 13 CFR Part 111

Environmental protection, Loan programs/business, Small business.

Accordingly, pursuant to the authority in section 308(c) of the Small Business Investment Act (15 U.S.C. 687(c)), SBA amends Part 111, Chapter I, Title 13 of the Code of Federal Regulations as follows:

PART 111—POLLUTION CONTROL

1. The authority citation for Part 111 is revised to read as follows:

Authority: 15 U.S.C. 687(c).

2. Section 111.2 is revised to read as follows:

§ 111.2 Policy.

It is the intent of Congress to assist existing small concerns which are or are likely to be at an operational or financing disadvantage with other business concerns with respect to the planning, design, or installation of pollution control facilities, or the obtaining of financing therefor, by authorizing SBA to guarantee fully (100 percent), directly or in cooperation with others, the periodic payments due in connection with the purchase or lease of such Facilities under a Qualified Contract. The guarantee shall be a full faith and credit obligation of the United States, and may be issued notwithstanding that the pollution control Facility is acquired by the use of proceeds from tax-exempt industrial revenue bonds.

(Catalog of Federal Domestic Assistance Program No. 59.031, Small Business Pollution Control Financing Guarantee.)

Dated: May 12, 1986.

Charles L. Heatherly,

Acting Administrator.

[FR Doc. 86-12348 Filed 6-3-86; 8:45 am]

BILLING CODE 8025-01-M

13 CFR Part 122

[Rev. 4; Amdt. 1]

Business Loans, Interest Rates

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This final rule provides that with respect to any loan made prior to April 27, 1984, utilizing a quarterly fluctuating interest rate, such rate may be changed to a monthly fluctuation with the prior written consent of the borrower, the lender, the Small Business Administration (SBA), and the secondary market investor (if any).

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Robert Wise, Financial Analyst, Office of Portfolio Management, (202) 653-6900.

SUPPLEMENTARY INFORMATION: On November 15, 1985, SBA published in the **Federal Register** (50 FR 47227), a notice of proposed rulemaking which clarified the intent of the Agency to allow quarterly fluctuating interest rates, on loans made prior to April 27, 1984, to be changed to monthly fluctuations, so long as there is obtained the prior written consent of the borrower, participating Lender, SBA, and any secondary market holder of the guarantee portion. The Agency received one written response which favored the proposal. The competitive banking industry requires that lenders structure their loans to attract business. The prevalent attitude of borrowing customers is that it is in everyone's interest to schedule loans which can take advantage more quickly of the downward trend of interest rates. Without this final rule, an announced reduction of the prime rate for example, in April or May 1985, could not have been passed along to a borrower of an SBA guaranteed loan made prior to April 1984, until July 1985. Consequently participating lenders were not able to serve their customers properly in a competitive environment. This final rule permits a quarterly interest rate fluctuating loan to be changed, with all the parties consenting, to a monthly fluctuation so that the borrower might obtain the benefit in May, for example, of an April reduction in the prime rate.

SBA certifies that this final rule will not have a significant economic impact on a substantial number of small entities for purposes of the Regulatory Flexibility Act (5 U.S.C. 605(b)). This change does not impose recordkeeping or paperwork requirements.

This is not a major rule for purposes of E.O. 12291 because the annual economic effect will be less than $100 million. The outstanding guaranteed loan portfolio at April 30, 1984, numbered 82,412 loans totaling $7,196,900,000. If two-thirds of these loans were variable rate loans still outstanding, the average effect on each loan would have to be $1,820 for a combined annual effect of $100,000,000 on average loan size of $87,328. This would be an annual effect of 2% on the interest rate with 100% participation in monthly adjustments. While borrower demand for conversion to monthly interest rate adjustments is unknown, neither the annual effect nor the participation rate will be to this degree.

List of Subjects in 13 CFR Part 122

Loan programs—business, Small business.

Accordingly, pursuant to the authority contained in section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)), SBA amends Part 122, Chapter I, Title 13, Code of Federal Regulations as follows:

PART 122—BUSINESS LOANS

1. The authority citation for Part 122 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6) and 636(a).

2. Section 122.8-4 is amended by revising paragraph (a) to read as follows:

§ 122.8-4 Variable (fluctuating) rate.

* * * * *

(a) Frequency. The fluctuation may occur no more frequently than monthly, except for the first fluctuation, which may occur on the first business day of

the month following initial disbursement: *Provided*, That with respect to any loan made prior to April 27, 1984, utilizing a quarterly fluctuation, the interest rate may be changed to a monthly fluctuation with the prior written consent of the borrower, Participating Lender, SBA, and Registered Holder (if any).

* * * * * *

Airworthiness Directives: Boeing Model 707/720 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which supersedes an existing airworthiness directive (AD) applicable to certain Boeing Model 707/720 airplanes. The existing AD requires inspection and repair, as necessary, of cracks in the wing front spar upper chord. A recent reassessment by the manufacturer has revealed that the maximum allowable length of a crack in the upper front spar which may be repaired in accordance with previous releases of the applicable service bulletin must be reduced from 2.5 inches to 2.0 inches. Cracks greater than 2.0 inches in length, previously repaired in accordance with the existing AD, may be subject to failure under maximum design conditions, and could result in buckling of the spar chord.

DATES: Effective July 14, 1986.

ADDRESSES: The applicable service documents may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Carlton Holmes, Airframe Branch, ANM-120S; telephone (206) 431-2926. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) which supersedes an existing AD requiring inspections and repair, as necessary, of cracks in the wing front spar upper chord of certain Boeing Model 707/720 airplanes was published in the Federal Register on February 14, 1986, (51 FR 5543). The comment period for the proposal closed on April 7, 1986.

Interested parties have been afforded an opportunity to participate in the making of this AD, and due consideration has been given to all comments received.

The only comment received was from the manufacturer, which recommended substitution of the words "greater than 2.0 inches" for the words "between 2.0 and 2.5 inches" in paragraph D. of the proposed rule. The FAA concurs and the final rule has been revised accordingly.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change previously mentioned.

It is estimated that 18 airplanes will be affected by this AD. Airplanes which have been previously repaired will require approximately 40 manhours per airplane to review the existing repairs. Based on an average labor cost of $40 per manhour, the total cost to the U.S. fleet for accomplishment of this AD will be $28,800.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact on a substantial number of small entities because few, if any, Boeing Model 707/720 series airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

Aviation Safety, Aircraft.

PART 39—[AMENDED]

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends Section 39.13 of Part 39 of the Federal Aviation Regulations as follows:

§ 39.13 [Amended]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By superseding Airworthiness Directive (AD) 85-08-07, Amendment 39-5044 (50 FR 16465; April 26, 1985), with the following new airworthiness directive:

Boeing: Applies to Model 707 and 720 series airplanes, certificated in any category, with 15,000 or more landings. To ensure continued structural integrity of the wing front spar upper chord, accomplish the following within 100 landings or 60 days after the effective date of this AD, whichever occurs first, unless previously accomplished within the last 900 landings or 305 days:

A. Perform a close visual inspection of the wing front spar upper chord for cracks and corrosion in accordance with Boeing Service Bulletin 3240, Revision 1, dated November 13, 1961, or later FAA-Approved revision. Repeat the inspection at intervals not to exceed 1,000 landings or one year, whichever occurs first.

B. If cracks or corrosion areas are found, repair prior to further flight in accordance with Boeing Service Bulletin 3240, Revision 3, dated October 18, 1965, or later FAA-approved revision.

C. Cracks which have been repaired in accordance with the "stop drilling" procedure described in Part III, Figure 2, of Service Bulletin 3240, Revision 1, dated November 13, 1961, or later FAA-approved revision, must be visually inspected at intervals not exceeding 300 landings, until permanently repaired in accordance with Part III, Figure 2, of Service Bulletin 3240, Revision 3, dated October 18, 1965, or later FAA-approved revision. A permanent repair must be completed within 1,000 landings or one year, whichever occurs first after the effective date of this AD.

D. Cracks greater than 2.0 inches in length, which have been previously repaired in

accordance with Boeing Service Bulletin 3240, Revision 2, dated May 3, 1985, or earlier, must be repaired in accordance with Revision 3, dated October 18, 1985, or later FAA-approved revision, 1,000 landings or one year, whichever occurs first after the effective date of this AD.

E. After each of the above inspections and repairs have been performed, apply BMS-3-23 corrosion inhibitor, or equivalent, to the affected areas.

F. Alternate means of compliance or adjustment of the compliance time, which provide an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

G. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the inspections and/or modifications require by this AD.

All persons affected by this proposal who have already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This AD supersedes AD 85-08-07, Amendment 39-5044.

This amendment becomes effective July 14, 1986.

Issued in Seattle, Washington, on May 28 1986.

David E. Jones,

Acting Director, Northwest Mountain Region

[FR Doc. 86-12479 Filed 6-3-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 85-NM-159-AD; Amdt. 39-5326]

Airworthiness Directive: Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective by individual telegrams to all known U.S. owners and operators of Boeing Model 747 airplanes powered by General Electric CF6 or Pratt and Whitney Aircraft JT9D-70A turbofan engines. The AD requires inspections and repair, if necessary, of the Engine Number 1 engine control cable to ensure control system integrity. This action is prompted by an incident in which a broken engine control cable resulted in extensive structural damage to a Model 747, and injury to its passengers, when the airplane veered off the runway due to uncontrollable asymmetric thrust during landing thrust reversal. A broken control cable can cause the engine to accelerate to an unusually high level of forward thrust (above takeoff power), which can result in an uncontrollable airplane asymmetric thrust situation.

DATES: Effective June 23, 1986. As to all persons except those persons to whom it was made immediately effective by telegraphic AD T85-25-55, issued December 20, 1985.

ADDRESSES: The service bulletins specified in this AD may be obtained upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur D. Scholes, Propulsion Branch, ANM-140S, Seattle Aircraft Certification Office; telephone (206) 431-2972. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: On December 2, 1985, Air France Flight 091, a Boeing Model 747-200 airplane powered by General Electric CF6 engines, was involved in an accident in which the airplane veered off the runway due to uncontrollable asymmetric thrust during landing thrust reversal. It was determined that the accident was caused by a broken Engine Number 1 control cable, which resulted in the inability of the flight crew to control the engine power. The accident resulted in injury to passengers and structural damage to the airplane.

The Engine Number 1 control cable is a 7-strand cable which goes through a cable passage hole in a support bracket on the strut. This installation is unique to CF6-powered Model 747's and JT9D-70A-powered Model 747's because of the common nacelle installation. Chafing of the cable against the side of the hole can result in the cable breaking. If the cable breaks while the throttles are in reverse thrust position, the release of cable tension will cause the thrust to decrease and may cause the reverser to retract. If the cable breaks while the throttles are in the forward thrust position, the release of cable tension will cause the thrust to increase—perhaps to the full throttle stop.

As a result to previous reports of broken control cable strands, including one broken cable which resulted in an inactive thrust reverser and loss of engine control (a less significant result than the Air France accident), Boeing issued Service Bulletin (SB) 747-76-2063 on July 12, 1985. This SB provides instructions to rework the support bracket and provided pulley bracket replacement to correct the chafing problem.

Following the Air France accident, Air France inspected sixteen CF6-powered Model 747 airplanes in Paris. Inspection results revealed that two Engine Number 1 control cables were worn and two had broken strands. Boeing then prepared an Alert Service Bulletin (ASB) 747-76A-2063, Revision 1, dated December 18, 1985, to provide instructions for inspection and necessary repairs of the Engine Number 1 control cables.

On December 20, 1985, telegraphic AD T85-25-55 was issued and made effective immediately as to all known U.S. owners and operators of Boeing Model 747 series airplanes powered by General Electric CF6 or Pratt and Whitney Aircraft JT9D-70A turbofan engines. The AD requires repetitive inspections and repair, if necessary, of the Engine Number 1 engine control cable in accordance with Boeing Alert Service Bulletin 747-76A-2063, Revision 1, dated December 18, 1985. Modification of the Engine Number 1 control cable in accordance with Boeing Service Bulletin 747-76-2063, dated July 12, 1985, constitutes terminating action for the required repetitive inspections.

Since a situation existed, and still exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis,

as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required.)

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

PART 39—[AMENDED]

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends Section 39.13 of Part 39 of the Federal Aviation Regulations as follows:

§ 39.13 [Amended]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to all Model 747 series airplanes, line number 1 through 607, powered by General Electric CF6 or Pratt & Whitney Aircraft JT9D-70A turbofan engines, certificated in any category.

To prevent failure of the Engine Number 1 control cable which may cause loss of control of the engine, accomplish the following, unless previously accomplished:

A. Within 48 hours following receipt of this AD, and thereafter at intervals not to exceed 600 flight hours, perform inspections and repair, if necessary, in accordance with Boeing Alert Service Bulletin 747-76A-2063, Revision 1, dated December 18, 1985, or later FAA-approved revisions.

2. Alternate means of compliance which provides an acceptable level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

3. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and modifications required by this AD.

4. Modification of the Engine Number 1 engine control cable in accordance with Boeing Service Bulletin 747-76-2063, dated July 12, 1985, constitutes terminating action for the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective June 23, 1986.

It was effective earlier to all recipients of telegraphic AD T85-25-55 issued December 20, 1985.

Issued in Seattle, Washington, on May 28, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 86-ANE-9; Amdt. 39-5325]

Airworthiness Directives; Garrett Turbine Engine Company Model TFE731-2, -3, and -3R Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes a currently effective priority letter Airworthiness Directive (AD) 86-04-02 applicable to Garrett Turbine Engine Company (GTEC) Model TFE731-2, -3, -3R turbofan engines. The priority letter AD requires the removal of certain fan rotor discs with more than 4000 total operating cycles in service. This final rule AD is needed to prevent the failure of the fan rotor disc due to fatigue cracking which could result in separation of the fan rotor assembly from the engine. Supersedure of priority letter AD 86-04-02 is necessary to include additional dash number fan rotor disc part numbers that were not listed in the priority letter AD.

DATES: Effective upon receipt of priority letter AD 86-04-02 dated February 14, 1986, for operators with GTEC TFE31-2, -3, -3R turbofan engines with fan rotor disc part numbers 3073436-1, -2, and -3, and 3072162-1, -2, and -3 installed.

Effective June 16, 1986 for operators with GTEC TFE731-2, -3, and -3R turbofan engines with rotor disc part numbers 3073436-4 and 3072162-4 installed.

Compliance required according to the complaince schedule as prescribed in the body of the AD.

ADDRESSES: The applicable service documents may be obtained from Garrett General Aviation Services Company, Department H65-1, Building 601AD, P.O. Box 29003, Phoenix, Arizona 85038.

A copy of the service documents is contained in the Rules Docket, FAA, New England Region, Room 311, 12 New England Executive Park, Burlington, Massachusetts, 01803.

FOR FURTHER INFORMATION CONTACT: Mr. Bill Moring, Aerospace Engineer, Propulsion Section, ANM-174W, FAA, Northwest Mountain Region, Western Aircraft Certification Office, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009-2007; telephone (213) 297-1382.

SUPPLEMENTARY INFORMATION: On February 14, 1986, Priority Letter AD No. 86-04-02 was issued and made effective immediately as to all known U.S. owners and operators of certain Garrett Turbine Engine Company Model TFE731-2, -3, and -3R turbofan engines. The priority letter AD requires removal from service of certian fan rotor discs with more than 4000 cycles. This AD action was prompted by fatigue failure of the fan rotor disc which caused separation of the fan rotor assembly from the engine. Priority Letter AD 86-04-02 is being superseded to add part numbers 3073436-4, and 3072162-4 to the list of affected fan discs. These -4 dics, subject to the same life limits, have become available since the issuance of the priority letter.

Since a situation exists affecting continued airworthiness of these engines that requires immediate adoption of this regulation, it is found that notice and public procedure thereon are impracticable and contrary to public interest, and good cause exists for making this amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the proecedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT"**.

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety.

PART 39—[AMENDED]

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulation (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) [Revised, Pub. L. 97-449, January 12, 1983]; and 14 CFR 11.89.

2. By adding to Section 39.13 the following new airworthiness directive (AD):

Garrett Turbine Engine Company (formerly the AiResearch Manufacturing Company of Arizona): Applies to all Model TFE731-2, -3, and -3R turbofan engines installed is aircraft certified in all categories equipped with fan rotor discs, part number 3073438-1, -2, -3, and-4 and 3073162-1, -2, -3, and -4.

Compliance is required as indicated unless already accomplished.

To prevent failure of the fan rotor disc due to fatigue cracking, accomplish the following:

(a) For fan rotor discs with 4000 or less operating cycles on the effective date of this AD, remove fan roter disc from service before reaching 4000 total operating cycles.

(b) For fan roter discs with more than 4000 but with 6000 or less operating cycles on the effective date of this AD, remove fan rotor disc from service within the next 100 operating cycles or prior to reaching 6005 total operating cycles whichever occurs first.

(c) For fan roter discs with more than 6000 but with 8000 or less operating cycles on the effective date of this AD, remove fan rotor disc from service within the next 5 operating cycles or prior to reaching 8001 total operating cycles whichever occure first.

(d) For fan rotor discs with more than 8000 operating cycles on the effective date of this AD, remove fan roter disc from service prior to further flight.

Notes: (1) An operating cycle is considered as any engine operating sequence involving an engine start, at least one acceleration to 80 percent or more low pressure rotor speed, and an engine shutdown. An alternate method of determining cycles is to consider each airplane landing as one cycle. Fan rotor discs which have had their cyclic lives calculated by any other method are to have their cyclic lives recalculated using one of the two methods specified above.

(2) It has come to the attention of the FAA that some life limit log cards in the engine log book were incorrectly filled out in that the "dash number" of the disc part numbers (i.e. -1/-2/-3-/-4) may have been left off. This should be corrected when the disc is next available to read the entire part number. All fan rotor discs are -1,-2, -3, -4, and are affected by this AD. Fan rotor discs may be returned to GTEC for evaluation. Shipping information is contained in Garrett Alert Service Bulletin No. TFE731-A72-3325 Revision 2 dated April 4, 1986.

Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Western Aircraft Certification Office, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Western Aircraft Certification Office, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009-2007 may adjust the compliance time specified in this AD.

This amendment supersedes Priority Letter AD 86-04-02 issued February 14, 1986.

There are two effective dates for this superseding AD.

For those operators who received Priority Letter AD 86-04-02, the effective date of this AD is the date of the priority letter AD.

The effective date of this AD is June 16, 1986, for operators with fan rotor disc part number 3073438-4 or 3073162-4 installed and for operators who did not receive the priority letter AD.

Issued in Burlington, Massachusetts, on May 22, 1986.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 86-12476 Filed 6-3-86; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 377

[Docket No. 51256-6082]

Exports of Crude Oil Derived From Alaska's Cook Inlet

AGENCY: Office of Industrial Resource Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This final rule modifies section 377 of the Export Administration Regulations by creating a new eligibility category under § 377.6(d)(1)—Exports of crude oil from Alaska's Cook Inlet. Each exporter is required to submit a license application along with supporting information demonstrating that the proposed export qualifies under this new category. No export can be made without the Department of Commerce first issuing an individual validated license. Exporters should be aware that any licenses issued will have a term of not greater than one year. Moreover, they should also be aware that outstanding licenses may be revoked if there is serious interruption to available U.S. oil supplies.

This rule is issued in final form following review and consideration of comments received in response to a proposed rule published on December 26, 1985 (50 FR 52798).

Only crude oil derived from state-owned submerged lands in Alaska's Cook Inlet and not subject to the restrictions contained in the Export Administration Act of 1979, as amended, Naval Petroleum Reserves Production Act of 1976, Outer Continental Shelf Lands Act, or Mineral Lands Leasing Act of 1920, as amended, is eligible to be exported under this rule. This excludes domestic crude oil derived from the North Slope or Outer Continental Shelf, or crude oil transported over a federal right-of-way granted pursuant to the Mineral Lands Leasing Act or the Trans-Alaska Pipeline Authorization Act.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Rodney A. Joseph, Acting Manager, Short Supply Program, Room 3876, Office of Industrial Resource Administration, U.S. Department of Commerce, Washington, D.C. 20230, Telephone: 202/377-3984.

SUPPLEMENTARY INFORMATION: On December 26, 1985, the Department of Commerce published in the Federal Register (50 FR 52798) a notice requesting public comments on a proposed rule to revise Part 377 of the Export Administration Regulations (EAR) to permit exports of crude oil derived from Alaska's Cook Inlet. The proposed rule was intended to implement a finding made by Commerce Secretary Malcolm Baldrige on November 6, 1985 under section 103 of the Energy Policy and Conservation Act (EPCA), that the export of Cook Inlet oil was in the national interest and consistent with the purposes of EPCA ("national interest finding"). The Secretary's finding followed a decision by President Reagan contained in a Presidential Policy Directive, dated October 24, 1985, based on the recommendation of the Economic Policy Council, to use his administrative authority to permit the sale of Cook Inlet oil to other countries.

The State of Alaska estimates the 1986 crude oil production from state-owned submerged lands in Cook Inlet at approximately 40,000 barrels per day. This production has been declining, and is expected to continue to decline, at approximately 15 percent per year. The oil is produced by a number of companies and serves several U.S. markets, which are expected to continue to use some of the oil.

Without further development of Cook Inlet resources, it is estimated that no more than 20,000 barrels per day may be available for export and most likely only 4,000 to 5,000 barrels per day of state royalty oil may be exported. This

quantity would require only a few vessel sailings a year and would have a minimal impact on the shipping industry.

Comments

The Department received 32 comments in response to the notice of proposed rulemaking, including one comment which consisted of nine separate statements, for a total of 40 comments. All of the commentators addressed the substance of the decision to permit the export of oil from Alaska's Cook Inlet. Twenty-seven commentators favored and 13 commentators opposed such exports. Six of the commentators challenged the Secretary's national interest finding based on procedural grounds. Only four commentators addressed the proposed rule itself. These comments related to the definition of Cook Inlet oil and to the documentation requirements supporting export license applications.

The Office of the Governor of the State of Alaska commented on the definition of the area included under "Cook Inlet" in the proposed regulations recommending the phrase "state-owned submerged lands." The proposed regulations had used the term "state waters of Alaska's Cook Inlet". The final rule adopts the recommendation because "state-owned submerged lands" is a more precise term.

Two oil producers also commented on the definition of "Cook Inlet" suggesting inclusion of onshore Cook Inlet fields. Export from onshore fields in the Cook Inlet Basin would invoke other statutory export restrictions, most notably the Mineral Lands Leasing Act of 1920 as amended (MLLA). Therefore, that area is not included within the definition.

The Coalition to Keep Alaska Oil questioned the Department's ability to insure compliance with the MLLA. License applications submitted under § 377.6(d) of the EAR are subject to the documentation requirements of § 377.6(e). Section 377.6(e) requires: (1) Documentary evidence of an order as described in § 372.6(a)(1) and (2); (2) a sworn affidavit, signed by an authorized representative of the exporter, which demonstrates (in conjunction with such supporting evidence as may be required by the Department of Commerce) that the applicable criteria of § 377.6(d)(1) are satisfied; and (3) an affidavit, attesting that the crude oil has not been nor will be produced from a Naval Petroleum Reserve.

The affidavit required by item 2 must state that the crude oil to be exported was derived from state-owned submerged lands in Alaska's Cook Inlet and has not been and will not be transported by a pipeline over a federal right-of-way granted pursuant to section 28(u) of the Mineral Lands Leasing Act of 1920 or by section 203 of the Trans-Alaska Pipeline Authorization Act. The applicant also will be required to provide documented independent verification of the origin of the crude oil. The Department has the right under existing regulations to require any additional supporting documentation.

The remaining comments received did not address the proposed rule but rather the Secretary's national interest finding.

The comments that challenged the substance of the Secretary's finding alleged that: Exports would not increase incentives for investment in the exploration and development of domestic crude oil would not result in transportation efficiencies; and, would not materially enhance the energy security of our allies. The favorable comments received concluded that: Increased export market opportunities would provide economic incentives for domestic oil exploration and development; that transport of oil to Pacific Rim countries is more efficient than to the U.S. Gulf Coast; that allowing Pacific Rim allies to purchase oil from more-diverse sources strengthens their energy security; and, that removing restrictions on crude oil exports would provide an incentive for our trading partners to remove barriers to U.S. goods.

Comment that challenged the Secretary's national interest finding on procedural grounds asserted that EPCA and the Administrative Procedure Act require public notice and comment prior to the finding; that the notice of proposed rulemaking failed to disclose whether EPCA's "mandated" criteria were considered in making the finding; and, that the notice did not make public the substance of advice received from any government agency concerning the finding.

The notice of proposed rulemaking met all applicable statutory provisions relating to notice and comment requirements. Neither the language of the applicable statutory provisions, nor any reasonable interpretation of the language, imposes a notice and comment requirement with respect to the national interest finding. Furthermore, EPCA does not "mandate" criteria. It grants the Secretary broad discretion in making the finding subject only to the criteria that exemption be based on a "reasonable classification or basis" as the Secretary determines to be appropriate and consistent with the national interest and the purposes of EPCA. The basis for the Secretary's finding was included with the proposed rule. Finally, advice obtained from other agencies is not routinely placed in the public record so as to facilitate frank interagency communication in rulemaking decisions.

Another comment stated that the national interest finding was improper under the delegation provisions in section 2 of Executive Order 11912 because the rule did not state that the Secretary had consulted with the Secretary of Defense or other agencies. Section 2 of the Executive Order cites section 5(a) of the 1969 Export Administration Act. That section of the Act did not require consultation with the Secretary of Defense specifically but merely charged the Secretary to seek information and advice from other agencies. As stated with the proposed rule, the Secretary's decision was taken in "consultation with other appropriate U.S. Government officials" and, as noted above, after a decision by the President pursuant to a recommendation of the Economic Policy Council.

Finally, comments were received concerning the classification of the proposed rule as not a major rule under E.O. 12291, alleging that exports of oil would result in an annual impact on the economy of $100 million or more. The conclusion in the comment was based on the theoretical effects of Alaska oil exports in general and not Cook Inlet oil specifically. The Department confirms its conclusion that the readily forseeable impact of this rule is less than $100 million annually.

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Industrial Resource Administration has determined that:

1. This final rule is not a major rule within the meaning of section 1 of Executive Order 12291 because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or in the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, preparation of a Regulatory Impact Analysis is not required, and neither a preliminary nor a final Regulatory Impact Analysis has been or will be prepared.

2. The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration that this

final rule will not have a significant economic impact on a substantial number of small entities. This is because the rule relieves a U.S. government prohibition on crude oil exports derived from Alaska's Cook Inlet and has no direct or indirect costs of compliance other than a routine licensing requirement. As a result, neither an initial nor final Regulatory Flexibility Analysis has been or will be prepared.

3. This rule affects collections of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501, *et seq*). These collections have been approved by the Office of Management and Budget under control numbers 0625–0001 and 0625–0155.

4. This rule is effective June 4, 1986 since it is a substantive rule that relieves a restriction on certain crude oil exports, and therefore is excepted under section 553(d)(1) of the Administrative Procedure Act (5 U.S.C. 553) from the requirement of a thirty (30) day delay in effective date.

List of Subjects in 15 CFR Part 377

Administrative practice and procedure, Exports, Forests and forest products, Petroleum, Reporting and recordkeeping requirements.

Accordingly, Part 377 of Title 15, Code of Federal Regulations, is amended as follows:

PART 377—SHORT SUPPLY CONTROLS AND MONITORING

1. The authority citation for Part 377 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat 503, 50 U.S.C. app. 2401 *et seq.* as amended by Pub. L. 97–145, of Dec. 29, 1981 and by Pub. L. 99–64 of July 12, 1985, E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Sec. 103, Pub. L. 94–163, as amended, (42 U.S.C. 6212) as amended by Pub. L. 99–58 of July 2, 1985; Sec. 28 Pub. L. 93–153, (30 U.S.C. 185); Sec. 28 Pub. L. 93–372, (43 U.S.C 1354); E.O. 11912 of April 3, 1976 (41 FR 15825, as amended); Sec. 101 and 201(11)(e) Pub. L. 94–258, (10 U.S.C. 7420 and 7430(e)); and Presidential Findings (50 FR 25188, June 18, 1985).

2. Section 377.8(d)(1)(ix) is added as follows:

§ 377.8 Petroleum and petroleum products.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 230

[Release No. 33–6645; File No. S7–38–84]

Definition of Annuity Contract or Optional Annuity Contract

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of rule.

SUMMARY: The Commission is adopting a rule, which establishes a "safe harbor" for certain forms of annuity contracts that will not be deemed subject to the federal securities laws. The Commission is also withdrawing its general statement of policy regarding the factors which should be considered in any determination of the status under the federal securities laws of certain contracts issued by insurance companies. The "safe harbor" rule enables a corporation subject to insurance regulation by any state to offer and sell a contract with reasonable assurance that it falls within the meaning of the phrase "annuity contract or optional annuity contract," as used in section 3(a)(8) of the Securities Act of 1933, provided that the rule's conditions are satisfied. The release also addresses several related matters.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Brian M. Kaplowitz, Special Counsel, (202) 272–2061, or Joseph R. Fleming, Attorney, (202) 272–3017, Office of Insurance Products and Legal Compliance, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission ("Commission") today is adopting rule 151 under the Securities Act of 1933 [15 U.S.C. 77a et seq.] ("Act") relating to certain types of annuity contracts issued by insurance companies, including what are generally known as guaranteed investment contracts.[1] Simultaneously, the Commission is withdrawing Securities Act Release No. 6051 (April 5, 1979) ("Release 6051"), 44 FR 21626 (April 11, 1979), an interpretative release concerning the availability of section 3(a)(8) of the Act to certain contracts issued by insurance companies. Rule 151 provides "safe harbor" from the federal securities laws for an "annuity contract or optional annuity contract," as those terms are used in section 3(a)(8) of the Act, that satisfies all of the rule's conditions. The rule specifies a three-prong test for determining whether an insurer is able to find refuge for its contract in the "safe harbor." The annuity or optional annuity contract must (1) be issued by a corporation (an "insurer") subject to the supervision of the state insurance commissioner, bank commissioner, or any agency or officer performing like functions; (2) include certain guarantees of principal and interest sufficient for the insurer to be deemed to assume the investment risk; and (3) not be marketed primarily as an investment. The general purpose of the rule is to provide greater certainty regarding the availability of section 3(a)(8) to certain annuity products and to facilitate the Commission's effective administration of its statutes. The Commission is also expressing its views on several ancillary items relating to the subject matter of the rule.

Rule 151 was proposed for public comment on November 21, 1984.[2] The original comment period closed February 15, 1985, but was subsequently extended to April 15, 1985.[3] In response

---

[1] On November 8, 1985, the Secretary of Commerce determined that the export of crude oil derived from Alaska's Cook Inlet is consistent with the national interest and the purposes of the Energy Policy and Conservation Act.

[1] The contracts included within this term are discussed in Securities Act Rel. No. 5838 (June 22, 1977) [42 FR 32861 (June 28, 1977)]. As relevant here, these contracts, generally speaking, are deferred annuities under which the purchaser agrees to pay money to an insurer (either in a lump sum or in installments) and the insurer promises to pay interest at a guaranteed rate for the life of the contract. In some contracts, the insurer may periodically pay discretionary excess interest over and above the guaranteed rate. In addition, virtually all of these contracts allow the purchaser to buy an annuity with the monies accumulated under the contract. Finally, these contracts are issued on either an individual or a group basis.

[2] The reasons for proposing rule 151 and the administrative history of the rule are set forth in Securities Act Release No. 6558 (November 21, 1984) ("proposing release") [49 FR 46730 (November 28, 1984)].

[3] *See* Securities Act Rel. No. 6588 (February 15, 1985) [50 FR 7188 (February 21, 1985)]. This extension of the comment period was made at the request of the insurance industry's principal trade association to give it more time to study and prepare comments on the proposed rule.

to its request for comments, the Commission received twenty-two letters. While almost all of the commentators commended the Commission for attempting to bring greater certainty to a complex area through objective standards, many expressed concern over certain elements of the proposed rule and some of the positions taken by the Commission in the proposing release. Several commentators also suggested refinements which they believed would enhance the rule's usefulness. After considering the comments, the Commission has decided to adopt rule 151, subject to several technical and clarifying changes, and to issue this release, which (together with the proposing release to the extent not modified by this release) will assist in interpreting the rule.

Discussion

The first portion of this discussion will focus on specific elements of the rule and certain interpretive positions taken by the Commission in the proposing release about which comments and suggestions were offered. The remainder of the discussion will deal with the issues raised by the commentators about the Commission's views on several ancillary matters relating to the rule.

1. Characterization of the Rule as a Safe Harbor Definition

One commentator questioned the Commission's characterization of the rule as a "definition" of the phrase "annuity contract or optional annuity contract" as used in section 3(a)(8) of the Act. This commentator suggested that it would be more appropriate conceptually to caption the rule as a "safe harbor," since it is, in the commentator's opinion, simply "an interpretation describing those forms of annuity contracts that clearly fall within the boundaries of section 3(a)(8)."

Rule 151 is merely a "safe harbor," not an all-inclusive definition purporting to encompass every annuity contract that falls within the section 3(a)(8) exclusion. The rule, therefore, does not attempt to identify the outer limits of section 3(a)(8) beyond which a contract, though denominated "insurance," is a security subject to federal regulation. Rather, the rule simply defines a class of annuities that the Commission believes is clearly entitled to rely on the section. While compliance with rule 151 will assure "non-security status," failure to comply with the rule would not mandate "security status" for an annuity product. Finally, as stated in the proposing release, an insurer offering a contract that, for one reason or another, does not satisfy all of the rule's conditions may still rely directly on section 3(a)(8), albeit with no Commission assurance that the contract is covered by the section 3(a)(8) exclusion.[4] The Commission has revised the caption of the rule to better emphasize that it is just a "safe harbor."

2. Paragraph (a)(1)—State Regulation

Paragraph (a)(1), as proposed, would require that the contract be issued by a corporation subject to regulation as an issuer of insurance by any agency or officer of any State or Territory of the United States or District of Columbia. As stated in the proposing release, the purpose of this initial requirement is to determine whether the status under the Act of the investment vehicle in question should be analyzed under section 3(a)(8).[5]

One commentator noted that while paragraph (a)(1), as proposed, did not mirror exactly the corresponding language of section 3(a)(8), it appeared to be consistent with the purpose of the section. However, this commentator suggested that the rule should also provide that "the contract itself by subject to state regulation as an annuity or insurance contract." This requirement, according to the commentator, would insure that the rule would be available only for those contracts which were subject to relevant state regulation with respect to such matters as reserves, investment restrictions, and approval of contract forms.

The Commission agrees with the concerns that apparently prompted the comment—only bona fide annuity contracts should be able to rely on the "safe harbor" rule.[6] The wording of the rule has been modified slightly to make it clearer that only "annuity or optional annuity contracts" may use the rule. Any such contract issued by an insurer satisfying the rule's requirements would, no doubt, be "subject to state regulation as an annuity or insurance." Accordingly, the Commission believes no further modification is needed.

3. Mortality Risk

Release 6051 contained a requirement that the insurer assume a "meaningful mortality risk" under the contract by guaranteeing "permanent" annuity purchase rates that are not "significantly lower than those otherwise commercially available." In the proposing release, the Commission requested comments on whether a mortality risk assumption requirement should be an element of the rule, and, if so, how best to implement such a requirement.

Five commentators, associated primarily with the life insurance industry, supported omitting any *per se* mortality risk test from the proposed rule. In their view, eliminating such a test is supported by the legislative history of section 3(a)(8) and the relevant case law. These commentators went on, however, to urge the Commission to make clear that any decision to omit a mortality risk test is not intended to mean that mortality risk is not an appropriate consideration in a section 3(a)(8) "facts and circumstances" analysis for annuity contracts outside rule 151. One of the commentators emphasized that this approach is consistent with the Commission's position, as stated in the proposing release, that to the extent an insurer is unable to rely on the rule, it has the responsibility for determining the status of its contract under section 3(a)(8). Thus, the commentator contended that any assessment of the relevance of mortality risk for contracts not coming within the "safe harbor" should be left to the issuing insurance company.

Two commentators argued that rule 151 should contain a mortality risk assumption requirement. One of them noted that many owners of single premium deferred annuities ("SPDAs")[7] may not be protected by the insurance guaranty association laws of some states.[8] This commentator stated that insurance guaranty associations that do not cover SPDAs consider such contracts to be investment vehicles and not insurance. The reason for this determination, the commentator said, is because SPDAs frequently provide

---

[4] In this regard, insurers offering life insurance contracts are in the same position as those who seek to offer annuity contracts in direct reliance upon section 3(a)(8). The securities law status of a life insurance contract may be analyzed by reference to the principles discussed in rule 151 and accompanying releases and by reference to relevant judicial interpretation of section 3(a)(8).

It should be noted that rule 151 is not intended to address appropriate accounting treatment under generally accepted accounting principles.

[5] 49 FR at 49752 (proposing release at 6).

[6] The case law seems to support the substance of the comment. *See Securities and Exchange Commission* v. *Variable Annuity Life Ins. Co.*, 359 U.S. 65, 67 (1959) ("VALIC").

[7] SPDAs are a type of guaranteed investment contract. *See* note 1, *supra*.

[8] Generally, state association guaranty laws provide for the indemnification of losses suffered by contractowners due to the impairment or insolvency of an insurer. An association derives funds for this purpose from assessments against insurers doing business in the state.

lower guaranteed annuity conversion rates than "bona fide" annuities, and thus do not shift a material mortality risk to the insurer.

After analysis of the relevant cases, [9] as well as section 3(a)(8) and its legislative history, the Commission has determined not to include a mortality risk assumption requirement as a separate element of rule 151. [10] When Congress created the insurance exclusion under the Act, there were certain "traditional" annuity contracts in effect that involved no assumption of mortality or longevity risks by the insurer. [11] However, the Commission is not concluding by this action that consideration of mortality risk assumption has no place in a section 3(a)(8) analysis of annuity contracts outside the "safe harbor." The presence or absence of a mortality risk assumption may be an appropriate factor to consider in a general facts and circumstances analysis under section 3(a)(8).

4. Paragraph (a)(2)—Investment Risk

An insurer may rely on the rule only if it assumes the investment risk under the contract. [12] The rule approaches this issue in terms of the degree of investment risk assumed by the insurer and sets objective standards in paragraph (b) for the minimum risk that must be assumed under the contract. Paragraph (b) contains three conditions that a contract must meet in order for the insurer to establish that is has assumed sufficient investment risk for purposes of the "safe harbor" rule.

A. Paragraph (b)(1)—Separate Account Funding of Contracts

Paragraph (b)(1) of the rule provides that one of the conditions that must be met for the insurer to be deemed to have assumed the investment risk under the contract is that the value of the contract not vary according to the investment experience of a separate account. Commentators on paragraph (b)(1) asked whether contracts that provide for the allocation of contributions to a separate account but do *not* provide for contract values that depend on the success of any investments in the separate account are disqualified from relying on the "safe harbor" rule. This use of a separate account, they maintained, has absolutely no effect on the contractual guarantees made by the insurer. They also argued that funds in this type of account are supported by the totality of general account assets. The commentators noted that insurer use such "nonunitized" separate accounts to facilitate the matching of maturities of fixed-income securities that support contract liabilities and as a mechanism for complying with state law reserve requirements or statutory accounting standards. [13]

A contract which provides for the allocation of net contributions to a separate account but does not provide for contract values that vary with the investment performance of the separate account would satisfy paragraph (b)(1) of the rule. This position presupposes that such "nonunitized" separate accounts are used solely to accommodate the circumstances described above and that the assets of the insurer's general account will be available to meet the guarantees provided under the contract without resulting in additional investment risk. Put another way, these accounts are not functionally equivalent to the types of separate accounts with which paragraph (b)(1) is concerned.

B. Paragraph (b)(2)—Guarantee of Principal and a Minimum Rate of Interest

As proposed, the second condition of the rule's investment risk test would have required that the insurer must, for the life of the contract, (1) guarantee the principal amount of purchase payments (net of deductions for sales, administrative, or other expenses) and interest credited thereto (paragraph (b)(2)(i)); and (2) credit a specified rate of interest to purchase payments and interest credited thereto (paragraph (b)(2)(ii)). The main points raised by the commentators concerning this condition involved market value adjustment features, deferred charges and the guaranteed minimum interest rate.

Market Value Adjustment Features. In the proposing release, the Commission took the position that the requirements of paragraphs (b)(2) (i) and (ii) would preclude a contract with a market value adjustment ("MVA") feature from relying on the safe harbor provided by the rule. [14]

The Commission based its conclusion on the Supreme Court's determination in *VALIC* that the concept of

". . . 'insurance' involves a guarantee that at least some fraction of the benefits will be payable in fixed amounts." [15]

Several commentators acknowledged that MVA features shift some investment risk back to the contractowner. These commentators and others, however, challenged what they viewed as an implicit conclusion by the Commission that this feature alone could jeopardize a contract's status under section 3(a)(8) generally. They maintained that the terms of these provisions vary widely from contract to contract and that the MVA feature of a given contract may well be designed so that the insurer assumes sufficient investment risk under the contract to qualify it for the section 3(a)(8) exclusion. Moreover, some of these commentators urged, based in part on similar reasoning, that some types of MVA features should be expressly permitted under the rule. [16] Accordingly,

---

[9] *See, e.g., VALIC*, 359 U.S. 65; *Securities and Exchange Commission* v. *United Benefit Life Ins. Co.*, 387 U.S. 202 (1967) ("United Benefit").

[10] The Commission notes that the states are moving to eliminate the gaps in coverage and protection under their guaranty association systems for investors in guaranteed investment contracts. *See, e.g.*, 27 N.Y. Ins. Law 7701–7718 (McKinney's 1985 Pocket Part); NAIC Life and Health Insurance Guaranty Association Model Act (1985) (the former model law was the basis for guaranty association laws in 26 states). In any event, the presence or absence of coverage under these laws is not determinative of the issue of whether a mortality risk assumption requirement is necessary. The Supreme Court in *VALIC* said, "the meaning of 'insurance' or 'annuity' under these Federal Acts is a federal question." *VALIC*, 359 U.S. at 69.

[11] A commonly accepted form of "annuity" issued prior to 1933 provided for payments in fixed amounts at regular intervals over a stated number of years ("annuities certain"). *See, e.g.*, C. Crobaugh, *Annuities and Their Uses*, 21–22 (1933); G. Fitch, *What Everybody Wants to Know About Annuities*, 9–11 (1934).

[12] This position is well supported by the applicable case law. *VALIC*, 359 U.S. 65; *United Benefit*, 387 U.S. 202.

[13] The term "nonunitized," as used here, reflects the fact that this type of separate account is *not* structured as a single unit operating independently of the investment experience of the insurer's general account.

[14] 49 FR at 46752, n. 17 (proposing release at 10, n. 17). Under an MVA feature, the insured adjusts the proceeds a contractowner receives upon an early surrender (*i.e.*, a surrender made before the end of a period of guaranteed discretionary excess interest) to reflect change in the market value of its portfolio securities supporting the contract. If the market value of the insurer's assets has decreased (*e.g.*, interest rates have increased for comparable interest-bearing instruments) the amount payable upon surrender is adjusted downward. Many MVA features are based upon a formula that recognizes the disparity between the rate of interest being credited to the contract's accumulated value and the rate the insurer is crediting on new money received under new or existing contracts. For surrenders made at a time of increasing market rates, the adjustment could affect both interest accretions and principal.

[15] *VALIC*, 359 U.S. at 71.

[16] Commentators also argued for permitting some MVA features under the rule because, they said, these provisions act as additional surrender charges and thereby enhance the contract's appeal as a long-term retirement vehicle. The Commission believes, however, that the shifting of investment risk distinguishes an MVA feature from a surrender charge. *See* note 20, *infra*.

two commentators argued that the status of a contract with an MVA feature under either the rule or section 3(a)(8) should depend upon the total "facts and circumstances" in each case. In the commentators' view, among the factors relevant to this analysis are (1) the terms of the MVA provision; (2) the circumstances that trigger its application; (3) whether the value accumulated under the contract may be withdrawn in installments over time, or applied to the purchase of guaranteed annuity benefits, without diminution; and (4) whether the withdrawal provisions to which an MVA is applicable are primary or incidental features of the contract.

Because the Commission is concerned that a contract which includes an MVA feature may transfer investment risk to the contractowner to an extent that "safe harbor" treatment would be inappropriate, it continues to believe that it should not permit issuers of such contracts to rely on rule 151.[17] Further, while the proposing release referred only to an "MVA feature," the Commission regards any contract that incorporates a provision, irrespective of the name given to it, which functions in a fashion substantially similar to an MVA as not entitled to the protections afforded by the rule. For example, if a contract includes a damages or default clause that operates like an MVA feature, and if the clause is designed to compensate the insurer under certain circumstances for any loss in market value of the investments supporting the guarantees made by the insurer under the contract, that clause will result in the contract's failure to satisfy paragraph (b)(2) of the rule.[18]

By deciding that a contract with an MVA feature may not rely on rule 151, however, the Commission, as noted in the proposing release, emphasizes that the presence of this feature should not create the negative inference that no such contract is eligible for the exclusion under section 3(a)(8). The degree to which any given MVA feature affects investment risk, and, therefore, the status of the contract, would depend on, among other things, the terms of the feature. In this regard, an MVA feature that invaded principal would be more problematic under a section 3(a)(8) analysis than one that merely requires forfeiture of a small portion of previously credited excess interest.[19]

Deferred Charges. Paragraph (b)(2)(i) of the proposed rule would require that the insurer for the life of the contract guarantee ". . . the principal amount of purchase payments (net of deductions for sales, administrative, or other expenses) and interest credited thereto." The Commission received a substantial number of comments requesting that this provision of the rule be clarified to avoid any appearance of favoring front-end loaded contracts over those that incorporate contingent deferred sales charges or defray sales and other charges and expenses through a charge against the contract value. This interpretation, they said, results from the positioning of the parenthetical reference to deductions, which seems to modify only "purchase payments" and not the entire amount credited under the contract, including interest. A few of these commentators pointed out that the presence of deferred charges encourages the product's use as a long-term retirement vehicle. Thus, several commentators suggested that this interpretive problem would be resolved by moving the parenthetical to the end of paragraph (b)(2)(i).

This rule has been modified slightly by adopting in substance the revision suggested by the commentators. This revision, the Commission believes, makes clear that the rule does not discriminate against contracts that do not have front-end charge structures. In making this change, however, the Commission assumes that it will not result in expense structures that transfer additional investment risk from the insurer to a contractowner.[20]

Minimum Interest Rate. In footnote 16 of the proposing release, the Commission indicated that the specified interest rate credited under the contract, as prescribed in paragraph (b)(2)(ii) of the rule, must at least be equal to the minimum rate required to be credited by the Standard Nonforfeiture Law used by the states.

Two of the three commentators on this point cited practical concerns which they believe make this standard unworkable for measuring the adequacy of the specified interest rate guaranteed under the contract. They observed that (1) a few states have no annuity nonforfeiture law at all on which to base the minimum specified interest rate; (2) the states that currently have such a law may not remain uniform in the future; and (3) there may be forms of annuities, such as group contracts and individual "modified guaranteed annuities," that will not be subject to such a law. One of them mentioned that group annuity contracts generally do not provide interest rate guarantees (minimum or otherwise) of unlimited duration. This commentator further noted that group annuity contracts that include an interest rate guarantee, even a very conservative one, for an indefinite period of time might present the issuing insurer with problems in complying with state law reserving requirements, particularly during a period of rapidly declining interest rates. Thus, this commentator specifically recommended that insurers be permitted to adjust, not more frequently than once every five years, the minimum interest rate in group annuity contracts. The commentator stated that if an insurer modified or eliminated the minimum guarantee at the end of a current five year time period because, *e.g.*, of a sharp drop in interest rates, the group annuity contract would no longer fall within the "safe harbor", and the insurer would thereafter have to rely directly on section 3(a)(8).

Both of these commentators suggested that footnote 16 be reworded to provide that the specified interest rate must not be less than the minimum rate under the

---

[17] The way in which an MVA feature may affect investment risk is perhaps best shown by example. Suppose a given contract has a minimum rate of 3% and an excess rate for the year of 5%. Further suppose that the contract is funded by Treasury bonds (paying, e.g., 8¼%) and has an MVA feature tied to the Treasury bond rate. The insurer, by the MVA feature, will have effectively shifted to the investor the risk of any changes in the Treasury bond rate. If the rate moves up, the investor would be more likely to wish to withdraw all or part of the money invested in the contract to reinvest at higher rates. If he or she does so, however, the insurer can adjust the amount withdrawn by discounting it in accordance with those rates. Thus, the insurer is able to protect against redemptions resulting from an upturn in interest rates by adjusting downward the amount payable upon redemption. Of course, the insurer would already be partially protected against a downturn in interest rates by being able to reassess the discretionary rate each year and lower interest if necessary.

[18] For an example of this type of damages or default clause, *see* State Mutual Life Assurance Company of America (pub. avail. December 9, 1985).

[19] In the simple example given *supra* at note 17, a sufficient increase in the Treasury bond rate could cause an invasion of principal, absent an express limitation. Thus, if the investor made a $1,000 payment on January 1 (at 8% simple interest, accrued daily), he or she would have $1,040 available for withdrawal on June 30. If that amount was adjusted for a Treasury bond rate of 10%, however, the investor would receive only $945.45 upon withdrawal, almost $55 less than principal.

Five guaranteed investment contracts have been registered with the Commission under the Act to date. Each had an MVA feature that could invade principal.

[20] For example, a contingent deferred sales load ("CDSL") is simply a sales load that is deducted upon partial or full redemption and that is contingent on the number of years the contract has been in effect. A CDSL normally does not shift additional investment risk to the contractowner, and should be distinguished from an MVA. *See* the MVA discussion *supra* note 16 and accompanying text.

BEST COPY AVAILABLE

relevant nonforfeiture laws in the jurisdiction in which the contract is issued. Absent such a law, they maintained, the rate should be not less than the minimum rate required for individual annuity contracts under the Standard Nonforfeiture Law approved by the National Association of Insurance Commissioners ("NAIC").[21]

The third commentator in this area was critical of the inclusion of a minimum interest rate as a requirement of the rule. The Commission, this commentator said, "appears to assume the role of a state legislature by prescribing the substantive content of annuity contracts that are not necessarily within the purview of the Commission's jurisdiction." For that reason, this commentator urged the Commission to delete paragraph (b)(2)(ii) entirely or, alternatively, to remove the minimum rate requirement noted in the proposing release.

The Commission is adopting paragraph (b)(2)(ii) as proposed. It would be inappropriate, particularly in light of clear judicial precedent, to eliminate this provision of the proposal. The Supreme Court in *VALIC* unambiguously concluded that absent some element of a fixed return, *i.e.*, "[s]ome investment risk-taking on the part of the company,"[22] an annuity contract is outside the scope of section 3(a)(8). As stated in the proposing release, paragraphs (b)(2) (i) and (ii) of the rule's investment risk test work in tandem to ensure that a contract relying on the rule includes a guarantee by the insurer that at least some portion of benefits will be paid in a fixed amount.

With respect to footnote 16 of the proposing release, the Commission has clarified the minimum interest rate standard stated therein to take into account many of the practical problems noted by the commentators. In addition, the standard for both individual and group contracts is now set out in paragraph (c) of the rule to make it easier for readers to ascertain the meaning of the term "specified rate of interest," as used paragraph (b)(2)(ii) of the rule.

The Commission has determined not to extend this standard to allow, as requested by one commentator, insurers to modify the minimum interest rate in group annuity contracts at five-year intervals. As discussed above, a guarantee of a minimum interest rate for the life of the contract is critical for purposes of the "safe harbor" rule.

[21] This law is the model for the annuity nonforfeiture laws of most states.

[22] *VALIC*, 359 U.S. at 71.

C. Paragraph (b)(3)—Guarantee of Excess Interest for At Least One Year Periods

The final condition of the proposed rule's investment risk test would require the insurer to guarantee that the rate of any discretionary excess interest credited under the contract will not be modified more frequently than once per year. This provision of the rule elicited a variety of comments, which can generally be broken down into three categories. The commentators expressed concern about the legal justification for this provision, the meaning and application of the term "year," and adjustments to the excess interest rate.

Justification. On commentator contended that the guarantee of excess interest for one year periods still leaves the purchaser shouldering much, if not all, of the investment risk under the contract. This commentator further contended that the guarantees of principal and one year's interest are an inadequate substitute for federal securities law type disclosures about the insurer's financial status, its investment policies and the charges deducted under the contract.

On the other hand, five commentators strongly urged the Commission to omit paragraph (b)(3) from the final rule. They contended that the one-year requirement is both unnecessary and founded on erroneous premises. The frequency of excess interest credits, they maintained, is not a reasonable indicator of the allocation of attendant investment risk between insurer and contractowner. Accordingly, four of these commentators argued that if a contract satisfies the first two conditions of the rule's investment risk test, there is a sufficient amount of risk assumption by the insurer for purposes of section 3(a)(8). Finally, a few commentators argued that Congress, through fairly recent amendments to the federal tax laws, has already taken adequate steps to encourage the use of deferred annuity contracts to meet long-term investment goals, such as the accumulation of savings for retirement, and discourage their use as short-term, tax deferred investment vehicles.[23] They asserted that the new tax law provisions, in contrast to the provisions upon which the Commission based the one-year requirement, are better suited to prevent annuities from being used as a tax favored, short-term investment.[24]

While the commentators make some reasonable arguments, the Commission is adopting the one-year requirement as proposed. Taking the position that various types of excess interest contracts are entitled to rely on the section 3(a)(8) exclusion is itself a major step. The length of time between interest rate modifications is one legitimate measure of the degree of investment risk assumed by the insurer. Designing a "safe harbor" rule is essentially a matter of balancing the legitimate interests of flexibility in structuring insurance products against the need to provide adequate investor protection. Where the limits of the "safe harbor" are set is a matter of discretion and judgment. The Commission believes, therefore, that the one-year period is, on balance, a reasonable condition, complementing the two other components of the rule's investment risk test.

Interpretation of the Term "Year". To avoid a series of practical problems, the commentators generally agreed that if the Commission decided to retain the one-year requirement, the release accompanying the final rule should provide clarification and amplification of the term "year." They said that these problems stem from the diverse methods employed by insurance companies in calculating and declaring excess interest.

Several commentators mentioned that where excess interest is declared for a "year," that year may be a calendar year,[25] a contract year,[26] or some other

[23] The Tax Equity and Fiscal Responsibility Act of 1982, Pub. L. 97-248, 96 Stat. 324 (1982) ("TEFRA"), changed the tax consequences to contractowners of "premature distributions" from annuity contracts; *i.e.*, distributions received under the contract prior to the annuity starting date. Under TEFRA, premature distributions are treated as taxable income to the extent the cash value of the annuity contract exceeds the investment therein and the remainder as a return of principal. I.R.C. 72(e) (1982). In addition, TEFRA imposed a five percent penalty tax on premature distributions not meeting certain conditions. I.R.C. 72(q) (1982). The Deficit Reduction Act of 1984, Pub. L. 98-369, 98 Stat. 780 (1984), stiffened the penalty provision. I.R.C. 72(q) (1984).

[24] In the proposing release, the Commission cited certain TEFRA provisions as indirect support for using the one-year requirement. TEFRA provided special tax treatment to insurers for discretionary excess interest, provided that the excess interest rate was guaranteed in advance for not less than 12 months. I.R.C. 805(f) (1982). In 1984, Congress repealed this section when it redesigned the statutory scheme for taxation of life insurance companies. Deficit Reduction Act of 1984, Pub. L. 98-369, 98 Stat. 787 (1984).

[25] Under a calendar year method, the excess rate may be adjusted once per year on January 1, regardless of when payments are received by the insurer from a particular contractowner.

[26] Under a contract year method, the excess rate may be adjusted once per year on the anniversary of the issuance of the contract, regardless of when payments are received by the insurer from a particular contractowner.

12-month period. Consequently, they asked that the Commission not restrict the use of these methods. In addition, a few commentators asked how the prescribed time period is to be linked to purchase payments under a given contract or class of contracts. In this regard, one commentator observed that excess rates may be established on a contract basis, pursuant to which rates are declared for all funds under the contract, or they may be determined on a payment basis, where specified rates are established for all payments received in a particular time period (day, month, quarter, etc.).

A number of commentators were concerned with what they referred to as "stub end" problems.[27] The commentators offered a series of hypothetical situations which they said illustrates only a few of the ways "stub end" problems arise. One such illustration involved the situation where an insurer guarantees on January 1 that all money received, *i.e.*, new money, on new or existing contracts during the ensuing calendar year will be guaranteed excess interest at a specified rate. Under this arrangement, any contract sold after the beginning of the 12-month period would not have a full one-year guarantee for money received that year.[28] If the insurer is not permitted to use the same discretionary interest rate for all new money received during the calendar year, it would be required to make separate 12-month guarantees with respect to each contract issued or each payment received. This, the commentators stressed, could burden insurers administering contracts in this manner with significant additional administrative and systems costs.

The Commission recognizes that the one-year requirement can raise interpretive issues such as those mentioned by the commentators. However, a "rule of reason" interpretation is desirable to afford some flexibility to insurers. More specifically, the Commission does not intend to foreclose insurers from using calendar year, contract year or other twelve-month periods.[29] Neither does it wish to prevent insurers from establishing rates on a contract basis or a per payment basis, as described above. Also, the Commission has no objection to insurers using a combination of different forms of 12-month periods under the same contract.[30] This position, the Commission believes, should eliminate the "stub end" difficulties about which the commentators were concerned.

In adopting this position the Commission expects that insurers will not manipulate the meaning of the term "year" in a way that circumvents the purposes of this provision of the rule. The Commission and its staff will scrutinize the operation of paragraph (b)(3) and will be prepared to adjust the rule, should any abuses appear.

Adjustments to the Excess Interest Rate. This discussion can be broken down into two sub-categories: (1) increases and "three-tier" contracts, and (2) indexed excess interest features.

Increases and "Three-Tier" Contracts

With respect to increases in the rate of excess interest, two commentators noted that paragraph (b)(3) of the rule appears to prohibit *any* modification of the rate during the one-year period. They suggested that the prohibition should apply only to reductions of the effective rate during the one-year period. One of them said that there appears to be no valid reason for preventing the insurer from increasing a rate during that period, provided the new rate is itself prospective and not subject to reduction during the remainder of the period. This, the commentator asserted, would benefit contractowners. Both commentators, therefore, recommended that paragraph (b)(3) be revised to permit explicitly increases in the excess rate during the one-year period.

In the same vein, two commentators requested the Commission to make clear that the one-year requirement is not intended to preclude the use of so-called "three tier" contracts.[31] They both argued that the third tier does not affect the investment risk borne by the insurer, as long as the second-tier rate is reasonably close to market rates at the time of its declaration. One of them further argued that this contract feature is principally designed to serve as a partial buffer between the insurer and the risk of adverse selection whenever market rates fall below the excess interest rate.[32]

The Commission has decided to extend the rule to permit increases in excess rates, provided that the new rate is not subject to reduction for a further one-year period. Thus, after each additional upward adjustment to the excess rate, the one-year period would begin anew. A downward adjustment would not be permitted until one year from the last increase in the excess rate.

However, "three tier" contracts and contracts that allow a reduction in the excess interest rate before a one-year period has run are excluded from the rule.[33] Such contracts are not necessary to protect against the risk of adverse selection; under the rule's flexible approach to the "stub-end" problems an insurer could structure the method used for establishing the excess interest rate to mitigate this risk.[34] More importantly, these contracts could, in effect, lead to a shorter time period for which total excess interest is guaranteed or could easily be structured to undermine the purpose of the one year guarantee.[35] In

---

[27] Generally speaking, a "stub end" problem occurs when the excess interest rate credited to a particular purchase payment in either the initial or a subsequent year of the contract is guaranteed for less than a 12-month period. For example, if an insurer declares excess interest each January 1, but pays a more current rate on new contracts entered into or new payments received under existing contracts during the year, a payment received under a contract entered into on July 1 may be credited a given amount (the current rate) of excess interest at that rate for only six months (*i.e.*, until the next January 1).

[28] Of course, money received that year would receive twelve month guarantees for the remainder of the contract, *i.e.*, from the next excess interest declaration.

[29] Thus, a scenario such as that discussed in the example *supra* at note 27 is acceptable under the rule.

[30] For example, an insurer may provide separate 12-month guarantees with respect to each payment received under a multiple payment contract. On January 1, after the second contract year, an insurer could convert to a calendar year period for all funds accumulated to date under the contract. Each purchase payment received during the next two years could continue to receive separate 12-month guarantees. This process could be repeated at two year intervals.

[31] A "three-tier" contract is one type of guaranteed investment contract, under the terms of which the insurer agrees to credit a guaranteed minimum interest rate for the life of the contract, excess interest for a specified period (e.g., one year) at a rate near the market rate prevailing when the rate is set, and a third tier of excess interest for a shorter period (e.g., three months).

[32] If, for example, an insurer using a calendar year period guarantees that all money received on new or existing contracts during the ensuing year will be credited excess interest at a specified rate, this rate applies to a potentially unlimited amount of funds to be received during the 12-month period. Thus, if market rates drop below the insurer's specified rate, purchasers may take advantage of the insurer's more favorable rate. This possibility is the "risk of adverse selection." By setting the one-year, second-tier rate just below the market rate and by reserving the right to adjust the third-tier rate up or down on a periodic basis, this commentator maintained that an insurer could reduce the risk of adverse selection and yet still offer competitive rates.

[33] By definition, "three tier" contracts are precluded from relying on the rule. Under these contracts, the third tier rate may be increased *or decreased* at shorter intervals than once per year. *See* note 31, *supra*.

[34] *See* notes 27 and 28 and accompanying text, *supra*.

[35] For example, a "three tier" contract could permit a scenario under which an insurer guarantees a minimum rate of 3% and a second tier, one-year rate of .5%, enabling the insurer to adjust freely the third tier rate to the extent it exceeds 3.5%. Certain types of short-term increases in the excess interest rate could be similarly

Continued

the case of discretionary excess interest, the shorter the period for which such interest is guaranteed, the greater the degree of investment risk shifted from the insurer to the contractowner. With each additional adjustment to the rate of return credited to the value accumulated under the contract, the obligations of the insurer are measured less in fixed-dollar terms and the investor shares to a greater extent the investment experience of the company.[36]

Indexed Excess Interest Features

The Commission indicated in footnote 19 of the proposing release that it intended to exclude from the "safe harbor" any contract pursuant to which excess interest is determined in accordance with an external formula or index ("index feature"), such as a composite bond index or Treasury bill rate. The Commission reasoned that an insurer which uses an index feature externalizes its discretionary excess interest rate, and thus shifts to the contractowner all of the investment risk regarding fluctuations in the rate.

Eight commentators suggested that the Commission reconsider its position. They contended that the insurer bears an investment risk in that the return on its own invested assets may not equal the rate determined under the index feature. One commentator said that purchasers who use annuity contracts to meet long-term investment goals feel more comfortable in having a product where interest rates change more often and track more closely to those of shorter term funds. Finally, to the extent the rule is expanded to encompass index feature contracts, one commentator questioned whether the "safe harbor" is available to such a contract if the rate of excess interest paid (but not the formula pursuant to which the rate is calculated) changes more frequently than once per year.

After reviewing the comments, the Commission has determined that it would be appropriate to extend the rule to permit insurers to make limited use of index features in determining the excess interest rate, so long as the excess rate is not modified more frequently then once per year.[37] The insurer, therefore, would be permitted to specify an index to which it will refer, no more often than annually, to determine the excess rate that it will guarantee under the contract for the next 12-month or longer period. Once determined, the rate of excess interest credited to a particular purchase payment or to the value accumulated under the contract must remain in effect for at least the one-year time period established by the rule.[38] Thus, while the rate of interest calculated under a particular index or formula may fluctuate upward or downward on a daily basis, the excess interest rate actually credited may not fluctuate more than once per year.[39] The Commission is concerned that index feature contracts that adjust the rate of return actually credited on a more frequent basis operate less like a traditional annuity and more like a security and that they shift to the contractowner all of the investment risk regarding fluctuations in that rate.

5. Paragraph (a)(3)—Marketing

The third element of rule 151, as proposed, is the requirement that "[t]he contract is not marketed primarily as an investment." The Commission cited the *United Benefit* case as its principal support for the application of a marketing test as an element in determining whether or not a contract is within the scope of rule 151.[40] The commentators addressed (1) the necessity for a marketing test, (2) the standards to be used in its application, and (3) certain matters incidental to the test, *i.e.*, "opt-out" features.

Necessity For A Marketing Test

Virtually all commentators on this point stated that because of the largely subjective nature of the marketing test, it appears to be fundamentally inconsistent with the Commission's stated goal of providing greater certainty in this area. They emphasized that annuities have always had a large investment component, and that, therefore, it would be unfair to insurers and the public not to market these products as "wise investments."

Although several commentators acknowledged that the Court in *United Benefit* looked beyond the contract to review marketing, they contended that the Supreme Court's analysis was different from that which is implied in the proposing release. They argued that it was only after the Court had determined, based on the degree of investment risk assumption, that the contract was not an insurance product entitled to section 3(a)(8) treatment, did marketing become a part of the Court's ultimate analysis of the contract's status under section 2(1) of the Act.[41] Therefore, they asserted, marketing as a *per se* test has not been found by the Supreme Court to be an essential element of analysis under section 3(a)(8).

The Commission is adopting paragraph (a)(3) as originally proposed. it continues to believe,[42] as the relevant case law supports,[43] that the manner in which a contract is *primarily* marketed is a significant factor which must be considered in determining a contract's status under the federal securities laws. In *United Benefit*, the insurer advertised its product by "emphasizing the possibility of investment return and the experience of United's management in professional investing."[44] The Supreme Court found this activity to be highly relevant in concluding that the contract does not fall within the insurance exclusion of section 3(a)(8) of the Act.

The Standard and Its Application

One commentator suggested that the standard set forth in paragraph (a)(3) of the rule be changed to "not marketed as a security" because "the term security is well-defined in law." Three other commentators suggested that a more appropriate standard would be that "the contract is not marketed in a manner inconsistent with its character as an annuity."

---

manipulated. Consider the following example. An insurer initially takes a conservative approach by setting the excess interest rate at a level below market. Six months later, after its investment posture becomes clearer, the insurer adjusts the excess rate upward (even to a level above market rates) in an attempt to produce a favorable annual rate of return to the contractowner. If the insurer adjusts the rate downward twelve months after the initial rate was set (*i.e.*, six months after the previous adjustment), it would have shortened to six months the period during which it assumed the risk of interest rate movements. This type of increase would, consequently, not be permissible under the rule.

[36] At some point, such a contract "between the investor and the organization no longer squares with the sort of contract in regard to which Congress in 1933 thought . . ." the disclosure and prospectus delivery requirements of the Act were unnecessary. *VALIC*, 359 U.S. at 78 (Brennan, J., concurring).

[37] The Commission's interpretation of the term "year," as discussed earlier, is pertinent here as well. *See* the discussion in Section 4.C., *supra*.

[38] In addition, an insurer cannot change the terms of the index feature pursuant to which the excess rate is calculated more frequently then once per year.

[39] An upward adjustment to the excess interest rate that is consistent with the Commission's position on increases in the excess rate would, however, be permitted. *See* the discussion titled "Increases and 'Three Tier' Contracts" in Section 4.C., *supra*.

[40] 49 FR at 48753 [proposing release at 12].

[41] 15 U.S.C. 77(b)(1). Section 2(1) defines the term "security" for purposes of the Act to include any "investment contract."

[42] The Commission's position here is consistent with its prior positions in this area. *See, e.g.*, Release 6051; Securities Act Release No. 6099 (April 5, 1979) [44 FR 21656 (April 11, 1979)].

[43] The Commission does not subscribe to the interpretation of the *United Benefit* case proffered by several commentators.

[44] *United Benefit*, 387 U.S. at 211, n.15.

Two of the commentators suggested that explicit guidelines be published. On the other hand, one commentator suggested that explicit guidelines would inhibit the creation of new products and would raise more issues than they solved.

The Commission believes that paragraph (a)(3) accurately sets forth the standard for applying the marketing test. By adopting this standard, however, the Commission is not saying, nor has it ever said, that an insurer in marketing its product cannot describe the investment nature of the contract, including its interest rate sensitivity and tax-favored status.[46] The standard adopted by the rule follows the Court's language in *United Benefit* and means simply that the thrust of the insurer's total marketing plan for the product must be targeted to appeal to purchasers " . . . on the usual insurance basis of stability and security. . . ."[46] For example, a marketing approach that fairly and accurately describes both the insurance and investment features of a particular contract, and that emphasizes the product's usefulness as a long-term insurance device for retirement or income security purposes, would undoubtedly "pass" the rule's marketing test.[47]

Because of the many different types of sales practices and the large mix of product features, it would be counterproductive for the Commission to attempt to provide insurers with a mechanical checklist of acceptable and unacceptable marketing techniques. Such a list would soon be outdated and, as one commentator noted, would deprive insurers of flexibility.

Accordingly, the Commission has determined not to publish specific guidelines for sales literature and marketing activities of insurers.[48]

[46] The Commission recognizes that consideration of the investment aspects of a contract is a natural consequence in any discussion of the traditional long-term nature of annuities. However, a presentation of the contract as one type of tax-sheltered investment that may be directly compared to, for example, tax-free municipal bonds, and that is pitched to the same consumer interest in tax-free or tax-deferred interest income, may lead to a different conclusion.

[46] *United Benefit*, 387 U.S. at 211.

[47] By way of contrast, if a contract is promoted with *primary* emphasis on current discretionary excess interest, and the possibility of future interest, or other investment-oriented features of the contract, that contract would likely fail the marketing test.

[48] The Commission, however, reiterates the position it took in footnote 13 of Release 6051. This position includes, among other things, a statement that the "mischievous oral comments of a single unscrupulous sales person" will not change the status of a company's contract.

"Opt-Out" Features

With respect to "opt-out" features,[49] three commentators wrote that they presumed the method of marketing this feature, rather than its actual presence or operation could cause a contract with this feature to be excluded from the proposed rule. They said "opt-out" provisions prompt insurers to continue crediting competitive discretionary rates, which, in turn, gives contractowners a greater incentive for retaining the contract as a long-term investment.

The presence of an "opt-out" feature in itself will not jeopardize a contract's status under the rule. The proposing release does not state that an "opt-out" feature may not or should not be mentioned when selling an annuity in reliance on the rule. Rather, the rule's approach is to examine the primary emphasis of the entire marketing environment. Depending on how an "opt-out" feature is promoted, its presence may be *one* factor relevant to a finding that a contract is being marketed primarily as an investment.[50]

6. Other Matters

A. Deposit Fund Riders

In the proposing release the Commission took the position that the appropriate method for analyzing deposit fund riders in the context of either rule 151 or section 3(a)(8) generally is to require all such riders to be tested separately from the contracts with which they are associated.[51]

Three commentators urged the Commission to take the position that for purposes of either rule 151 or section 3(a)(8) generally, deposit fund riders that are an integral part of the contract with which they are associated or that are incidental to the contract (and, as to the latter, do not involve a shift of a substantial portion of the investment risk to the contractowner) need not be analyzed independently.

[49] In general, "opt-out" or "bail out" provisions allow contractowners to redeem the annuity without the insurer deducting the surrender charge otherwise applicable to a redemption if at any time the rate of discretionary interest declared by the insurer drops below a rate specified in the annuity contract. *See* 49 FR at 46753, n.24 [proposing release at 13, n.24].

[50] An example of how an "opt-out" feature may enable a contract to be marketed as an investment is where an insurer, in an attempt to compete with short-term liquid investments, such as money market funds, promotes the feature by emphasizing its use as a device to provide liquidity.

[51] A deposit fund rider typically is associated with an insurance contract and permits monies in excess of the minimum purchase payments for the principal contract to be deposited with the insurer and credited with interest at a discretionary rate.

For purposes of rule 151, the Commission is of the view that it is appropriate to determine the status of all deposit fund riders separately from the contracts to which they relate. Such an approach, the Commission believes, is not only in accord with relevant precedent,[52] but also focuses primarily on the fundamental question of whether the insurer is assuming a significant degree of investment risk under any deposit fund rider to any annuity contract. If a deposit fund rider is structured as a security it should be treated as such, regardless of the status of the contract to which it is attached or the nature of its relationship to that contract.

B. Withdrawal of Release 6051

In the release proposing rule 151, the Commission indicated that upon final adoption of the rule it would withdraw Release 6051. Commentators generally agreed in principal that Release 6051 should be withdrawn upon adoption of rule 151. However, many commentators were troubled by the prospect of an absence of interpretive guidance on the factors which should be considered in determining the status of annuity contracts falling outside the "safe harbor." The commentators, therefore, urged the Commission to publish, in the release adopting rule 151 or in a separate release, such guidance.

The Commission has determined to withdraw Release 6051 because of certain reservations about its continued usefulness. Any insurer that is unable, or chooses not, to rely on rule 151 may still look to the rule and accompanying releases for interpretive guidance. The rationale underlying the conditions set forth in the rule is relevant to any section 3(a)(8) determination.[53]

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act [15 U.S.C. 605(b)], the Chairman of the Commission previously certified that the adoption of rule 151 will not have a significant economic impact on a substantial number of small entities. No comments were received on that certification.

Paperwork Reduction Act

The rule is not subject to the Act because it does not impose an information collection requirement.

Text of Rule 151

Part 230 of Chapter II of Title 17 of the Code of Federal Regulations is amended as shown.

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. The authority citation for Part 230 is amended by adding the following citation:

Citations before * * * indicate general rulemaking authority.

Authority: Sec. 19, 48 Stat. 85, as amended; 15 U.S.C. 77s, * * * § 230.151 also issued under section 19(a) [15 U.S.C. 77(s)(a)].

2. By adding § 230.151 to read as follows:

§ 230.151 Safe harbor definition of certain "annuity contracts or optional annuity contracts" within the meaning of Section 3(a)(8).

(a) Any annuity contract or optional annuity contract (a "contract") shall be deemed to be within the provisions of section 3(a)(8) of the Securities Act of 1933 [15 U.S.C. 77c(a)(8)], *Provided*, That

(1) The annuity or optional annuity contract is issued by a corporation (the "insurer") subject to the supervision of the insurance commissioner, bank commissioner, or any agency or officer performing like functions, of any State or Territory of the United States or the District of Columbia;

(2) The insurer assumes the investment risk under the contract as prescribed in paragraph (b) of this section; and

(3) The contract is not marketed primarily as an investment.

(b) The insurer shall be deemed to assume the investment risk under the contract if:

(1) The value of the contract does not vary according to the investment experience of a separate account;

(2) The insurer for the life of the contract

(i) Guarantees the principal amount of purchase payments and interest credited thereto, less any deduction (without regard to its timing) for sales, administrative or other expenses or charges; and

(ii) Credits a specified rate of interest (as defined in paragraph (c) of this section to net purchase payments and interest credited thereto; and

(3) The insurer guarantees that the rate of any interest to be credited in excess of that described in paragraph (b)(2)(ii) of this section will not be modifed more frequently than once per year.

(c) The term "specified rate of interest," as used in paragraph (b)(2)(ii) of this section, means a rate of interest under the contract that is at least equal to the minimum rate required to be credited by the relevant nonforfeiture law in the jurisdiction in which the contract is issued. If that jurisdiction does not have any applicable nonforfeiture law at the time the contract is issued (or if the minimum rate applicable to an existing contract is no longer mandated in that jurisdiction), the specified rate under the contract must at least be equal to the minimum rate then required for individual annuity contracts by the NAIC Standard Nonforfeiture Law.

By the Commission.

Dated: May 28, 1986.

Shirley E. Hollis,

Acting Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 430 and 442

[Docket No. 86N-0191]

Antibiotic Drugs; Sterile Cefotetan Disodium

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the antibiotic drug regulations to provide for the inclusion of accepted standards for a new antibiotic drug, sterile cefotetan disodium. The manufacturer has supplied sufficient data and information to establish its safety and efficacy.

DATES: Effective June 4, 1986; comments, notice of participation, and request for hearing by July 7, 1986; data, information, and analyses to justify a hearing by August 4, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Richard Norton, Center for Drugs and Biologics (HFN-815), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4290.

SUPPLEMENTARY INFORMATION: FDA has evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357), as amended, with respect to a request for approval of a new antibiotic drug, sterile cefotetan disodium. The agency has concluded that the data supplied by the manufacturer concerning this antibiotic drug are adequate to establish its safety and efficacy when used as directed in the labeling and that the regulations should be amended in Parts 430 and 442 (21 CFR Parts 430 and 442) to provide for the inclusion of accepted standards for the product.

Environmental Impact

The agency has determined under 21 CFR 25.24(c)(6) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Submitting Comments and Filing Objections

This final rule announces standards that FDA has accepted in a request for approval of an antibiotic drug. Because this final rule is not controversial and because when effective it provides notice of accepted standards, notice and comment procedure and delayed effective date are found to be unnecessary and not in the public interest. This final rule, therefore, is effective June 4, 1986. However, interested persons may, on or before July 7, 1986, submit written comments to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this final rule may file objections to it and request a hearing. Reasonable grounds for the hearing must be shown. Any person who decides to seek a hearing must file (1) on or before July 7, 1986, a written notice of participation and request for hearing, and (2) on or before August 4, 1986, the data, information, and analyses on which the person relies to justify a hearing, as specified in 21 CFR 314.300. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact

precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the persons(s) who request(s) the hearing, making findings and conclusions and denying a hearing. All submissions must be filed in three copies, identified with the docket number appearing in the heading of this order and filed with the Dockets Management Branch.

The procedures and requirements govering this order, a notice of participation and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and grant or denial of a hearing are contained in 21 CFR 314.300.

All submissions under this order, except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Dockets Management Branch (address above), between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects

21 CFR Part 430

Administrative practice and procedure; Antibiotics.

21 CFR Part 442

Antibiotics.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Parts 430 and 442 are amended as follows:

PART 430—ANTIBIOTIC DRUGS; GENERAL

1. The authority citation for 21 CFR Part 430 continues to read as follows:

Authority: Secs. 507, 701(a), 59 Stat. 463 as amended, 52 Stat. 1055 (21 U.S.C. 357, 371(a)); 21 CFR 5.10.

2. Section 430.5 is amended by adding new paragraphs (a)(88) and (b)(90) to read as follows:

§ 430.5 Definitions of master and working standards.

(a) * * *

(88) *Cefotetan.* The term "cefotetan master standard" means a specific lot of cefotetan that is designated by the Commissioner as the standard of comparison in determining the potency of the cefotetan working standard.

(b) * * *

(90) *Cefotetan.* The term "cefotetan working standard" means a specific lot of a homogeneous preparation of cefotetan.

3. Section 430.6 is amended by adding new paragraph (b)(90) to read as follows:

§ 430.6 Definitions of the terms "unit" and "microgram" as applied to antibiotic substances.

* * * * *

(b) * * *

(90) *Cefotetan.* The term "microgram" applied to cefotetan means the cefotetan activity (potency) contained in 1.012 micrograms of the cefotetan master standard.

PART 442—CEPHA ANTIBIOTIC DRUGS

4. The authority citation for 21 CFR Part 442 is revised to read as follows and the authority citations following the sections in Part 442 are removed.

Authority: Sec. 507, 59 Stat. 463 as amended (21 U.S.C. 357); 21 CFR 5.10.

5. New § 442.53a is added to read as follows:

§ 442.53a Sterile cefotetan disodium.

(a) *Requirements for certification—(1) Standards of identity, strength, quality, and purity.* Sterile cefotetan disodium is a white to off-white lyophilized powder. It is so purified and dried that:

(i) If the cefotetan disodium is not packaged for dispensing, its potency is not less than 890 micrograms and not more than 970 micrograms of cefotetan per milligram on the anhydrous basis. If the cefotetan disodium is packaged for dispensing, its potency is not less than 890 micrograms and not more than 970 micrograms of cefotetan per milligram on the anhydrous basis and also, each container contains not less than 90 percent and not more than 120 percent of the number of milligrams of cefotetan that it is represented to contain.

(ii) It is sterile.

(iii) It is nonpyrogenic.

(iv) Its moisture content is not more than 1.5 percent.

(v) Its pH in an aqueous solution containing 100 milligrams of cefotetan disodium per milliliter is not less than 4.0 and not more than 6.5.

(vi) It gives a positive identity test for cefotetan.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 432.5 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain:

(i) Results of tests and assays on the batch for potency, sterility, pyrogens, moisture, pH, and identity.

(ii) Samples, if required by the Director, Center for Drugs and Biologics:

(*a*) If the batch is packaged for repacking or for use in the manufacture of another drug:

(*1*) For all tests except sterility: 10 packages, each containing approximately 500 milligrams.

(*2*) For sterility testing: 20 packages, each containing approximately 300 milligrams.

(*b*) If the batch is packaged for dispensing:

(*1*) For all tests except sterility: A minimum of 10 immediate containers.

(*2*) For sterility testing: 20 immediate containers, collected at regular intervals throughout each filling operation.

(b) *Tests and methods of assay—(1) Potency.* Proceed as directed in § 436.216 of this chapter, except use the resolution test solution to determine resolution in lieu of the working standard solution. Perform the assay at ambient temperature, using an ultraviolet detection system operating at a wavelength of 254 nanometers, a column packed with microparticulate (3 to 10 micrometers in diameter) reversed phase packing material such as octadecyl hydrocarbon bonded silicas, a flow rate not exceeding 2.0 milliliters per minute, and a known injection volume of between 10 and 20 microliters. Reagents, working standard solution, sample solution, resolution test solution, system suitability requirements, and calculations are as follows:

(i) *Reagents—(a) Diluting solution.* Mix water:methanol:acetonitrile (90:5:5).

(*b*) *Mobile phase.* Mix 0.1*M* phosphoric acid:glacial acetic acid:methanol:acetonitrile (1700:100:105:105). Filter through a suitable filter capable of removing particulate matter greater than 0.5 micron in diameter. Degas the mobile phase just prior to its introduction into the chromatograph.

(ii) *Preparation of working standard, sample, and resolution test solutions—(a) Working standard solution.* Accurately weigh approximately 50 milligrams of the cefotetan working standard into a 250-milliliter volumetric flask containing 12.5 milliliters of methanol. Swirl the flask for several minutes, then add 12.5 milliliters of acetonitrile. Swirl the flask until the cefotetan is dissolved. Dilute to volume with water to obtain a solution containing approximately 200 micrograms of cefotetan per milliliter. Mix well. Protect the working standard solution from light.

(*b*) *Sample solutions—(1) Product not packaged for dispensing (micrograms of cefotetan per milligram).* Dissolve an accurately weighed portion of the

sample with sufficient diluting solution described in paragraph (b)(1)(i)(*a*) of this section, to obtain a concentration of approximately 200 micrograms of cefotetan per milliliter.

(*2*) *Product packaged for dispensing.* Determine both micrograms of cefotetan per milligram of the sample and milligrams of cefotetan per container. Use separate containers for preparation of each sample solution as described in paragraph (b)(1)(ii)(*b*)(*2*) (*i*) and (*ii*) of this section.

(*i*) *Micrograms of cefotetan per milligram.* Dissolve an accurately weighed portion of the sample with sufficient diluting solution described in paragraph (b)(1)(i)(*a*) of this section, to obtain a concentration of approximately 200 micrograms of cefotetan per milliliter.

(*ii*) *Milligrams of cefotetan per container.* Reconstitute the sample as directed in the labeling. Then, using a suitable hypodermic needle and syringe, remove all of the withdrawable contents if it is represented as a single-dose container; or, if the labeling specifies the amount of potency in a given volume of the resultant preparation, remove an accurately measured representative portion from each container. Further dilute an aliquot of the solution thus obtained with sufficient diluting solution described in paragraph (b)(1)(i)(*a*) of this section, to obtain a concentration of approximately 200 micrograms of cefotetan per milliliter.

(*c*) *Resolution test solution.* Place 10 milliliters of the working standard solution in a stoppered flask containing a few milligrams of magnesium carbonate. Close the flask and sonicate for 10 minutes. If the solution is not slightly turbid, add more magnesium carbonate and repeat sonication. Filter the turbid solution through a 0.5-micron filter and use within 2 hours. As this solution stands, the tautomer concentration increases.

(iii) *System suitability requirements*—(*a*) *Tailing factor.* The tailing factor (*T*) is satisfactory if it is not more than 1.3 at 10 percent of peak height in lieu of 5 percent of peak height.

(*b*) *Efficiency of the column.* The efficiency of the column (*n*) is satisfactory if it is greater than 1,500 theoretical plates.

(*c*) *Resolution.* The resolution (*R*) between the peak for cefotetan and its tautomer is satisfactory if it is not less than 2.0.

(*d*) *Coefficient of variation.* The coefficient of variation (S_n in percent) of five replicate injections is satisfactory if it is not more than 2.0 percent.

If the system suitability requirements have been met, then proceed as described in § 436.216(b) of this chapter. Alternate chromatographic conditions are acceptable provided comparable system suitability requirements are met. However, the sample preparation described in paragraph (b)(1)(ii)(*b*) of this section should not be changed.

(iv) *Calculations*—(*a*) Calculate the micrograms of cefotetan per milligram of sample as follows:

$$\text{Micrograms of cefotetan per milligram} = \frac{A_u \times P_s}{A_s \times C_u}$$

where:

A_u = Area of the cefotetan peak in the chromatogram of the sample (at a retention time equal to that observed for the standard);

A_s = Area of the cefotetan peak in the chromatogram of the cefotetan working standard;

P_s = Cefotetan activity in the cefotetan working standard solution in micrograms per milliliter; and

C_u = Milligrams of sample per milliliter of sample solution.

(*b*) Calculate the cefotetan content of the container as follows:

$$\text{Milligrams of cefotetan per container} = \frac{A_u \times P_s \times d}{A_s \times 1{,}000}$$

where:

A_u = Area of the cefotetan peak in the chromatogram of the sample (at a retention time equal to that observed for the standard);

A_s = Area of the cefotetan peak in the chromatogram of the cefotetan working standard;

P_s = Cefotetan activity in the cefotetan working standard solution in micrograms per milliliter; and

d = Dilution factor of the sample.

(*2*) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e)(1) of that section.

(*3*) *Pyrogens.* Proceed as directed in § 436.32(b) of this chapter, using a solution containing 50 milligrams of cefotetan per milliliter.

(*4*) *Moisture.* Proceed as directed in § 436.201 of this chapter.

(*5*) *pH.* Proceed as directed in § 436.202 of this chapter, using an aqueous solution containing 100 milligrams of cefotetan disodium per milliliter.

(*6*) *Identity.* The high-performance liquid chromatogram of the sample determined as directed in paragraph (b)(1) of this section, compares qualitatively to that of the cefotetan working standard.

6. New § 442.253 is added to read as follows:

§ 442.253 Sterile cefotetan disodium.

The requirements for certification and the tests and methods of assay for sterile cefotetan disodium packaged for dispensing are described in § 442.53a.

Dated: May 29, 1986.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 207, 220, 221, 236, 246, 251, and 255

[Docket No. R-86-1151; FR-1805]

Multifamily Housing Mortgage Insurance—Deregulation of Rents

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule generally ends HUD regulation of rents and charges for services and facilities in projects with mortgages insured under section 207 of the National Housing Act (NHA) on or after November 30, 1983. HUD regulation of these projects will continue for (1) rents and charges for facilities and services for units occupied by Section 8 tenants and for subsidized projects refinanced pursuant to section 223(f) of the NHA, and (2) rents for projects where the mortgagor opts for continued HUD regulation in order to maintain the project's tax-exempt status. HUD will also continue to regulate rents for a limited class of projects that otherwise qualify for deregulation, where the effect of deregulation would be imposition of State or local rent controls previously inapplicable by the terms of the State or local law by reason of HUD rent regulation.

The rule also decontrols rents on unassisted units in projects that are insured under section 220 or 221(d)(4) of the NHA and are receiving Section 8 Loan Management Set-Aside Assistance, and adds provisions (analogous to the section 207 revisions) for HUD rent regulation of projects insured under those authorities to maintain a project's tax-exempt status or to avoid local rent control. The rule specifies how maximum rents are determined when HUD preempts State

or local rent control, and makes a number of corresponding changes to the multifamily coinsurance authorities under 24 CFR Parts 251 and 255 that use sections 221 and 207 of the NHA, respectively, as their insuring authorities. Finally, the rule makes clear that in partially subsidized, HUD-insured or -held projects, rents for units that are occupied by tenants receiving Section 8 assistance qualify for automatic preemption of State or local rent controls under Subpart C of 24 CFR Part 246; rents for other units in these projects are subject to case-by-case preemption review and tenant participation under Subpart B of Part 246.

EFFECTIVE DATE: July 21, 1986.

FOR FURTHER INFORMATION CONTACT: James J. Tahash, Office of Multifamily Housing Management, Room 6180, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. Telephone number (202) 426-3970. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Summary of the Statutory Scheme and Proposed Rule

Section 431(a)(1) of the Housing and Urban-Rural Recovery Act of 1983 (Pub. L. No. 98-181) (the 1983 Act) amended section 207(b)(2) of the National Housing Act (NHA) to make discretionary the Secretary's authority to regulate rents and other charges for multifamily housing projects insured under section 207. Before enactment of the 1983 Act, the Secretary was *required* to regulate these rents and charges. Section 431(c) of the 1983 Act provided that this change does not apply to mortgages insured by HUD before the date of enactment of the 1983 Act—November 30, 1983.

The proposed rule (49 FR 39690, published on October 10, 1984) added a new paragraph to § 207.19(e) deregulating rents and charges for facilities and services in projects insured under section 207 on or after November 30, 1983. The rule provided that HUD regulation would continue for charges for services and facilities in elderly or handicapped projects, and for rents and charges for services and facilities for units occupied by tenants receiving Section 8 assistance and for certain subsidized projects refinanced pursuant to section 223(f) of the NHA.

The proposed rule also amended § 207.19(e)(4) to provide that rents for HUD-regulated section 207 projects that were insured before November 30, 1983 and are receiving Section 8 Loan Management Set-Aside assistance could be determined under either of the formulas for determining HUD-regulated rents for unsubsidized section 207 projects. (The existing regulation provides that rents for unsubsidized section 207 projects could be determined (at the mortgagor's option) by applying the original "debt service factor" to anticipated operating expenses or by using a formula based on the property's fair market value or rentals for comparable projects. Rents for Section 8 Loan Management projects, however, can only be determined under the "debt service" approach.) Where the mortgagor chose to use the market-based section 207 rent formula, the proposed rule made clear that rents for units occupied by Section 8 tenants would continue to be determined under the Housing Assistance Payments Contract and applicable administrative instructions.

The proposed rule made similar changes to 24 CFR Part 255—the coinsurance program for the purchase or refinancing of existing multifamily projects. Part 255 uses section 207 of the NHA as its insuring authority.

The proposed rule also amended 24 CFR Parts 200 and 221, the regulatory authorities that implement the mortgage insurance programs under sections 220 and 221 of the NHA, respectively. The regulation of rents for multifamily projects insured under sections 220 and 221(d)(4) has long been discretionary with HUD. On April 19, 1983 (48 FR 16670), the Department published a final rule in the **Federal Register**, that, among other things, generally decontrolled rents and charges for facilities and services in projects insured under section 220 or 221(d)(4) of the NHA. One of the exceptions was the continued regulation of rents for insured projects with Section 8 Loan Management assistance. The proposed rule in this proceeding provided for the deregulation of rents and charges for facilities and services in projects receiving Loan Management assistance, except that rents and other charges for units occupied by tenants receiving Section 8 assistance were to be determined under the HAP Contract and other applicable requirements.

Finally, the proposed rule amended 24 CFR Part 246 to make clear that in partially assisted, HUD-insured or -held Section 8 projects, rents for units occupied by tenants receiving Section 8 assistance qualify for automatic rent control preemption under Subpart C, and that rents for unassisted units are subject to the case-by-case preemption and tenant participation procedures under Subpart B. The rule also specified the rent control mechanism to be used in determining maximum rents after HUD has preempted State or local rent control laws.

Public Comments

The proposed rule invited comment for a period of 60 days ending December 10, 1984. The Department received six comments on the proposed rule. The comments supported the rule or offered suggestions to extend the rule's coverage.

One commenter suggested that the "economic viability" of project mortgages insured before November 30, 1983 is of the same "paramount interest" to HUD as those insured on or after that date. The commenter concluded that HUD should consider deregulating rents on projects with mortgages insured before November 30, 1983.

The statute does not permit the Department to deregulate rents on projects covered by mortgages insured before November 30, 1983. As noted above, section 431(c) of the 1983 Act provides that the amendment to section 207(b)(2) (making the regulation of rents discretionary with HUD) does not apply to mortgages insured by HUD before that date. (This prohibition was specifically added during congressional consideration of the bill that was enacted as the 1983 Act, and was not a limitation that had been requested by this Department.)

A trade association commented that the rule would provide an incentive to owners to upgrade their buildings and to maintain them as rental housing. In furtherance of these objectives, the commenter urged HUD to implement the President's Housing Commission recommendation that the "Federal government should preempt the application of any State or local government rent controls" with respect to federally assisted housing.

HUD preemption of State and local rent control laws and ordinances is governed by 24 CFR Part 246 (formerly 24 CFR Part 403). Subpart C provides for automatic preemption of local rent controls for HUD-insured or -held projects that are subsidized under section 236 or 221(d)(3) BMIR of the NHA, or the Rent Supplement, Section 23, or Section 8 programs. (See §§ 246.1, 246.20, and 246.21.) Subpart B provides for preemption for unsubsidized, HUD-insured or -held projects on a case-by-case basis, where HUD determines that rent control will jeopardize its economic interest in the project. (See §§ 246.1 and 246.5.) The Department believes that the current Part 246 is the appropriate approach for dealing with rent controls,

and will not change this policy in the final rule.

The same commenter requested that the rule clarify whether private appraisers or HUD appraisers will be used to determine appraised market value. The provision in question—§ 207.19(e)(2)(i)(B) of the final rule—is clear that the appraised market value is determined by a qualified real estate appraiser of the mortgagor's choice. Owners are, therefore, free to select private appraisers.

Another commenter proposed that the rule deregulate rents on projects insured under section 207 that receive final Transfer of Physical Assets (TPA) approval after November 30, 1983. The commenter's rationale was that a TPA has the same effect on a project as a refinancing, in that repairs may be made and new debt is incurred. The commenter was alluding to an earlier point in its comment that " an existing section 207 project could be refinanced under section 223(f) after November 30, 1983 and qualify for rent deregulation."

The commenter is in error with respect to its assertion that properties whose assets were transferred after November 30, 1983 qualify for rent deregulation. Section 431(c) of the 1938 Act, as previously stated, provides that the amendment to section 207(b)(2) does not apply with respect to mortgages insured before November 30, 1983. Consequently, the fact that a project may be transferred after that date will not except it from the prohibitory language of section 431(c) if the project was *insured* before November 30, 1983. In short, insofar as section 431 is concerned, deregulation of rents is applicable only to those projects *insured* on or after November 30, 1983. Moreover, the contract of mortgage insurance is unaffected by a TPA, and continues in force even though there has been a change in title to a project as a result of a TPA. In contrast, refinancing results in a retirement of the existing debt and the assumption of new indebtedness that is covered by a new contract of mortgage insurance, and thus qualifies a project for rent deregulation.

The commenter raised a second argument that the rule should deregulate projects that receive final TPA approval after November 30, 1983 on grounds that "section 431(a) refers to mortgagors approved by the Secretary, which is the status of all new mortgagors upon receipt" of approval of a TPA. The commenter thought that this issue would be settled by the Department's response to its question of whether Congress intended "to regulate the mortgagor or the property insured under the mortgage."

The Department's earlier response that it is the date of insurance that is dispositive of the issue of which projects can be deregulated, and not other transactions affecting the property, including matters related to title, is adopted here as the response to the commenter's additional argument.

With respect to the commenter's specific question, a full reading of section 207(b)(2), including that portion not amended by section 431, shows that Congress intended to regulate the property covered by the insured mortgage, as well as to regulate the mortgagor. However, it does not follow, and there is nothing in section 207(b)(2) or section 431(c) that would lead to the conclusion, that deregulation of a project's rents is related to the Secretary's regulation or approval of a mortgagor or its successors, and not, as section 431(c) provides, to the date of insurance of the mortgage given by such mortgagor or its successors.

For further clarification, the Department notes that section 207(b) provides:

> In addition to mortgages insured under section 209, the Secretary is authorized to insure mortgages . . . which cover property held by—(1) Federal or State instrumentalities, . . . or (2) any other mortgagor approved by the Secretary.

It is clear that the function of clause (2), on which the commenter relies for its proposition that Secretarial approval of a mortgagor after November 30, 1983 should qualify the mortgagor's project for the benefits of this rule, is only to define or describe which types of mortgages the Secretary is authorized to *insure*—here, a mortgage held by a "mortgagor approved by the Secretary." This clause is not, therefore, relevant to the issue of which projects qualify for rent deregulation.

Summary of the Regulatory Revisions

The regulatory revisions proposed in the October 10, 1984 rule making, and incorporated, along with other amendments, in this final rule, affect several provisions. Because of the technical complexity of these revisions, the following Part-by-Part summary provides a guide to the changes made by the final rule.

Part 207

As noted above, a new paragraph is added to § 207.19(e), deregulating rents and other charges for projects covered by mortgages insured on and after November 30, 1983. To make clear what provisions apply to projects insured before and on and after that date, § 207.19(e) has been reordered and is redesignated. A new paragraph (e)(1) (Applicability) is added as a guidepost for which provisions apply to which mortgages. The following derivation chart lists the provisions of § 207.19(e) in the final rule and their counterparts in the existing regulations.

24 CFR 207.19(e)

Final rule	Existing regulation
§ 207.19(e)(1) (Rents and charges—Applicability).	
§ 207.19(e)(2) (Rents and charges—mortgages insured before November 30, 1983).	§§ 207.19(e)(1)(i)(A).
§ 207.19(e)(2)(i)(B) (Special Allowance).	§ 207.19(e)(4).
§ 207.19(e)(3) (Effective date of rent adjustments—mortgages insured before November 30, 1983, and projects described in paragraphs (e)(5) (iii) and (iv)).	§ 207.19(e)(2).
§ 207.19(e)(4) (Refund of additional rentals—mortgages insured before November 30, 1983, and projects described in paragraphs (e)(5) (iii) and (iv)).	§ 207.19(e)(3).
§ 207.19(e)(5) (Rents and Charges—mortgages insured on or after November 30, 1983).	
§ 207.19(e)(6) (Reasonable and moderate rental charges—mortgages insured on or after November 30, 1983).	
§ 207.19(e)(7) (Certain refinanced projects).	
§ 207.19(e)(8) (Rent control—all mortgages).	§ 207.19(e)(2).

As paragraph (e)(1) of the final rule states, paragraphs (e)(2), (e)(3), and (e)(4) apply to mortgages insured before November 30, 1983. Paragraphs (e)(3) and (e)(4) also apply to projects described in paragraphs (e)(5) (iii) and (iv). These projects are referenced in paragraphs (e)(3) and (e)(4) to make clear that the requirements of these paragraphs apply to projects in which HUD continues to regulate rents to ensure compliance with the Internal Revenue Code or State law or exemption from State or local rent control, even if the projects would otherwise qualify to have their rents decontrolled. Paragraphs (e)(5) and (e)(6) apply to mortgages insured on or after November 30, 1983, and paragraphs (e)(7) and (e)(8) apply to all mortgages.

These provisions are largely unchanged from the existing and proposed regulations. One minor change was made to § 207.19(e)(2)(i) (now § 207.19(e)(2)(ii)(A)), which provides that, with respect to rent adjustments, consideration will be given to increases in operating costs occurring within 12 months of *the effective date of the rent increase*, instead of, as previously provided, within 12 months of the *date of filing of the application for a rent adjustment*. This change is consistent with HUD's present method of determining rent adjustments. Also, in § 207.19(e)(2)(ii)(B)(*2*) (formerly

§ 207.19(e)(ii)(B)), the term "licensed", used in describing a real estate appraiser, has been deleted, since real estate appraisers are not licensed.

Section 207.19(e)(2)(iii) continues without substantive change the proposed rule provision in § 207.19(e)(4) permitting project rents for unsubsidized units in insured projects with Section 8 Loan Management assistance to be determined under either of the section 207 rent regulation formulae.

New paragraph (e)(5) in § 207.19 (proposed § 207.19(e)(7)) effectively allows rents and charges in projects insured under section 207 of the NHA on or after November 30, 1983 to be deregulated. Paragraph (e)(6) details that "reasonable and moderate" rentals under section 207(b)(2) of the NHA are determinable by reference to market rentals in the area. As indicated above, it too applies, like paragraph (e)(5), only to projects with mortgages insured after November 30, 1983.

There are exceptions in paragraph (e)(5) to the mortgagor's right to determine rents and charges. The mortgagor is restricted in the charges for facilities or services that may be collected in a project constructed for occupancy exclusively by elderly or handicapped tenants. There is an absolute prohibition against the mortgagor's imposing a charge for perpetual or life care. The mortgagor may charge for facilities and services and rentals for units occupied by tenants assisted under a Section 8 Housing Assistance Payments (HAP) contract only as permitted by the HAP Contract and HUD's regulations and administrative instructions, but in no event may the mortgagor impose lesser charges for facilities and services on unassisted tenants than those imposed on assisted tenants.

These provisions continue to reflect the Department's obligation to control rents and charges for certain projects and tenants. The prohibition against the mortgagor's charging for life care was not specifically identified in the proposed rule; it is not a new prohibition, but one that HUD currently enforces. It is spelled out in the final rule because, in the textual revision to proposed § 207.19(e)(7)(i), the requirement of "the prior approval of the Commissioner" for charges was eliminated in favor of language permitting the imposition of charges by the mortgagor in accordance with "HUD's administrative instructions." The Department also believes that, because of the potential for abuse with respect to life care contracts, it was necessary specifically to identify this prohibition.

The linguistic change also reflects Departmental policy of deemphasizing, where applicable, the Commissioner's direct role in approving charges since, in this regard, the Commissioner's instructions offer adequate guidance to the mortgagor. The prohibition against charging unassisted tenants lower charges for facilities and services is intended to assure that the unassisted tenants carry their proportionate share of the costs of the project's furnishing these facilities and services.

In this final rule, new paragraphs (iii) and (iv) have been added to § 207.19(e)(5) (similar provisions, where applicable, also are included in the amendments to 24 CFR Parts 220, 221, 251, and 255). The addition of paragraph (iii) permits HUD to continue to regulate project rents where deregulation could jeopardize a project's tax-exempt status. HUD will regulate project rents, if necessary, in accordance with 24 CFR 207.19(e)(2)(ii) (A) or (B), at the option of the mortgagor.

New paragraph (iv) provides for continued HUD regulation of rents for a limited class of projects that otherwise qualify for deregulation, but that in the absence of HUD regulation would be subject to State or local rent control. Specifically, paragraph (iv) provides that HUD will approve rental adjustments where the following conditions apply:

(1) The firm commitment to insure the project mortgage under Part 207 was issued before the effective date of the deregulation of HUD rent control contained in this rule;

(2) When the mortgagor (or its predecessor in title) (A) obtained a firm commitment to insure the mortgage under Part 207 or (B) acquired the project subject to a mortgage insured under Part 207, the project would be (or would become upon completion) subject to regulation under a State or local rent control law, but for an exclusion contained in the State or local law based upon HUD regulation of the project rents; and

(3) The exclusion continues in effect, so that authorizing the mortgagor to determine rents would have the effect of subjecting the project to regulation under the State or local rent control law.

Rental charges would be determined under § 207.19(e)(2)(ii) (A) or (B), at the mortgagor's option—the same way that rent adjustments are made for other unsubsidized projects whose rents are regulated by HUD.

The new paragraph (iv) applies only to situations in which HUD decontrol of project rents would cause the projects to become subject to State or local rent control. The Department believes that continuation of HUD rent control for these projects is consistent with the mortgagor's expectation when it acquired its interest in the project. That is, the mortgagor may have relied on the exclusion of HUD-controlled projects from the ambit of local rent control laws when it committed to construct or purchase the project. From the mortgagor's standpoint, continued rent control by HUD represents a benefit on which it relied in acquiring its interest. HUD's unilateral termination of its control, where it has the effect of subjecting the project to State or local rent control, could unfairly deprive the mortgagor of the benefit of its bargain. To protect mortgagors' interest to the fullest extent possible, the rule makes clear that HUD will continue to control project rents, thereby continuing the exclusion from local rent control provided by the State or local law, and that the benefit of the exclusion remains part of what the mortgagor can sell if it sells the project.

This provision in the final rule is intended to protect mortgagors who may have acquired an interest in the property in reliance upon continued HUD control of the project rents. It is not designed to extend to situations where this reliance is lacking. Thus, the new paragraph (iv) does not cover projects for which a Part 207 insurance commitment is issued after the rule's effective date—the date on which Part 207 rents are removed from HUD control. In addition, it does not apply to projects that (1) were originally insured under Part 220 or 221 pursuant to commitments issued on or after June 1, 1983—the date on which HUD rent regulation ended under those Parts—but (2) are refinanced under Part 207 before the effective date of this rule. In this latter circumstance, the mortgagor could not have acted in reliance on HUD regulation of its project rents when the mortgage was originally insured, and ought not be able to use later HUD control of its rents because of an insured refinancing under Part 207 as grounds for invoking the special relief afforded by new paragraph (iv).

HUD control of project rents under paragraph (iv) would end, and the mortgagor would be free to determine rents and charges for facilities and services in accordance with §207.19(e)(5), if the State or local law no longer excludes from its provisions rents regulated by HUD. In other words, paragraph (iv) is intended to protect the mortgagor from a unilateral termination of a benefit by HUD, but is not intended to protect the mortgagor from the effects of a valid change of local law.

The rule provides for mandatory HUD rent regulation where the regulatory criteria are met, rather than leaving the decision to accept HUD control to the mortgagor. This obviates questions about whether HUD is in fact still "regulating" rents when the owner has an option to accept HUD control or not. (See *Rent Control Bd. of Cambridge* v. *Cambridge Tower Corp.*, 394 Mass. 809 (1985).) It should be noted that projects not qualifying for HUD control under the new paragraph (iv) may seek preemption of the State or local law, as provided in 24 CFR Part 865.

Provisions similar to § 207.19(e)(5)(iv) have been added to 24 CFR Parts 220, 221, and 255. The amendments to Part 220 and 221 specify that the firm commitment to insure must have been issued before June 1, 1983—the effective date of the regulation ending HUD control of rents under those programs. The amendment to Part 255 parallels the Part 207 provisions, since Part 255 coinsurance derives its authority from Part 207. No amendment is made to Part 251. That Part draws its insuring authority from Part 221, but was not added until October 9, 1984, some 15 months after the deregulation of Part 221 rents. Thus, the essential ingredient to continued HUD control of rents—mortgagor reliance on the existence of HUD control—is missing.

Inclusion in Parts 220 and 221 of provisions analogous to those in § 207.19(e)(5)(iv) is entirely consistent with HUD's intent in promulgating the 1983 rule that deregulated HUD control of rents in projects insured under those Parts. The 1983 rule did not specifically address its effects on contractual rent control provisions in existing Regulatory Agreements. HUD's general policy, however, is that amendments to regulations should not adversely affect the interests of contracting parties under outstanding contracts with the Secretary. See, e.g., 24 CFR 220.751 (incorporating by reference, *inter alia*, § 207.499) and 221.749. The published decontrol regulation itself did not specifically include any reference to this policy, in large part because it would be an extremely rare occurrence to find a mortgagor adversely affected by decontrol.

However, recognizing that there could be instances in which a mortgagor operating under an existing Regulatory Agreement might be adversely affected by immediate and unilateral HUD decontrol, HUD provided, in its administrative instructions implementing the regulatory change, that decontrol of rents currently regulated pursuant to Regulatory Agreements would become effective only upon execution of an amendment to the Regulatory Agreement so providing. See, HUD Notice H-83-27. In this manner, the mortgagor would have the opportunity to determine for itself whether its interests were adversely affected by HUD decontrol, and, if it so determined, to preserve the *status quo* under the Regulatory Agreement by not requesting any amendment thereof. HUD did not intend to look behind the mortgagor's conclusion that decontrol would adversely affect its interests; the mortgagor's conclusion, as evidenced by its election not to request an amendment to its Regulatory Agreement, would be conclusive. As noted above, the final rule does not permit mortgagors to choose HUD rent control or not, at their option; mortgagors that meet the regulatory criteria must have their project rents regulated by HUD, in accordance with the rent control provisions for the Part under which the mortgage is insured.

Proposed § 207.19(e)(7)(iii) has been redesignated as § 207.19(e)(7) and captioned, "Certain refinanced projects". Its removal as a subparagraph under proposed paragraph (e)(7) clarifies that the projects covered by it are not limited to those with mortgages insured on or after November 30, 1983, but also includes projects with mortgages insured before that date. The final rule also makes substantive changes to the new paragraph (e)(7). The rents in covered projects will be determined in accordance with § 221.530 or § 236.55, whichever is appropriate, instead of in accordance with § 207.19(e)(2)(i), as provided in the proposed rule. This change is consistent with current Departmental policy with respect to these projects. Also, approval of the Commissioner is no longer required before the mortgagor could impose charges for facilities or services offered by these projects. Paragraph (e)(7) now provides that these charges are to be imposed only as permitted by HUD's administrative instructions. Here too, the change is consistent with the Department's liberalizing of its control over charges, by allowing the mortgagor to set the charges consistent with HUD instructions, but without HUD's advance approval.

Section 207.19(e)(8), specifying how HUD will determine project rents after State or local rent controls have been preempted, is unchanged from the proposed rule.

Part 220

The final rule amends proposed § 220.511(c)(1) to state that the mortgagor may charge for facilities or services in Section 8 projects only as permitted by the HAP Contract, applicable regulations, and HUD's administrative instructions. As under the Part 207 revisions, the Commissioner's advance approval would no longer be necessary before the mortgagor may impose these charges. Also, as in the Part 207 amendment, the mortgagor is prohibited from imposing higher charges on the assisted tenants for the facilities or services than are imposed on the unassisted tenants.

Section 220.511(c)(2) is amended in this rule, although its proposed amendment was not published in the predecessor rule. The amendment is insubstantial; it is principally a stylistic one intended to harmonize the language of § 221.511(c)(2) with parallel provisions in the final rule. See, e.g., § 221.531(a)(3). The amendment also corrects the inadvertent omission of State Agency projects assisted under 24 CFR Part 883 from those subject to § 220.511(c)(2).

Section 220.511(c)(3) contains the substance of the proposed rule's deregulation of rents and other charges in insured projects receiving Section 8 Loan Management assistance. Sections 220.511(c) (4) and (5) contain provisions analogous to those in § 207.19(e)(5)(iii) and (iv) with respect to HUD regulation of rents in cases where HUD deregulation would jeopardize a project's tax exempt status or result in State or local control of the project's rents. Section 220.511(d) contains the provision in the proposed rule regarding HUD's mode of regulating rents after a preemption.

Part 221

The final rule contains an amendment to § 221.530(a) that was not published in the proposed rulemaking of October 10, 1984. New § 221.530(a)(1) is basically a restatement of existing § 221.530's general deregulation policy; however, the rule notes that exceptions to this policy would have to comport with HUD's administrative instructions. As noted earlier, the revision is a salutary one for mortgagors and HUD, since the elimination of the approval process reduces the administrative burdens for both mortgagors and HUD.

Paragraph (a)(2), a new addition in this final rule to § 221.530, details the factors that the Commissioner uses in determining rents in projects covered by Part 221 that are still subject to HUD regulation. Specifically, the provision states that the Commissioner will take into account the sum of the project's operating costs and debt service (as determined by HUD), and the owner's

return on investment, with adjustment for vacancies, the project's non-rental income, and other factors that the Commissioner deems appropriate. This provision simply reflects the current practice for HUD's determination of rents for covered projects.

The final rule adds a new § 221.530(a)(3), which contains the substance (as amended by the final rule) of present § 221.531(c). This change is designed to accomplish two things: first, to make clear that no section 221(d)(3) mortgagors—neither market-rate nor BMIR—have had their rents and other charges deregulated; and second, that all section 221(d)(4) mortgagors—not just "general mortgagors"—qualify for deregulation. Under the existing regulatory framework; these points were unclear.

With respect to section 221(d)(3) mortgagors, the statute is clear that project rents and other charges must be regulated

> . . . under Federal or State laws or by political subdivisions of States . . ., or by the Secretary under a regulatory agreement or otherwise. . . .

With respect to section 221(d)(4) projects, the existing rule inadvertently limited its deregulation provisions to "general mortgagors" by its placement in § 221.531. The new § 221.530(a)(3) clarifies that all section 221(d)(4) mortgagors are indeed deregulated.

The new § 221.530(a)(3) states the general rule, that rents and other charges are deregulated, subject to listed exceptions. The exceptions conform to analogous provisions in Part 207 or 220, as appropriate. The provision also contains the previously discussed guidance regarding the manner in which rents are determined following preemption of State and local rent controls.

Part 236

The final rule contains an amendment (not in the proposed rule) to 24 CFR 236.55(a) specifying how HUD determines maximum rentals for section 236 projects. This addition is analogous to the rent determination provision added in § 221.530(a)(2), and (like that provision) merely reflects HUD's current practice in making rent determinations for covered section 236 projects.

Parts 251 and 255

The final rule also amends 24 CFR Parts 251 and 255. These authorities provide for coinsurance for the new construction or substantial rehabilitation of multifamily projects (Part 251) and the purchase or refinancing of existing projects (Part 255). They use sections 221 and 207 of the NHA, respectively, as their insuring authorities.

The final rule makes a number of changes in §§ 251.703 and 255.703 that were not contained in the proposed rule. Paragraph (a) of these sections adds the Section 8 Moderate Rehabilitation program to the list of Section 8 authorities that have their rents and other charges determined in accordance with HUD requirements. The Moderate Rehabilitation program is used in connection with projects coinsured under Parts 251 and 255, and its inclusion in the final rule conforms to the existing practice with respect to coinsured projects using the program. Paragraph (a) of each section also contains language limiting rents for units occupied by Section 8 tenants to levels charged for unassisted units (without HUD's approval), and prohibiting the imposition of lower facility and service charges on unassisted tenants. These provisions correspond to changes made in Parts 207, 220, and 221, and reflect current HUD practice.

Paragraph (c) of § 251.703 and paragraph (d) of § 255.703 require that requests for rent increases be submitted on a form prescribed by HUD. This is a minor change to conform to HUD practice. Paragraph (d) of § 251.703 prohibits mortgagors from charging tenants of elderly or handicapped projects for life care. As noted earlier, this provision reflects current HUD requirements. (No similar change is made in § 255.703, since projects exclusively for the elderly or handicapped may not be coinsured under Part 255.)

The provisions of paragraph (e) of § 251.703 and paragraph (c)(1) of § 255.703 parallel those of § 207.19(e)(5)(iii), relating to continued HUD rent control to ensure the tax-exempt status of the obligations issued to finance the project. Section 255.703(c)(2) tracks the provisions of § 207.19(e)(5)(iv), requiring continued HUD rent control to avoid imposition of State or local controls. As noted above, Part 251 does not contain an analogous provision. Paragraph (f) of § 251.703 and paragraph (e) of § 255.703 contain provisions similar to those in Parts 207, 220, and 221, specifying how HUD will determine rents when the mortgagor requests preemption.

Part 240

As a consequence of the deregulation of rents instituted by this rule, along with the deregulation already effected by the final rule of April 19, 1983 (48 FR 16670), projects that are partially assisted under Section 8 may qualify not only for Federal rent deregulation but also for automatic preemption of State of local rent control laws. Thus, unassisted tenants could be subject to wholly unregulated rental charges, without the opportunity to comment on the need for, or propriety of, preemption of local controls.

The final rule remedies that situation by making clear that the preemption of rent controls for units that house unassisted tenants in partially assisted projects is subject to 24 CFR Part 246, Subpart B. This subpart governs preemption actions in unassisted projects, and provides for preemption on a case-by-case basis, only after tenant comment and a showing that failure to preempt would jeopardize HUD's financial interest in the project. The final rule contains a number of technical revisions to the proposed rule, designed to make clear that the automatic preemption provisions of Subpart C continue to apply to assisted units and to fully subsidized projects.

Other Findings

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule exercises the Department's discretionary authority to decontrol rents. The rule will eliminate cash deficiencies for some small entities but

will not result in additional costs to any small entities.

The information collection requirements contained in this rule were submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520) and have been assigned OMB Control Numbers 2502–0314 and 2502–0324.

This rule was listed as sequence number 867 in the Department's Semiannual Agenda of Regulations published on April 21, 1986 (51 FR 14036, 14060) under Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program numbers are 14.134 and 14.149.

List of Subjects

24 CFR Part 207

Mortgage insurance, Rental housing, Manufactured home parks.

24 CFR Part 220

Home improvement, Mortgage insurance, Urban renewal, Rental housing, Loan programs-housing and community development, Projects.

24 CFR Part 221

Condominiums, Low and moderate income housing, Mortgage insurance, Displaced families, Single Family Housing, Projects, Cooperatives.

24 CFR Part 236

Low and moderate income housing, Mortgage insurance, Rent subsidies, Taxes, Utilities, Projects.

24 CFR Part 240 (formerly Part 403)

Intergovernmental review, low and moderate income housing, Mortgages, Rent subsidies, Rent control.

24 CFR Part 251

Mortgage insurance Coinsurance of multifamily mortgages

24 CFR Part 255

Mortgage insurance.

Accordingly, 24 CFR Parts 207, 220, 221, 236, 240, 251, and 255 are amended as follows:

PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

1. The authority citation for 24 CFR Part 207 continues to read as follows:

Authority: Secs. 207, 211, National Housing Act (12 U.S.C. 1713, 1715(b)); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In section 207.19, paragraph (e) is revised to read as follows:

§ 207.19 Required supervision of private mortgagors.

* * * * *

(e) (1) *Rents and Charges—Applicability.* Paragraphs (e)(2), (e)(3), and (e)(4) of this section apply to mortgages insured before November 30, 1983. Paragraphs (e)(3) and (e)(4) also apply to projects described in paragraphs (e)(5)(iii) and (iv) of this section. Paragraphs (e)(5) and (e)(6) of this section apply to mortgages insured on or after November 30, 1983. Paragraphs (e)(7) and (e)(8) of this section apply to mortgages insured both before and on or after November 30, 1983.

(2) *Rents and charges—mortgages insured before November 30, 1983.* The mortgagor may make no charges for the accommodations (rents), facilities, or services offered by a project insured before November 30, 1983 in excess of those that the Commissioner authorizes. In authorizing these charges and later rent adjustments, the Commissioner will give consideration to providing for rental income necessary to maintain the economic soundness of the project and a reasonable return on investment, consistent with reasonable rents to tenants. The determination will be made as follows:

(i) *Initial rent determination.* The Commissioner will set initial rents in the project before it opens for occupancy, based upon:

(A) A debt service factor determined by the Commissioner to cover debt service requirements and a rate of return to the mortgagor, multiplied by the sum of the Replacement Cost and working capital;

(B) Estimated project operating costs, including an allowance for management, using the latest available data from comparable properties; and

(C) Such additional factors as the Commissioner considers appropriate, such as local market conditions, vacancy rates, and use of commercial space.

(ii) *Rent adjustments.* After initial rents are determined, the Commissioner may approve rental adjustments in the amount provided in paragraph (e)(2)(ii)(A) or (e)(2)(ii)(B) of this section, at the option of the mortgagor:

(A) The sum of the most recent year's audited operating costs or, as appropriate, updated certified operating costs (taking into consideration reasonably anticipated increases in operating costs that will occur within 12 months of the anticipated effective date of the rent increase), and the amount derived under paragraph (e)(2)(i)(A) of this section; or

(B) The lesser of:

(*1*) The sum of the operating costs determined in accordance with paragraph (e)(2)(ii)(A) of this section and the amount derived by multiplying the debt service factor determined under paragraph (e)(2)(i)(A) of this section by the project's appraised market value as residential rental property at the time of the current application for rental adjustment; or

(*2*) Rents on comparable, conventionally financed projects in the same area, determined in accordance with procedures established by the Commissioner.

For purposes of paragraph (e)(2)(ii)(B)(*1*) of this section, the appraised market value shall be determined by a qualified real estate appraiser of the mortgagor's choice. The mortgagor must provide the information required under this paragraph (e) in a format required by HUD.

(iii) *Special Allocations.* Rent adjustments for projects with units assisted under Part 886 of this title (Section 8 Housing Assistance Payments Program—Special Allocations) shall be determined under paragraph (e)(2)(ii)(A) of this section, except that the mortgagor may, with HUD's prior approval, elect to have the rents determined under paragraph (e)(2)(ii)(B) of this section. However, if the mortgagor so elects, the rents for units occupied by assisted tenants shall be determined in accordance with the Housing Assistance Payments (HAP) contract, applicable regulations, and HUD's administrative instructions.

(3) *Effective date of rent adjustments—mortgages insured before November 30, 1983, and projects described in paragraphs (e)(5) (iii) and (iv) of this section.* Except for rents for projects described in paragraph (e)(2)(iii) of this section, no adjustment to maximum permissible rents may take effect before the end of 30 days after the mortgagor files the application for the adjustment with the appropriate HUD Field office. Rent adjustments are considered approved, unless the Commissioner disapproves them in writing. If the Commissioner does not approve the maximum permissible rents within this 30-day period, the mortgagor shall hold the additional rents received, as a result of the adjustment, in an escrow account under such terms as the Commissioner directs, or provide a letter of credit acceptable to the Commissioner sufficient to cover the additional rents collected, pending the Commissioner's approval or disapproval.

(4) *Refund of additional rents—mortgages insured before November 30,*

1983, and projects described in paragraphs (e)(5) (iii) and (iv) of this section. If the Commissioner disapproves all or part of the additional rents collected pursuant to paragraph (e)(3) of this section, the mortgagor shall promptly refund all disapproved amounts to the affected tenants.

(5) *Rents and charges—mortgages insured on or after November 30, 1983.* The mortgagor shall determine the charges for accommodations (rents), facilities, or services offered by a project insured on or after November 30, 1983, except as follows:

(i) For a project constructed for occupancy exclusively by elderly or handicapped tenants, the mortgagor may charge tenants for facilities or services offered by the project only as HUD's administrative instructions permit. The mortgagor may not charge for perpetual care or life care.

(ii) For units occupied by tenants assisted under a Section 8 HAP contract under Part 880 (Section 8 Housing Assistance Payments Program for New Construction), Part 881 (Section 8 Housing Assistance Payments Program for Substantial Rehabilitation), Part 883 (Section 8 Housing Assistance Payments Program—State Housing Agencies), or Part 886 (Section 8 Housing Assistance Payments Program—Special Allocations) of this title, the mortgagor may charge tenants for accommodations (rents), facilities, or services only as the HAP contract, applicable regulations, and HUD's administrative instructions permit. Rents for units occupied by assisted tenants may not exceed rents charged for comparable, unassisted units in the project without the prior approval of the Commissioner, and in no event may the mortgagor impose lesser charges for facilities or services on unassisted tenants than those imposed on assisted tenants.

(iii) The Commissioner will continue to approve rents for units in a project that are not occupied by tenants receiving Section 8 assistance if the mortgagor and the Commissioner determine that such approval is necessary for the project to comply with the requirements of the Internal Revenue Code or State law. If such a determination is made, the Commissioner will approve rents in the amount provided in paragraph (e)(2)(ii)(A) or (e)(2)(ii)(B) of this section, at the option of the mortgagor.

(iv) The Commissioner will approve rental adjustments, in the amount provided in paragraph (e)(2)(ii) (A) or (B) of this section, at the option of the mortgagor, if the Commissioner determines that the following conditions are applicable:

(A) The firm commitment to insure the mortgagor under this part was issued before June 4, 1986.

(B) At the time that the mortgagor (or its predecessor in title) (*1*) obtained a firm commitment to insure the mortgage under this part, or (*2*) acquired title to the project subject to a mortgage insured under this part, the project would be (or would become upon completion) subject to regulation under a State or local rent control law, but for an exclusion contained in the State or local law based upon regulation of the project rents by the Commissioner; and

(C) The exclusion continues in effect, so that authorizing the mortgagor to determine rents would have the effect of subjecting the project to regulation under the State or local rent control law.

This paragraph (iv) shall not apply to any mortgage insured under this Part, the proceeds of which were used to refinance a mortgage insured under 24 CFR Part 220 or 221 for which the firm commitment to insure under such Part 220 or 221 was issued on or after June 1, 1981.

(6) *Reasonable and moderate rental charges—mortgages insured on or after November 30, 1983.* With respect to projects on which rents are deregulated as provided in paragraph (5) of this section, "reasonable" and "moderate" rental charges for purposes of section 207(b)(2) of the National Housing Act are determinable by reference to market rentals in the area.

(7) *Certain refinanced projects.* Rents on refinanced projects insured under section 207 of the National Housing Act pursuant to section 223(f) of that Act that have a Rent Supplement contract under Part 215 of this title, or that receive assistance under Part 236 of this title, shall be determined in accordance with § 221.530(a)(2) or § 236.55, as appropriate. The mortgagor may charge tenants for facilities or services offered by the project only as HUD's administrative instructions permit.

(8) *Rent control—all mortgages.* Any State or local law, ordinance, or regulation regulating the rents of projects subject to this section may be preempted only as provided in Part 246 of this chapter. HUD will determine the maximum rents that may be charged following any such preemption action using the method outlined in paragraph (e)(2)(ii)(A) of this section.

(Approved by OMB under control numbers [illegible] and 2503-0324)

PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS

3. The authority citation for 24 CFR Part 220 continues to read as follows:

Authority: Secs. 207, 211, 220, National Housing Act (12 U.S.C. 1713, 1715b, 1715k); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

4. Section 220.511 is revised to read as follows:

§ 220.511 Supervision of mortgagors.

(a) All of the provisions of § 207.19 of this chapter apply, except that: (1) § 207.19(e) shall not apply, except as specifically referenced in this section; and (2) in the case of a mortgage covering property on which there is located a dwelling or dwellings designed principally for residential use for two to 11 families, § 207.19(d), relating to labor standards and prevailing wage requirements, shall not apply.

(b) Except as otherwise provided in paragraphs (c) and (d) of this section, the mortgagor shall determine the charges for accommodations (rents), facilities, or services offered by the project.

(c) (1) For units occupied by tenants assisted under the programs referred to in paragraphs (c)(2) and (c)(3) of this section, the mortgagor may charge for facilities and services only as the Housing Assistance Payments (HAP) contract, applicable regulations, and HUD's administrative instructions permit. The mortgagor may not impose lesser charges for facilities or services on unassisted tenants than those imposed on assisted tenants.

(2) Rent adjustments for units occupied by tenants assisted under a Section 8 HAP contract Part 880 (Section 8 Housing Assistance Payments Program for New Construction), Part 881 (Section 8 Housing Assistance Payments Program for Substantial Rehabilitation), or Part 883 (Section 8 Housing Assistance Payments Program—State Housing Agencies) of this title shall be determined in accordance with the HAP contract, applicable regulations, and HUD's administrative instructions, and shall not, without the prior approval of the Commissioner, exceed rents charged for comparable, unassisted units in the project.

(3) Rent adjustments for projects with units assisted under Part 886 of this title (Section 8 Housing Assistance Payments Program—Special Allocations) shall be determined under § 207.19(e)(2)(ii)(A) of this chapter, or the mortgagor may, with the prior approval of the Commissioner, determine the rents, except that the

rents for units occupied by assisted tenants shall be determined in accordance with the HAP Contract, applicable regulations, and HUD's administrative instructions.

(4) The Commissioner will approve rents for units in a project not occupied by tenants receiving Section 8 assistance if the mortgagor and the Commissioner determine that such approval is necessary for the project to comply with the requirements of the Internal Revenue Code or State law. If such a determination is made, the Commissioner will approve rents in the amount provided in § 207.19(e)(2)(ii) (A) or (B) of this chapter, at the option of the mortgagor.

(5) The Commissioner will approve rental adjustments, in the amount provided in § 207.19(e)(2)(ii) (A) or (B) of this chapter, at the election of the mortgagor, if the Commissioner determines that the following conditions are applicable:

(i) The firm commitment to insure the mortgage under this part was issued before June 1, 1983;

(ii) At the time that the mortgagor (or its predecessor in title) (A) obtained a firm commitment to insure the mortgage under this part, or (B) acquired title to the project subject to a mortgage insured under this part, the project would be (or would become upon completion) subject to regulation under a State or local rent control law, but for an exclusion contained in the State or local law based upon regulation of the project rents by the Commissioner; and

(iii) The exclusion continues in effect, so that authorizing the mortgagor to determine rents would have the effect of subjecting the project to regulation under the State or local rent control law.

(d) Any State or local law, ordinance, or regulation regulating the rents of projects subject to paragraph (b) or (c) of this section may be preempted only as provided in Part 246 of this chapter. HUD will determine the maximum rents that may be charged following any such preemption action using the method outlined in § 207.19(e)(2)(ii)(A) of this chapter.

PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE

5. The authority citation for 24 CFR Part 221 continues to read as follows:

Authority: Secs. 211, 221, National Housing Act (12 U.S.C. 1715b, 1715l); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

6. In § 221.530, paragraph (a) is revised to read as follows:

§ 221.530 Supervision applicable to all mortgagors.

(a) (1) Except as otherwise provided in paragraph (a)(3) of this section, the mortgagor shall make no charges for accommodations (rents), facilities, or services offered by the project except as HUD's administrative instructions authorize.

(2) On the basis of information that the mortgagor provides on a form prescribed by the Commissioner, the Commissioner will determine the rents for projects (other than those referred to in paragraph (a)(3) of this section), using the sum of the project's operating costs and debt service (as calculated by the Commissioner), and the owner's return on investment, with adjustments for vacancies, the project's non-rental income, and other factors that the Commissioner deems to be appropriate.

(3) Mortgagors with mortgages insured under section 221(d)(4) of the National Housing Act shall determine the charges for accommodations (rents), facilities, or services offered by the project, except as follows:

(i) For a project constructed for occupancy exclusively by elderly or handicapped tenants, the mortgagor may charge tenants for facilities or services offered by the project only as HUD's administrative instructions permit. The mortgagor may not charge for perpetual care or life care.

(ii) For units occupied by tenants assisted under the programs referred to in paragraphs (a)(3) (iii) and (iv) of this section, the mortgagor may charge for facilities and services offered by the project only as the Housing Assistance Payments (HAP) contract, applicable regulations, and HUD's administrative instructions permit. The mortgagor may not impose lesser charges for facilities and services on unassisted tenants than those imposed on assisted tenants.

(iii) Rent adjustments for units occupied by tenants assisted under a section 8 Housing Assistance Payments (HAP) Contract under Part 880 (Section 8 Housing Assistance Payments Program for New Construction), Part 881 (Section 8 Housing Assistance Payment Program for Substantial Rehabilitation), or Part 883 (Section 8 Housing Assistance Payments Program—State Housing Agencies) of this title shall be determined in accordance with the HAP contract, applicable regulations, and HUD's administrative instructions, and shall not, without the prior approval of the Commissioner, exceed rents charged for comparable, unassisted units in the project.

(iv) Rent adjustments for projects with units assisted under Part 886 of this title (Section 8 Housing Assistance Payments Program—Special Allocations) shall be determined under paragraph (a)(2) of this section, or the mortgagor may, with the prior approval of the Commissioner, determine the rents, except that the rents for units occupied by assisted tenants shall be determined in accordance with the HAP Contract, applicable regulations, and HUD's administrative instructions.

(v) The Commissioner will approve rents for units in a project not occupied by tenants receiving section 8 assistance if the mortgagor and the Commissioner determine that such approval is necessary for the project to comply with the requirements of the Internal Revenue Code or State law. If such a determination is made, the Commissioner will approve rents in the amount provided in § 207.19(e)(2)(ii) (A) or (B) of this chapter, at the option of the mortgagor.

(vi) The Commissioner will approve rental adjustments, in the amount provided in § 207.19(e)(2)(ii) (A) or (B) of this chapter, at the election of the mortgagor, if the Commissioner determines that the following conditions are applicable:

(A) The firm commitment to insure the mortgage under this part was issued before June 1, 1983;

(B) At the time that the mortgagor (or its predecessor in title) (*1*) obtained a firm commitment to insure the mortgage under this part, or (*2*) acquired title to the project subject to a mortgage insured under this part, the project would be (or would become upon completion) subject to regulation under a State or local rent control law, but for an exclusion contained in the State or local law based upon regulation of the project rents by the Commissioner; and

(C) The exclusion continues in effect, so that authorizing the mortgagor to determine rents would have the effect of subjecting the project to regulation under the State or local rent control law.

(vii) Any State or local law, ordinance, or regulation regulating the rents of projects subject to this paragraph (a) may be preempted only as provided in Part 246 of this chapter. HUD will determine the maximum rents that may be charged following any such preemption action using the method outlined in § 207.19(e)(2)(ii)(A) of this chapter.

(Approved by OMB under control number 2503-0324)

§ 221.531 [Amended]

7. Section 221.531(c) is removed and reserved.

PART 236—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENT FOR RENTAL PROJECTS

8. The authority citation for 24 CFR Part 236 continues to read as follows:

Authority: Secs. 211, 236, National Housing Act (12 U.S.C. 1715b, 1715z–1); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

9. In § 236.55, paragraph (a) is revised to read as follows:

§ 236.55 Rental charges.

(a) *Approved rental charges.* The Commissioner will establish, and the mortgagor will maintain, a Basic Rent and Market Rent for each dwelling unit. On the basis of information that the mortgagor provides on a form prescribed by the Commissioner, the Commissioner will determine the rents for the project, using the sum of the project's operating costs and debt service (as calculated by the Commissioner), and the owner's return on investment, with adjustments for vacancies, the project's non-rental income, and other factors that the Commissioner deems appropriate.

* * * * *

(Approved by OMB under control number 2502–0334)

PART 246—LOCAL RENT CONTROL

10. The authority citation for 24 CFR Part 246 is revised to read as set forth below and any authority citation following any section in Part 246 is removed:

Authority: Sec. 211, National Housing Act (12 U.S.C. 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

11. Section 246.20 is revised to read as follows:

§ 246.20 Applicability.

This subpart applies to all projects with mortgages insured or held by HUD that receive a subsidy in the form of (a) interest reduction payments under section 236 of the National Housing Act; (b) below-market interest rates under sections 221(d) (3) and (5) of the National Housing Act; (c) direct loans at below-market interest rates under section 202 of the Housing Act of 1959; (d) rent supplement payments under section 101 of the Housing and Urban Development Act of 1965; (e) housing assistance payments under 24 CFR Part 886, Subpart A (Section 8 Loan Management Set Aside), for projects that converted their rent supplement contracts under section 101 of the Housing and Urban Development Act of 1965 to such assistance for the term of the HAP contract; or (f) housing assistance payments pursuant to a contract covering all the units in the project under section 8 of the United States Housing Act of 1937 or section 23 of that Act, as in effect before January 1, 1975. This subpart also applies to projects with mortgages insured or held by HUD that receive housing assistance payments pursuant to a contract covering fewer than all units in the project, but only with respect to those units occupied by tenants receiving housing assistance thereunder.

PART 251—COINSURANCE FOR THE CONSTRUCTION OR SUBSTANTIAL REHABILITATION OF MULTIFAMILY HOUSING PROJECTS

12. The authority citation for 24 CFR Part 251 is revised to read as set forth below and any authority citation following any section in Part 251 is removed:

Authority: Secs. 211, 244, National Housing Act (12 U.S.C. 1715b, 1715z(9)); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

13. Section 251.703 is revised to read as follows:

§ 251.703 Rents and charges.

(a) For units occupied by tenants assisted under a Section 8 Housing Assistance Payments (HAP) Contract under Part 880 (Section 8 Housing Assistance Payments Program for New Construction), Part 881 (Section 8 Housing Assistance Payments Program for Substantial Rehabilitation), Part 882, Subpart E (Section 8 Moderate Rehabilitation), Part 883 (Section 8 Housing Assistance Payments Program—State Housing Agencies) or Part 886 (Section 8 Housing Assistance Payments Program—Special Allocations) of this title, the Commissioner will determine the rents and charges for facilities and services in accordance with the HAP Contract, HUD's regulations, and administrative instructions governing the program under which the unit is receiving assistance. The Mortgagor may not charge rents for units occupied by Section 8 assisted tenants that exceed rents charged for comparable, unassisted units in the project without the prior approval of the Commissioner, and the Mortgagor may not impose lesser charges for facilities and services on unassisted tenants than those imposed on assisted tenants.

(b) For units (other than those governed by paragraph (a) of this section) in projects with mortgages coinsured under section 221(d)(3) of the National Housing Act, the Mortgagor may collect unit rents and other charges only in amounts less than or equal to those approved by the lender. In determining maximum allowable rents and charges and in acting upon applications for changes, the lender must adhere to standards that the Commissioner establishes. These standards are designed to set rents at a level needed to maintain the economic soundness of the project and to provide a reasonable return to the Mortgagor and reasonable rents to tenants.

(c) Any requests for rent increases must be submitted and processed on a form that the Commissioner prescribes.

(d) If the mortgage is coinsured under section 221(d)(4) of the National Housing Act, and the lender does not elect to regulate rents pursuant to paragraph (e) of this section, the Mortgagor will determine the rents for all units, except for those that are occupied by tenants receiving Section 8 assistance. For a project not constructed for occupancy exclusively by the elderly or handicapped, the Mortgagor may also determine the charges for facilities or services. For a project constructed for occupancy exclusively by the elderly or handicapped, the Mortgagor may charge for facilities or services offered by the project only after obtaining any lender approval that the Commissioner's administrative instructions require. These charges must be reasonable in amount, and may not exceed any amounts approved by the lender. The mortgagor may not charge for perpetual care or life care.

(e) For any mortgage co-insured under section 221(d)(4) of the National Housing Act, the lender may, subject to the Commissioner's administrative instructions, regulate rents and charges for any units not occupied by Section 8-assisted tenants, if the lender determines (under standards established by the Commissioner) that such regulation is necessary to comply with the requirements of the Internal Revenue Code or State law.

(f) Any State or local law, ordinance or regulation regulating the rents of projects subject to this part may be preempted only as provided in Part 246, Subpart B of this chapter. HUD will determine the maximum rents that may be charged following any such preemption action using the method outlined in § 207.19(e)(2)(ii)(A) of this chapter.

(Approved by OMB under control number 2502–0314)

PART 255—COINSURANCE FOR PRIVATE MORTGAGE LENDERS

14. The authority citation for 24 CFR Part 255 is revised to read as set forth below and any authority citation following any section in Part 255 is removed:

Authority: Secs. 211, 244, National Housing Act (12 U.S.C. 1715b, 1715z(9)); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

15. Section 255.703 is revised to read as follows:

§ 255.703 Rents and charges.

(a) For units occupied by tenants assisted under a Section 8 Housing Assistance Payments (HAP) Contract under Part 880 (Section 8 Housing Assistance Payments Program for New Construction), Part 881 (Section 8 Housing Assistance Payments Program for Substantial Rehabilitation), Part 882, Subpart E (Section 8 Moderate Rehabilitation), Part 883 (Section 8 Housing Assistance Payments Program—State Housing Agencies), or Part 886 (Section 8 Housing Assistance Payments Program—Special Allocations) of this title, the Commissioner will determine rents and charges for facilities and services in accordance with the HAP Contract, HUD's regulations, and administrative instructions governing the program under which the unit is receiving assistance. The Mortgagor may not charge rents for units occupied by Section 8-assisted tenants that exceed rents charged for comparable, unassisted units in the project without the prior approval of the Commissioner, and the Mortgagor may not impose lesser charges for facilities and services on unassisted tenants than those imposed on assisted tenants.

(b) For units (other than those governed by paragraph (a) of this section) in projects with mortgages coinsured before November 30, 1983, the Mortgagor may collect unit rents and other charges only in amounts less than or equal to those that the lender approves. In determining maximum allowable rents and charges and in acting upon applications for changes, the lender must adhere to standards established by the Commissioner. These standards are designed to set rents at a level needed to maintain the economic soundness of the project and to provide a reasonable return to the Mortgagor and reasonable rents to tenants.

(c) For any mortgage coinsured on or after November 30, 1983, the Mortgagor will determine rents and charges for facilities and services for all units (except those occupied by tenants receiving Section 8 assistance) except as follows:

(1) For any mortgage co-insured on or after November 30, 1983, the lender may, subject to the Commissioner's administrative instructions, regulate rents and charges for any units not occupied by Section 8-assisted tenants, if the lender determines (under standards established by the Commissioner) that such regulation is necessary to comply with the requirements of the Internal Revenue Code or State law.

(2) The Commissioner (through the lender) will approve rental adjustments, in the amount provided in § 207.19(e)(2)(ii) (A) or (B) of this chapter, at the election of the mortgagor, if the Commissioner determines that the following conditions are applicable:

(i) The firm commitment to insure the mortgage under this part was issued before June 4, 1986;

(ii) At the time that the mortgagor (or its predecessor in title) (A) obtained a firm commitment to insure the mortgage under this part, or (B) acquired title to the project subject to a mortgage insured under this part, the project would be (or would become upon completion) subject to regulation under a State or local rent control law, but for an exclusion contained in the State or local law based upon regulation of the project rents by the Commissioner; and

(iii) The exclusion continues in effect, so that authorizing the mortgagor to determine rents would have the effect of subjecting the project to regulation under the State or local rent control law.

This paragraph (c)(2) shall not apply to any mortgage coinsured pursuant to this Part, the proceeds of which were used to refinance a mortgage insured under 24 CFR Part 220 or 221 for which the firm commitment to insure under such Part 220 or 221 was issued on or after June 1, 1983.

(d) Any requests for rent increases must be submitted and processed on a form that the Commissioner prescribes.

(e) Any State or local law, ordinance or regulation regulating the rents of projects subject to this part may be preempted only as provided in Part 246, Subpart B of this chapter. HUD will determine the maximum rents that may be charged following any such preemption action using the method outlined in § 207.19(e)(2)(ii)(A) of this chapter.

(Approved by OMB under control number 2502-0314)

Dated: May 27, 1986.

Silvio J. DeBartolomeis,

Acting General Deputy Assistant Secretary for Housing-Deputy Federal Housing Commissioner.

Correction

In FR Doc. 86-10998, beginning on page 17929, in the issue of Friday, May 16, 1986, make the following corrections:

1. On page 17931, first column, second complete paragraph, ninth line, "and" should read "any".

2. On page 17932, second column, § 1.338-1T(m), in the fifth line, before "July" insert "December 9, 1985, and on or before".

3. On page 17933, second column, in § 1.338-1T(m)(7)(iii)(B), tenth line, the date should read "November 3, 1986".

BILLING CODE 1505-01-M

DEPARTMENT OF JUSTICE

28 CFR Part 16

[AAG/A Order No. 10-86]

Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: On December 17, 1985, the United States Marshals Service (USMS), Department of Justice, issued proposed regulations to exempt four systems of records from certain provisions of the Privacy Act.

Specifically, the USMS proposed to exempt the Threat Analysis Information System (JUSTICE/USM-009) from subsections (c) (3) and (4), (d), (e) (1), (2) and (3), (e)(4) (G) and (H), (e)(5), (e)(8), (f), and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). These exemptions are necessary because adherence to these provisions of the Act would present a serious impediment to security measures necessary for the fulfillment of

law enforcement and the protection of participants in the judicial process, including but not limited to judges, witnesses, U.S. Attorneys, etc. For example, persons who have directly threatened or pose violent threat to USMS protectees could learn that countermeasures to specific threat situations are being developed and implemented. The exemptions will preclude such knowledge and thereby deny threat sources the opportunity to circumvent law enforcement and security efforts.

The USMS also proposed to exempt from subsections (c)(3) and (d) of the Privacy Act a system entitled "Judicial Facility Security Index System (JUSTICE/USM-10)" pursuant to 5 U.S.C. 552a(k)(5). This exemption is necessary to protect the identity of confidential sources.

Finally, the USMS also proposed to exempt from subsections (c) (3) and (4), (d), (e) (1), (2) and (3), (e)(4) (G) and (H), (e)(5), (e)(8), (f), and (g) of the Privacy Act a system entitled "U.S. Marshals Service Freedom of Information/Privacy Act (FOIA/PA) Files (JUSTICE/USM-012)" and from subsections (c) (3) and (4), (d), (e) (2) and (3), (e)(4) (G) and (H), (e)(8), (f), and (g) of the Privacy Act a system entitled "U.S. Marshals Service Administrative Proceedings, Claims and Civil Litigation Files (JUSTICE/USM-013)." The exemptions are needed to protect the integrity of civil litigation, criminal investigatory information, the privacy of third parties and identity of confidential sources.

DATE: This rule will be effective June 4, 1986.

ADDRESS: J. Michael Clark, Assistant Director, General Services Staff, Justice Management Division, Room 9002, Department of Justice, 601 D Street, NW., Washington, DC 20530.

FOR FURTHER INFORMATION CONTACT: J. Michael Clark (202) 272-6474.

SUPPLEMENTARY INFORMATION: No comments were received regarding the proposed regulations published on December 17, 1985.

List of Subjects in 28 CFR Part 16

Administrative practice and procedure, Courts, Freedom of Information, Privacy, and the Sunshine Act.

This order relates to individuals rather than small business entities. Nevertheless, pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601-612, it is hereby stated that the order will not have a "significant economic impact on a substantial number of small entities."

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order 793-78, the regulations published in the Federal Register on December 17, 1985 (50 FR 51411) are adopted without change as set forth below.

Dated: May 20, 1986.

[redacted]
Acting Assistant Attorney General for Administration.

PART 16—[AMENDED]

1. The authority for Part 16 continues to read as follows:

Authority: 28 U.S.C. 509, 510; 5 U.S.C. 301, 552, 552a; 31 U.S.C. 483a unless otherwise noted.

2. Section 16.101 is amended by redesignating existing paragraph (g) as paragraph (o), by revising the last sentence of newly redesignated paragraph (o), and by adding new paragraphs (g) through (n).

§ 16.101 Exemption of U.S. Marshals Service Systems—Limited access, as indicated.

* * * * *

(g) The following system of records is exempt from 5 U.S.C. 552a(c) (3) and (4), (d), (e)(1), (2) and (3), (e)(4) (G) and (H), (e)(5), (e)(8), (f) and (g):

(1) U.S. Marshals Service Threat Analysis Information System (JUSTICE/USM-009).

These exemptions apply only to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(j)(2).

(h) Exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) because to release the disclosure accounting would permit a person to determine whether he or she has been identified as a specific threat to USMS protectees and to determine the need for countermeasures to USMS protective activities and thereby present a serious impediment to law enforcement.

(2) From subsection (c)(4) because it is inapplicable since an exemption is being claimed for subsection (d).

(3) From subsection (d) because to permit access to records would inform a person of the nature and scope of information obtained as to his or her threat-related activities and of the identity of confidential sources, and afford the person sufficient information to develop countermeasures to thwart protective arrangements and endanger lives of USMS protectees, informants, etc. To permit amendment of the records would interfere with ongoing criminal law enforcement and impose an impossible administrative burden requiring criminal investigations to be continuously reinvestigated.

(4) From subsections (e) (1) and (5) because the collection of investigatory information used to assess the existence, extent and likelihood of a threat situation necessarily includes material from which it is impossible to identify and segregate information which may not be important to the conduct of a thorough assessment. It is often impossible to determine in advance if all information collected is accurate, relevent, timely and complete but, in the interests of developing effective protective measures, it is necessary that the U.S. Marshals Service retain this information in order to establish patterns of activity to aid in accurately assessing threat situations. The restrictions of subsections (e) (1) and (5) would impede the protective responsibilities of the Service and could result in death or serious injury to Marshals Service protectees.

(5) From subsection (e)(2) because to collect information from the subject individual would serve notice that he or she is identified as a specific threat to USMS protectees and would enable the subject individual to develop countermeasures to protective activities and thereby present a serious impediment to law enforcement.

(6) From subsection (e)(3) because to inform individuals as required by this subsection would enable the subject individual to develop countermeasures to USMS protective arrangements or identify confidential sources and thereby present a serious impediment to law enforcement.

(7) From subsections (e)(4) (G) and (H) because they are inapplicable since an exemption is being claimed for subsections (d) and (f) of the Act.

(8) From subsection (e)(8) because to serve notice would give persons sufficient warning to develop countermeasures to protective arrangements and thereby present a serious impediment to law enforcement through compromise of protective procedures, etc.

(9) From subsection (f) because this system of records is exempt from the provisions of subsection (d).

(10) From subsection (g) because it is inapplicable since an exemption is being claimed for subsections (d) and (f).

(i) The following system of records is exempt from 5 U.S.C. 552a(c) (3) and (d):

(1) Judicial Facility Security Index System (JUSTICE/USM-010)

These exemptions apply only to the extent that information in this system is exempt pursuant to 5 U.S.C. 552a(k)(5).

(j) Exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) only to the extent that release of the disclosure accounting would reveal the identity of a confidential source.

(2) From subsection (d) only to the extent that access to information would reveal the identity of a confidential source.

(k) The following system of records is exempt from 5 U.S.C. 552a(c) (3) and (4), (d), (e)(1), (2) and (3), (e)(4) (G) and (H), (e)(5), (e)(8), (f) and (g):

(1) U.S. Marshals Service Freedom of Information/Privacy Act (FOIA/PA) Files (JUSTICE/USM-012)

These exemptions apply only to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a (j)(2), (k)(2) and (k)(5).

(l) Because this system contains Department of Justice civil and criminal law enforcement, investigatory records, exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) because to release the disclosure accounting would permit the subject of an investigation to obtain valuable information concerning the existence and nature of the investigation and present a serious impediment to law enforcement.

(2) From subsection (c)(4) because that portion of this system which consists of investigatory records compiled for law enforcement purposes is being exempted from the provisions of subsection (d), rendering this provision not applicable.

(3) From subsection (d) because to permit access to investigatory records would reveal the identity of confidential sources and impede ongoing investigative or law enforcement activities by the premature disclosure of information related to those efforts. To permit amendment of the records would interfere with ongoing criminal law enforcement and impose an impossible administrative burden by requiring criminal investigations to be continuously reinvestigated.

(4) From subsections (e) (1) and (5) because it is often impossible to determine in advance if investigatory records contained in this system are accurate, relevant, timely and complete but, in the interests of effective law enforcement, it is necessary to retain this information to aid in establishing patterns of activity and provide leads in criminal investigations.

(5) From subsection (e)(2) because to collect information from the subject individual would serve notice that he or she is the subject of criminal investigative or law enforcement activity and thereby present a serious impediment to law enforcement.

(6) From subsection (e)(3) because to inform individuals as required by this subsection would enable the subject individual to identify confidential sources, reveal the existence of an investigation, and compromise law enforcement efforts.

(7) From subsections (e)(4) (G) and (H) because they are inapplicable since an exemption is being claimed for subsections (d) and (f) for investigatory records contained in this system.

(8) From subsection (e)(8) because to serve notice would give persons sufficient warning to evade law enforcement efforts.

(9) From subsection (f) because investigatory records contained in this system are exempt from the provisions of subsection (d).

(10) From subsection (g) because it is inapplicable since an exemption is being claimed for subsections (d) and (f).

(m) The following system of records is exempt from 5 U.S.C. 552a(c) (3) and (4), (d), (e) (2) and (3), (e)(4) (G) and (H), (e)(8), (f) and (g):

(1) U.S. Marshals Service Administrative Proceedings, Claims and Civil Litigation Files (JUSTICE/USM-013).

These exemptions apply only to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(j)(2) or (k)(5).

(n) Exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) because to release the disclosure accounting for disclosures pursuant to the routine uses published for this system would permit the subject of a criminal or civil case or matter under investigation, or a case or matter in litigation, or under regulatory or administrative review or action, to obtain valuable information concerning the nature of that investigation, case or matter, and present a serious impediment to law enforcement or civil legal activities, or reveal a confidential source.

(2) From subsection (c)(4) because the exemption claimed for subsection (d) will make this section inapplicable.

(3) From subsection (d) because to permit access to records contained in this system would provide information concerning litigation strategy, or case development, and/or reveal the nature of the criminal or civil case or matter under investigation or administrative review, or in litigation, and present a serious impediment to law enforcement or civil legal activities, or reveal a confidential source.

(4) From subsection (e)(2) because effective legal representation, defense, or claim adjudication necessitates collecting information from all individuals having knowledge of the criminal or civil case or matter. To collect information primarily from the subject individual would present a serious impediment to law enforcement or civil legal activities.

(5) From subsection (e)(3) because to inform the individuals as required by this subsection would permit the subject of a criminal or civil matter under investigation or administrative review to compromise that investigation or administrative review and thereby impede law enforcement efforts or civil legal activities.

(6) From subsections (e)(4) (G) and (H) because these provisions are inapplicable since this system is exempt from subsections (d) and (f) of the Act.

(7) From subsection (e)(8) because to serve notice would give persons sufficient warning to compromise a criminal or civil investigation or administrative review and thereby impede law enforcement of civil legal activities.

(8) From subsection (f) because this system of records is exempt from the provisions of subsection (d).

(9) From subsection (g) because it is inapplicable since an exemption is claimed for subsections (d) and (f).

(o) * * * The decisions to release information from these systems will be made on a case-by-case basis.

BILLING CODE 4410-01-M

---

28 CFR Part 16

[AAG/A Order No. 11-86]

Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: On December 17, 1985, the United States Marshals Service (USMS), Department of Justice, issued proposed regulations to exempt a system of records entitled "Warrant Information System, JUSTICE/USM-007" from subsections (e)(1) and (e)(5) of the Privacy Act. These exemptions are necessary because the relevancy, necessity, accuracy, timeliness and completeness provisions of subsections (e)(1) and (e)(5) would present a serious impediment to law enforcement in that it is impossible to determine in advance what information collected in the course of a criminal investigation will be

important or crucial to the apprehension of Federal fugitives or to the law enforcement activities of other agencies. These exemptions will permit the USMS to retain seemingly irrelevant, untimely or inaccurate information which, with the passage of time, would gain new significance in the criminal investigation. In addition, because a new paragraph has been added to exempt the system from the additional subsections (e)(1) and (e)(5), the USMS is also republishing existing paragraphs which reflect existing exemptions from other subsections. The existing paragraphs are being republished only to accomplish paragraph redesignation and clarity in Title 28, Part 16, of the Code of Federal Regulations. Their republication has no effect on the public because such republication does not effect any new exemptions.

DATE: This rule will be effective June 4, 1986.

ADDRESS: J. Michael Clark, Assistant Director, General Services Staff, Justice Management Division, United States Department of Justice, Room 9002, 601 D Street, NW., Washington, DC 20530.

FOR FURTHER INFORMATION CONTACT: J. Michael Clark (202-272-6474).

SUPPLEMENTARY INFORMATION: No comments were received regarding the proposed regulations published on December 17, 1985.

List of Subjects in 28 CFR Part 16

Administrative practice and procedure, Courts, Freedom of Information, Privacy, and Sunshine Acts.

This order relates to individuals rather than small business entities. Nevertheless, pursuant to the requirements of the Regulatory Felxibility Act, 5 U.S.C. 601-612, it is hereby stated that the order will not have a "significant economic impact on a substantial number of small entities."

Pursuant to authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by the Attorney General Order No. 793-78, the proposed regulations published in the Federal Register on December 17, 1985 (50 FR 51413) are adopted without change as set forth below.

Dated: May 20, 1986.

Harry H. Flickinger,

Acting Assistant Attorney General for Administration.

PART 16—[AMENDED]

1. The authority for Part 16 continues to read as follows:

Authority: 28 U.S.C. 509, 510; 5 U.S.C. 301, 552, 552a; 31 U.S.C. 483a unless otherwise noted.

2. Section 16.101 is amended by revising the introductory text of paragraph (a); by redesignating paragraphs (b)(4) through (b)(9) as paragraphs (b)(5) through (b)(10); by adding a new paragraph (b)(4); and by revising paragraphs (d) (5) through (7) and (d)(9) and paragraphs (f)(4) through (f)(9).

§ 16.101 Exemption of U.S. Marshals Service Systems—Limited Access, as indicated.

(a) The following system of records is exempt from 5 U.S.C. 552(a)(c) (3) and (4), (d), (e) (1), (2) and (3), (e)(4) (G) and (H), (e)(5), (e)(8), (f) and (g):

* * * * *

(b) * * *

(4) From subsections (e)(1) and (e)(5) because the requirements of these subsections would present a serious impediment to law enforcement in that it is impossible to determine in advance what information collected during an investigation will be important or crucial to the apprehension of Federal fugitives. In the interest of effective law enforcement, it is appropriate in a thorough investigation to retain seemingly irrelevant, untimely, or inaccurate information which, with the passage of time, would aid in establishing patterns of activity and provide investigative leads toward fugitive apprehension and assist in law enforcement activities of other agencies.

* * * * *

(d) * * *

(5) From subsection (e)(3) for the reason stated in (b)(6) of this section.

(6) From subsection (e)(4) (G) and (H) for the reason stated in (b)(7) of this section.

(7) From subsection (e)(8) for the reason stated in (b)(8) of this section.

* * * * *

(9) From subsection (g) for the reason stated in (b)(10) of this section.

* * * * *

(f) * * *

(4) From subsection (e)(2) because the requirement that information be collected to the greatest extent practicable from the subject individual would present a serious impediment to law enforcement because the subject of the investigation or prosecution would be placed on notice as to the existence of the investigation and would therefore be able to compromise the investigation and avoid detection or apprehension.

(5) From subsection (e)(3) for the reason stated in (b)(6) of this section.

(6) From subsections (e)(4) (G) and (H) for the reason stated in (b)(7) of this section.

(7) From subsection (e)(8) because the individual notice requirement of this subsection would present a serious impediment to law enforcement in that the subject of the investigation would be alerted as to the existence of the investigation and therefore be able to compromise the investigation and avoid detection, subpoena, etc.

(8) From subsection (f) because procedures for notice to an individual pursuant to subsection (f)(1) as to the existence of records dealing with investigations of criminal or civil law violations would enable the individual to compromise the investigation and evade detection or apprehension. Since an exemption is being claimed for subsection (d) of the Act, the rules required pursuant to subsections (f)(2) through (f)(5) are not applicable to this system.

(9) From subsection (g) for the reason stated in (b)(10) of this section.

* * * * *

BILLING CODE 4410-04-M

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 806b

Privacy Act Program

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Final rule.

SUMMARY: The Department of the Air Force is revising Part 806b—Privacy Act Program. This revision simplifies procedures for answering Privacy Act requests, restores the distinction between Freedom of Information (FOIA) and Privacy Act requests and deletes two exemptions. It implements 5 U.S.C. 552a (Pub. L. 93-579), and DOD Directive 5400.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Updike, Department of the Air Force, HQ USAF/DAQD, Washington, D.C. 20330, telephone (202) 694-3488.

SUPPLEMENTARY INFORMATION: Because this regulation implements a higher authority directive it was not published as proposed for public comments. It is published as a final rule for information purposes. The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291; is not subject

BEST COPY AVAILABLE

to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354); and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub. L. 96-511).

List of Subjects in 32 CFR Part 806b

Privacy, Records.

Title 32 CFR Part 806b is revised to read as follows:

PART 806b—AIR FORCE PRIVACY ACT PROGRAM

Sec.

806b.0. Purpose.

Subpart A—The Privacy Act Program

806b.1. Air Force Policy.
806b.2. Terms defined.
806b.3. Access authorities.
806b.4. Judicial sanctions.

Subpart B—Collecting Personal Information

806b.5. Privacy Act Statements (PAS).

Subpart C—Maintaining Systems of Records

806b.6. Air Force standards.
806b.7. Personal notes.

Subpart D—Providing Information

806b.8. Access by subjects of records.
806b.9. Disclosures to third parties and organizations.

Subpart E—Privacy Act Exemptions

806b.10. Use of exemptions.
806b.11. General Exemptions.
806b.12. Specific exemptions.
806b.13. General and specific exemptions.

Authority: 5 U.S.C. 552a, Pub. L. 93-579.

§ 806b.0 Purpose.

This part sets policies and outlines procedures that govern collecting, safeguarding, maintaining, using, accessing, amending, and disseminating personal information kept by the Department of the Air Force in systems of records. This part applies to all Air Force activities, including the Reserve Components, except for the Office of the Chief, National Guard Bureau; Air National Guard technicians; and Army-Air Force Exchange Service activities, including Motion Picture Service activities. It does not apply to civilian employee records maintained by Air Force activities which are covered by the Office of Personnel Management systems of records. Such records are subject to Parts 293, 294, and 297 of Office of Personnel Management regulations and the Federal Personnel Manual and Air Force supplements.

Subpart A—The Privacy Act Program

§ 806b.1 Air Force policy.

Air Force policy is to:

(a) Protect personal privacy as required by the Privacy Act of 1974. The Privacy Act and this part apply only to information in systems of records on living U.S. citizens and aliens admitted as permanent residents of the United States.

(b) Collect, maintain, and use information in such systems only to support programs authorized by law or Executive order.

(c) Ensure that records in these systems are timely, accurate, complete, and relevant, amending on request any record which does not meet these requirements.

(d) Let individuals know about and see or get copies of their own records in systems unless the Secretary of the Air Force (SAF) has approved an exemption, or the records were created in anticipation of civil action or proceeding.

(e) Safeguard records in systems.

(f) Provide a review of decisions that deny individuals access to or amendment of their records.

(g) Keep records the minimum time required to protect the rights and provide for the needs of the individual and the U.S. Government.

§ 806b.2. Terms defined:

(a) *Access.* The process of letting individuals see or get copies of their records from a system of records.

(b) *Agency.* The Department of Defense (DOD) for disclosures from systems of records. Any record may be disclosed to any component for a use compatible with the purpose for which the record was created. The Air Force is an agency for all other actions under the Privacy Act including access and amendment requests and appeals.

(c) *Confidential source.* Any person or organization that has given information under an:

(1) Expressed promise to withhold their identity; or

(2) Implied promise of confidentiality made before September 27, 1975.

(d) *Confidentiality.* A promise to withhold the identity of a source or the information provided. The information must be for use in an exempt system. This promise must be expressed and recorded.

(e) *Disclosure.* Giving information from a system, by any means, to anyone other than the subject.

(f) *Individual.* A living U.S. citizen or a permanent resident alien. The deceased, non-resident aliens, businesses, and third parties have no rights under the Privacy Act. However, a parent or guardian may exercise Privacy Act rights for a minor or incompetent person.

(g) *Maintain.* To collect, keep, use, or disseminate records.

(h) *Minor.* Anyone under the age of majority according to the law of the state where the records are located. If there is no state law, a minor is anyone under the age of 18. Military members and married persons are not minors.

(i) *Official use.* Any action by a Department of Defense member or employee to perform a mission or function prescribed or authorized by law or regulation.

(j) *Personal information.* All information about an individual except for matters of public record. Some examples of personal information are all medical files, financial records except for gross pay, criminal records except the findings of a court-martial, and details on a person's private life. Information about an individual's official duties is normally not personal.

(k) *Privacy Act request.* A request by an individual about the existence of, access to, or amendment of, a record about him or her that is in a system of records. The request must show dependence on the Privacy Act.

(l) *Record.* Any item, collection, or grouping of information about an individual.

(m) *Routine use.* Any disclosure outside of Department of Defense from a system for a use that is compatible with the purpose for which the record was created. Routine uses must be shown in the systems notice. These notices are published in the Federal Register and AFP 12-36, Privacy Act Systems of Records.

(n) *Statistical records.* A record kept only for statistical or reporting purposes. It is not used for making judgments about persons. Individual identity must not be discoverable using routine statistical or data manipulation methods.

(o) *System manager.* The official who initiates a system of records and issues policies and procedures for operating and safeguarding a system. Local systems managers operate such systems or are responsible for a segment of a decentralized system.

(p) *System of records.* Any group of records from which personal information is retrieved by name or personal identifier (See paragraph (l) of this section.) A record in a system of records must contain two elements, a personal identifier and at least one item of personal information. This identifier is some name, number, or symbol which is unique to the individual. The most often used personal identifiers in the Air Force are name and Social Security number (SSN). If a retrieval is possible

but not actually done, or if it depends on memory, the group is not a system of records. However, creating a retrieval or cross index, arranged by personal identifier for randomly filed records, makes that collection a system.

(q) *Workday or day.* A duty day, not including Saturdays, Sundays, and Federal holidays.

§ 806b.3 Access authorities.

The system manager, or individual or position designated in the system notice to receive requests is the access authority.

§ 806b.4 Judicial sanctions.

The Privacy Act has both civil remedies and criminal penalties for violations.

(a) *Civil remedies.* An individual can file a civil suit against the Air Force for failing to comply with the Privacy Act.

(b) *Criminal penalties.* Personnel may be found guilty of a misdemeanor and fined not more than $5,000 for willfully:

(1) Maintaining a system without meeting the public notice requirements.

(2) Disclosing information from a system to someone who is not entitled to have it knowing that disclosure is prohibited.

(3) Obtaining another's record from a system under false pretenses.

Subpart B—Collecting Personal Information

§ 806b.5 Privacy Act Statements (PAS).

Give PASs to individuals you ask to provide information about themselves which will go into a system of records. Do this regardless of how you collect or record the answers. You may read the statement or display a sign in area where people are often asked for the same type of information. However, a printed copy must be given out if the subject asks for one. A PAS is not required if the information will not go into a system of records or if it will go into a SAF exempted criminal investigative system. A PAS must show:

(a) The citation and title of the law or Executive Order that authorizes the program the system supports and the Air Force or lower level standard publications which covers the system. All systems of records must be governed by a standard publication.

(b) The principal purposes for the system. The reasons why the Air Force needs the information.

(c) The routine uses of the information. What disclosures, if any, will be made outside of DOD.

(d) Whether furnishing the information is mandatory or voluntary. An answer is mandatory only if the information is essential to an Air Force mission, and if failure to answer could make the person liable to some specific penalty.

(e) What will happen to an individual who does not respond. PASs are not to be signed and the language in them must be nonthreatening. These statements may be printed in simple paragraph form without separation of the five parts.

Subpart C—Maintaining Systems of Records

§ 806b.6 Air Force standards.

Records on individuals must be as accurate, relevant, timely, and complete as is reasonably necessary to make fair and informed decisions about them. Systems of records must be:

(a) Authorized by law or Executive Order.

(b) Controlled by an Air Force or lower echelon directive.

(c) Needed to carry out an Air Force mission or function.

(d) Described in a notice published in the Federal Register.

§ 806b.7 Personal notes.

Personal notes which are maintained on individuals as memory aids in the performance of supervisory or other official functions are not subject to the notice, access, or amendment provisions of the Privacy Act if both of the following conditions are met.

(a) The notes remain under the control of the originator and are never made available to any other person in the course of official business.

(b) The notes are not required by any Air Force directive, and they may be retained or disposed of as the originator sees fit.

Subpart D—Providing Information

§ 806b.8 Access by subjects of records.

Individuals may ask if the Air Force has any records on them. The Privacy Act gives rights of access and amendment for records in a system of records.

(a) *Privacy Act requests.* To be considered under the Privacy Act, a request must:

(1) Come from the subject of a record in a system of records, or from a designated agent or guardian. The subject must be a U.S. citizen or permanent resident alien.

(2) Cite the Privacy Act or at least show an awareness of the law and its requirement to provide an individual access to his or her records. For example it could be addressed to the Privacy Act officer or the system manager or cite the Privacy Act.

(3) Reasonably describe the records sought. The request does not have to name the system, but it should be fairly specific. Do not accept blanket requests for "all records about me." Instead, refer the individual to AFP 12-36 or the Federal Register and ask the requester to identify at least the types of records sought.

Note: Privacy Act requests are personal and not official business. Requests received on official letterhead, except for those from an area defense counsel, should be returned. No one may be penalized or harassed for exercising their rights under the Privacy Act. The Air Force will provide all reasonable aid to individuals exercising their rights.

(4) Requests which do not cite or refer to the Privacy Act, or are for information which is not in a system of records, are not processed under this part.

(b) *FOIA requests.* Request made under the FOIA or Part 806 of this chapter are processed as FOIA requests. Privacy Act exemptions must not be used to deny records under the FOIA. FOIA exemptions cannot be used to deny anyone any record which would be available under the Privacy Act. No person will be denied access to a record for failure to cite the proper act. FOIA requests must not be listed on the annual Privacy Act report.

(c) *Privacy Act requests for investigative records.* Requests for investigative records subject to the (j)(2) general exemption will be processed under both acts. Tell the individual in writing what records are exempt under the Privacy Act and that you are providing records, if any, which would be available under the FOIA. Clearly explain the reasons for this action in your reply.

(d) *Access requests that cite both the Privacy Act and the FOIA.* Use the act that gives the most information. This may mean processing part of the request under one act and part under another. Explain in your reply which act you are using in each case and why.

(e) *Functional requests.* Other directives give individuals access to records. If a person asks for his or her records and does not cite, or reasonably imply, the Privacy Act or the FOIA, and another directive authorizes the release of the records, use that directive as the releasing authority. Apply the fee schedule in Part 813 of this chapter.

(f) *Processing access requests*—(1) *Verifying identity.* Local system managers must verify the identity of all requests unless the record sought is available to anyone under the FOIA. Individuals do not have to state a reason for the request, nor can the request be denied if that person does not

give his or her SSN, unless disclosure of the SSN is required by Federal Statute or by a regulation adopted before January 1, 1975.

(2) *Notifying the requester.* Once the requester's identity is verified:

(i) Tell the individual if there is a record in a system of records about him or her, and when and where it may be reviewed. If possible, this should be done within 10 workdays from the date the request was received.

(ii) Let the subject see the record, or obtain one copy, unless the system is exempt and listed in Section 806b.13. Usually this should be done within 30 workdays from the date the request was received.

(A) If the requester wants to bring another person, the local system manager may ask for written consent for the other individual to be present during any review of the record.

(B) Do not create a new record simply to fulfill a request. The record must exist at the time of the request. However, do not deny a record just because it is not readily available in a convenient form. Information on magnetic or computer tape should be given in a format the requester can understand.

(iii) If you cannot answer the request in 10 workdays, tell the requester why in a letter and give an approximate completion date. That date should be no more than 20 workdays after the first Air Force office received the request. Send a copy of this letter to HQ USAF/DAQD through Privacy Act channels.

(3) *Fees.* When providing copies of records under the Privacy Act, charge only for the direct cost for reproduction.

(i) Use the following fee schedule:

Office copy (per page), 10 cents.
Microform media (paper copy) (per image), 25 cents.
Microfiche (per fiche), 85 cents.

(ii) Do not charge fees for:

(A) Searching records.

(B) Reproducing a document for the convenience of the Air Force.

(C) Reproducing a record only in order to let a requester review it. If he or she wants a personal copy, use the fees in paragraph (f)(3)(i) of this section.

(iii) Waive the fee, if the total amount is less than $30. Do not waive the fee when a previous waiver has been granted and subsequent requests appear to be an extension or duplication of the original request.

(iv) Locally determine fees for reproducing photographs or nonpaper material other than microform.

(4) *Denying access.* If the record should not be released, the local system manager sends a copy of the request, a copy of the record (or records), and the reasons for recommending denial (including the exemption being applied) to the denial authority through the local Privacy Act officer and the MAJCOM or SOA Privacy Act officer. Staff Judge Advocate (SJA) coordination is required. This should be done within 5 workdays from the date the request was received.

(i) *Record evaluation.* A record may not be withheld just because it is in an exempt system. Before recommending denial, the local system manager must determine that:

(A) The system is covered by an exemption approved by SAF and listed in § 806b.13.

(B) Each document is covered by the exemption, because all parts of a system are not automatically exempt.

(C) No nonexempt parts can be reasonably segregated.

(ii) *Medical records.* If a practitioner believes that access to a medical record by the subject could harm that person's mental or physical health, ask the requester to name a practitioner to receive the record. If this requirement poses a hardship on the individual, offer the service of a military practitioner other than the one who provided treatment. If the individual refuses to name a recipient, the record will not be released. This is not a denial under the Privacy Act and is not appealable.

(iii) *Third party information.* Third party information may not be deleted from a record when the subject requests access to the record unless there is an established exemption published in § 806b.13. This is because all information in a file must be presumed to pertain to the subject of the file. However, personal data such as SSNs and home addresses of third parties usually do not pertain to the subject of the record and, therefore, need not be released. This is not a denial under the Privacy Act and cannot be appealed.

(iv) *Information compiled for litigation.* Records in a system compiled in connection with a civil action or other proceeding may be withheld. This includes any action where judicial or administrative adjudicatory proceedings may reasonably be anticipated. Attorney work products prepared in support of such proceedings are not usually released under the Privacy Act at any point before, during, or after termination of the action or proceeding.

(v) *Denial authority action.* (A) The MAJCOM or SOA Privacy Act officer reviews the proposed denial, asks for written advice from the servicing SJA and the office responsible for the program under which the record was created, and makes a recommendation to the denial authority.

(B) The denial authority sends the requester a letter stating whether or not access will be granted. If the denial authority decides to grant access, he or she instructs the local system manager to release the record. If the denial authority denies access, he or she must tell the requester why, and that the decision may be appealed to SAF not later than 60 calendar days after receipt of the denial letter. Tell the requester to resubmit the original request and send any supporting material to the denial authority for forwarding to HQ USAF/DAQD for processing. The requester should be cautioned that failure to follow this procedure may delay the appeal.

(g) *Amendment requests.* Individuals may ask the Air Force to amend records about them that are in a system of records. The request must seek to change, delete, or add material to make a record accurate, timely, relevant, or complete. Requests for amendment of a record that is subjective, or involves a matter of opinion or interpretation will not be processed under this part. Return such a request and tell the individual to submit it either to the Air Force Board for the Correction of Military Records according to Part 865 Subpart A of this chapter, to follow grievance procedures in AFR 40-771. Coordinate these returns with the director of personnel. Record correction requests which have been denied by the Air Force Board for the Correction of Military Records, acting for the Secretary of the Air Force, are not subject to further consideration under this part.

(1) Requests for minor corrections may be made orally. All others must be written.

(2) Local system managers routinely correct any record if the requester can show it is factually wrong. After verifying identity, the local system manager makes the change, notifies all known recipients of the record, and informs the individual when the correction is made.

(3) If the local system manager decides not to amend or partially amend the record, he or she sends a copy of the request, a copy of the record (or records), and the reasons for this action to the denial authority through the base and the MAJCOM or SOA Privacy Act officers. SJA coordination is required. This must be done within 5 workdays from receipt of the request.

(i) The MAJCOM or SOA Privacy Act officer reviews the proposed denial, asks for written advice from the servicing SJA and the office responsible for the program under which the record

was created and makes recommendation to the denial authority.

(ii) The denial authority sends the requester a letter stating whether or not the amendment or partial amendment will be granted. If the denial authority decides to amend or partially amend the record, he or she tells the local system manager to amend the record and notify all subsequent recipients of the change. If the denial authority denies the amendment request, he or she must tell the requester why, and that the decision may be appealed to SAF not later than 60 calendar days after receipt of the denial letter. The requester is told to resubmit the original request and to send any supporting material to the denial authority for forwarding to HQ USAF/DAQD for processing. The requester should be cautioned that failure to follow this procedure may delay the appeal.

(h) *Appeals of denials to grant access or to amend records*— (1) *Request for Secretarial review.* An individual may request a review of the denial by writing to SAF not later than 60 calendar days after the denial is received. The request should be addressed to SAF/AA, and sent back to the denial authority for forwarding to HQ USAF/DAQD for processing. The denial authority sends a complete file arranged as follows:

(i) The request for review.

(ii) The original request for access or amendment.

(iii) The original denial.

(iv) A copy of the record or portions in question.

(v) Any internal records or coordination actions that relate to the denial.

(vi) Denial authority comments on the appellant's arguments.

(vii) A legal review prepared by the SJA servicing the denial authority.

(2) *Responsibilities for Review.* (i) HQ USAF/DAQD reviews the denial and makes a recommendation to the Office of the Vice Chief of Staff (HQ USAF/CV). HQ USAF/JACM coordination is required.

(ii) HQ USAF/CV decides whether to direct the denial authority to grant access or to amend the record. If HQ USAF/CV decides to uphold a denial, this recommendation is passed to SAF/AA through the Office of the General Counsel (SAF/GC) for final action.

(iii) SAF/AA considers the recommendation to uphold a denial, decides to grant or deny the appeal, and notifies both the individual and the denial authority of the decision. If SAF/AA upholds a denial to amend a record, the individual must be told of his or her right to send a statement of disagreement to the system manager.

(3) *Requests for Secretarial review.* These requests must be completed within 30 workdays after the date HQ USAF/DAQD received the appeal.

Note: Appeals for denial of access to law enforcement records subject to the (j)(2) exemption are processed under this part and Part 806 of this chapter since the original action should have been taken under both.

(i) *Statements of disagreement.* If an individual submits a statement of disagreement with a SAF/AA decision not to amend his or her record, the local system manager:

(1) Flags the record so that the disagreement may be seen by anyone who discloses or gains access to the record.

(2) Files the statement with the record. If this is not possible, the local system manager maintains it to allow ready retrieval when the disputed portion of the record is used.

(3) Tells previous recipients that the record has been disputed and, if they can be identified, gives them a copy of the statement.

(4) Lets subsequent users know that the record is disputed and gives them a copy of the statement along with the record. The system manager may include a brief summary of the reasons for not amending the record. Summaries are limited to the reasons SAF/AA gave to the individual. The summary is treated as a part of the individual's record, but is not subject to the amendment procedures.

§ 806b.9 Disclosures to third parties and organizations.

The fact that the Air Force tells an individual why the information is collected and how it will be used does not imply consent for release. When deciding to release information as authorized in paragraph (a) through (c) of this section, first consider the consequences of that disclosure. Before releasing any information, make a reasonable effort to ensure that it is accurate.

(a) *With consent of the subject.* You may disclose information from a system of records if the subject of the record asks you to do so or has given prior written consent. Make sure that no law or directive prohibits release. See AFR 11–24 on release of individual home telephone numbers and home addresses from unit locators.

(b) *Without consent of the subject.* An individual's records may be disclosed without his or her consent to:

(1) DOD officials and employees who need the record to perform their duties when the use is compatible with the purpose for which the record is maintained.

(2) The public, as required by the FOIA. See part 806 of this chapter.

(i) Some examples of information that may normally be released for individual military personnel without an unwarranted invasion of privacy are: Name; grade; marital status; number and sex of dependents; date of rank; gross pay (base pay and entitlements); present and past duty assignments and future assignments that are firm (except overseas); office and unit address and phone number; source of commission; professional miltiary education, civilian educational degrees and major areas of study, school, and year of graduation; promotion sequence number; awards and decorations; duty status at any given time; official photograph without the identification frame; and home of record, without street address. Lists of names, home and duty addresses, and telephone numbers of military members must not be provided in any form for solicitation regardless of the intent of the solicitation unless otherwise provided for by law or this part. See Federal Personnel Manual Supplement 990–1, part 294, on release of civilian personnel information.

(ii) A balancing test may be used to decide whether disclosure would be a clearly unwarranted invasion of individual privacy. Weigh the right of the subject to a reasonable expectation of privacy verus the public right to know. Consider the nature of the information to be disclosed. Do individuals usually expect this information to be kept private? Are the identities of the subject and the recipient already in the public eye? What is likely to happen to the individual as a result of the disclosure? How old is the information; is it still relevant? To what degree is the information already in the public domain?

(iii) Information may be released if the balancing test described above weighs in favor of disclosure. For example, home addresses may be disclosed to a requester who wants to enforce a court order for alimony or child support payments, or to local and state tax authorities to enforce tax laws.

(iv) Individuals must be allowed to decide if they wish their home addresses and phone numbers included in base directories.

(3) Agencies outside DOD for a routine use that has been listed in the notice describing the system of records published in the Federal Register. The routine use must be compatible with the purpose for which the information was collected.

(4) The Bureau of the Census to plan or carry out a census or survey under Title 13, U.S.C.

(5) A recipient for statistical research or reporting. The recipient must give advance written assurance that the record will be used solely as a statistical research or reporting record. The record must not be used, in whole or part, to make any decisions about the individual's rights, benefits, or entitlements. It must be sent in a form in which the identity of the individual cannot be found out through usual research methods.

(6) The National Archives of the United States as a record with enough value to warrant permanent retention, or for evaluation by the Archivist of the United States to see if the record has such value. However, records sent to Federal Archives and Records Centers for storage stay under Air Force control. These transfers are not disclosures under this section and do not need an accounting.

(7) A Federal, state, or local agency outside DOD for a civil or criminal law enforcement activity authorized by law. The head of the agency or a designee must send a written request to the system manager. The request must specify the record or part needed and the law enforcement purpose for which it is wanted. A record may also be disclosed to a law enforcement agency if a criminal violation is suspected. This disclosure is a routine use for all Air Force systems of records and has been published in the Federal Register.

(8) Another individual or agency under compelling circumstances that affect the health or safety of an individual. The individual whose records are disclosed does not have to be the one in danger. For example, records on several individuals could be disclosed to identify individuals injured in an accident. When an individual record is disclosed in this way, the subject must be sent a notification of disclosure to the last known address.

(9) Either House of Congress (a congressional committee or subcommittee) for matters within their jurisdictions.

(10) A congressional office acting for a constituent who is the record subject. This disclosure is authorized by a published blanket routine use.

(11) The Comptroller General or any authorized representatives on business of the General Accounting Office.

(12) A court of competent jurisdiction that has ordered the disclosure of the record. When a record is disclosed, reasonable efforts must be made to notify the individual to whom the record pertains, if the legal process is a matter of public record.

(13) A consumer credit agency according to the Debt Collection Act. This provision applies to the Air Force Accounting and Finance Center only.

(14) A contractor who is operating a system of records under a contract to perform an Air Force function. In this case, the contractor is considered an employee of the Air Force for Privacy Act purposes, and the system of records is considered an Air Force system. Disclosure of records to the contractor does not need the subject's consent nor does it require an accounting. Records maintained by the contractor for the management of contractor employees are not subject to the Privacy Act.

(c) *Medical records of minors.* The medical records of minors may be disclosed to the parents or legal guardians of the minor. However, the following conditions apply:

(1) The law of the state in which the records are located may protect certain types of medical records that deal with drug or alcohol abuse treatment, abortion, and birth control advice or devices. Such laws must be observed. Medical records custodians in the United States must be knowledgeable of local laws and coordinate any proposed local policies with their servicing SJA.

(2) Parents or guardians are not allowed to see the medical records of a minor when all four of the following conditions apply:

(i) The minor was between 15 and 17 years of age at the time he or she sought or consented to the treatment.

(ii) The treatment was sought in a program authorized by regulations or law to offer confidentiality of treatment records as a part of the program.

(iii) The minor specifically requested or indicated that he or she wished his or her treatment record to be handled with confidence and not released to a parent or guardian.

(iv) The parent or guardian seeking access does not have the written authorization of the minor or a valid court order for access.

Subpart E—Privacy Act Exemptions

§ 806b.10 Use of Exemptions.

SAF can exempt systems of records from parts of the Privacy Act. The two kinds of exemption are: General and specific. The general exemption frees systems from most parts of the Privacy Act; the specific from only a few parts.

§ 806b.11 General Exemptions.

(a) SAF has approved a general exemption for investigative systems used by activities whose principal function is criminal law enforcement. These include the SJA, and investigative and correctional activities. All records in such a system come under the exemption which will be observed and cannot be waived. This exemption is in subparagraph (j)(2) of the Privacy Act. It only applies to systems used to:

(1) Identify criminals and alleged criminals, with identity; arrests; type and disposition of charges; sentences, confinement and release records; and parole and probation status.

(2) Support criminal investigations (including efforts to prevent, reduce, or control crime) and reports of informants and investigators that identify an individual.

(3) Reports on an individual, compiled at any stage of the law enforcement process.

(b) The Air Force observes only subsections (b); (c)(1) and (2); (e)(4)(A) through (F); (e)(6), (7), (9), (10), and (11); and (i) of the Privacy Act.

§ 806b.12 Specific exemptions.

(a) SAF has approved specific exemptions for all classified and a few other systems. These exemptions must be observed and cannot be waived. The Privacy Act citation appears in parentheses after each type below.

(1) Classified information in any system of records. Before denying access, make sure that the record is currently and properly classified and cannot be declassified ((k)(1)).

(2) Law enforcement records (other than those covered by the general exemption). However, the Air Force must allow access to any record which was used to deny someone a right, privilege or benefit, unless doing so would reveal a confidential source ((k)(2)).

(3) Statistical records required by law. The data must be used only as statistics and not to make decisions on the rights, benefits, or entitlements of individuals ((k)(4)).

(4) Data to determine suitability, eligibility, or qualifications for Federal service or contracts, or access to classified information. The Air Force can withhold this if access would reveal a confidential source ((k)(5)).

(5) Qualification tests for appointment or promotion in the federal service. The Air Force may withhold these if access would compromise the objectivity of the tests ((k)(6)).

(6) Information to determine promotability in the Armed Forces. The Air Force may withhold this if access would reveal a confidential source ((k)(7)).

(b) A specific exemption may free a system from any of the following parts of the Privacy Act: subsections (c)(3); (d); (e)(1); (e)(4) (G), (H), and (I); and (f).

§ 806b.12. General and specific exemptions.

(a) *General exemption.* The following systems of records are exempt under 5 U.S.C. 552a(j)(2):

(1) Counter Intelligence Operations and Collection Records, F124 AF A.

(2) Criminal Records, F124 AF C.

(3) Incident Investigation Files, F125 AF SP E.

(4) Investigative Support Records, F124 AF D.

(5) Correction and Rehabilitation Records, F125 AF A (that portion maintained by the 3320th Correction and Rehabilitation Squadron, but only for the period the individual is confined or in rehabilitation at an Air Force or Federal correctional facility).

(6) Management Information and Research System (MIRS), F125 ATC A (but only for the period the individual is confined or in rehabilitation at an Air Force or Federal correctional facility).

(b) *Specific exemptions.* The following systems of records are subject to the specific exemptions shown:

(1) *Classified records.*

(i) *Exemption.* All records in any systems of records that are properly classified according to Executive Orders 11652, 12065 or 12356, are exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4)(G), (H), and (I); and (f), regardless of whether the entire system is otherwise exempt or not.

(ii) *Authority.* 5 U.S.C. 552a(k)(1).

(2) *Admissions and Registrar Records (F053 AFA C).*

(i) *Exemption.* Parts of this system of records (Liaison Officer Evaluation and Selection Panel Candidate Evaluation) are exempt from 5 U.S.C. 52a(d), (e)(4)(H), and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(5).

(iii) *Reasons.* To ensure the frankness of information used to determine whether cadets are qualified for graduation and commissioning as officers in the Air Force.

(3) *Air Force Personnel Test 851, Test Answer Cards (F035 MPC R).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f).

(ii) *Authority.* 5 U.S.C. 552a(k)(6).

(iii) *Reasons.* To protect the objectivity of the promotion testing system by keeping the test questions and answers in confidence.

(4) *Cadet Personnel Management System (F035 AFA A).*

(i) *Exemption.* Parts of this system are exempt from 5 U.S.C. 552a(d), (e)(4)(H), and (f), but only insofar as disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(7).

(iii) *Reasons.* To maintain the candor and integrity of comments needed to evaluate an Air Force Academy cadet for commissioning in the Air Force.

(5) *Cadet Records (F045 ATC C).*

(i) *Exemption.* Portions of this system (Detachment Professional Officer Course (POC) Selection Rating Sheets; Air Force Reserve Officer Training Corps (AFROTC) Form 0–24– Disenrollment Review; Memoranda for Record and Staff Papers with Staff Advice, Opinions, or Suggestions) are exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G) and (H), and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(5).

(iii) *Reasons.* To protect the identity of a confidential source who furnishes information necessary to make determinations about the qualifications, eligibility, and suitability of cadets for graduation and commissioning in the Air Force.

(6) *Child Advocacy Case Files (F168 AF SG B).*

(i) *Exemption.* Parts of this system are exempt from 5 U.S.C. 552a(c)(3) and (d), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k) (2) and (5).

(iii) *Reasons.* To encourage those who know of child abuse or neglect to come forward by protecting their identities, and to protect the integrity of ongoing and civil law investigations of criminal and civil law violations. Giving subjects access to their files could result in them concealing, altering, or fabricating evidence; could hamper the identification of offenders and alleged offenders; and could jeopardize the safety and well-being of parents and their children.

(7) *Effectiveness/Performance Reporting Systems (F035 AF MP A).*

(i) *Exemption.* The parts of this system that have completed AF Forms 705, Lieutenant Colonel Promotion Recommendation Report; and AF Forms 706, Colonel Promotion Recommendation Report; are exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(7).

(iii) *Reasons.* To ensure that selection boards have candid evaluations of officers being considered for promotion to the grades of Colonel and Brigadier General.

(8) *Equal Opportunity in Off-Base Housing (F030 AF LE A).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f).

(ii) *Authority.* 5 U.S.C. 552a(k)(2).

(iii) *Reasons.* To enforce civil laws, court orders, and the activities of the Departments of Housing and Urban Development and Justice.

(9) *Files on General Officers and Colonels Assigned to General Officer Positions (F035 MP A).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(7).

(iii) *Reasons.* To protect the integrity of information used in the Reserve Initial Brigadier General Screening Board, the release of which would compromise the selection process.

(10) *General Officer Personnel Data System (F035 AF MP P).*

(i) *Exemption.* The parts of this system that have completed AF Forms 78, Air Force General Officer Effectiveness Report, are exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(7).

(iii) *Reasons.* To ensure selection boards get candid evaluations of officers being considered for promotion to Major General, Lieutenant General, and General.

(11) *Historical Airman Promotion Master Test File (F035 MPC L).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f).

(ii) *Authority.* 5 U.S.C. 552a(k)(6).

(iii) *Reasons.* To protect the integrity, objectivity, and equity of the promotion testing system by keeping test questions and answers in confidence.

(12) *Inspector General Records (F120 AF IG B).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f). However, if a person is denied any right, privilege, or benefit, he or she would otherwise be entitled to as a result of keeping this material, it must be released, unless doing so would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(2).

(iii) *Reasons.* Granting individuals access to information collected while an Inspector General inquiry is in progress could interfere with the just, thorough, and timely resolution of the complaint or inquiry and could possibly enable individuals to conceal wrong doing or mislead the inquiring officer. Disclosure might also subject sources, witnesses, and their families to harassment or intimidation.

(13) *Investigative Applicant Processing Records (F124 AFOSI B).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(5).

(iii) *Reasons.* To protect those who gave information in confidence during Air Force Office of Special Investigations (AFOSI) applicant inquiries. Fear of harassment could cause sources not to make frank and open responses about applicant qualifications. This could compromise the integrity of the AFOSI personnel program that relies on selecting only qualified people.

(14) *Master Cadet Personnel Record (Active/Historical) (F035 AFB B).*

(i) *Exemptions.* Parts of these systems are exempt from 5 U.S.C. 552a(d), (e)(4)(H), and (f), but only to the extent that they would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(7).

(iii) *Reasons.* To maintain the candor and integrity of comments needed to evaluate a cadet for commissioning in the Air Force.

(15) *Sensitive Compartmented Information Personnel Records (F205 AFIS A).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(a)(3); (d); (e)(4) (G), (H), and (I); and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a (k)(2) and (k)(5).

(iii) *Reasons.* To protect the identity of sources to whom proper promises of confidentiality have been made during investigations. Without these promises, sources will often be unwilling to provide information essential in adjudicating access in a fair and impartial manner.

(16) *Security and Related Investigative Records (F124 AFB).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(5).

(iii) *Reasons.* To protect the identity of those who give information in confidence for personnel security and related investigations. Fear of harassment could cause sources to refuse to give this information in the frank and open way needed to pinpoint those areas in an investigation that should be expanded to resolve charges of questionable conduct.

(17) *Special Security Case Files (F205 AFSCO A).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d), (e)(4) (G), (H), and (I); and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(5).

(iii) *Reasons.* To protect the identity of those who give information in confidence for personnel security and related investigations. Fear of harassment could cause sources to refuse to give this information in the frank and open way needed to pinpoint those areas in an investigation that should be expanded to resolve charges of questionable conduct.

(18) *Special Security Files (F205 AF SP A).*

(i) *Exemption.* This system is exempt from 5 U.S.C. 552a(c)(3); (d); (e)(4) (G), (H), and (I); and (f), but only to the extent that disclosure would reveal the identity of a confidential source.

(ii) *Authority.* 5 U.S.C. 552a(k)(5).

(ii) *Reasons.* To protect the identity of those who give information in confidence for personnel security and related investigations. Fear of harassment could cause them to refuse to give this information in the frank and open way needed to pinpoint areas in an investigation that should be expanded to resolve charges of questionable conduct.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3025-3]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: USEPA is approving a site-specific revision to the Illinois State Implementation Plan (SIP) for Carbon Monoxide (CO). This final rulemaking incorporates a January 24, 1985, Opinion and Order of the Illinois Pollution Control Board (PCB), PCB 84–147, into the SIP. This order grants Anderson Clayton Foods, Inc. (ACF) a variance from 35 Illinois Administrative Code 216.121, which governs CO emissions from the Fluidized Bed Combuster (FBC) retrofitted boiler at ACF's Jacksonville, Illinois, facility. This action is taken in response to a March 27, 1985, request from the State of Illinois.

USEPA proposed to approve this site-specific SIP revision on November 15, 1985 (50 FR 47234). No public comments were received on the proposed approval.

EFFECTIVE DATE: This final rulemaking becomes effective on July 7, 1986.

ADDRESSES: Copies of the SIP revision and other materials relating to this rulemaking are available at the following addresses for review: (it is recommended that you telephone Uylaine E. McMahan, at (312) 886-6031, before visiting the Region V Office.)

U.S. Environmental Protection Agency (5AR-26), Region V, Air and Radiation Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, DC 20460

Illinois Environmental Protection Agency, Division of Air Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706

Copies of the revision to the Illinois SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, Regulatory Analysis Section, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

SUPPLEMENTARY INFORMATION: On March 27, 1985, the Illinois Environmental Protection Agency,

(IEPA) submitted a variance from 35 Illinois Administrative Code 216.121 [1] for a FBC retrofitted boiler at ACF's facility in Jacksonville, Illinois, as a final revision to its CO SIP. Jacksonville is located in an area that is classified as attainment with respect to the National Ambient Air Quality Standard (NAAQS) for CO.

The variance will allow the existing boiler, that will be retrofitted with FBC, to emit up to 400 parts per million (ppm) of CO, until January 24, 1988. Because the FBC boiler is a major new source in an attainment area, it must meet the best available control technology (BACT) requirement of the Prevention of Significant Deterioration (PSD) regulations. Under the existing federally approved CO SIP, a new source is required to meet a limit of 200 ppm. In today's rulemaking, USEPA's final finding is limited to determining that the CO NAAQS will not be violated by this variance. In this notice, USEPA makes no finding regarding the 400 ppm emission limit in relation to the BACT requirement.

The IPCB granted ACF a variance from 35 Illinois Administrative Code 216.121 which allows a temporary CO limit of 400 ppm until January 23, 1988. ACF's FCC boiler, is subject to the following operating conditions:

1. CO emissions during the period of the variance must be kept to a level below 400 parts per million.
2. ACF is required to develop and implement a program to study and evaluate any technical advances in the control of CO in fluidized bed combusters.
3. ACF is required to develop and evaluate the operation characteristics of their fluidized bed combuster.
4. ACF is required to submit to IEPA every 6 months, a written report describing the progress of the programs required by conditions 3, 4 and 5.
5. Within 45 days of the date of this Order, ACF shall execute a Certificate of Acceptance and Agreement to be bound to all terms and conditions of this variance.

USEPA reviewed the air quality analysis section of ACF's preconstruction permit application that was completed as part of the PSD requirements. The details of this analysis are contained in the March 27, 1985, State submittal. The predicted CO impact is well below the maximum 1-hour and 8-hour secondary NAAQS.

ACF's retrofitted FBC boiler will not have a significant impact on CO air quality in Jacksonville and, therefore, will not interfere with attainment and maintenance of the CO NAAQS. USEPA proposed to approve this site-specific SIP revision on November 15, 1985 (50 FR 47234). No public comments were received to the proposed approval. USEPA is, therefore, approving PCB 84-147 as revision to the Illinois CO SIP.

However, USEPA is not affirming the 400 ppm emission limit for CO as BACT for FBC boilers. The final approval of this SIP revision does not in any way eliminate the requirements for ACF to comply with the PSD regulations or any other applicable new source regulation.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Petitions for judicial review of this action under section 307(b)(1) of the Act must be filed in the United States Court of Appeals for the appropriate Circuit by August 4, 1986. This action may not be challenged later in proceedings to enforce its requirements (See section 307(b)(2) of the Act).

List of Subjects in 40 CFR Part 52

Incorporation by Reference, Air pollution control, Carbon monoxide, Intergovernmental relations.

Dated: May 27, 1986.

Lee M. Thomas,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Illinois—Subpart O

Title 40 of the Code of Federal Regulations, Chapter I, Part 52, is amended as follows:

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.720 is amended by adding new paragraph (c)(66) as follows:

§ 52.720 Identification of Plan.

* * * * *

(c) * * *

(66) On March 27, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a site-specific revision to its Carbon Monoxide State Implementation Plan for Anderson Clayton Foods, Inc. (ACF), a variance from 35 Illinois Administrative Code (IAC) 216.121 which governs Carbon Monoxide emissions from the Fluidized Bed Combuster retrofitted boiler at ACF's Jacksonville, Illinois facility. IAC 216.121 was incorporated in the Illinois SIP on May 31, 1972 (37 FR 10862), as Illinois Pollution Control Board Rule 206(a).

(i) Incorporation by reference.

(A) Illinois Pollution Control Board Opinion and Order of the Board, PCB 84–147, which was adopted on January 24, 1985.

40 CFR Parts 52 and 81

[FRL–3025–4]

Approval and Promulgation of State Implementation Plan and Designation of Areas for Air Quality Planning Purposes; State of Oregon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: By this Notice, EPA approves the redesignation of the Medford-Ashland, Oregon "nonattainment" area to "attainment" for the primary ozone (O_3) standard and approves an air quality maintenance strategy as a revision to the Oregon State Implementation Plan (SIP). The redesignation request is based on supporting documentation prepared and submitted by the Oregon Department of Environmental Quality (ODEQ) pursuant to section 107(d) of the Clean Air Act. Air quality data and emission reductions achieved through implementation of control strategy measures support this redesignation.

EFFECTIVE DATE: August 4, 1986.

ADDRESSES: Copies of the materials submitted to EPA may be examined during normal business hours at:

Public Information, Reference Unit, Environmental Protection Agency, 401 M Street SW, Washington, DC 20460
Air Programs Branch (10A–85–8), Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101
State of Oregon, Department of Environmental Quality, Yeon Building, 522 SW. Fifth, Portland, OR 97204
Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, DC

FOR FURTHER INFORMATION CONTACT: Richard F. White, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone No. (206) 442–4232, (FTS) 399–4232.

---

[1] IAC 216.121 was incorporated in the Illinois SIP as Illinois Pollution Control Board Rule 206(a) on May 31, 1972 (37 FR 10862). This Rule was subsequently recodified as part of the Illinois Administrative Code. In a subsequent Federal Register notice, USEPA will propose to incorporate the recodification of the SIP.

SUPPLEMENTARY INFORMATION:

I. Background

On March 3, 1978 (43 FR 8962), EPA designated, pursuant to the requirements of section 107(d) of the Clean Air Act, all areas of the country as "attainment," "nonattainment," or "unclassifiable" in terms of meeting National Ambient Air Quality Standards (NAAQS). At that time, the Medford-Ashland, AQMA, encompassing a portion of Jackson County, Oregon, was designated "nonattainment" for primary O_3 standards in 40 CFR Part 81, § 81.338.

EPA approved, with conditions, the Medford-Ashland, O_3 SIP on June 24, 1980 (45 FR 42285). These conditions were satisfied by ODEQ and removed by EPA on November 5, 1981 (46 FR 54839). On March 11, 1982 (47 FR 10534), EPA approved additional revisions to the O_3 SIP.

ODEQ held a public hearing in Medford, Oregon, on December 4, 1984, to obtain public comment on the redesignation proposal. The proposal was then adopted by the Oregon Environmental Quality Commission on January 25, 1985. ODEQ submitted the redesignation request to EPA on February 28, 1985. The submittal included documentation of attainment for the O_3 standard based on both emission reductions, air quality improvement, and O_3 and precursor modeling.

On January 24, 1986 (51 FR 3219), EPA published a proposed rulemaking for approval of the redesignation request and the attendant plan to maintain the O_3 standard in the Medford-Ashland AQMA. The proposal contained a technical evaluation of the attainment and maintenance demonstrations, covering air quality data, emission reductions, VOC regulations, emission projections, and the use of a growth cushion, which will eliminate the necessity of case-by-case air quality analyses for new or modified major stationary sources subject to the ODEQ PSD rules.

No comments were received during the 30-day public comment period, which ended on February 24, 1986.

II. EPA Final Action

EPA is redesignating the Medford-Ashland, Oregon, O_3 nonattainment area to attainment for the primary O_3 standard and is approving the O_3 maintenance plan.

Under 5 U.S.C. 605(b), I certify that this SIP approval will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by 60 days from today. This action may not be challenged later in proceedings to enforce its requirements (See 307(b)(2)).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations, Reporting and record-keeping requirements.

Air pollution control, National parks and wilderness areas.

Dated: May 20, 1986.

Lee M. Thomas,

Administrator.

Note.—Incorporation by reference of the State Implementation Plan for the State of Oregon was approved by the Director of the Office of Federal Register on July 1, 1982.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

Subpart MM—Oregon

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.1970 is amended by adding paragraph (c)(77) as follows:

§ 52.1970 Identification of Plan.

* * * * *

(c) * * *

(77) On February 28, 1985, the Director of the Oregon Department of Environmental Quality submitted (1) a request to EPA to redesignate the Medford-Ashland Air Quality Maintenance Area (AQMA) from nonattainment to attainment for the primary O_3 standard and (2) a plan to maintain that standard.

(i) Incorporation by reference:

(A) Letter of February 28, 1985, from Oregon State Department of Environmental Quality to EPA Region 10.

(B) Oregon Administrative Rules, Chapter 340, Division 20, Section 4.8 "Medford-Ashland Air Quality Maintenance Area Plan for Maintenance of Ozone Standard," adopted by the Oregon Environmental Quality Commission on January 25, 1985.

PART 81—[AMENDED]

Part 81 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart C—Section 107 Attainment Status Designations

1. The authority citation for Part 81 continues to read as follows:

Authority: 42 U.S.C. 407(d), 7501(2) and 7601(a).

2. In § 81.338 the attainment status designation table for ozone is revised to read as follows:

§ 81.338 Ozone.

OREGON—OZONE

Designated area	Does not meet primary standard	Cannot be classified or is better than national standard
Portland-Vancouver AQMA (Oregon portion)	X

40 CFR Part 60

[AD-FRL-3008-6]

Standards of Performance for New Stationary Sources; Addition of Alternative Procedure to Method 1 of Appendix A; Measurement Location

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: An alternative, site location procedure addition to Method 1 was proposed in the Federal Register on May 10, 1985 (50 FR 19725). This action promulgates the addition of this alternative procedure. The alternative procedure applies to the determination of the acceptability of measurement locations that do not meet minimum criteria now in Method 1. The alternative is the application of a directional flow-sensing probe to determine pitch and yaw angles at a measurement location less than 2 equivalent diameters downstream or less than ½ an equivalent diameter upstream from a flow disturbance.

The intended effect of the addition of the alternative procedure is to allow the evaluation of the acceptability of measurement locations that do not otherwise meet the minimum criteria in Method 1. With the addition of the alternative procedure, source owners may choose to use an existing

measurement location, if the criteria in the alternative procedure are met, instead of installing new ports and access equipment at another location.

EFFECTIVE DATE: June 4, 1986.

Under section 307(b)(1) of the Clean Air Act, judicial review of the actions taken by this notice is available *only* by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this rule. Under section 307(b)(2) of the Clean Air Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

ADDRESSES: *Docket.* A docket, number A–84–50, containing information considered by EPA in development of the promulgated standards, is available for public inspection between 8:00 a.m. and 4:00 p.m., Monday through Friday, at EPA's Central Docket Section (LE–131), West Tower Lobby, Gallery 1, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. Peter R. Westlin or Mr. Roger T. Shigehara, Emission Measurement Branch, Emission Standards and Engineering Division (MD–19), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–2237.

SUPPLEMENTARY INFORMATION:

I. The Rulemaking

The alternative procedure defines the directional probe equipment and the procedure. Also included are the acceptance criteria for the measured results and calibration procedures. In addition, as a result of the review of the effects of nonparallel gas flow on the measurement of mass concentrations, the Agency has determined that the acceptable limit for rotation angle should be increased from 10° to 20° in Section 2.4—Verification of Absence of Cyclonic Flow.

This rulemaking does not impose emission measurement requirements beyond those specified in the current regulations, nor does it change any emission standard. Rather, this rulemaking provides a usable alternative procedure for determining the acceptability of a measurement location not meeting the other specifications in Method 1.

II. Public Participation

A public hearing was scheduled for June 27, 1985, at 10:00, but was not held because no one requested to speak. The public comment period was from May 10 to July 1, 1985. The comments have been carefully considered and, where determined to be appropriate by the Administrator, changes have been made to the proposed rulemaking.

III. Significant Comments and Changes to the Proposed Rulemaking

One comment letter was received from a State regulatory agency. The major comments and the Agency's responses are summarized below.

The commenter believes that source owners and testing groups will use the alternative procedure to select sampling sites that are less than ideal. The commenter suggested that the method specify that the alternative procedure be used to determine the accepatability of an alternative site only when a measurement site meeting the other criteria in Method 1 is not available.

Method 1 includes guidelines and other criteria for determining the acceptability of a particular measurement location based on position relative to other process and structural features. The alternative procedure is intended to provide an evaluation technique for determining the acceptability of a measurement location not meeting any of the other guideline criteria. There is no indication that a measurement location found acceptable using the alternative procedure would be more or less acceptable for particulate or velocity testing purposes than a location meeting other Method 1 criteria. The addition of the wording suggested by the commenter is unnecessary.

The alternative procedure provides a direct measurement of the angle of nonaxial flow. With the limits specified in the alternative procedure, one can estimate the effect of the nonaxial flow on the particulate concentration measurement. The Agency has determined that the maximum potential bias in the particulate concentration measurement resulting from nonaxial flow is about 10 percent. This degree of bias is within acceptable limits for particulate sampling. Note that the method recognizes this degree of bias is possible at any measurement location regardless of whether that location meets the original Method 1 location criteria of the specification of the alternative procedure.

The commenter mentioned that considerable time and money could be wasted if a measurement location is found unacceptable and no other measurement location is available while the test group is on site.

The commenter is correct if impractical application of the alternative procedure is made. It would be more efficient and practical to determine the acceptability of a measurement location before a field test crew is on the site ready to conduct the test.

The commenter questioned the background and the availability of data used in support of the alternative procedure.

The Agency has included reports of field tests using the alternative procedure in the docket. These reports describe the method development work and field test data gathered using the procedure. References added to Method 1 present the titles and other necessary information about the sources of the materials.

The commenter referred to revisions to Method 1 promulgated on September 30, 1983 (48 FR 43035), that reduced the required maximum number of traverse points from 48 to 24 and suggested that Tables 1–1 and 1–2 should be returned to their earlier forms. This change is necessary according to the commenter to specify the location of traverse points required for the alternative procedure.

Tables 1–1 and 1–2 were not changed in the September 30, 1983, revision. The tables remain adequate in their present form as they provide information about locating the 40 points for circular ducts or 42 points for rectangular ducts as required for the alternative procedure.

IV. Administrative

The docket is an organized and complete file of all the information considered by EPA in the development of this rulemaking. The docket is a dynamic file, since material is added throughout the rulemaking development. The docketing system is intended to allow members of the public and industries involved to identify readily and locate documents so that they can effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated standards and EPA responses to significant comments, the contents of the docket, except for interagency review materials, will serve as the record in case of judicial review [Section 307(d)(7)(A)].

Under Executive Order 12291, EPA is required to judge whether a regulation is a "major rule" and, therefore, subject to the requirements of a regulatory impact analysis. The Agency has determined that this regulation would result in none of the adverse economic effects set forth in Section 1 of the Order as grounds for finding a regulation to be a "major rule." The revisions to Method 1 do not add any requirements to the testing of new

sources, but, instead, provide an alternative procedure that may allow the use of an existing measurement location that does not otherwise meet Method 1 criteria. This alternative procedure may save the expense of preparing a new measurement location. The Agency has, therefore, concluded that this regulation is not a "major rule" under Executive Order 12291.

The Regulatory Flexibility Act of 1980 requires the identification of potentially adverse impacts of Federal regulations upon small business entities. The Act specifically requires the completion of a regulatory flexibility analysis (RFA) in those instances where small business impacts are possible. Because these standards impose no adverse economic impacts, an RFA has not been conducted.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the promulgated rule will have no economic impact on small entities because no additional testing costs will be incurred.

List of Subjects in 40 CFR Part 60

Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements, and Incorporation by reference.

Dated: May 29, 1986.

Lee M. Thomas,

Administrator.

PART 60—[AMENDED]

Appendix A of 40 CFR Part 60 is amended by amending Method 1 as follows:

1. The authority citation for Part 60 continues to read as follows:

Authority: Sections 101, 111, 114, 116, 301 Clean Air Act as amended (42 U.S.C. 7401, 7411, 7414, 7416, 7601).

2. By amending Section 2.1 of Section 2 by adding a second paragraph as follows:

2. *Procedure*

2.1 * * *

An alternative procedure is available for determining the acceptability of a measurement location not meeting the criteria above. This procedure, determination of gas flow angles at the sampling points and comparing the results with acceptability criteria, is described in Section 2.5.

3. By amending Section 2.4 of Section 2 by changing in the last sentence of the second paragraph the value "10°" to "20°", and by adding a third paragraph as follows:

2.4 * * *

The alternative procedure described in Section 2.5 may be used to determine the rotation angles in lieu of the procedure described above. The limit of acceptability for the average value of α would remain 20°.

4. By adding a new Section 2.5 to Section 2 as follows:

2.5 Alternative Measurement Site Selection Procedure. This alternative applies to sources where measurement locations are less than 2 equivalent stack or duct diameters downstream or less than ½ duct diameter upstream from a flow disturbance. The alternative should be limited to ducts larger than 24 in. in diameter where blockage and wall effects are minimal. A directional flow-sensing probe is used to measure pitch and yaw angles of the gas flow at 40 or more traverse points; the resultant angle is calculated and compared with acceptable criteria for mean and standard deviation.

Note.—Both the pitch and yaw angles are measured from a line passing through the traverse point and parallel to the stack axis. The pitch angle is the angle of the gas flow component in the plane that INCLUDES the traverse line and is parallel to the stack axis. The yaw angle is the angle of the gas flow component in the plane PERPENDICULAR to the traverse line at the traverse point and is measured from the line passing through the traverse point and parallel to the stack axis.

2.5.1 Apparatus.

2.5.1.1 Directional Probe. Any directional probe, such as United Sensor Type DA Three-Dimensional Directional Probe, capable of measuring both the pitch and yaw angles of gas flows is acceptable. (Note: Mention of trade name or specific products does not constitute endorsement by the U.S. Environmental Protection Agency.) Assign an identification number to the directional probe, and permanently mark or engrave the number on the body of the probe. The pressure holes of directional probes are susceptible to plugging when used in particulate-laden gas streams. Therefore, a system for cleaning the pressure holes by "back-purging" with pressurized air is required.

2.5.1.2 Differential Pressure Gauges. Inclined manometers, U-tube manometers, or other differential pressure gauges (e.g., magnehelic gauges) that meet the specifications described in Method 2, § 2.2.

Note.—If the differential pressure gauge produces both negative and positive readings, then both negative and positive pressure readings shall be calibrated at a minimum of three points as specified in Method 2, § 2.2.

2.5.2 Traverse Points. Use a minimum of 40 traverse points for circular ducts and 42 points for rectangular ducts for the gas flow angle determinations. Follow § 2.3 and Table 1–1 or 1–2 for the location and layout of the traverse points. If the measurement location is determined to be acceptable according to the criteria in this alternative procedure, use the same traverse point number and locations for sampling and velocity measurements.

2.5.3 Measurement Procedure.

2.5.3.1 Prepare the directional probe and differential pressure gauges as recommended by the manufacturer. Capillary tubing or surge tanks may be used to dampen pressure fluctuations. It is recommended, but not required, that a pretest leak check be conducted. To perform a leak check, pressurize or use suction on the impact opening until a reading of at least 7.6 cm (3 in.) H_2O registers on the differential pressure gauge, then plug the impact opening. The pressure of a leak-free system will remain stable for at least 15 seconds.

2.5.3.2 Level and zero the manometers. Since the manometer level and zero may drift because of vibrations and temperature changes, periodically check the level and zero during the traverse.

2.5.3.3 Position the probe at the appropriate locations in the gas stream, and rotate until zero deflection is indicated for the yaw angle pressure gauge. Determine and record the yaw angle. Record the pressure gauge readings for the pitch angle, and determine the pitch angle from the calibration curve. Repeat this procedure for each traverse point. Complete a "back-purge" of the pressure lines and the impact openings prior to measurements of each traverse point.

A post-test check as described in § 2.5.3.1 is required. If the criteria for a leak-free system are not met, repair the equipment, and repeat the flow angle measurements.

2.5.4 Calculate the resultant angle at each traverse point, the average resultant angle, and the standard deviation using the following equations. Complete the calculations retaining at least one extra significant figure beyond that of the acquired data. Round the values after the final calculations.

2.5.4.1 Calculate the resultant angle at each traverse point:

$$R_i = \text{arc cosine } [(\text{cosine } Y_i)(\text{cosine } P_i)] \quad \text{Eq. 1–2}$$

Where:

R_i = Resultant angle at traverse point i, degree.

Y_i = Yaw angle at traverse point i, degree.

P_i = Pitch angle at traverse point i, degree.

2.5.4.2 Calculate the average resultant for the measurements:

$$\bar{R} = \frac{\Sigma R_i}{n} \quad \text{Eq. 1–3}$$

where:

$\bar{R}$ = Average resultant angle, degree.

n = Total number of traverse points.

2.5.4.3 Calculate the standard deviations:

$$S_R = \sqrt{\frac{\sum_{i=1}^{n} (R_i - \bar{R})^2}{(n-1)}} \quad \text{Eq. 1–4}$$

Where:

S_R = Standard deviation, degree.

2.5.5 The measurement location is acceptable if $\bar{R} < 20°$ and $S_R < 10°$.

2.5.6 Calibration. Use a flow system as described in Sections 4.1.2.1 and 4.1.2.2 of Method 2. In addition, the flow system shall have the capacity to generate two test-section velocities: one between 305 and 730 m/min (1200 and 2400 ft/min) and one between 730 and 1100 m/min (2400 and 3600 ft/min).

2.5.6.1 Cut two entry ports in the test section. The axes through the entry ports shall be perpendicular to each other and intersect in the centroid of the test section. The ports should be elongated slots parallel to the axis of the test section and of sufficient length to allow measurement of pitch angles while maintaining the pitot head position at the test-section centroid. To facilitate alignment of the directional probe during calibration, the test section should be constructed of plexiglass or some other transparent material. All calibration measurements should be made at the same point in the test section, preferably at the centroid of the test section.

2.5.6.2 To ensure that the gas flow is parallel to the central axis of the test section, follow the procedure in Section 2.4 for cyclonic flow determination to measure the gas flow angles at the centroid of the test section from two test ports located 90° apart. The gas flow angle measured in each port must be ± 2° of 0°. Straightening vanes should be installed, if necessary, to meet this criterion.

2.5.6.3 Pitch Angle Calibration. Perform a calibration traverse according to the manufacturer's recommended protocol in 5° increments for angles from −60° to +60° at one velocity in each of the two ranges specified above. Average the pressure ratio values obtained for each angle in the two flow ranges, and plot a calibration curve with the average values of the pressure ratio (or other suitable measurement factor as recommended by the manufacturer) versus the pitch angle. Draw a smooth line through the data points. Plot also the data values for each traverse point. Determine the differences between the measured data values and the angle from the calibration curve at the same pressure ratio. The difference at each comparison must be within 2° for angles between 0° and 40° and within 3° for angles between 40° and 60°.

2.5.6.4 Yaw Angle Calibration. Mark the three-dimensional probe to allow the determination of the yaw position of the probe. This is usually a line extending the length of the probe and aligned with the impact opening. To determine the accuracy of measurements of the yaw angle, only the zero or null position need be calibrated as follows. Place the directional probe in the test section, and rotate the probe until the zero position is found. With a protractor or other angle measuring device, measure the angle indicated by the yaw angle indicator on the three-demensional probe. This should be within 2° of 0°. Repeat this measurement for any other points along the length of the pitot where yaw angle measurements could be read in order to account for variations in the pitot markings used to indicate pitot head positions.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 0

[FCC 86-263]

Amendment of Part 0 to Delegate Authority to EICs To Grant Emergency Exemptions to Vessels

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends the rules to delegate authority to the Engineers-in-Charge of the Commission's field offices to grant emergency exemptions from certain vessel equipment requirements of the Communications Act, the Great Lakes Agreement and the Safety Convention. The Commission initiated this action to improve the convenience and efficiency of emergency exemption procedures.

EFFECTIVE DATE: June 30, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Robert DeYoung, Private Radio Bureau, (202) 632-7175.

SUPPLEMENTARY INFORMATION:

Order

Adopted: May 20, 1986.
Released: May 22, 1986.

In the Matter of Amendment of Part 0 of the rules to delegate authority to EICs to grant emergency exemptions to vessels.

By the Commission.

1. We have determined to delegate authority to grant emergency exemptions from certain vessel equipment requirements contained in the Communications Act of 1934, as amended, 47 U.S.C. 151 *et seq.* (Act), the Great Lakes Radio Agreement, T.I.A.S. 7637, amended T.I.A.S. 9352 (GLA) or the International Convention for the Safety of Life at Sea, T.I.A.S. 9700 (Safety Convention) to the Engineers-in-Charge (EICs) of Commission field offices. This authority will be in addition to that already delegated to the Chief, Private Radio Bureau (Bureau). See § 0.331 of the rules, 47 CFR 0.331.

2. The emergency exemption process begins when the ship station licensee contacts the Bureau for an exemption from a particular statutory or treaty requirement. Typically, a station has failed the mandatory annual or periodic inspection because equipment required by the Act, the GLA or the Safety Convention is not functioning properly. The vessel cannot sail unless the licensee receives an emergency exemption from the statutory or treaty requirement in lieu of the required safety certificate. Unlike a standard exemption, which is usually granted for one year, an emergency exemption is temporary and expedient in nature. Typically an emergency exemption is granted for a single voyage to permit the ship to sail to another port for repair. In accordance with the Act, the GLA or the Safety Convention, emergency exemptions are granted only after it has been determined that the route and conditions of the proposed voyage, including other available communications equipment, render the failed equipment unnecessary for safety purposes during the exempted voyage.

3. The present procedure may consume several hours from the time the licensee contacts the Bureau to the time the exemption is sent. This is so because frequently the exemption requires coordination between the Bureau, the licensee and the FCC field office which conducted the inspection. This coordination is frequently complicated by differing time zones and sailing schedules.

4. It would be more convenient for the public and the Commission to also provide authority to grant such emergency exemptions to the EICs at field offices. EICs are near the vessel's location and are familiar with the functions of each piece of equipment. They are qualified to determine whether the lack of such equipment for the term of the exemption would pose a danger to life or property on a particular voyage. Furthermore, they are capable of recommending alternative measures within established paramenters which might satisfactorily function in lieu of the missing equipment.

5. Authority and parameters for exemptions are set forth in Title III, Parts II and III of the Act, Chapters I and IV of the Safety Convention, and Article IX of the GLA. The Commission's rules currently delegate exemption authority to the Chief, Private Radio Bureau. In cases of emergency, § 83.60(a) permits the owner, operator or master of a vessel to file an informal request for exemption for Title III, Part II or III of the Act, or from the Safety Convention or from the GLA. Joint authority to act on these requests in both the Private

Radio Bureau and the Field Operations Bureau will provide greater flexibility and expedition in processing them. This will be accomplished by amending § 0.314 of the rules to delegate this authority to the EICs. In order to ensure consistent policies, we are also amending § 0.332 of the rules to provide for coordination between the affected Bureau Chief regarding these emergency exemption actions.

6. For the reasons described above, we are amending the rules to delegate authority to grant emergency exemptions to EICs in addition to the authority already delegated to the Chief, Private Radio Bureau. Authority for this action is contained in sections 4(i) and 303 (r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r). Because these rule amendments involve Commission organization, the public notice, comment and effective date provisions of the Administrative Procedure Act, 5 U.S.C. 553, and of § 1.413 of the Commission's rules do not apply. See § 1.412(b)(5) of the rules, 47 CFR 1.412(b)(5).

7. Accordingly, It Is Ordered, That Part 0 of the Commission's rules is amended as set forth below effective June 30, 1986.

8. For further information regarding matters covered in this document, contract Robert DeYoung at (202) 632-7175.

47 CFR Part 1

[MM Docket No. 85-313; RM-5037; FCC 86-181]

Modification of FM Broadcast Licenses to Higher Class Co-channel or Adjacent Channels

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action amends the Commission's Rules to provide for modification of FM licenses (and permits) to higher class channels on existing or adjacent frequencies in the course of rule making proceedings amending the FM Table of Allotments. This action is taken in response to a petition filed by Fuller-Jeffrey Group.

EFFECTIVE DATE: July 7, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Joel Rosenberg, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 85-313, adopted April 18, 1986, and released April 29, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW, Suite 1440, Washington, DC. 20037.

Summary of Report and Order

1. The Commission amended § 1.420(g) of its Rules to provide a new procedure whereby the Commission may modify the licenses or permits of FM stations in the course of rule making proceedings amending the FM Table of Allotments, § 73.202(b) of the Rules, where the modifications would occur on mutually exclusive higher class adjacent or co-channels. Such modifications would be made regardless of the availability of additional equivalent higher class channels. In those circumstances, the Commission would not entertain the filing of expressions of interest by other parties.

2. This proceeding was commenced in response to a petition filed by Fuller-Jeffrey Group whose request was premised on recent Commission action in MM Docket No. 83-1148, *Amendment of the Commission's Rules Regarding Modification of FM and Television Station Licenses*, 98 F.C.C. 2d 916 (1984), *recon. denied*, FCC 86-32, Mimeo No. 36378, released January 17, 1986. In that proceeding the Commission added a new § 1.420(g) to its Rules, whereby the authorizations of FM stations seeking to upgrade to newly allotted superior class channels (e.g., from Class A to Class C) could be modified in rule making proceedings, provided at least one additional equivalent channel is available to accommodate others expressing interest in proposed channels. Fuller-Jeffrey proposed that the authorizations be modified in certain circumstances where equivalent channels are not available. Such circumstances would exist where a licensee seeks higher class use of its existing channel or of a mutually exclusive adjacent channel (e.g., a Class A licensee seeks to operate a Class C station, moving from Channel 241A to Channel 241C or to Channel 243C).

3. Commenters expressed nearly unanimous support for the proposal. They noted Commission policy favoring upgrades and public interest benefits from improving the ability of stations to increase service areas without fear of costly and time-consuming comparative license proceedings. They indicated that both Commission and licensee resources are wasted when requested upgrades are withdrawn in the face of other interests. Some contended that additional equivalent channels are not always available and that problems can arise where such channels are said to be not equivalent due to factors such as site restrictions. Other commenters claimed that the proposal is analogous to Commission preferences to daytime-only AM stations seeking full-time FM facilities or that precluding lower class FM stations from competing in nearby larger communities is not conducive to promoting a competitive marketplace environment.

4. The Commission concluded that existing procedures discourage expansion of FM service and thereby

deprive the public of significant benefits. Despite Commission action encouraging FM stations to upgrade their facilities, where no additional equivalent superior channels are available to accommodate other interests, licensees seeking to enhance service on co- or adjacent channels generally withdraw their requests rather than risk loss of existing authorizations and the expenses and delays associated with comparative license proceedings. When allotment proceedings are thereby terminated, Commission, licensee, and public resources are wasted, and spectrum is underutilized due to the incompatibility between petitioners' existing channels and the proposed channels. In light of this, the Commission believes that it makes no policy sense to provide for competing applications.

5. The Commission has legal authority to adopt and to implement the new procedure. Section 316 of the Communications Act of 1934, as amended, authorizes it to modify station licenses in order to promote the public interest, convenience, and necessity. The Commission believes that modifications to superior adjacent or co-channels make possible the expeditious provision of expanded radio service which would otherwise remain unrealized. The Commission does not believe that the Supreme Court's ruling in *Ashbacker Radio Corp.* v. *U.S.*, 326 U.S. 327 (1945), is controlling where such upgrades are sought. This is so, because the proposed channels, being precluded by existing operations, are, in effect, unavailable for application by others. Further, the Commission may promulgate rules limiting eligibility to apply for newly allotted channels where it determines that such a limitation promotes the public interest. *See: U.S.* v. *Storer*, 351 U.S. 192 (156).

6. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 604, a final regulatory flexibility analysis has been prepared. It is available for public viewing as part of the full text of this decision, which may be obtained from the Commission or its copy contractor.

7. The Rule contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modifed form, information collection and/or record keeping, labeling, disclosure, or record retention requirements and will not increase or decrease burden hours imposed on the public.

Ordering Clauses

Accordingly, it is ordered, that, under the authority contained in sections 1, 2, 4 (i) and (j), 303(r), 316, and 403 of the Communications Act of 1934, as amended, Part 1 of the Commission's Rules and Regulations is amended, effective July 7, 1986, as shown at the end of this document.

List of Subjects in 47 CFR Part 1

Administrative practice and procedure.

Part 1 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 1—ADMINISTRATIVE PRACTICE AND PROCEDURE

8. The authority citation for Part 1 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303.

Section 1.420 is amended by revising paragraph (g) as follows:

§ 1.420 Additional Procedures in Proceedings for Amendment of the FM, Television or Air-Ground Table of Assignments.

* * * * *

(g) The Commission may modify the license or permit of an FM station to another class of channel or of a UHF TV station to a VHF channel in the same community in the course of the rule making proceeding to amend § 73.202(b), § 73.504(a) or § 73.606(b) if any of the following conditions are met:

(1) There is no other timely filed expression of interest, or

(2) If another interest in the proposed channel is timely filed an additional equivalent class of channel is also allotted, assigned or available for application, or

(3) With respect to FM, the modification of license or permit would occur on a mutually exclusive higher class adjacent or co-channel.

William J. Tricarico,
Secretary.

[BC Docket No. 79-219; RM-3099; RM-3273]

Deregulation of Radio; Program Record Keeping Obligation

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action was taken in response to the decisions of the United States Court of Appeals vacating the Commission's *Second Report and Order* in this proceeding and remanding the case for further proceedings. A new program record keeping obligation for commerical radio licensees was developed to accommodate the court's concern for the proper functioning of the petition to deny process and the FCC's own information needs. Such licensees will be obliged, each quarter, to list those programs aired during the preceding quarter which, in the licensee's judgment, provided the station's most significant treatment of issues of concern to the broadcaster's community.

EFFECTIVE DATE: June 27, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Freda Lippert Thyden, (202) 632-7792.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Memorandum Opinion and Order*, BC Docket 79-219, FCC 86-222, adopted May 1, 1986 and released May 27, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 "M" Street, Northwest, Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 "M" Street, Northwest, Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

1. On December 20, 1985, the Court of Appeals for the District of Columbia Circuit vacated the Commission's *Second Report and Order* in this proceeding and remanded the case to the Commission for further proceedings. The court found that the record keeping requirements adopted in the *Second Report and Order*—an illustrative issues/programs list documenting at least 5 to 10 issues addressed each quarter—did not further the FCC's stated regulatory goal of relying on effective public participation in the license renewal process. The court further concluded that an adequate explanation had not been given by the Commission for its rejection of an alternative record keeping requirement suggested by a commenter during an earlier stage of the proceeding. Under this alternative approach, commercial radio licensees would record all programming that afforded "significant treatment" to issues facing their communities.

2. By this *Memorandum Opinion and Order*, the FCC adopted a modified form of the "significant treatment"

alternative. Under the revised rule, a commercial radio licensee is obliged, each quarter, to list those programs aired during the preceding quarter which, in the licensee's judgment, provided the station's most significant treatment of issues of concern to the broadcaster's community. This program record keeping obligation accommodates the court's concern for the proper functioning of the petition to deny process and the FCC's own information needs. This requirement has been narrowly tailored to meet our regulatory needs and, therefore, is minimally burdensome to licensees. While it is a flexible technique for providing reliable programming information and is intended to vest maximum discretion in licensees to determine appropriate amounts and types of issue programming, the FCC noted its continued belief that a licensee that documents significant programming directed to 10 community issues during each quarter would likely be able to demonstrate compliance with its issue-responsive programming obligation.

Ordering Clauses

3. Authority for the action taken herein is contained in Section 4 (i) and (j) and 303 of the Communications Act of 1934, as amended.

4. Accordingly, it is ordered, that the Commission's Rules are amended, effective June 27, 1986, as set forth below.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Amendatory Section

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 73—RADIO BROADCAST SERVICES

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154 and 303.

47 CFR 73.3526 is amended by revising paragraph (a)(9), removing the Note after paragraph (a)(9), and revising paragraph (e) introductory text to read as follows:

§ 73.3526 Local public inspection file of commercial stations.

(a) * * *

(9) For commercial AM and FM broadcast stations, every three months a list of programs that have provided the station's most significant treatment of community issues during the preceding three month period. The list for each calendar quarter is to be filed by the tenth of the succeeding calendar quarter (*e.g.*, January 10 for the quarter October-December, April 10 for the quarter January-March, etc.). The list shall include a brief narrative describing what issues were given significant treatment and the programming that provided this treatment. The description of the programs should include, but is not limited to, the time, date, duration and title of each program in which the issue was treated.

* * * * *

(e) *Period of Retention.* The records specified in paragraph (a)(4) of this section shall be retained for periods specified in § 73.1940 (2 years). The manual specified in paragraph (a)(8) of this section shall be retained indefinitely. The letters specified in paragraph (a)(7) of this section shall be retained for the period specified in §73.1202 (3 years). The "significant treatment of community issues" list specified in paragraphs (a)(8) and (9) of this section shall be retained for the term of license (5 and 7 years for TV and radio, respectively). The certification specified in paragraph (a)(10) of this section shall be retained for the period specified in § 73.3580 (for as long as the application to which it refers). The records specified in paragraphs (a)(1), (2), (3), and (5) of this section shall be retained, as follows:

* * * * *

[MM Docket No. 85-138; RM-4778]

Radio Broadcasting Services; Silver Springs, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document changes paragraph 4 of the *Report and Order* in this proceeding concerning an FM channel allotment in Silver Springs, FL. (April 21, 1986, 51 FR 13512) to delete the window filing dates. The acceptance of applications for Channel 238A at Silver Springs, Florida, is conditioned on Station WNLT(FM), Channel 239, Clearwater, Florida, relocating its transmitter site. A filing window for Channel 238A at Silver Springs will be announced at a future date.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Erratum, MM Docket No. 85-318, released May 23, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW, Suite 140, Washington, DC 20037.

47 CFR Part 73

[MM Docket 83-670]

Revision of Programming and Commercialization Policies, Ascertainment Requirements, and Program Log Requirements for Commercial Television Stations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In 1984, the Commission adopted a *Report and Order* in MM Docket No. 83-670, concerning deregulation of the nonentertainment programming and commercialization policies, ascertainment requirements, and program log requirements for commercial television stations. In response to this decision, the Commission received two petitions for reconsideration and/or clarification. This action is intended to reply to these petitions and to clarify that decision as requested.

EFFECTIVE DATE: June 27, 1986.

FOR FURTHER INFORMATION CONTACT: Freda Lippert Thyden, (202) 632-7792.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission *Memorandum Opinion and Order* in MM Docket No. 83-670, adopted May 1, 1986 and released May 28, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230),

1919 "M" Street, NW., Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 "M" Street, NW., Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

1. In August 1984, the Commission adopted a *Report and Order* (*Report*) in MM Docket No. 83–670 [49 FR 33588, August 23, 1984], eliminating guidelines relating to nonentertainment programming and amounts of commercial matter presented by commercial television stations and deleting our rules relating to formalized community ascertainment and the maintenance of comprehensive program logs by such stations. Two petitions were filed requesting reconsideration and/or clarification of that decision. The summarized *Memorandum Opinion and Order* (*Order*) responds to these concerns, denies the petitions for reconsideration, and clarifies the decision adopted in the *Report*.

2. Specifically, the petitioners objected to: (1) Deletion of the nonentertainment programming guidelines, (2) elimination of formal ascertainment requirements, (3) deletion of the commercial guidelines, (4) elimination of the requirement for comprehensive program logs in favor of quarterly "issues/programs" lists, and (5) the amount of notice provided to support the action in the *Report* eliminating the long form audit.

3. The *Order* rejects the arguments against elimination of the nonentertainment programming guidelines as unpersuasive and repetitive. The FCC re-emphasizes that all licensees remain individually responsible for contributing to the overall discussion of issues confronting the community and that fully adequate means remain available to bring to its attention the failings of any particular licensee. Petitioners also requested clarification or expressed concern on several issues relating to this point. In reply, the *Order* underscores that the decision in the *Report* in no way diminished the obligation of broadcasters to address the special needs of the child audience. It also clarifies that generally, where a station relies on the programming of another market station, that programming must actually be broadcast. Finally, the *Order* reaffirms the obligation of licensees to meet the needs of minority audiences, but also confirms the Commission's determination that in doing so, a broadcaster may look to other market stations and need not program in direct proportion to the size of the minority audience.

4. Petitioners also argued against elimination of the formal ascertainment requirements, maintaining that ascertainment is required by the Communications Act. The *Order* reiterates the *Report*'s finding that ascertainment is not statutorily compelled. The FCC acted within its allowable discretion in determining that, under current marketplace conditions, ascertainment is no longer a necessary or appropriate device to assure programming in the public interest. The focus of FCC inquiry is now upon the responsiveness of licensee programming, not upon the methodology utilized by a licensee to determine the issues addressed.

5. In response to petitioners' concerns about the deletion of commercial guidelines, the *Order* again states that marketplace forces are sufficient to determine appropriate levels of commercialization. The *Order* clarifies the FCC's intention in eliminating the commercialization guidelines to remove all quantitative commercial time limits from TV licensees, including those announced in prior policy pronouncements regarding the quantity of advertising in children's programming. It emphasized, however, that other protective mechanisms related to commercialization practices in children's programming, such as the bar to host selling and the requirement for adequate separation of program and commercial material, remain FCC policies.

6. The *Order* rejects the plea for retention of a comprehensive program logging system for television licensees because the petitioners did not present any new arguments to persuade the FCC to revisit the matter. However, with respect to revision of the existing illustrative issues/programs list requirement, the Court of Appeals recently vacated the Commission's decision in the *Second Report and Order* in the radio deregulation proceeding on the basis that amendment of the current program record keeping requirement is necessary. Therefore, the same modified program record keeping rule which has been adopted for radio licensees in response to the court's decision is adopted for television licensees as well. Under this rule, a television licensee would be required, each quarter, to list programs that provided the station's most significant treatment of community issues.

7. Finally, the *Order* rejects the contention of petitioners for reconsideration that the Commission's action deleting the "long" (audit) renewal form for television licensees was taken without sufficient notice. The Commission's reference (in the *Notice of Proposed Rule Making* in this Docket) to reassessing its "information needs" in light of its deregulation proposals provided adequate notice of the subject matter to sustain action upon the long form audit.

Ordering Clauses

8. Accordingly, it is ordered, That the Commission's Rules are amended effective June 27, 1986, as set forth below.

It is further ordered, That the petitions for reconsideration filed by Henry Geller and Donna Lampert, and by Telecommunications Research and Action Center, *et al.*, are denied.

9. Authority for the actions taken herein is contained in sections 4 (i) and (j) and 303 of the Communications Act of 1934, as amended.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Amendatory Section

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 73—RADIO BROADCAST SERVICES

10. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154 and 303.

11. 47 CFR 73.3526 is amended by revising paragraph (a)(8) to read as follows, and by removing the note after paragraph (a)(8).

§73.3526 Local public inspection file of commercial stations.

(a) * * *

(8) For commerical TV broadcast stations, every three months a list of programs that have provided the station's most significant treatment of community issues during the preceding three month period. The list for each calendar quarter is to be filed by the tenth day of the succeeding calendar quarter (*e.g.*, January 10 for the quarter October–December, April 10 for the quarter January–March, etc.). The list include a brief narrative describing what issues were given significant treatment and the programming that provided this treatment. The description of the programs should include, but is not limited to, the time, date, duration and

title of each program in which the issue was treated.

BILLING CODE 4710-01-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 192 and 195

[Amdts. 192-52 and 195-36; Docket No. PS-87]

Transportation of Gas or Hazardous Liquids by Pipeline, Welding Requirements

AGENCY: Research and Special Programs Administration (RSPA), Department of Transportation.

ACTION: Final rule.

SUMMARY: These amendments generally conform requirements of Parts 192 and 195 for welding procedure qualification and performance and for welder qualification, with the exception of requirements for low stress welder qualification applicable only to Part 192. Welding procedure requirements are now identical, worded in performance language for both regulations. Requirements for qualification of welders are editorially conformed, retaining the incorporation by reference of section 3 of API Standard 1104 and section IX of the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code.

EFFECTIVE DATE: July 7, 1986.

FOR FURTHER INFORMATION CONTACT: William A. Gloe, (202) 426-2082, regarding the content of this amendment, or the Dockets Branch, (202) 426-3148, regarding copies of the amendment or other information in this docket.

SUPPLEMENTARY INFORMATION:

Background

These amendments continue the process of conforming the welding requirements of 49 CFR Part 192 for gas pipelines with those for hazardous liquid pipelines under 49 CFR Part 195. As described in the Notice of Proposed Rulemaking (NPRM) (50 FR 49429, December 2, 1985), the two sets of requirements were developed separately at different times and as a result differ with each other in ways that cannot be explained on the basis of technical or safety differences between gas and liquid pipelines.

Based on prior petition by the industry and subsequent notice and comment, Part 195 was amended in 1984 (Amdt. 195-32, 49 FR 36859, September 20, 1984) to generally conform requirements for qualification of welders with those of Part 192. Both parts now require (except for welders who work on gas pipelines to be operated at a pressure that produces a hoop stress of less than 20 percent of the specified minimum yield strength of the pipe) that welders be qualified in accordance with either section 3 of API Standard 1104 or section IX of the ASME Boiler and Pressure Vessel Code. At the time of Amendment 195-32, other requirements relating to qualification of welders remaining in Part 192 but were not incorporated into Part 195 because the requirements were unnecessary for safety and could be misleading. As stated in the NPRM of this proceeding, paragraph (b) of § 192.227 exempted welders from separate qualification for differences in carbon and low alloy steels being welded when being qualified under the ASME Code. Because material, within broad limits, is not an essential variable for welder qualification, the paragraph is unnecessary and is deleted with this amendment.

Similarly, sections on preheating and stress relieving are deleted from Part 192 because, by specifying overly-liberal requirements, the sections did not regulate an actual safety hazard but instead created the impression that preheating and stress relieving may not be required when good engineering judgment would mandate that one or the other are necessary. Part 195 contains no separate requirements for preheating or stress relieving.

Qualification of welding procedures was discussed in detail in the NPRM preceding this amendment, and the difference between Parts 192 and 195 was pointed out regarding qualification of the welding procedure. Part 195 merely stated that the procedures must be tested and Part 192 required that the procedures must be qualified in accordance with API 1104 or the ASME Code. Because both of these industry standards require destructive testing of test weldments made to qualify the welding procedure, the requirement for destructive testing has been incorporated in both Parts 192 and 195. RSPA believes that there are two advantages, besides conformity between Parts 192 and 195, in incorporating this language. First, the language rules out qualification of welding procedures by various forms of nondestructive inspection, and second, the language allows qualification by more than one type of destructive testing, including tensile testing, nick-break, guided bend testing, as well as COD (crack opening displacement), CTOD (crack-tip opening displacement) and other forms or methods of destructive testing that may be fracture toughness or fracture mechanics oriented. Incorporated by reference of section 6 of API Standard 1104 for standards of acceptability of welds is not changed by this rulemaking for either Part 192 or Part 195.

The Proposal

The RSPA proposal published in the NPRM (Docket PS-87, Notice 1) is reproduced here for guidance in evaluating comments and arguments advanced in the next section of this preamble. As published on page 49431 of the Federal Register (50 FR 49429-49431, December 2, 1985), the proposal reads:

RSPA proposes to amend 49 CFR 192 and 195 as follows:

PART 192—[AMENDED]

1. The authority citation for Part 192 continues to read as follows:

Authority: 49 U.S.C. 1672; 49 U.S.C. 1804; 49 CFR 1.53, and Appendix A of Part 1.

§ 192.223 [Removed]

2. By deleting § 192.223 in its entirety.

3. By revising § 192.225 to read:

§ 192.225 Welding procedures.

(a) Welding must be performed by a qualified welder in accordance with established written welding procedures that have been tested and the quality of the test welds determined by destructive testing to meet the acceptability standards of this subpart.

(b) Each welding procedure must be recorded in detail, including the results of the qualifying tests. This record must be retained and followed whenever the procedure is used.

4. By deleting paragraph (b) of § 192.227, redesignating the existing paragraph (c) as (b), and by revising paragraph (a) to read:

§ 192.227 Qualification of welders.

(a) Except as provided in paragraph (b) of this section, each welder must be qualified in accordance with section 3 of API Standard 1104 or section IX of the ASME Boiler and Pressure Vessel Code. However, a welder qualified under an earlier edition than listed in Appendix A may weld but may not requalify under that earlier edition.

* * * * *

§ 192.227 [Removed]

5. By deleting § 192.227 in its entirety.

§ 192.229 [Removed]

6. By deleting § 192.229 in its entirety.

PART 192—[AMENDED]

7. The authority citation for Part 192 continues to read as follows:

Authority: 49 U.S.C. 2002; 49 CFR 1.53, and Appendix A of Part 1.

8. By revising § 192.214 to read:

§ 192.214 Welding: Procedures.

(a) Welding must be performed by a qualified welder in accordance with established written welding procedures that have been tested and the quality of the test welds determined by destructive testing to meet the acceptability standards of this subpart.

(b) Each welding procedure must be recorded in detail, including the results of the qualifying tests. This record must be retained and followed whenever the procedure is used.

§ 192.222 Welding: Qualification of welders.

9. By revising the title of § 192.222 to read as set forth above. In the preamble to the proposal, RSPA provided justification for deletion of §§ 192.223, 192.227, and 192.229 as duplicative and unnecessary for safety. Comments on the deletion of these sections as well as on the balance of the proposal are discussed below as they apply to each section.

Comments in Response to Notice 1

RSPA received a total of 17 comment letters on the NPRM, 10 from gas pipeline operators, 1 from a combined liquid and gas operator, 3 from trade organizations representing gas operators, 1 from a State Public Service Commission, and from the American Petroleum Institute (API) and the American Welding Institute (AWI). All supported the proposal to delete §§ 192.223, 192.227, and 192.229 from Part 192 as unnecessary, and generally agreed with the proposed conformity between Parts 192 and 195, except the State Public Service Commission and the Boston Gas Company. The State Public Service Commission interpreted the reference to section 2 of API Standard 1104 in the existing § 192.225 to mean that all of section 2, including the development and establishment of the welding procedure, is presently incorporated by reference. The interpretation is incorrect. Section 2 of API 1104 and section IX of the ASME Boiler and Pressure Vessel Code are referred to in § 192.225 only for qualification, or testing, and not for development and establishment of the written welding procedure. The section now reads, in part:

§ 192.225 Qualification of welding procedures.

(a) Each welding procedure must be qualified under section IX of the ASME Boiler and Pressure Vessel Code or section 2 of API Standard 1104, whichever is appropriate to the function of the weld, except that a welding procedure qualified under an earlier edition previously listed in Appendix A may continue to be used but may not be required under the earlier edition.

The requirement for "established written welding procedures" is presently in § 192.223(a) which, by containing no reference to industry or other standards, is and has been a performance requirement since issuance of the regulations. The same paragraph also requires that the procedures be "qualified" under § 192.225, which is simply a duplication of the requirements of § 192.225.

RSPA believes that the error in interpretation is a common one because of the use of the word "qualified" in association with section 2 of API 1104 without further definition of the limited meaning of that term. However, if a State regulation includes other requirements of API 1104 or of the ASME Code as mandatory, there is no conflict with the Federal regulations. The applicable Federal laws permit States to apply to intrastate pipelines additional or more stringent State regulations that are compatible with Federal regulations.

The Boston Gas Company stated that they were concerned about the deletion of § 192.223 and the revision of § 192.225, eliminating reference to the industry standards. Boston Gas expressed their concerns as:

> It is our feeling that Parts 192.223, 192.225, and 192.227 should be retained. Subpart E has withstood the test of time. We do not believe it should be modified for the sake of alignment with another Part. We recommend that Part 195 be modified to be aligned with Part 192.

In the interest of assuring the Boston Gas Company that the requirements of Part 192 are not watered down to suit Part 195, all of the requirements of §§ 192.223 and 192.227 have been retained. Paragraph (a) of § 192.223 is relocated in § 192.225 and contains the same requirements. Paragraph (b) of § 192.223 is covered by incorporation by reference of section 3 of API 1104 and section IX of the ASME Code in § 192.227, and would be a duplication of the requirements of that section if retained. Section 192.227 remains as it is with the exceptions of reversal of order of reference to the industry standards to reflect the amount of usage on pipelines, and the deletion of paragraph (b), which, to the best of our knowledge, has never been invoked. Incorporation by reference of the industry standards for qualification of welding procedures under § 192.225 has been replaced by performance standards as explained in the NPRM. No effect on safety is anticipated from this change because essentially the same testing requirements, or their equivalents, will continue to be specified by operators to meet the acceptability standards of the regulations.

Therefore, with the exception of the two comments that RSPA believes are based on a misunderstanding, all commenters agreed with the intent of the rulemaking. Two others suggested further clarification by iterating the effect of the changes, and four additionally suggested a re-wording of the proposed §§ 192.225 and 195.214. These four are the API, AWI, the Northern Natural Gas Company, and the Interstate Natural Gas Association of America (INGAA) whose comments are discussed here because of the possible impact of the changes on the relatively large organizations. INGAA and Northern Natural recomended that these sections on qualification of welding procedures be limited to requirements on developing, documenting, and maintaining the procedures, and that the requirement for performance by qualified welders be moved to § 192.228, Limitations on welders. The API recommended that the word "acceptability" be deleted from the phrase "to meet the acceptability standards of this subpart," while INGAA would modify that phrase by changing the word "to" to "and." Both INGAA and the AWI recommended changing the wording of paragraph (b), INGAA again reflecting the intention to limit the requirements of the sections to that implied by the title. The AWI commented that both the original language and the proposed language cause problems in interpretation, defining the reasons as follows:

> It is customary to make test weldments to qualify a welding procedure. The welding parameters of this test assembly, along with the destructive test results, are recorded and this record becomes the Procedure Qualification Record (PQR). In applying that procedure to a production weld, a Welding Procedure Specification (WPS) is written. The WPS includes tolerances and other variations from the PQR which are allowed by code rules or other engineering judgment. The "record" (PQR) is not the specific document used by the welder in making his production welds. The WPS is the document with instructions for the welder.

The AWI suggested a wording change to refer to the welding procedure specification as the document that must be followed whenever the procedure is used.

Considering that conformity between Parts 192 and 195 is an objective of this rulemaking and that most of the comments are directed at the proposed

§§ 192.255 and 195.214 as a result of conforming the two, and also incorporating the requirements of § 192.223, RSPA recognizes a possible impasse in resolving the differences between the various comments. Because more commenters addressed the changes to § 192.225 and because the existing title of the section is "Qualification of welding procedures," it appears that the intent to include the general provisions of §§ 192.223 and 195.214 may have been overlooked because of the similarity of the proposed title, "Welding procedures." As proposed, the section does cover aspects of welding performance that would not normally be in a section on welding procedures, offering a reasonable explanation for the INGAA and Northern Natural comments. In order to clarify that the section is intended to cover other aspects as well as welding procedures, RSPA has reconsidered the title and feels that the problems may be more appropriately resolved by using the title, "Welding: General" as presently for § 195.214. Therefore, this final rule contains the title "Welding: General" for both §§ 192.225 and 195.214. Thus, the general nature of § 192.223 is included, including performance of welding, and the general and performance nature of § 195.214 is also retained.

To address the API comment to delete the word "acceptability," RSPA is replacing the term "acceptability standards" with the word "requirements" as presently in § 195.214 and as commonly used to denote any mandatory rule. The basis for the API comment is that the word "acceptability" would likely lead the reader to section 6 of API 1104 because of the title of that section, "Standards of Acceptability—Nondestructive Testing." The intent of the proposed language for §§ 192.225 and 195.214 is to require destructive testing of test weldments to qualify the welding procedure such that the weld soundness as governed by the acceptability standards would be met in production welding as determined by nondestructive testing. Therefore, RSPA considers that meeting the acceptability standards (or, more broadly, "requirements" of the subpart) is an objective of establishment and qualification of the procedure as well as of qualification of the welder. The final rule is editorially changed to reflect this. There is no intent to require nondestructive testing as a part of welding procedure qualification. Hence, RSPA does not accept the INGAA recommendation to change the word "to" to "and." The final phrase is "to meet the requirements of this subpart," meaning to meet all that follows in the subpart, including the standards of acceptability.

Similarly, RSPA feels that no change is necessary to acknowledge the AWI comment because, although using different language, the AWI had demonstrated that it understands the requirement and has specified the means that the industry uses to implement the requirement. AWI suggested the following for §§ 192.255(b) and 195.214(b):

> Each welding procedure test must be recorded in detail, including the results of the qualifying test. A welding procedure specification shall be prepared using the qualifying test record as justification and shall be followed whenever the procedure is used.

Although informative with regard to the use of a welding procedure specification, this wording is unacceptable to RSPA because it omits the requirement to record the entire procedure, including all variables of the procedure, such as the welding process, the material, size, joint design, type, class of consumables, preheating, stress relieving, and other characteristics. RSPA does not limit recording of the procedure to the tests, although the qualifying tests must be included. Further, once a welding procedure is qualified (referred to by AWI as the Procedure Qualification Record), that procedure may not change in ways that have an effect on the welds produced. Tolerances in prescribing instructions for the welder, as pointed out by the AWI, are understandable. However, in terms of enforcement, when, for example, the welding procedure is established in a way that preheating may be necessary but may not be adequately prescribed in the welding procedure specification, RSPA will enforce the need for adequate preheating, especially in cases where an unusual number of related weld defects are occurring. The phrase "to meet the requirements of this subpart" also means that no cracks are permitted in pipeline girth welds, and that if cracks occur, the entire welds must be removed or must be repaired using detailed, welding procedures developed for that purpose (§§ 192.245 and 195.230).

Northern Natural suggested substituting performance standards for welder qualification as proposed for qualification of welding procedures. Northern Natural commented in part:

> The stated purpose of this NPRM was to ". . . conform the two" (Parts 192 and 195) "by using the same *performance language* . . ." (emphasis added). This has been completed in 192.225, Welding Procedures, by removing the references to API 1104 Section 2 and ASME Section IX for destructive testing of the test welds when qualifying a procedure. We suggest that similar action be taken in 192.227(a) for welder qualification, namely the statement of requirements in performance language and the deletion of specification references.

RSPA has several problems with the Northern Natural suggestion. First, we do not find the quoted language in the NPRM. Second, RSPA had no intention of substituting performance language for the existing welder qualification requirements. As the summary of the NPRM stated:

> MTB proposes to amend Parts 192 and 195 by generally conforming requirements for welding procedure qualification and for welder qualification. Identical performance standards are proposed for qualification of welding procedures under both regulations, except for retained provisions for low stress level gas pipelines in Part 192. Industry standards incorporated by reference would be retained for qualification of welders and for weld acceptability.

Although we recognize that removing reference to the industry standards for welder qualification could potentially provide greater flexibility, RSPA has not proposed to do this, having limited the proposal to conforming the two regulations with a minimal change in both. This rulemaking is complete with regard to conformity of the welding procedure qualification and welder qualification requirements of Parts 192 and 195. Further change would have to be based on supportable petition and demonstration of need. RSPA presently believes that qualification of welders in accordance with the industry standards is an essential part of pipeline safety. Petitions for change would have to present convincing arguments as to why this may not be so.

Advisory Committee Review

Section 4(b) of the Natural Gas Pipeline Safety Act of 1968, as amended (49 U.S.C. 1673(b)), and section 204(b) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. 2003(b)) require that each proposed amendment to a safety standard established under these statutes be submitted to a 15-member advisory committee for its consideration. The Technical Pipeline Safety Standards Committee, composed of persons knowledgeable about transportation of gas by pipeline, considered the proposed amendment to §§ 192.223, 192.225, 192.227, 192.237, and 192.239 in a meeting on December 10, 1985, in Washington, D.C. The Technical Hazardous Liquid Pipeline Safety Standards Committee considered the

proposed amendment to §§ 195.214 and 195.222 in a meeting on November 18, 1985, in Washington, D.C. Both committees found the proposed amendments to be technically feasible, reasonable, and practicable.

Classification

This final rule is considered to be nonmajor under Executive Order 12291 and is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). The economic impact of this final rule has been found to be so minimal that further evaluation is unnecessary. The rule merely conforms the requirements of 49 CFR Parts 192 and 195 with regard to welding procedures and welder qualification.

Since the impact of this final rule is expected to be minimal, the agency certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects

49 CFR Part 192

Pipeline safety, Welding requirements, Incorporation by reference

49 CFR Part 195

Pipeline safety, Welding requirements, Incorporation by reference

In view of the foregoing, RSPA amends 49 CFR Parts 192 and 195 as follows:

1. The authority citation for Part 192 continues to read as follows:

Authority: 49 U.S.C. 1672; 49 U.S.C. 1804; 49 CFR 1.53, and Appendix A of Part 1.

§ 192.223 [Removed]

2. By removing § 192.223 in its entirety.

3. By revising § 192.225 to read:

§ 192.225 Welding—General.

(a) Welding must be performed by a qualified welder in accordance with welding procedures qualified to produce welds meeting the requirements of this subpart. The quality of the test welds used to qualify the procedure shall be determined by destructive testing.

(b) Each welding procedure must be recorded in detail, including the results of the qualifying tests. This record must be retained and followed whenever the procedure is used.

4. By removing paragraph (b) of § 192.227, redesignating the existing paragraph (c) as (b), and by revising paragraph (a) to read:

§ 192.227 Qualification of welders.

(a) Except as provided in paragraph (b) of this section, each welder must be qualified in accordance with section 3 of API Standard 1104 or section IX of the ASME Boiler and Pressure Vessel Code. However, a welder qualified under an earlier edition than listed in Appendix A may weld but may not requalify under that earlier edition.

* * * * *

§ 192.237 [Removed]

5. By removing § 192.237 in its entirety.

§ 192.239 [Removed]

6. By removing § 192.239 in its entirety.

7. The authority citation for Part 195 continues to read as follows:

Authority: 49 U.S.C. 2002; 49 CFR 1.53, and Appendix A of Part 1.

8. By revising § 195.214 to read:

§ 195.214 Welding: General.

(a) Welding must be performed by a qualified welder in accordance with welding procedures qualified to produce welds meeting the requirements of this subpart. The quality of the test welds used to qualify the procedure shall be determined by destructive testing.

(b) Each welding procedure must be recorded in detail, including the results of the qualifying tests. This record must be retained and followed whenever the procedure is used.

9. By revising the title of § 195.222 to read:

§ 195.222 Welding: Qualification of welders.

Issued in Washington, DC, on May 29, 1986.

M. Cynthia Douglass,

Administrator, Research and Special Programs Administration.

BILLING CODE 4910-60-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 630

[Docket No. 60583-6083]

Foreign Fishing, and Atlantic Swordfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule to implement portions of the Fishery Management Plan for the Atlantic Swordfish Fishery (FMP). This rule (1) prohibits nighttime longlining during a closure, and (2) establishes a data collection program to monitor the fishery. The intended effect of the final rule is to maintain high landings in the form of larger fish that are preferred in the market, prevent growth overfishing, provide a buffer against possible recruitment overfishing, obtain the information necessary to monitor the fishery and refine the management regime, and minimize the impacts of foreign fishing on the domestic swordfish fishery.

EFFECTIVE DATE: June 29, 1986. This rule is being issued prior to approval by the Office of Management and Budget (OMB) of the information collection requirements in § 630.5 (b) and (c). When the OMB control number is received, a notice will be published in the **Federal Register** making these sections effective on date of filing for public inspection with the Office of the Federal Register.

ADDRESSES: A copy of the combined final regulatory flexibility analysis/regulatory impact review may be obtained from Donald W. Geagan, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813-893-3722.

SUPPLEMENTARY INFORMATION:

The South Atlantic Fishery Management Council (Council) prepared the Fishery Management Plan for Atlantic Swordfish in cooperation with the Caribbean, Gulf of Mexico, Mid-Atlantic, and New England Fishery Management Councils (Councils). The original Swordfish FMP submitted on April 29, 1985 was partially disapproved. The Council, on behalf of the Councils, resubmitted the disapproved measures. A notice of availability of the revised FMP was published in the **Federal Register** on March 21, 1986 (51 FR 9669). Proposed regulations to implement the resubmitted measures were published March 31, 1986 (51 FR 10690). The proposed rule presented supporting rationale for the resubmitted management measures and they are not repeated here.

Comments and Responses

Eleven comments were received addressing seven issues. The sources of the comments were a fishery management council, a foreign fishing association, two foreign governments, a commercial fisheries association, three conservation organizations, a commercial fisherman, an individual, the Department of State, the Office of Management and Budget, and the U.S. Coast Guard.

Prohibition of Imports During the Variable Season Closure (VSC)

A fishery management council and an environmental organization commented in favor of a prohibition on imports of western North Atlantic swordfish harvested during the VSC. They indicated that the prohibition is necessary to prevent a shift in effort from domestic to foreign fleets fishing the same stock which would undermine the effectiveness of the domestic closure. NOAA acknowledges the potential effect of increased foreign effort on the western North Atlantic stock during a VSC but believes there is substantial doubt that an import prohibition would effectively control foreign fishing effort. Foreign fleets could continue to fish and export to alternative markets or freeze fish and export after a closure. In either case, the burden of requiring all exporters to provide certificates of eligibility for every shipment of swordfish during a closure and the burden of Federal enforcement costs would be substantial even though little conservation benefits would be realized.

NOAA is also concerned about the enforceability of this import prohibition. Most of the major exporters have far ranging longline fleets. It would be virtually impossible to determine whether or not a given shipment of swordfish was harvested from the western Atlantic and during a specific VSC. The certificate of eligibility would, in effect, be an honor system with little or no means of verification. For these reasons, NOAA has disapproved the import prohibition.

A commercial fishermen stated that allowing imports of western North Atlantic swordfish during a closure would adversely affect domestic price structure and increase reliance on imports. Given the magnitude of total swordfish imports entering the United States (approximately nine million pounds in 1985), NOAA does not believe the relatively small portion controlled through the import prohibition during a VSC would be a significant factor in determining price or market dependence.

A commercial fishery organization opposed the import prohibition because adverse impacts on importers, distributors, and consumers were not adequately evaluated. Further, the measure creates a burden for importers and distributors yet there is no assurance foreign fleets would reduce effort on the affected stock, i.e. no management benefits. NOAA agrees and has deleted the measure from the final rule.

Prohibition of Nighttime Longlining During a VSC

A foreign fishing association, and a fishery agency of a foreign government objected to this measure citing the reduced foreign fishing effort, substantial existing restrictions, and the failure to provide a reasonable opportunity to fish for tuna. The DOS expressed reservation but, ultimately agreed to the measure with the understanding that its implementation would still provide a reasonable opportunity to fish for tuna. A fishery management council and an environmental organization supported the prohibition as being necessary to reduce mortality during a VSC and to be fair and equitable to domestic fishermen already subject to the restriction. NOAA has retained this measure but will consider its effect when it evaluates the desirability of continuing the plan and regulations after December 1987.

NOAA considers this measure to be a less burdensome alternative than a total prohibition of longlining. The measure acknowledges the minimal incidental catch of swordfish during daylight hours and specifically allows tuna longlining during those hours. Allowing "tuna" longlining at night would be equivalent to allowing a directed fishery for swordfish during the closure because of the demonstrated high swordfish catch during those hours. NOAA believes that this measure does provide a reasonable opportunity to fish for tuna because (1) it applies only during a small portion of the fishing year (only the VSC and only at night); (2) other fishing methods may be used during the brief time longlines are prohibited; and (3) foreign fishermen are afforded the same opportunity to fish for tuna as are domestic fishermen.

Highly migratory species of tuna are not subject to the exclusive management authority of the U.S. under the MFCMA. It is the position of the U.S. that these highly migratory species can only be managed pursuant to international agreements. Approval of the ban on nighttime longlining does not reflect departures from that position. NOAA will not approve any measure under the MFCMA that would not allow a foreign vessel a reasonable opportunity to fish for tuna in the FCZ.

Caps on Incidental Catch of Swordfish by Foreign Longlines and Squid Trawls

A fishery management council and an environmental organization commented in support of the caps on incidental catch. A foreign fishing association, a fishery agency of a foreign government, and the Department of State opposed this measure on the basis that foreign incidental catch has been reduced to insignificant levels, the specified caps are far below mortality levels that would significantly affect the stock or availability to U.S. fishermen, and the restriction would not provide a reasonable opportunity to fish for tuna.

Although this measure was to be held in reserve, Council intent was for the respective foreign fisheries to be closed for the remainder of the year when the caps were reached. NOAA concludes that the specified levels of incidental catch are well below levels that would be reasonably expected to have a perceptible impact on the swordfish stock or abundance within U.S. waters. Such restriction would not provide a reasonable opportunity to fish for tuna and would not be considered a necessary and appropriate management measure. NOAA has disapproved this provision and it has been deleted from the final rule.

Area I Closure to Foreign Longlining

NOAA has disapproved the area closure measure for the area from Key West, Florida to Cape Lookout, North Carolina out to 100 nautical miles, from June 1 to September 30 (currently not in effect). At the request of the Council, or based on information from other sources, the Regional Director was to implement a closure when the numbers or severity of gear conflicts between foreign and domestic vessels within a given fishing year or patterns of fishing by foreign vessels resulted in a reduction in domestic vessel efficiency or damage to the swordfish stock.

A foreign fishing association and a foreign fishery agency objected to the proposed closure as being unnecessary, overly restrictive, and an unreasonable deprivation of the opportunity to catch tuna. They also stated that the definition of gear conflict was too broad, open to abuse, and would tempt deliberate conflicts.

A fishery management council supported the measure. The DOS did not object to the closure, but expressed reservations about use of specific numbers of conflicts to trigger the closure, inclusion of preemption of fishing grounds in the definition of gear conflict, and lack of a provision for lifting the closure if conflicts and fishing effort returned to low levels.

This measure was disapproved because it was determined that it violated National Standard 6. The total number of foreign longline vessels permitted in the Atlantic FCZ bears no direct relationship with the severity of potential conflicts in Area I. The use of a specific number of conflicts to

BEST COPY AVAILABLE

implement the closure automatically lacks sufficient flexibility to allow a reasonable determination of the impact of those conflicts on the domestic fishery.

Prohibition of Drift Entanglement Nets

Three environmental organizations strongly supported implementation of this measure because of the nonselectivity of the gear and the significant incidental mortality of non-target species, such as seabirds, marine mammals, and sea turtles. A fishery management council, a commercial fisherman and one individual opposed the measure citing lack of scientific justification, natural limitations on the use of the gear, minimal incidental catch, and the small number of vessels using the gear. The east coast drift net fishery consists of approximately six vessels operating in the northeast that use the gear as a supplement to harpooning or longlining when sea conditions allow. There has been no significant expansion in use of the gear since its introduction on the east coast.

The Council recently compiled numerous reports and data regarding the effects of drift nets. Much of this information is based on the high seas drift net fisheries for salmon and squid in the Pacific Ocean. The Pacific fisheries have significant incidental catches of seabirds and porpoise, but the nature of the fisheries, including mesh size, length of gear, depth and area fished, differs substantially from the east coast drift net swordfish fishery.

The most applicable data are from the five observer trips aboard east coast swordfish drift net boats and the California swordfish drift net study. Reports from the observed trips revealed no mortality of marine mammals, endangered species, or billfish. The California study covered a four year period and involved observations of 355 sets by 79 different vessels. Incidental take included 97 sea lions, 7 whales, 2 dolphins, 2 seals and 2 turtles. The incidental take problem was resolved by establishing selective, time-area closures rather than a total prohibition of gear.

NOAA concludes that the best available scientific evidence does not support a prohibition on use of this gear. The information provided, particularly the California data, indicates a potential for incidental take, but a gear prohibition in the absence of more specific data on the east coast fishery is not warranted. NOAA will focus efforts on developing appropriate methods of collecting data so that the Council can further evaluate the effects of this gear. This measure has been disapproved and deleted from the final rule.

Mandatory Logbooks

One fishery management council expressed opposition to use of mandatory logbooks to collect effort data. NOAA disagrees with this commenter. Scientists on the Swordfish Working Panel and the Scientific and Statistical Committees of the Gulf of Mexico and South Atlantic Councils strongly supported the logbook concept. Assessment scientists have stressed the need for effort data to improve our understanding of the status of the swordfish stock. Data required are consisent with information normally recorded by most swordfish fishermen, thus the additional reporting burden should be minimal. This measure is implemented as proposed for a period of one year to establish the baseline data necessary for the best management of the fishery. NOAA will explore less burdensome methods of data collection during that initial period.

Mandatory Data Collection Using Onboard Technicians

The Council proposed an onboard technician program (3.0% sample) to collect biological samples (otoliths, fin spines, gonads) for age and sex analysis and to collect data on size selectivity of gear, incidental catch, and survival rates of released fish. It is generally agreed that these data cannot be obtained reliably without onboard technicians. The estimated cost of the program at the level the Council desires is $107,100–$142,800 per year. This program was proposed as mandatory under the original FMP but was disapproved principally because of insurance liability problems associated with mandatory technician coverage. The Council has revised the measure to be implemented as either mandatory or voluntary. The voluntary program has been approved, the mandatory option has been disapproved.

NOAA agrees with the concept of a voluntary onboard technician program. The intention is that the program be conducted in cooperation with the private sector on a voluntary basis to the extent funding from any source becomes available (i.e., 0–100%). The conduct of a voluntary program does not require implementing regulations, or necessarily require the expenditure of federal funds.

Changes From the Proposed Rule

The final rule differs from the proposed rule in the following respects, for the reasons discussed above and to clarify other minor aspects of the regulations:

Part 611

Paragraph 611.61(b)(4) has been removed.

Paragraph 611.61(g) has been removed.

Part 630

Section 630.2. The definition for "Gear conflict" is deleted.

Section 630.5. Paragraph (b) is revised by deleting reference to onboard technicians.

Paragraph (c) is revised by inserting the words "and are selected by the Center Director".

Paragraph (c)(2) is revised by adding "and official number".

Section 630.7. All Paragraphs are removed.

Section 630.21. In paragraph (c)(2) the first sentence is revised by substituting the words "South Atlantic Council, after consultation with the other four Councils," for the word "Councils".

Section 630.23. Paragraph (b) is deleted and the section remains as published in the final rule at 50 FR 33955, August 22, 1985.

Section 630.25. Section 630.25 is removed in its entirety.

Classification

The Regional Director determined that the approved portions of the FMP are necessary for the conservation and management of the Atlantic swordfish fishery and that they are consistent with the Magnuson Act and other applicable law.

The Council prepared a final environmental impact statement for the FMP; a notice of availability was published on August 9, 1985; 50 FR 32306.

The Council prepared a supplementary regulatory impact review. You may obtain a copy of this review from the Council at the address listed above.

The General Counsel of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small entities because the action proposed for implementation would effect only foreign fishermen. Domestic fishermen are already regulated by an equivalent restriction under the previously approved variable season closure program. In addition, the reporting burden under the mandatory logbook program will not be significant because the data required is already recorded by

most vessel captains. The burden is estimated to involve only 2.4 minutes per trip for transcribing the data to the logbook form. At an average of 100 trips per year, each vessel will incur a total annual burden of approximately 4 hours.

This rule contains a collection of information requirement subject to the Paperwork Reduction Act which has been submitted for approval by the Office of Management and Budget.

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of all the affected States. This determination was submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act. The State agencies agreed with this determination.

List of Subjects

50 CFR Part 611

Fisheries, Foreign relations, Reporting and recordkeeping requirements.

50 CFR Part 630

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: May 30, 1986.

Joseph W. Angelovic,

Deputy Assistant Administrator for Science and Technology, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Part 611 and 50 CFR Part 630 are amended as follows:

PART 611—[AMENDED]

1. The authority citation for 50 CFR Part 611 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Section 611.61 is amended by adding new paragraph (b)(4) to read as follows:

§ 611.61 Atlantic billfish and shark fishery.

* * * * *

(b) * * *

(4) Fishing with pelagic longlines is restricted to the hours 0600–1800, local time, in an area during the seasonal closure for that area as specified at 50 CFR 630.21.

* * * * *

PART 630—[AMENDED]

3. The authority citation for 50 CFR Part 630 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

4. Section 630.5 is amended by designating the existing text as paragraph (a) and adding new paragraphs (b) and (c) to read as follows:

§ 630.5 Reporting requirements.

* * * * *

(b) The owner or operator of a vessel of the United States who has a permit issued under § 630.4 to fish for or land swordfish with gear other than rod and reel in the Atlantic, Gulf of Mexico, and Caribbean, and is selected by the Center Director must—

(1) Advise the Center Director by telephone 10 days in advance of each trip of the following:

(i) Departure information (port, dock, date, and time), and

(ii) Expected landing information (port, dock, and date).

(c) Owners or operators of vessels of the United States who have been issued a permit under § 630.4 and are selected by the Center Director must maintain a daily fishing record on forms provided by the Center Director according to instructions. These forms must be submitted to the Center Director on a monthly basis. The following information must be included on the forms:

(1) Date of set;

(2) Vessel name and official number;

(3) Federal permit number;

(4) Set location (latitude and longitude);

(5) Miles of gear per set;

(6) Number of hooks per set;

(7) Number of hooks between floats;

(8) Number of lights or lightsticks per set;

(9) Length of gangions (leader) used;

(10) Length of drop lines from floats;

(11) Sea surface temperature;

(12) Number of fish retained (for each species listed on the form);

(13) Number of fish discarded (for each species listed on the form); and

(14) Signature of captain.

5. Section 630.21 is amended by adding text to paragraph (c), which had been *Reserved*, to read as follows:

§ 630.21 Seasonal closures.

* * * * *

(c) *Adjustments.* (1) The VSC will be reviewed annually to determine the need for adjustment to respond to new stock assessment data, to specific fishery practices, and to correct size composition of catch by month.

(2) On or about May 1 of each year the South Atlantic Council, after consultation with the other four Councils, will recommend to the Regional Director the modifications to the VSC to be implemented. If the Regional Director, after receiving the recommended modifications from the Council, concludes that such modifications are consistent with the objectives of the FMP, the Magnuson Act, and other applicable law, the Regional Director will recommend on or about May 15 of each year that the Secretary publish a preliminary notice of any modifications to the VSC in the Federal Register. The public may comment on the modifications for 15 days after the date of publication. After consideration of public comments the Secretary shall publish a final notice in the Federal Register of any changes in the modifications to the VSC.

[FR Doc. 86-12574 Filed 5-30-86; 4:57 pm]

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 51, No. 107
Wednesday, June 4, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 21

[Docket No. 016CE, Notice No. SC-ACE-15]

Special Conditions; Fairchild Model SA227-AC Airplanes Incorporating Bendix EFS-10 Electronic Flight Instrument Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Special Conditions.

SUMMARY: This notice proposes special conditions for the Fairchild Aircraft Corporation Model SA227-AC airplanes incorporating a Bendix EFS-10 Electronic Flight Instrument System (EFIS). These airplanes will have novel and unusual design features when compared to the state of technology envisaged in the airworthiness standards of Part 23 of the Federal Aviation Regulations (FAR). These novel and unusual design features include the use of an electronic flight instrument system for which the applicable regulations do not contain adequate or appropriate airworthiness standards. This notice contains the additional airworthiness standards which the Administrator considers necessary to establish a level of safety equivalent to that provided by the airworthiness standards applicable to the Fairchild Aircraft Corporation Model SA227-AC airplanes.

DATE: Comments must be received on or before July 4, 1986.

ADDRESS: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, ACE-7, Attention: Rules Docket Clerk, Docket No. 016CE, Room No. 1558, Federal Office Building, 601 East 12th Street, Kansas City, Missouri 64106. All comments must be marked: Docket No. 016CE. Comments may be inspected in the Rules Docket between 7:30 a.m. and 4:00 p.m., weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: David Warner, Aerospace Engineer, Regulations and Policy Office (ACE-110), Aircraft Certification Division, Central Region, Federal Aviation Administration, Room 1656, 601 East 12th Street, Federal Office Building, Kansas City, Missouri 64106; telephone (816) 374-5886.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the promulgation of these special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking further rulemaking action on this proposal. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a pre-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 016CE." The postcard will be date stamped and returned to the commenter. The proposals contained in this notice may be changed in light of the comments received. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Type Certification Basis

The type certification basis for the Fairchild Aircraft Corporation Model SA227-AC airplane is as follows: Part 23 of the Federal Aviation Regulations, effective February 1, 1965, as amended by Amendments 23-1 through 23-6; § 23.175(d) as amended by Amendment 23-14, effective December 20, 1973; Special Conditions outlined in FAA letters November 19, 1965, August 22, 1967, February 5, 1968, and April 4, 1968; Amendment B of SFAR No. 41, including paragraph 4(c) and the compartment interior requirements of § 25.853(a), (b), (b-1), (b-2), and (b-3) effective September 26, 1978; Part 36, Appendix F, effective December 1, 1969, as amended by Amendments 36-1 through 36-6; and the special conditions that may result from this proposal.

An "A" designation following the serial number signifies that the airplane is not eligible for SFAR 41 approval of weights greater than 12,500 pounds. Certification basis same as noted herein except omit SFAR 41 approval.

Background

On March 24, 1986, King Radio Corporation, 400 N. Rogers Road, Olathe, Kansas 66062, made application to the FAA for approval of installation of a Bendix EFS-10 Electronic Flight Instrument System (EFIS) on the Fairchild Aircraft Corporation Model SA227-AC airplanes. This installation incorporates an electronic attitude direction indicator (ADI) and an electronic horizontal situation indicator (HSI) in lieu of the traditional mechanical or electro-mechanical displays providing similar information to the flight crew.

Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101 do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane or installation. Special conditions, as appropriate, are issued in accordance with § 11.49, after public notice as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis, as provided by § 21.101(b)(2).

The proposed type design of the EFS-10 EFIS installation in the Fairchild Aircraft Corporation Model SA227-AC airplanes contains a number of novel or unusual design features not envisaged by the applicable airworthiness standards. Special conditions are considered necessary because the airworthiness standards of Part 23 do not contain adequate or appropriate safety standards for the novel or unusual design features of the EFS-10 EFIS installation in the Fairchild Aircraft Corporation Model SA227-AC airplanes.

King Radio Corporation has proposed cathode ray tube (CRT) electronic display units for primary attitude, heading and navigation cockpit displays. The cockpit instrument panel configuration would feature five EFIS

displays, an EADI and EHSI on the left and right instrument panels and a multifunction display in the center panel. All other displays; i.e. airspeed, altitude, vertical speed, etc., will be conventional instruments. An optional configuration would provide for an EADI and EHSI on the pilot's side, conventional instruments on the copilot's side, and a multi-function display in the center panel.

Emissive color on a CRT display will inevitably appear different than reflective colors on conventional electro-mechanical displays. Different intensities and color temperatures of ambient illumination will also affect the perceived colors. Therefore, display legibility mut be adequate for all cockpit lighting conditions including direct sunlight.

Features of this system are novel and unusual relative to the applicable airworthiness requirements. Current small airplane airworthiness requirements are based on "single fault" or "fail safe" concepts and, when promulgated, the FAA did not envision use of complex, safety-critical systems in small airplanes. The current small airplane requirements envisioned instruments that were single function; i.e., a failure would cause loss of only one instrument function, although several instrument functions may have been housed in a common case. Flight instruments for the pilot are required to be grouped in front of the pilot so deviation from looking forward along the airplane flight path is minimized when the pilot shifts from viewing the flight path to viewing the flight instruments.

For instrument flight, the airplane must be equipped with the minimum flight instruments listed in the operating rules. This minimum listing of instruments includes all instruments that have long been accepted as the minimum for continued safe flight after the failure of any *one* of the required instruments; i.e., airspeed, altitude, attitude, and turn and slip (needle and ball). Backup instruments for these instruments are not required by the small airplane airworthiness requirements because the FAA has long accepted that the small airplanes could be safely flown following a single instrument failure. The basic airman certification program for an IFR rating has long included the required demonstration of ability to fly the airplane safely following failure of any one of the previously cited instruments, and has not required as a basic IFR rating requirement that all IFR rated airmen must demonstrate abilities using other backup instruments.

A special condition is proposed which would allow installation of electronic displays that feature design characteristics where a single malfunction or failure could affect more than one primary instrument, display or system. The proposed special condition would also provide requirements to assure the reliability of system design functions that are determined to be essential for continued safe flight and landing of the airplane.

In installations where electronic displays take the place of traditional instruments, the reliability must not be less than that of the traditional instruments. This is in regard to the collective reliability of the traditional instruments rather than the reliability of a single traditional instrument. For this reason, the proposed special condition includes requirements for identifying complex, safety critical systems, and defines requirements needed for their certification.

The proposed special condition requires a detailed examination of each item of equipment/component of the electronic display system and the system installation to determine if the airplane is dependent upon its function for continued safe flight and landing, or if its failure would significantly reduce the capability of the airplane or the ability of the crew to cope with these adverse operating conditions. Each component of the installation identified by such an examination as being critical to the safe operation of the airplane would be required to meet the proposed special condition.

The proposed special condition also requires that components of system(s) whose function is required and that requires a power supply, be considered an "essential load" on the power supply. The power source(s) and its distribution system must be able to supply power to the electronic display system(s) as stated in the proposed special condition since the operational reliability of the electronic display system(s) is dependent on the airplane electrical source.

The present § 23.1309 has been used as a means of evaluating systems since being incorporated into Part 23 by Amendment 23–14, effective December 20, 1973. The "single fault" or "fail safe" concept of § 23.1309, along with experience based on service-proven designs and good engineering judgement have been used to successfully evaluate most airplane systems and equipment. However, the FAA is finding it difficult to apply the "single fault" concept as a means of determining the effect or likelihood of certain failure conditions to complex systems like those proposed for the EFS–10 EFIS installation. Therefore, the FAA considers it necessary to include the proposed system analysis requirements in the certification based in lieu of including present § 23.1309. This will allow the use of the latest available "rational method" of safety analysis of the systems to assure a level of safety intended in the applicable requirements.

The development of rational methods for safety assessment of systems is based on the premise that an inverse relationship exists between the probability of a failure condition and its effect on the airplane. That is, the more serious the effect, the lower the probability must be that the related failure condition will occur.

Use of these rational methods for safety assessment of systems do not mandate use of numerical analysis. An applicant may use numerical analysis to assist in showing compliance, but, in many cases, adequate data is not available for preparing a stand-alone numerical analysis for showing compliance. Therefore, in small airplane certification, a rational analysis based on identification of failure modes and their consequences is frequently better substantiation of compliance with the various required levels of system reliability than a numerical analysis alone.

The availability of this "rational method" of safety analysis of systems, along with the difficulty in applying the existing "singly fault" or "fail safe" concept, has prompted the FAA to propose this special condition, because the Fairchild Aircraft Corporation Model SA227–AC airplanes incorporating the EFS–10 EFIS installation are proposed to have electronic displays where use of the single fault criterion is an unnecessary burden. The proposed special condition would require that a safety evaluation of the systems be made and specifies a level of safety in qualitative terms.

If it is determined that the airplane includes systems that perform more critical functions, it will be necesary to show that those systems meet more stringent requirements. Systems that perform a function that is needed for continued safety of flight and landing of the airplane, whose failure would be catastrophic, would be required to meet requirements that establish either that there will be no failures of that system, or that a failure is extremely improbable.

The special condition also requires that the occurrence of systems failures which would significantly reduce the airplane's capability, or the ability of the crew to cope with adverse operating conditions, and thereby be potentially catastrophic, be improbable. It is recognized that any system(s) failure will reduce the airplane's crew's capability by some degree, but that reduction may not be of the degree as to lead to potentially catastrophic results.

The proposed special condition provides reliability requirements which are based on the criticality of the system's function and will provide the standards needed for certification of complex safety-critical systems being proposed for installation in the Fairchild Aircraft Corporation Model SA227–AC airplanes.

The Fairchild Aircraft Corporation Model SA227–AC airplanes incorporating the EFS–10–EFIS installation may have both digital and analog instrumentation cues for the pilot. While a digital indication does show exact numbers, it may not provide adequate sensory cues to the pilot as to whether the numbers are increasing or decreasing, or a sense of how fast they are changing. A digital indication may not show the normal operating range or operational limits. Human factor authorities agree that such digital indications are not equivalent to an analog instrument which inherently provides usable sensory cues. Therefore, the proposed special condition includes requirements for sensory cues.

The FAA has considered the features proposed by King Radio Corporation for the EFS–10 installation in the Fairchild Aircraft Corporation Model SA227–AC airplanes and has concluded that, notwithstanding the existing requirements applicable to these airplanes which did not envision the use of such complex or critical systems, special conditions should be promulgated for the affected systems, in addition to the applicable requirements, that will provide the necessary level of safety. Accordingly, a special condition is proposed.

List of Subjects in 14 CFR Part 21

Aviation safety, Aircraft, Air transportation, Safety.

The authority citation for these special conditions is as follows:

Authority: Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958; as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 21.16 and 21.101; and 14 CFR 11.28 and 11.49.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration proposes the following special conditions as a part of the type certification basis for the Fairchild Aircraft Corporation Model SA227–AC airplanes when equipped with the Bendix EFS–10 Electronic Flight Instrument System:

1. In addition to the applicable airworthiness requirements, and requirements to the contrary, for instruments, systems, and installations whose design incorporates: Electronic displays that feature design characteristics where a single malfunction or failure could affect more than one primary instrument display or system; and/or system design functions that are determined to be essential for continued safe flight and landing of the airplane. The following special condition applies:

(a) Systems and associated components must be examined separately and in relation to other airplane systems to determine if the airplane is dependent upon its functions for continued safe flight and landing, and if its failure would significantly reduce the capability of the airplane or the ability of the crew to cope with adverse operating conditions. Each item of equipment, each system, and each installation identified by this examination, upon which the airplane is dependent for continued safe flight and landing, or whose failure would significantly reduce the capability of the airplane or the ability of the crew to cope with adverse operating conditions, must be designed and examined to comply with the following additional requirements:

(1) There must be no single failure or probable combination of failures under any anticipated operating condition which would prevent the continued safe flight and landing of the airplane or which would significantly reduce the capability of the airplane or the crew to cope with adverse operating conditions.

(2) Warning information must be provided to alert the crew to unsafe system operating conditions, and to enable them to take appropriate corrective action. This warning information must not tend to initiate crew action which would create additional hazards.

(3) Compliance with the requirements of this special condition must be shown by analysis and, where necessary, by appropriate ground, flight, or simulator tests. The analysis must consider:

(i) Modes of failure, including malfunctions and damage from foreseeable sources;

(ii) Consequence of a single failure or probable combination of failures (latent or undetected);

(iii) Appropriate levels of reliability as determined by the severity of consequence;

(iv) The resulting effects on the airplane and occupants, considering the stage of flight and operating conditions; and

(v) The crew warning cues, corrective action required, and the capability of detecting faults.

(4) If numerical analysis is used to support the engineering examination:

(i) The occurrence of any failure condition which would prevent the continued safe flight and landing of the airplane must be shown to be extremely improbable; and

(ii) The occurrence of any other failure condition which would significantly reduce the capability of the airplane or the ability of the crew to cope with adverse operating conditions must be shown to be improbable.

(b) Each item of equipment of each system, and each installation whose functioning is essential for safe operation and that requires a power supply is an "essential load" on the power supply. The power sources and its distribution system must be able to supply the following power loads in probable operating combinations and for probable durations:

(1) Loads connected to the power distribution system with the system functioning normally.

(2) Essential equipment of each system (loads) after failure of:

(i) Any one engine on the airplane, or

(ii) Any power converter, or energy storage device, or

(iii) Essential loads for which an alternate source of power is required by this special condition, after any failure or malfunction in any one power supply system, distribution system, or other utilization system.

(c) In determining compliance with paragraph (b)(2) of this special condition, the power loads may be assumed to be reduced or shed under a monitoring procedure consistent with safety.

(d) In showing compliance with this section with regard to the electrical power system and to equipment design and installation, critical environmental and atmospheric conditions must be considered. For electrical generation, distribution, and utilization equipment required by or used in complying with this special condition, the ability to provide continuous, safe service under foreseeable environmental and atmospheric conditions may be shown

by tests, design analysis, or reference to previous comparable service experience on other airplanes.

(e) Electronic display units, including those incorporating more than one function, may be installed in lieu of mechanical or electro-mechanical instruments if:

(1) The display units:

(i) Are easily legible under all lighting conditions encountered in the cockpit, including direct sunlight,

(ii) In any normal mode of operation do not inhibit the primary display of attitude,

(iii) Incorporate sensory cues for the pilot that are equivalent to those in the instrument being replaced by the electronic display units, and

(iv) Incorporate visual displays of instrument markings, required by §§ 23.1541 through 23.1553 or visual displays that alert the pilot to abnormal operational values, or approaches to unsafe values, of any parameter required to be displayed by Part 23/SFAR 41 requirements.

(2) The display units, including their systems and installations, must be designed so that one display of information essential to continued safe flight and landing will remain available to the pilot, without need for immediate action by any crew member for continued safe operation, after any single failure or probable combination of failures.

Issued in Kansas City, Missouri, on May 23, 1986.

Edwin S. Harris,

Director, Central Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 86-NM-114-AD]

Airworthiness Directives: Boeing Model 707/720 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes an amendment to an existing airworthiness directive (AD) applicable to Boeing Model 707/720 airplanes. The existing AD requires inspection and repair, as necessary, of Significant Structural Details (SSD) as described in the manufacturer's Supplemental Structural Inspection Document (SSID). Since the issuance of the AD, the manufacturer has revised the 707/720 Supplemental Structural Inspection Document to expand the sample size and revise certain inspection thresholds; this amendment would incorporate those revisions. This action is necessary to improve the information provided by the SSID program for identification and evaluation of unsafe conditions.

DATE: Comments must be received on or before July 28, 1986.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 86-NM-114-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. The information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Carlton A. Holmes, Airframe Branch, ANM-120S; telephone (206) 431-2928. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 86-NM-114-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. DISCUSSION: On May 20, 1985, the FAA issued Amendment 39-5073 (50 FR 20690), AD 85-12-01, which requires inspection and repair, as necessary, of Significant Structural Details (SSD) as specified in the manufacturer's Supplemental Structural Inspection Document (SSID) D6-44360, Revision L, dated May 31, 1983. Since the adoption of AD 85-12-01, the manufacturer has revised the 707/720 Supplemental Structural Inspection Document. This amendment would require inspections in accordance with the later revision.

The latest revision to the 707/720 Supplemental Structural Inspection Document incorporates modified inspection thresholds. Thresholds previously listed between 27,000 and 32,000 flight cycles have been lowered to 25,000 flight cycles. Thresholds previously listed between 17,000 and 25,000 flight cycles have been adjusted to 19,000 flight cycles. Previous thresholds below 17,000 flight cycles remained unchanged. In establishing the total number of airplanes to be inspected under its previous revision, the manufacturer utilized a statistical sample consisting of certain high time airplanes (Reference 707/720 SSID, D6-44360, Revision L, Section 1.30). This resulted in a total of over 200 airplanes to be monitored under the 707/720 SSID program. However, since that time, the number of high time airplanes available for inspection has declined considerably. This has resulted in an inadequate fleet sample of airplanes by which critical structural details may be monitored.

In addition, there have been two editorial changes to the SSID:

First, all Significant Structural Details (SSD) have been consolidated into one of two categories. These categories include Fleet Sampling Details for non-service bulletin related items, and Known Fatigue Problem Details for items addressed by service bulletin or AD. The Fleet Sampling Details apply to all Model 707/720 airplanes exceeding the given SSD threshold. Previously, these SSD's applied only to a selected number of airplanes with a high number of flight cycles within each model series. The Known Fatigue Problem Details apply to aircraft as specified in the applicable service bulletin or AD.

Secondly, the SSID has been revised so that each SSD lists all the affected models on one page. Previously, the document had been organized into separate sections for each model. As a result of this change, the bulk volume of

the SSID has been reduced considerably.

AD 85-12-01, which became effective on May 20, 1985, requires all affected operators to incorporate revisions to their FAA-approved maintenance programs to require accomplishment of the inspections as specified in the SSID. Furthermore, AD 85-12-01 requires that airplanes which are approaching or have already exceeded an SSD threshold be inspected within one year after the effective date, or upon reaching the threshold, whichever occurs later. Although this amendment would adjust some thresholds, these adjustments do not justify an additional one-year extension of the compliance times. Therefore, the compliance time for incorporating the proposed revisions is proposed to be 180 days. This amendment would require that airplanes which are near or beyond an SSD threshold be inspected within 180 days after the effective date of this amendment, or upon reaching the threshold, whichever is later.

The amendment, if adopted, would incorporate the aforementioned editorial changes and would provide an increased fleet sample of high time airplanes by which Significant Structural Details (SSD) may be monitored.

Information collection requirements contained in this regulation have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB Control Number 2120-0056.

It is estimated that 18 airplanes of U.S. registry and 9 U.S. operators would be affected by this AD, and that approximately 100 manhours would be required to incorporate these revisions into a typical operator's maintenance program. Based on an average labor cost of $40 per hour, the cost to U.S. operators for implementation of this amendment is estimated to be $36,000.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Boeing Model 707/720 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend Section 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By amending Airworthiness Directive 85-12-01, Amendment 39-5073 (50 FR 20690; May 20, 1985), by revising paragraphs A., B., and C. to read as follows:

A. Within 180 days after the effective date of the amendment, incorporate a revision into the FAA-approved maintenance inspection program which requires accomplishment of the inspection and repairs, as necessary, of each Significant Structural Detail (SSD) as listed in Boeing Document D6-44860, Supplemental Structural Inspection Document (SSID), Revision M, or later FAA-approved revision. The revision to the maintenance program must include procedures to notify the manufacturer when SSD's are found cracked. The inspection thresholds, repetitive inspection intervals, inspection techniques, and terminating action for each SSD are listed in the SSID. Incorporate this revision to the maintenance program in accordance with paragraphs B., C., and D., below.

B. The increase of inspection intervals in accordance with Section 5.2 of Boeing Document D6-44860, Revision M, is not permitted, except as provided in paragraphs F. and G., below.

C. Inspect each Significant Structural Detail (SSD) which has exceeded the initial threshold specified in Boeing Document D6-44860, Revision M, within 180 days after the effective date of this amendment. Significant Structural Details which are below the inspection thresholds specified in Boeing Document D6-44860, Revision M, must have an initial inspection within 180 days after the effective date of this amendment or prior to reaching the threshold, whichever is later. Accomplish these inspections in accordance with Boeing Document D6-44860, Revision M, or later FAA-approved revisions.

All persons affected by this proposal who have not already received the appropriate documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124-2207. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on May 28, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 85-NM-135-AD]

Airworthiness Directives: British Aerospace Model BAe 125-800A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD), applicable to certain Model BAe 125-800A Series airplanes, that would require the inspection of certain wire bundles and replacement, if necessary, if the insulation has been damaged. It also would require the installation of an improved protection for the cables to prevent further damage. This action is necessary to prevent fires which could result from shorted wires.

DATE: Comments must be received on or before July 28, 1986.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 85-NM-135-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM-113; telephone (206) 431-2909. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 85-NM-135-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA) has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist on certain BAe Model 125-800A series airplanes. Certain wiring in the cockpit area has been found to be subject to chafing on surrounding structure. This condition, if not corrected, could lead to fires resulting from shorted wires. British Aerospace issued BAe Service Bulletin 24-250-(3017D), dated April 8, 1985, which describes inspection, modification, and repair procedures of the affected electrical cables to prevent this condition from occurring. the CAA has classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require compliance with the previously mentioned service bulletin.

It is estimated that 18 airplanes of U.S. registry would be affected by this AD, that it would take approximately 6 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $4,320.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($240). A final evaluation has been prepared for this regulation and placed in the docket.

Aviation safety, Aircraft.

PART 39—[AMENDED]

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Model BAe 125-800 series airplanes, serial numbers as cited in BAe Service Bulletin 24-250-(3017D), dated April 8, 1985, certificated in any category. Compliance is required within 90 days after the effective date of this AD. To prevent a potential fire hazard associated with chafing of electrical wiring, accomplish the following, unless previously accomplished:

1. Inspect and replace as necessary, the affected electrical cables and install the protective treatment to adjacent structures in accordance with BAe Service Bulletin 24-250-(3017D), dated April 8, 1985.

2. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

3. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this proposed directive, who have not already received the applicable service document from the manufacturer, may obtain copies upon request to British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC 20041. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on May 28, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 85-NM-134-AD]

Airworthiness Directives: British Aerospace Model BAe 125-800A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require modification of the grounding connections of both AC and DC electrical circuits on certain BAe Model 125-800A series airplanes. This action is prompted by the manufacturer's analysis, which concluded that it is necessary to have dedicated ground terminals for both the AC and DC circuits to prevent power superposition and partial electrical system loss in the event of a grounding failure.

DATE: Comments must be received on or before July 28, 1986.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 85-NM-134-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C.

20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM-113; telephone (206) 431-2188. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 85-NM-134-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA) has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist on certain BAe Model 125-800A airplanes. The manufacturer has determined that dedicated ground terminals are required for certain AC and DC electrical circuits in the signal summing system to prevent partial electrical system loss in the event of a ground failure. British Aerospace issued BAe Service Bulletin 24-251-(3014A), dated April 8, 1985, which describes a modification of the ground connections which will prevent this condition from occurring. The CAA has classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require compliance with the previously mentioned service bulletin.

It is estimated that 15 airplanes of U.S. registry would be affected by this AD, that it would take approximately 10 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $6,000.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; Febraury 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($400). A final evaluation has been prepared for this regulation and placed in the docket.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend Section 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised) Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

British Aerospace: Applies to BAe Model 125-800A airplanes, serial numbers as cited in BAe Service Bulletin 24-251-(3014A), dated April 8, 1985, certificated in any category. Compliance is required within 60 days after the effective date of this AD, unless previously accomplished. To provide dedicated AC and DC ground terminals, accomplish the following:

1. Modify electrical wiring in accordance with BAe Service Bulletin 24-251-(3014A), dated April 8, 1985.

2. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

3. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this proposed directive who have not already received the appropriate service bulletin from the manufacturer may obtain copies upon request to British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C. 20041. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on May 28, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

[Docket No. 85-NM-133-AD]

Airworthiness Directives: British Aerospace Model BAe-146 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require an inspection and repair, if necessary, of the main landing gear main fittings on certain BAe Model 146 series airplanes. This action is prompted by reports of surface defects which, if not repaired, could lead to failure of the fittings.

DATE: Comments must be received on or before July 28, 1986.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 85-NM-132-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM-113; telephone (206) 431-2908. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 85-NM-132-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA) has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist on certain BAe Model 146 series airplanes. As a result of a failure during testing conducted by the manufacturer, indications of possible forging defects were discovered in the landing gear main fitting. Similar defects have been discovered in other fittings subsequently examined. This condition, if uncorrected, could lead to landing gear failure. To detect any fitting flaws, and to make the necessary repairs, the CAA has mandated inspection and repair, if necessary, of these fittings in accordance with BAe Service Bulletin 32-18, Revision 1, dated November 28, 1984.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require compliance with the previously mentioned service bulletin.

It is estimated that 10 airplanes of U.S. registry would be affected by this AD, that it would take approximately 3 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $1,200.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($120). A final evaluation has been prepared for this regulation and placed in the docket.

Aviation safety, Aircraft.

PART 39—[AMENDED]

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend Section 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Model BAe-146 series airplanes, with serial numbers as noted in BAe Service Bulletin 32-18, Revision 1, dated November 28, 1984, certificated in any category. Compliance is required within 60 days after the effective date of this AD. To prevent structural failure of the main landing gear, accomplish the following, unless previously accomplished:

1. Inspect and repair, if necessary, the main landing gear main fittings in accordance with BAe Service Bulletin 32-18, Revision 1, dated November 28, 1984.

2. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

3. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this proposed directive, who have not already received the appropriate service document from the manufacturer, may obtain copies upon request to British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC 20041. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on May 28, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 86-NE-10-AD]

Airworthiness Directives: Gates Learjet Models 35, 36, 35A, 36A, and 55

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new Airworthiness Directive (AD)

applicable to Gates Learjet Model 35, 35A, 36, 36A, and 55 airplanes, equipped with certain J.E.T. autopilot/flight director systems. This proposed AD is needed to prevent possible lateral navigational errors during enroute and approach operations. This Ad would add a limitation to the Airplane Flight Manual Supplement (AFMS) that prohibits the use of the applicable J.E.T. flight director system for certain VOR/TACAN operations, and where appropriate, would modify or add a limitation to the AFMS relative to the use of wing flaps on autopilot-coupled VOR/TACAN approaches.

DATE: Comments must be received on or before July 28, 1986.

ADDRESSES: Mail comments on the proposal in duplicate to the Federal Aviation Adminstration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 86-NM-109-Ad, 17900 Pacific Highway South, C68966, Seattle, Washington 98168. The applicable Temporary Airplane Flight Manual Supplement Changes may be obtained from Gates Learjet Corporation, P.O. Box 7707, Wichita, Kansas 67277, or may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or FAA, Central Region, 1601 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209.

FOR FURTHER INFORMATION CONTACT: Robert R. Jackson, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, Central Region, 1601 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas, 67209; telephone (316) 946-4419.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or agruments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 86-NM-109-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168.

Discussion

Flight test investigations by the Gates Learjet Corporation have revealed that the J.E.T. FC-530, FC-535, and FC-550 flight director (FD) systems may provide lateral steering command errors during Very High Frequency Omni Range/Ultra-High Frequency Tactical Air Navigational (VOR/TACAN) operations, if the airplane, after the flight detector initially captures the navigation TRACK mode, deviates more than ⅝-dot Horizontal Situation Indicator (HSI) course deviation off the selected course, due to pilot inattention or for any other reason. A ⅝ dot course deviation sensing circuit, in combination with reduced flight director gains utilized during VOT/TACAN operations, results in more flight director steering authority being given to the actual selected course than to the course deviation. The pilot is presented a steering command that tends to parallel the selected course rather than providing a steering command back to the selected course. It should be noted that the problem is confined only to the flight director steering commands when not coupled to the autopilot. Autopilot-coupled operations and raw data displays are not affected.

Although the FAA has not received any official reports of flight director steering problems during VOT/TACAN operations, the airplane manufacturer requested and the FAA has approved an Airplane Flight Manual Supplement (AFMS) change which would prohibit the use of the flight director during all VOT/TACAN enroute and approach operations.

Since the FAA has determined that the unsafe condition described herein is likely to exist in other airplanes of the same type design, this proposed regulation would require a change to the AFMS to prohibit the use of the J.E.T. flight director systems for VOR/TACAN enroute and approach operations.

In addition, where appropriate, a limitation would be modified, or added, to clarify the use of wing flaps during autopilot-coupled approaches. It has always been an operational requirement on the affected autopilot/FD installations that the airplane wing flaps be lowered to 8° or greater during VOR/TACAN approaches, since an electronic autopilot/FD gain change is accomplished during flap extension. On the FC-530 and FC-535 installations, the requirement for flap extension would be included as a system limitation, and this proposal would simply modify the limitation to remove any reference to FD-coupled approaches. On the FC-550 installation, the reference to wing flap extension was previously included as a procedural step only, and not a limitation. However, it has been determined that flap extension should be a limitation and to make the FC-550 limitations consistent with the FC-530 and FC-535 installation, a limitation would be added to require that wing flaps be extended 8° or beyond when conducting autopilot-coupled VOR/TACAN approaches.

The FAA has determined that this proposed regulation only involves the insertion of the Temporary Flight Manual (TFM) Supplement Changes in the Limitations Section of the appropriate Flight Manual Supplement on approximately 230 airplanes. Compliance would involve only a nominal monetary cost to operators.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation Safety, Aircraft.

PART 39—[AMENDED]

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend Section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Gates Learjet Corporation: Applies to Model 35, 35A, 36, 36A airplanes equipped with a J.E.T. FC-530 autopilot/flight director; Model 35A, 36A airplanes equipped with a J.E.T. FC-535 autopilot/flight director; and Model airplanes equipped with a J.E.T. FC-550 autopilot/flight director; certificated in any category. Compliance required as indicated, unless already accomplished.

To prevent operations with unsafe flight director steering commands, accomplish the following:

A. For the Model 35, 35A, 36, 36A airplanes equipped with J.E.T. FC-530 autopilot/flight director, within the next 10 hours time-in-service after the effective date of this AD, insert the following information in Section I—Limitations of the Gates Learjet 35/36 series AFMS for the J.E.T. FC-530 Autopilot/Flight Director, AFMS W1029, dated 4/23/85 and revised 3/11/86 (or Gates Learjet 35A, 36A J.E.T. FC 530 autopilot/flight director, AFMS W1029, dated 9/20/82, revised 5/13/83):

1. Add the following limitation and Note:

Flight director VOR enroute and approach operations are prohibited.

Note.—Autopilot coupled VOR operations and raw data displays are not affected and may be used.

2. Change the final limitation to read as follows:

For autopilot VOR approach, the flaps must be lowered to 8° or more.

B. For Model 35A, 36A airplanes equipped with J.E.T. FC-535 autopilot/flight director, within the next 10 hours time-in-service after the effective date of this AD, insert the following information in Section I—Limitations of the Gates Learjet Model 35A/36A AFMS for the J.E.T. FC-535 autopilot/flight director, AFMS T1204, dated 3/16/84 and revised 4/4/84:

1. Add the following limitation and Note:

Flight director VOR/TACAN enroute and approach operations are prohibited.

Note.—Autopilot coupled VOR/TACAN operations and raw data displays are not affected and may be used.

2. Change the final limitation to read as follows:

For autopilot VOR/TACAN approach, the flaps must be lowered to 8° or more.

C. For Model 55 airplanes equipped with J.E.T. FC-550 autopilot/flight director, airplanes S/N 55-003 through 55-042, not incorporating ECR 2524, ECR 2525, or AAK 55-83-1, within the next 10 hours time-in-service after the effective date of this AD, insert the following information in Section I—Limitations of the Gates Learjet Model 55 AFMS for the J.E.T. FC-550 autopilot/flight director, AFMS W1001, dated 4/14/81 and revised 8/31/81:

1. Add the following limitation and Note:

Flight director VOR enroute operations are prohibited.

Note.—Autopilot coupled VOR enroute operations and raw data displays are not affected and may be used.

D. For Model 55 airplanes equipped with J.E.T. FC-550 autopilot/flight director, airplanes S/N 55-003 through 55-042 incorporating ECR 2524, ECR 2525 or AAK 55-83-1, and airplanes 55 S/N 55-043 and subsequent, within the next 10 hours time-in-service after the effective date of this AD, insert the following information in Section I—Limitations of the appropriate Gates Learjet Model 55 AFMS for the J.E.T. FC-550 autopilot/flight director: AFMS W1002, dated 8/25/81 (for airplanes incorporating ECR 2524), or AFMS W1003 dated 8/31/81 and revised 2/15/83 (for airplanes incorporating ECR 2524 and ECR 2525 or AAK 55-83-1, and 55-043 and subsequent):

1. Add the following limitation and note:

Flight director VOR enroute and approach operations are prohibited.

Note.—Autopilot coupled VOR operations and raw data displays are not affected and may be used.

2. Add the following limitation:

For autopilot VOR approach, the flaps must be lowered to 8° or more.

E. In order to comply with the applicable requirements of paragraph A., B., C., or D., above, a copy of this AD may be used as a temporary amendment to the AFMS and carried in the airplane as part of the AFMS until replaced by the appropriate FAA Approved Gates Learjet published Temporary Flight Manual (TFM) Supplement Change. These include:

1. TFM Supplement Change to AFMS W1029 for the Model 35/36 series with J.E.T. FC-530 autopilot/flight director: TFM 86-1, dated 4/1/86.

2. TFM Supplement Change to AFMS T1204 for the Model 35A/36A with J.E.T. FC-535 autopilot/flight director: TFM 86-2, dated 4/1/86.

3. TFM Supplement Change to W1001 for the Model 55 with J.E.T. FC-550 autopilot/flight director: TFM 86-3, dated 4/1/86.

4. TFM Supplement Change to AFMS W1002 and AFMS W1003 for the Model 55 with J.E.T. FC-550 autopilot/flight director: TFM 86-4, dated 4/1/86.

F. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Wichita Aircraft Certification Office, FAA, Central Region, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209.

All persons affected by this proposal who have not already received the appropriate Temporary Airplane Flight Manual Supplement Changes from the manufacturer may obtain copies upon request to Gates Learjet Corporation, P.O. Box 7007, Wichita, Kansas 67277. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or FAA, Central Region, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid Continent Airport, Wichita, Kansas.

Issued in Seattle, Washington, on May 28, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 314

[Docket No. 86N-0077]

New Drugs for Human Use: Proposed Clarification of Requirements for Application Supplements

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to clarify the scope of certain reporting obligations imposed on holders of approved applications to market new drugs for human use. Specifically, the proposal would clarify the scope of a recently adopted final regulation that permits an applicant to make certain changes in an approved application without requiring a supplemental application if the changes are made to comply with an official compendium. The proposal is intended to end confusion about the scope of that specific provision.

DATE: Comments by August 4, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Steven H. Unger, Center for Drugs and Biologics (HFN-362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8049.

SUPPLEMENTARY INFORMATION:

Introduction

In the **Federal Register** of February 22, 1985 (50 FR 7452), FDA revised the regulations governing the review and approval of marketing applications for new drugs (21 CFR Part 314). Questions have been raised about a provision in the new drug regulations (§ 314.70(d)(1)) that permits a drug firm to make "any change to comply with an official compendium" without the filing of a supplemental application for the change, provided it is described in the next required annual report. FDA is now proposing to amend the regulation to

clarify the scope and applicability of that provision.

Under section 505(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(a)), a new drug may not be introduced or delivered for introduction into interstate commerce in the United States unless FDA has made effective the approval of a marketing application for it. FDA approves a marketing application only if the sponsor of the application shows that the drug is safe and effective for the conditions prescribed, recommended, or suggested in the product's labeling. The marketing application is required to contain, among other data and information, detailed information about the composition of the drug, the method of its manufacture, and copies of the labeling for the product. In general, a manufacturer who wants to change the conditions under which the drug was approved for marketing must first inform FDA of the proposed change and, in some cases, await FDA approval before making the change. However, some changes do not require that prior notification be given to FDA. Specifically, under the revised regulations, changes are divided into three classes: (1) Changes that require an approved supplemental application before the change can be made (§ 314.70(b)); (2) changes that require that a supplement be submitted before a change is made but do not require approval before the change is made (§ 314.70(c)); and (3) changes that may be made without a supplemental application provided the change is described in the next annual report (§ 314.70(d)).

The regulations enumerate the changes that are required to be submitted in supplemental applications under § 314.70(b) or (c). If not listed in either of these two paragraphs, a change in the conditions of approval of the product may be implemented without a supplemental application provided the description of the change is contained in the next required annual report.

To illustrate the scope of § 314.70(d), the section gives a few examples of changes that may be made without a supplemental application provided the change is described in the next annual report. Among the types of changes described is "Any change made to comply with an official compendium" (§ 314.70(d)(1)). Confusion has arisen in interpreting the meaning of this phrase. The phrase has been read by some drug companies to include not only those changes specifically described in an official compendium, but also other changes that, although not described in the compendium, are, arguably, "made necessary" by the change that was described. Thus, for example, one drug company read the phrase as allowing it to reformulate a product on the basis that the official compendium had adopted a dissolution testing requirement for the product. Because the approved formulation of the product could not meet the newly adopted dissolution testing requirement, the company claimed that a change in formulation was "made necessary" by the compendial change even though the formulation itself was not described in the compendium. FDA advises that this view of the provision misreads its intended purpose: the provision is intended to be confined to changes specifically described in the compendium. Changes that as a practical matter are made necessary by compendial change, but that are not expressly adopted in the compendium, may not be made under the provisions of § 314.70(d). Such changes, if they are of the type that require a supplemental application under § 314.70 (b) or (c), can be made only in accordance with the specific provision that applies.

Therefore, in the example cited, because the reformulation of the drug product was not itself described in the official compendium, the reformulation could only be implemented under a supplemental application approved under § 314.70(b)(2)(i), which requires a supplement to add or delete an ingredient, or otherwise to change the composition of the drug product.

The agency's view of the scope of the provision in § 314.70(d) is supported by a consideration of the process that governs the adoption of revisions in the official compendium—*The United States Pharmacopeia—The National Formulary*. Underlying FDA's willingness to forgo supplemental applications for changes made to comply with an official compendium is the close cooperation between FDA and the United States Pharmacopeial Convention (USPC) in the development of compendial standards, including cooperation in the review of data and information supporting proposed changes in standards. This relationship ensures that proposed compendial changes will be brought to FDA's attention before they are incorporated into a compendial standard. It should be emphasized that agency review of proposed compendial changes under this process is limited to review of the particular revision being considered by the USPC.

To ensure that agency policy with respect to compendial changes is clearly understood, FDA proposes to revise § 314.70(d)(1) to clarify its intended scope. As proposed, the section would be revised to allow the holder of an approved application to adopt, without the filing of a supplemental application, "any test, method, labeling statement, or specification * * * to comply with the adoption of that same test, method, labeling statement, or specification in an official compendium." As now, the regulation would require that the change be reported in the next required annual report.

FDA expects that in some situations a manufacturer may be unsure whether a planned change in the conditions of approval is, in fact, a change made to comply with an official compendium under § 314.70(d). In such situations, FDA strongly encourages the manufacturer to discuss the matter with the appropriate reviewing officials in the division in the Center for Drugs and Biologics with responsibility for review and approval of the product in question.

Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Economic Impact

FDA has carefully analyzed the regulatory impact of the proposed rule in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354). The proposed rule would clarify a provision allowing a drug firm holding an approved marketing application for a new drug to comply with new standards adopted in an official compendium without requiring the firm to file a supplemental application for the change. Therefore, the agency has determined that the proposed rule is not a major rule as defined in Executive Order 12291. Further, FDA certifies that the proposed rule, if adopted, will not have a significant impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act.

Request for Comments

Interested persons may, on or before August 4, 1986, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy.

Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 314

Administrative practice and procedure, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act, it is proposed that Part 314 be amended as follows:

PART 314—APPLICATIONS FOR FDA APPROVAL TO MARKET A NEW DRUG OR AN ANTIBIOTIC DRUG

1. The authority citation for 21 CFR Part 314 continues to read as follows:

Authority: Secs. 501, 502, 503, 505, 506, 507, 701, 51 Stat. 1049–1053 as amended, 1055–1058 as amended, 55 Stat. 851, 59 Stat. 463 as amended (21 U.S.C. 351, 352, 353, 355, 356, 357, 371); 21 CFR 5.10, 5.11.

2. In § 314.70 by revising paragraph (d)(1) to read as follows:

§ 314.70 Supplements and other changes to an approved application.

* * * * *

(d) * * *

(1) The adoption of a test, method, labeling statement, or specification to comply with the adoption of that same test, method, labeling statement, or specification in an official compendium.

* * * * *

Dated: April 28, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

24 CFR Parts 510 and 570

[Docket No. R-86-1296; FR-2151]

Section 312 Rehabilitation Loan Program and Urban Development Action Grant Program; Relocation Requirements

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Proposed rule.

SUMMARY: The Department proposes to revise its relocation requirements for those displaced by rehabilitation activities under the Section 312 Rehabilitation Loan Program and the Urban Development Action Grant Program. These amendments would provide greater consistency in the treatment of persons who are displaced by HUD-assisted community development projects that are not subject to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

COMMENT DUE DATE: Comments must be in writing and must be received on or before July 21, 1986.

ADDRESS: Comments should be sent to the Office of General Counsel, Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–0500. Comments should refer to the above docket number and title. A copy of each comment submitted will be available for public inspection and copying during regular business hours at this address. Comments on the information collection requirement contained in this rule (which should include a reference to the docket number and title) should be submitted both to the HUD Rules Docket Clerk at the above address and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: HUD Desk Officer.

FOR FURTHER INFORMATION CONTACT: Melvin Geffner, Deputy Director; Roland Brown, Georgian Carter, or Alvin West, Relocation and Real Estate Division, Room 7174, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–7000. Telephone (202) 755–6338. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

1. Section 312 Rehabilitation Loan Program

Most displacement under the Section 312 Rehabilitation Loan Program is not subject to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act) because it does not involve the acquisition of real property by a "State agency." However, the current relocation provisions at 24 CFR 510.52 (effective May 12, 1980) require that tenants displaced by non-Uniform Act Section 312 activities be provided relocation assistance at levels similar to those provided under HUD Uniform Act regulations at 24 CFR Part 42, as modified by § 510.52. On February 27, 1986 (51 FR 7000), the Department issued a comprehensive revision of its Uniform Act regulations as part of a common final rule issued with 16 other Federal agencies. Because of the scope and applicability of that rulemaking, however, the displacement of tenants by non-Uniform Act Section 312 activities continues to be governed by the procedures in old 24 CFR Part 42. Thus, until the current Section 312 relocation requirements are changed, local agencies administering both a Section 312 program and other HUD-assisted community development programs will be required to follow two different HUD Uniform Act regulations—the old Part 42 and the new Part 42.

The Department is proposing to adopt relocation requirements for non-Uniform Act Section 312 Program activities that are similar to those it plans to adopt to implement Section 104(j) of the Housing and Community Development Act of 1974. Section 104(j) requires that "reasonable relocation benefits" be provided to persons displaced by rehabilitation or non-Uniform Act acquisition under the Community Development Block Grant (CDBG) Program or Urban Development Action Grant (UDAG) Program.

The proposed changes would simplify current requirements and make them more consistent with relocation requirements under other HUD-assisted activities not subject to the Uniform Act.

The proposed rule would expand a locality's flexibility in determining tenant eligibility requirements for relocation assistance and the amount of assistance to be provided. Consistent with certain minimums set forth in the rule, the locality would develop, adopt and make public the standards it will follow.

At a minimum, all residential and nonresidential tenants permanently displaced as a direct result of the rehabilitation project would be reimbursed for their reasonable moving expenses. A locality could (but would not be required to) continue to provide tenants the option of choosing a "fixed payment" in lieu of a payment for their actual reasonable moving expenses.

All displaced residential tenants would be eligible for rental assistance payments to obtain suitable, decent, safe and sanitary housing for at least a two-year period. Payments under the current rule are based on housing needs for a four-year period. The Department believes the reduced standard is consistent with Congressional intent in enacting the "reasonable relocation benefits" criterion, rather than extending Uniform Act coverage to displacement resulting from rehabilitation.

A locality may determine that a residential tenant will not be considered permanently displaced from his or her dwelling if the tenant has been offered a

decent, safe, and sanitary dwelling unit in the rehabilitated property at a monthly cost for rent and utilities that does not exceed the greater of (1) the tenant's cost for rent and utilities at the time of the submission of the Section 312 preapplication (or application, if there is no preapplication); or (2) 30 percent of the household's gross income. If temporary relocation to another dwelling unit is required, the tenant would be reimbursed for all reasonable out-of-pocket expenses incurred in connection with the temporary relocation (including any moving costs and any increase in the monthly cost for rent and utilities).

2. Urban Development Action Grant Program

This rule proposed changes to § 570.457, the Urban Development Action Grant (UDAG) Program's requirements on relocation assistance. Paragraph (a) of this section makes it clear that the acquisition of real property by a "State agency" under the UDAG program and displacement resulting from such acquisition are subject to the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act). Rather than repeat standards contained in other regulations, paragraph (b) refers the user to § 570.606(a) and 24 CFR Part 42 for specific instructions on implementation of the Uniform Act.

Paragraph (c) of § 570.457 sets forth relocation requirements governing non-Uniform Act displacements subject to the provisions of Section 104(j) of the Housing and Community Development Act of 1974 (the Act). Section 104(j) requires that reasonable relocation benefits be provided to any family, individual, business, nonprofit organization or farm "involuntarily and permanently displaced as a result of the use of assistance" under the CDBG or UDAG programs to acquire or substantially rehabilitate property. Because the statute covers displacement brought about as a result of the "use of assistance", the displacement-causing acquisition or rehabilitation activities of private developers are subject to the law and these implementing regulations.

The proposed changes would improve consistency in relocation requirements under HUD-assisted community development programs not subject to the Uniform Act. Like the proposed Section 312 relocation requirements described above, the proposed rule would expand the flexibility of the grantee to determine eligibility requirements for tenants displaced from a dwelling and also the amount of assistance to be provided. Consistent with certain minimums set forth in the rule, the grantee would develop, adopt and make public the standards it would follow.

At a minimum, all persons permanently displaced as a direct result of non-Uniform Act acquisition or rehabilitation would be reimbursed for their reasonable moving expenses. All persons displaced from a dwelling unit would be eligible for financial assistance sufficient to rent suitable, decent, safe and sanitary housing for at least two years. Under the present rule assistance must reflect four-year housing needs. The Department believes the reduced standard is consistent with Congressional intent in enacting the "reasonable relocation benefits" criterion, rather than extending Uniform Act coverage to displacements resulting from rehabilitation.

A grantee may determine that a tenant has not been permanently displaced from his or her dwelling if the tenant has been offered a decent, safe, and sanitary dwelling unit in the rehabilitated property at a monthly cost for rent and utilities that does not exceed the greater of (1) the tenant's cost for rent and utilities at the time of the preliminary funding approval for UDAG assistance or (2) 30 percent of the household's gross income. If temporary relocation to another dwelling unit is required, the tenant must be reimbursed for all reasonable out-of-pocket expenses incurred in connection with the temporary relocation, including any moving costs and any increase in the monthly cost for rent and utilities.

The Department also is proposing to revise §570.458(c)(14)(ix)(I) to conform the required certification of compliance with applicable relocation and acquisition requirements to the proposed changes in §570.457 described above.

3. Other Matters

Environmental Impact

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implements section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the General Counsel, Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, DC 20410-0500.

Executive Order 12291

This rule does not constitute a major rule as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it would not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act of 1980

Under the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned certifies that this rule would not have a significant economic impact on a substantial number of small entities, because it does not affect the amount of funds provided under the Urban Development Action Grant Program or Section 312 Rehabilitation Loan Program, but rather eliminates unnecessary, administrative relocation requirements by making revisions to the rule consistent with recently enacted legislation.

HUD Semiannual Agenda

This proposed rule was listed as item 910 in the Department's Semiannal Agenda of Regulations, published on April 21, 1986 (51 FR 14036, 14067) under Executive Order 12291 and the Regulatory Flexibility Act.

Paperwork Reduction Act

The information collection requirements contained in this rule were submitted to the Office of Management and Budget for approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). All requirements have been approved and have been assigned OMB control number 2506–0084.

Catalog of Federal Domestic Assistance

The applicable Catalog numbers are 14.220 for the Section 312 Rehabilitation Loan Program and 14.221 for the Urban Development Action Grant Program.

List of Subjects

24 CFR Part 510

Loan programs: housing and community development, Housing, Relocation assistance, Home improvement, Rehabilitation, Urban renewal

24 CFR Part 570

Community development block grants, Grant programs: housing and community

development, Loan programs: housing and community development, Low and moderate income housing, New communities, Pockets of poverty, Small cities.

Accordingly, it is proposed that 24 CFR Chapter V be amended as follows:

PART 510—SECTION 312 REHABILITATION LOAN PROGRAM

1. The authority citation for Part 510 is proposed to continue to read as follows:

Authority: Section 312 of the United States Housing Act of 1964 (42 U.S.C. 1452b) and sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. Section 510.32 is proposed to be revised to read as follows:

§ 510.32 Relocation/Displacement.

(a) *Responsibility of locality.* (1) The locality shall administer its Section 312 Rehabilitation Loan Program in a manner that minimizes any potential or actual involuntary displacement of tenants. Wherever it offers the potential of minimizing displacement, the locality shall require the owner to consider the feasibility of carrying out the rehabilitation in stages.

(2) The locality is responsible for ensuring compliance with the requirements of this section. To pay the cost of the assistance required, the locality may use local public funds or Community Development Block Grant funds. The locality also may secure a commitment from any participating party in the program to provide all or part of the necessary funds. (To use Block Grant funds, the locality shall adopt a written policy in accordance with § 570.606(b) of this chapter.)

(3) If a locality determines that a residential tenant will not be displaced, it shall ensure that the terms and conditions of the tenant's continued occupancy are consistent with the locality's standards, are not more restrictive than those customary in the jurisdiction, and are set forth in a lease which is offered to the tenant.

(4) The locality shall maintain records in sufficient detail to demonstrate compliance with the requirements of this section.

(b) *Applicability of Uniform Act.* The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act) and HUD implementing regulations at 24 CFR Part 42 apply to the displacement of any person (family, individual, business, nonprofit organization or farm) as a direct result of the acquisition of real property by a "State agency" (defined in section 101 of the Uniform Act, 42 U.S.C. 4601) for a federally assisted project, including a project where the Federal assistance is a Section 312 Rehabilitation Loan.

(c) *Non-Uniform Act Displacement.* Projects not subject to the Uniform Act are subject to this paragraph (c). The locality shall provide reasonable relocation assistance to any residential or nonresidential tenant displaced as a direct result of an approved Section 312 Rehabilitation Loan activity. (The term "tenant" includes any family, individual, business, nonprofit organization or farm that is a renter.) The locality shall develop, adopt and make public the standards it will use for providing the relocation assistance, consistent with the following minimum requirements:

(1) A residential tenant who moves will be considered displaced from his or her dwelling if (i) The tenant has not been offered a decent, safe and sanitary dwelling unit on the real property at a cost for rent and estimated utility charges that does not exceed the greater of (A) the tenant's cost for rent and utilities at the time of the submission of the preapplication (or the application, if there is no preapplication) to the HUD Office or (B) 30 percent of the tenant household's gross income; or (ii) Temporary relocation is required and the tenant is not reimbursed for all reasonable out-of-pocket expenses incurred in connection with the temporary relocation.

(2) Eligibility criteria must cover (i) Any tenant legally occupying the property at the time of the submission of the preapplication (or application, if there is no preapplication) to the HUD office; and (ii) Any tenant who legally moves into the property between such event and the actual rehabilitation without receiving prior written notice of his or her possible displacement as a result of the planned rehabilitation.

(3) Any residential or nonresidential tenent (but not an owner-occupant) who is determined under local standards to be displaced as a direct result of Section 312 Rehabilitation Loan activity shall be provided with relocation assistance, including at a mimimum:

(i) Reasonable moving expenses;

(ii) Advisory services needed to help in relocating; and

(iii) For a displaced residential tenant:

(A) Referral to at least one suitable, decent, safe and sanitary replacement dwelling unit. The grantee shall advise tenants of their rights under the Federal Fair Housing Law (Title VIII) and of replacement housing opportunities in such manner that, wherever feasible, they will have a choice between relocating within their neighborhood and other neighborhoods consistent with the locality's responsibility to affirmatively further fair housing; and

(B) Either (*1*) Payment at least equal to 24 times the increase, if any, between the monthly cost of rent and utilities at the dwelling unit from which the tenant is displaced and the cost of rent and utilities at a suitable, decent, safe and sanitary replacement dwelling unit or (*2*) The provision of a Certificate or Housing Voucher for rental assistance payments under the Section 8 Housing Assistance Payments Program if the tenant is an eligible low-income person.

(d) *Appeals.* If a person disagrees with the locality's determination concerning the person's eligibility for, or the amount of a relocation payment under this section, the person may file a written appeal of that determination with the locality. The appeal procedures to be followed are described at 24 CFR 42.10.

(Approved by the Office of Management and Budget under control number 2506–0084)

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

3. The authority citation for Part 570 is proposed to continue to read as follows:

Authority: Title I, Housing and Community Development Act of 1974 (42 U.S.C. 5301–5320); and sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

4. Section 570.457 is proposed to be revised as follows:

§ 570.457 Relocation and acquisition.

(a) *Responsibility of the applicant.* (1) The applicant is responsible for ensuring compliance with the requirements of this section. To pay the cost of relocation assistance, including rental assistance payments, the applicant may use local public funds, action grant or entitlement community development block grant funds (see Subparts D and G of this part). The applicant also may secure a commitment from any participating party in the action grant program to provide all or a part of the necessary funds. In order to use Block Grant funds, the applicant shall adopt a written policy in accordance with § 570.606(b).

(2) If the applicant determines that a residential occupant will not be displaced, it shall ensure that the terms and conditions of the person's continued occupancy are consistent with its established standards, are not more restrictive than those customary in the jurisdiction, and are set forth in a lease which is offered to the person.

(3) The applicant shall maintain records in sufficient detail to demonstrate compliance with the requirements of this section.

(b) *Applicability of the Uniform Act.* The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act) and HUD implementing regulations in Part 42 of this title apply to the acquisition of real property by a "State agency" for an activity assisted under this subpart and to the displacement of any person (family, individual, business, nonprofit organization or farm) that results from the acquisition. "State agency" is defined in section 101 of the Uniform Act (42 U.S.C. 4601). *See* also § 570.606(a) for additional instructions on the implementation of the Uniform Act.

(c) *Displacement not subject to the Uniform Act.* The displacement of any person (family, individual, business, nonprofit organization or farm) as a result of the acquisition of real property by an entity other than a State agency or rehabilitation for an activity assisted under this subpart is not subject to the Uniform Act. However, such dispacement is subject to section 104(j) of the Housing and Community Development Act of 1974, which requires that reasonable benefits be provided to persons permanently and involuntarily displaced as a result of the use of assistance received under this part to acquire or substantially rehabilitate property where such displacement is not subject to the Uniform Act. The grantee is responsible for developing the standards it will use for providing such benefits, consistent with the following minimum requirements:

(1) A residential tenant who moves will be considered displaced from his or her dwelling if:

(i) The tenant has not been provided a decent, safe, and sanitary dwelling unit on the property following the completion of the assisted activity at a monthly cost for rent and utilities that does not exceed greater of:

(A) The tenant's cost for rent and utilities at the time of preliminary funding approval for the UDAG assistance; or

(B) 30 percent of the tenant household's gross income; or

(ii) Temporary relocation is required and the tenant is not reimbursed for all reasonable out-of-pocket expenses incurred in connection with the temporary relocation.

(2) Eligibility criteria for benefits must cover:

(i) Any tenant legally occupying the property at the time the grantee enters into a contract to provide assistance for the acquisition or rehabilitation; and

(ii) Any tenant who legally moves into the property between such event and the actual acquisition or rehabilitation without receiving prior written notice of his or her possible displacement as a result of the planned acquisition or rehabilitation.

(3) Any residential or nonresidential tenant who is determined under grantee standards to be displaced as a direct result of rehabilitation or acquisition assisted under this part (not subject to the Uniform Act) must be provided relocation assistance, including at a minimum:

(i) Reasonable moving expenses;

(ii) Advisory services needed to help in relocating; and

(iii) For a displaced residential tenant:

(A) Referral to at least one suitable, decent, safe and sanitary replacement dwelling unit. The grantee shall advise tenants of their rights under the Federal Fair Housing Law (Title VIII) and of replacement housing opportunities in such a manner that, wherever feasible, they will have a choice between relocating within their neighborhood and other neighborhoods consistent with the grantee's responsibility to affirmatively further fair housing; and

(B) Either (i) Payment at least equal to 24 times the increase, if any, between the monthly cost of rent and utilities at the dwelling unit from which the tenant is displaced and the cost of rent and utilities at a suitable, decent, safe and sanitary replacement dwelling unit, or (ii) The provision of a Certificate or Housing Voucher for rental assistance payments under the Section 8 Housing Assistance Payments Program, if the tenant is an eligible low-income person.

(4) For purposes of this paragraph (c), the term "tenant" includes any family, individual, business, nonprofit organization or farm that is a renter. It also includes any owner-occupant displaced as a direct result of non-Uniform Act acquisition by an agency with the power of eminent domain and any displaced owner-occupant of a mobile home who rents the site.

(d) *Appeals.* If a person disagrees with the applicant's determination concerning the person's eligibility for, or the amount of a relocation payment under this section, the person may file a written appeal of that determination with the applicant. The appeal procedures to be followed are described in 24 CFR 42.10.

(Approved by the Office of Management and Budget under control number 2506-0084)

5. Section 570.458(c)(14)(ix)(I) is proposed to be revised as follows:

§ 570.458 Full applications.

* * * * *

(c) * * *

(14) * * *

(ix) * * *

(I) The acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act), HUD implementing regulations in Part 42 of this title, and the relocation requirements in § 570.457(c) governing displacement subject to section 104(j) of the Housing and Community Development Act of 1974.

* * * * *

Dated: May 27, 1986.

Alfred C. Moran,

Assistant Secretary for Community Planning and Development.

Superfund Cost Sharing Eligibility Criteria for Permanent and Temporary Relocation

Correction

In FR Doc. 86-10671 beginning on page 17501 in the issue of Tuesday, May 13, 1986, make the following correction:

On page 17502, in § 222.3(a), in the second column, in the thirteenth line, "(a)(2)" should read "(a)(1)".

BILLING CODE 1505-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-206, RM-5066, RM-5214, RM-5287, RM-5402]

Radio Broadcasting Services; Canton, GA et. al.

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the following: (a) the substitution of Channel 289C2 for Channel 288A in Canton, Georgia, and the modification of license of Station WCHK-FM to specify operation on Channel 289C2 in response to a petition filed by Cherokee Broadcasting in order to provide a grater coverage area, (b) the allotment of Channel 289A to Douglasville or to Villa Rica, Georgia, as a first FM service to either community in response to

petitions filed by Hugh J. Wheeler and Elizabeth Martin Henley respectively; and (c) the substitution of FM Channel 269A for Channel 244A at Newnan, Georgia, and the modification of license of FM Station WBUS to specify operation on Channel 269A to eliminate a severe short spacing and alleviate an alleged intermodulation interference problem.

DATES: Comments must be filed on or before July 21, 1986, and reply comments on or before August 5, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows:

Edward W. Hummers, Jr., Fletcher, Heald and Hildreth, 125 Connecticut Ave., NW—Suite 400 Washington, DC 20036 (Counsel for Cherokee Broadcasting Co.)

Eric L. Bernthal, Asent, Fox, Kintner, Plotkin & Kahn, 1050 Connecticut Ave., NW., Washington, DC 20036 (Counsel for NEW Systems of Georgia, Inc.)

Timothy K. Brady, Esq., 1116 Weisgarber Road, Post Office Box 10569, Knoxville, Tennessee 37939, (Counsel for Hugh J. Wheeler)

Lawrence J. Bernard, Jr., Ward & Mendelsohn, P.C., 1110—17th Street NW—Suite 900, Washington, DC 20036 (Counsel for Elizabeth Martin Henley)

FOR FURTHER INFORMATION CONTACT: Arthur D. Scrutchins, Mass Media Bureau—(202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 86–206, adopted May 20, 1986, and released May 28, 1986. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M. Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex parte contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible ex parte contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

Federal Register
Vol. 51, No. 107
Wednesday, June 4, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

May 30, 1986.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from:

Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, D.C. 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to:

Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

Agricultural Marketing Service

Renewal of the Flue-Cured Tobacco Advisory Committee

Notice is hereby given that the Secretary of Agriculture has renewed the Flue-Cured Tobacco Advisory Committee for an additional period of 2 years.

This Committee recommends opening dates and selling schedules for the flue-cured marketing area which aid the Secretary in making an equitable apportionment and assignment of tobacco inspectors.

The Committee consists of 39 members, 21 producers, 10 warehousemen, and 8 buyers, representing all segments of the flue-cured tobacco industry.

The Committee shall report to the Director, Tobacco Division, Agricultural Marketing Service.

This Committee is authorized by Title 7, Code of Federal Regulations, § 29.9403, and the Tobacco Inspection Act (7 U.S.C. 511 *et seq.*).

Authority for this Committee will expire two years from date of filing unless the Secretary formally determines that continuance is in the public interest.

This notice is given in compliance with the Federal Advisory Committee Act, (5 U.S.C. App. 1).

Dated: May 28, 1986.
William T. Manley,
Deputy Administrator, Marketing Programs.

DEPARTMENT OF COMMERCE

Presidential Board of Advisors on Private Sector Initiatives; Open Meeting

AGENCY: Office of the Secretary, Office of the General Counsel and Office of Business Liaison, Commerce.

SUMMARY: The Presidential Board of Advisors on Private Sector Initiatives will hold a meeting on June 17, 1986. The Presidential Board of Advisors was established on August 8, 1985 to advise the President and Secretary of Commerce, through The White House Office of Private Sector Initiatives, with respect to the objectives and conduct of private sector initiative policies. This includes methods of increasing public awareness of the importance of public/private partnerships; removing barriers to development of effective social service programs which are administered by private organizations; strengthening the professional resources of the private social service sector; and studying options for promoting the long-term development of private sector initiatives in the United States.

Time and place: Tuesday, June 17, 1986, 3:30 p.m., at the National Headquarters of American Red Cross, 17th & E Street, NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: The Committee Control Officer, Mr. Robert H. Brumley, Deputy General Council, U.S. Department of Commerce, (202/377-4772) or the Alternate Control Officer, Nancy J. Olson, Director, Office of Business Liaison, U.S. Department of Commerce, (202/377-3942), Main Commerce Building, Washington, DC 20230.

Dated: May 28, 1986.

Nancy J. Olson,

Director, Office of Business Liaison.

[FR Doc. 86-12800 Filed 6-3-86; 8:45 am]

BILLING CODE 3510-DW

International Trade Administration

Licensing Procedures and Regulations Subcommittee of the Computer Systems Technical Advisory Committee; Partially Closed Meeting

A meeting of the Licensing Procedures and Regulations Subcommittee will be held on June 26 and 27, 1986, 9:30 a.m. to 5:00 p.m. in the Herbert C. Hoover Building, 14th Street and Constitution Avenue, NW., Washington, D.C. The meeting on June 26 will be held in Room 1092, and in Room 3407 on June 27. The Committee advises the Office of Technology and Policy Analysis with respect to licensing procedures and regulation that affect the level of export controls applicable to computer systems or technology.

Agenda

Open Discussion

1. Opening Remarks by the Chairman.
2. Presentation of papers or comments by the public on proposed equipment decontrol and discussions on problems experienced in obtaining export licenses.
3. Discussion and formulation of a proposal to revise U.S. controls regarding West/West export licenses.

Executive Session

4. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1986, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: (202) 377-4217. For further information or copies of the minutes, call (202) 377-2583.

Dated: May 30, 1986.

Margaret Cornejo,

Director, Technical Support Staff, Office of Technology & Policy Analysis.

BILLING CODE 3510-DT-M

The Electronic Instrumentation Technical Advisory Committee; Partially Closed Meeting

The Electronic Instrumentation Technical Advisory Committee was initially established on October 23, 1973, and rechartered on January 10, 1986, in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

Time and place: June 16 1986 at 9:30 a.m. to 5:00 p.m., in the Herbert C. Hoover Building, Room 3708, 14th Street and Constitution Avenue NW., Washington, D.C. The meeting will continue to its conclusion on June 17, 1986, in Room 1092, the Herbert C. Hoover Building.

Agenda

1. Introduction of members and guests.
2. Opening remarks by the Chairman.
3. Public comments invited on revisions to:

CCL 1529—Electronic Test Equipment
CCL 1531—Frequency Synthesizers
CCL 1522—Lasers and Laser Systems
CCL 1533—Radio Spectrum Analysers
CCL 1521—Solid State Broadband Amplifiers
CCL 1541—Cathode Ray Tubes
CCL 1572—Recording and Reproduce Equipment

Comments should consider the need for revision (strengthening, relaxation, or decontrol) of the current regulations based on technological trends, foreign availability, and national security. The committee is interested in proposals for revision to PRC guidelines and G-COM

regulations for the above commodites as well.

Executive Session

4. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1986, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94–409, that the matters be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof are available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202/377–4217. For further information or copies of the minutes, call 202/377–4959.

Dated: May 23, 1986.

Margaret Cornejo,

Director, Technical Support Staff, Office of Technology & Policy Analysis.

The MCTL Implementation Technical Advisory Committee; Closed Meeting

A meeting of the MCTL Implementation Technical Advisory Committee will be held Tuesday, June 24, 1986, 9:30 am, the Herbert Hoover Building, Room B841, 14th Street and Constitution Avenue, NW., Washington, DC.

The Committee will meet only in Executive Session to discuss matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM program and strategic criteria related thereto.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on February 19, 1985, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Sessions will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, telephone: (202) 377–4217. For further information, (202) 377–4959.

Dated: May 30, 1986.

[A-351-605]

Frozen Concentrated Orange Juice From Brazil: Initiation of Antidumping Duty Investigation

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating an antidumping duty investigation to determine whether frozen concentrated orange juice (FCOJ) from Brazil is being, or is likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether imports of this product materially injure, or threaten material injury to, a United States industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before June 23, 1986, and we will make ours on or before October 16, 1986.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: John Brinkmann, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377–3965.

SUPPLEMENTARY INFORMATION:

The Petition

On May 9, 1986, we received a petition in proper form filed by Florida Citrus Mutual, a voluntary cooperative marketing association of growers of citrus fruit for processing and processors of citrus fruits. The petition was filed on behalf of the United States industry producing FCOJ, including growers and processors. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of the subject merchandise from Brazil are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether it sets forth the allegations necessary for the initiation of an antidumping duty investigation and, further, whether it contains information reasonably available to the petitioner supporting the allegations.

We examined the petition on FCOJ from Brazil and have found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether FCOJ is being, or is likely to be, sold in the United States at less than fair value.

Scope of Investigation

The product covered by this investigation is FCOJ in a highly concentrated form for transport and further processing, sometimes referred to as frozen concentrated orange juice for manufacturing, currently provided for under the *Tariff Schedules of the United States (TSUS)* item number 165.29.

United States Price and Foreign Market Value

The petitioner based United States price on offers made by Brazilian producers to U.S. purchasers. Using price offers from the Brazilian producers, petitioner arrived at ex-factory prices by subtracting estimated charges for foreign inland freight, ocean freight, insurance, customs duties, brokerage, Brazilian export tax, Florida

citrus equalization tax and U.S. inland freight.

Petitioner alleged that sales of FCOJ in Brazil were too small to constitute a viable home market. Therefore, it based foreign market value on constructed value because the sales price to third countries was below the cost of production of the Brazilian producers. We will determine whether the home market is viable. If it is not viable, we will initiate a cost of production investigation with regard to sales to third countries.

Based on the comparison of these estimated values, petitioner alleged dumping margins ranging from 3.0 percent to 167.8 percent.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by June 23, 1986, whether there is a reasonable indication that imports of FCOJ from Brazil are causing material injury, or threaten material injury, to a United States industry. If its determination is negative, the investigation will terminate; otherwise, it will proceed according to the statutory procedures.

Joseph A. Spetrini,

Acting Deputy Assistant Secretary for Import Administration.

May 29, 1986.

BILLING CODE 3510-DS-M

Sugar and Syrups From Canada; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On July 20, 1984, the Department of Commerce published the preliminary results of its administrative review and tentative determination to revoke in part the antidumping duty order on sugar and syrups from Canada. The review covered the ten known manufacturers and/or exporters of this merchandise to the United States and the period April 1, 1982 through March 31, 1983.

We gave interested parties an opportunity to comment on the preliminary results and tentative determination to revoke in part. Based on our analysis of the comment received, we have changed the margin for Lantic Sugar Limited from that presented in the preliminary results of review.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Richard P. Bruno or J. Linnea Bucher, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On July 20, 1984, the Department of Commerce ("the Department") published in the Federal Register (49 FR 29428) the preliminary results of its administrative review and tentative determination to revoke in part the antidumping duty order on sugar and syrups from Canada (45 FR 24120, April 9, 1980). The preliminary results covered the ten known manufacturers and/or exporters of Canadian sugar and syrups to the United States and the period April 1, 1982 through March 31, 1983.

In accordance with § 353.53a(a) of the Commerce Regulations, five of the ten firms requested that we complete the administrative review for those firms. The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of Canadian sugar and syrups produced from sugar cane and sugar beets. The sugar is refined into granulated or powdered sugar, icing, or liquid sugar. Sugar and syrups are currently classifiable under items 155.2025, 155.2045, and 155.3000 of the Tariff Schedules of the United States Annotated.

The review covers five of the ten known manufacturers and/or exporters of sugar and syrups to the United States and the period April 1, 1982 through March 31, 1983.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results and tentative determination to revoke in part. We received a written comment from Lantic Sugar Limited (previously known as Atlantic Sugar, Ltd.).

Comment

During the review period, Lantic made only spot price sales to the United States. Lantic had three types of home market sales during the review period: spot price sales, spot price sales with fixed discounts, and fixed price long-term contract sales. Lantic argues that, through clerical error, it reported as the date of sale for the last group the dates of shipments under these contracts. The Department then included those individual shipments in the weighted-average foreign market values. Lantic contends that we should ignore the fixed price contract sales completely when creating the weighted average, because those sales are not of the same type as the U.S. sales. Alternatively, we should change the dates of those sales to the dates of original contract before deciding which sales to weight average.

Department's Position

The issue of whether fixed price contract sales should be included in creating a weighted-average is moot, since calculation under either method results in a zero margin.

Final Results of the Review

As a result of the comment received, we have revised our preliminary results for Lantic, and we determine that the following weighted-average margins exists for the period April 1, 1982 through March 31, 1983:

Manufacturer/exporter	Margin (percent)
Atlantic Sugar, Ltd. (now known as Lantic Sugar Limited)	0
Lantoo Ltd.	10.18
Redpath Sugars, Ltd.	0.01
St. Lawrence Sugar, Ltd. (now known as Lantic Sugar Limited)	0
Westcane Sugar Ltd. (now know as Lantic Sugar Limited)	0

The Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, the Department will instruct the Customs Service to collect a cash deposit of estimated antidumping duties for each firm based upon the above margins as provided in section 751(a)(1) of the Tariff Act. Since the margin for Redpath Sugars, Ltd. is less than 0.5 percent and therefore *de minimis* for

cash deposit purposes, the Department waives the deposit requirement for that firm. For any shipments from the remaining five known manufacturers and/or exporters, not covered by this review, the cash deposit will continue to be at the rate published in the final results of the last administrative review for each of those firms (48 FR 49327, October 25, 1983). For any shipments from a new exporter not covered by this or prior administrative reviews, whose first shipments of Canadian sugar and syrups occurred after March 31, 1983, and who is unrelated to any covered firm, a cash deposit of 10.18 percent shall be required. These deposit requirements and waiver are effective for all shipments of Canadian sugar and syrups entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice, and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53a of the Commerce Regulations (19 CFR 353.53a; 50 FR 32556, August 13, 1985).

Dated: May 23, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

California Institute of Technology; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No. 86-011R. Applicant: California Institute of Technology, Pasadena, CA 91125. Instrument: VG Sector Thermal Ionization Mass Spectometer with Accessories. Manufacturer: VG Instruments, United Kingdom. Original notice of this resubmitted application was published in the Federal Register of November 13, 1985.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument is equipped with a fully automated multiple collector system capable of providing an external precision on Neodymium (300 ng) of 0.003%. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 86-12584 Filed 6-3-86; 8:45 am]

BILLING CODE 3510-DS-M

College of the Holy Cross; Decision on Application for Duty-Free Entry of Scientific Instrument

This application is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C.

Docket No. 85-074R. Applicant: College of the Holy Cross, Worcester, MA 01610. Instrument: Flash Photolysis with 1000J Capacitor Bank, Model KN-100. Original notice of this resubmitted application was published in the Federal Register of February 15, 1985.

Comments: None received.

Decision: Application denied. An instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: This application is a resubmission of Docket Number 85-074, which was denied without prejudice to resubmission (DWOP). In the DWOP, we asked the applicant to demonstrate that the instrument *as ordered* was capable of making absorption measurements in the range between 750 and 900 nm claimed pertinent. In the resubmission the applicant did not do this. However, the applicant did confirm the NBS contention that the foreign article as ordered is of limited usefulness, stating that the foreign article "is equipped with a IP28 photomultiplier tube useful only to 600 nm." Although the applicant intends to purchase a photomultiplier tube extending the instrument range to the near IR, the purchase of optional parts that do not accompany the instrument cannot be considered (Subsection 301.5(d)(1)(ii). The applicant's contention "that the instrument will be used primarily in the region 700-900 nm" is irrelevant to the capability of the instrument *as purchased* since it is incapable of making measurements in this absorption range without a red sensitive photomultiplier tube.

We conclude, therefore, that the instrument available from the domestic manufacturer, Xenon Corporation, is scientifically equivalent to the foreign article as purchased.

BILLING CODE 3510-DS-M

Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles; Oakland University et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Decision: Denied. Applicants have failed to establish that domestic instruments of equivalent scientific value to the foreign instruments for the intended purposes are not available.

Reasons: Section 301.5(e)(4) of the regulations requires the denial of applications that have been denied without prejudice to resubmission if they are not resubmitted within the spcified time period. This is the case for each of the listed dockets.

Docket No. 85-166. Applicant: Oakland University, Rochester, MI 48063. Instrument: Scanning Electron Microscope, Model DS-130. Manufacturer: Akashi-Seisakusho Ltd., Japan. Date of denial without prejudice to resubmission: December 26, 1985.

Docket No. 85-249. Applicant: Georgia Baptist Medical Center, Atlanta, GA 30312. Instrument: Lithotripter. Manufacturer: Dornier System GmbH, West Germany. Date of denial without prejudice to resubmission: January 22, 1986.

Docket No. 86-108. Applicant: North Texas State University, Denton, TX 76203. Instrument: CO_2 Breadboard Amplifier System. Manufacturer: Lumonics Inc., Canada. Date of denial without prejudice to resubmission: December 23, 1985.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

State University of New York et al.; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C.

Docket No. 86-100. Applicant: State University of New York, Syracuse, NY 13210. Instrument: Electron Microscope, Model JEM-2000EX with Accessories. Manufacturer: Jeol, Ltd., Japan. Intended Use: See notice at 51 FR 6576. Instrument Ordered: October 9, 1985.

Docket No. 86-114. Applicant: Ohio State University, Columbus, OH 43210. Instrument: Electron Microscope, Model EM 10CA. Manufacturer: Carl Zeiss, West Germany. Intended Use: See notice at 51 FR 7844. Instrument Ordered: December 2, 1985.

Docket No. 86-116. Applicant: State University of New York, Stonybrook, NY 11794. Instrument: Electron Microscope, Model CM 12 with Accessories. Manufacturer: N.V. Philips, The Netherlands. Intended Use: See notice at 51 FR 7844. Instrument Ordered: December 13, 1985.

Docket No. 86-117. Applicant: Medical College of Ohio, Toledo, OH 43699. Instrument: Electron Microscope, Model CM 10 with Accessories. Manufacturer: N.V. Philips, The Netherlands. Intended Use: See notice at 51 FR 7845. Instrument Ordered: November 20, 1985.

Docket No. 86-120. Applicant: Colorado State University, Fort Collins, CO 80523. Instrument: Electron Microscope, Model EM 109 with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended Use: See notice at 51 FR 6576. Instrument Ordered: December 30, 1985.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as those instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered.

Reasons: Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

BILLING CODE 3510-DS-M

[C-557-801]

Preliminary Negative Countervailing Duty Determination; Carbon Steel Wire Rod From Malaysia

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that no benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Malaysia of carbon steel wire rod (wire rod). The estimated net bounty or grant is 0.09 percent *ad valorem*. This rate is *de minimis*, and therefore our preliminary countervailing duty determination is negative. If this investigation proceeds normally, we will make our final determination on or before August 11, 1986.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Roy Malmrose, Ellie Shea, or Barbara Tillman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2815, 377-0184, or 377-2438.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon the questionnaire responses, we preliminarily determine that there is reason to believe or suspect that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Malaysia of wire rod. For purposes of this preliminary determination, the following programs are found to confer bounties or grants:

- Export Tax Incentives
  - —An export allowance of five percent of the f.o.b. value of qualifying exported goods
  - —A double deduction for expenses related to export promotion
- Short-Term Export Financing

We preliminarily determine the estimated net bounty or grant to be 0.09 percent *ad valorem*. Although we have determined these programs to be countervailable, the respondents received *de minimis* benefits during the review period, calendar year 1985. Therefore, we preliminarily determine that no benefits which constitute bounties or grants within the meaning of section 303 of the Act are being provided to manufacturers, producers, or exporters in Malaysia of wire rod.

Case History

On March 4, 1986, we received a petition in proper form from Armco, Inc., Atlantic Steel Co., Georgetown Steel Corp., North Steel Texas, Inc., and Raritan River Steel Co., filed on behalf of the U.S. industry producing wire rod. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that manufacturers, producers, or exporters in Malaysia of wire rod receive, directly or indirectly, benefits which constitute bounties or grants within the meaning of section 303 of the Act.

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on March 24, 1986, we initiated an investigation (51 FR 10905). We stated that we expected to issue a preliminary determination on or before May 28, 1986.

Since Malaysia is not a "country under the Agreement" within the meaning of section 701(b) of the Act, sections 303(a)(1) and 303(b) of the Act apply to this investigation. Accordingly, petitioners are not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of the subject merchandise from Malaysia materially injure, or threaten material injury to, a U.S. industry.

On April 3, 1986, we presented a questionnaire to the government of Malaysia in Washington, DC, concerning petitioners' allegations. We received the government and company responses on May 9, 1986. According to the government response, Amalgamated Steel Mills Bhd. (ASM) is the only producer of wire rod in Malaysia. Angkasa Marketing Sdn. Bhd. (Angkasa), a wholly-owned subsidiary of ASM, is the only exporter of wire rod to the United States. Malayawata Steel Bhd. (Malayawata), alleged in the petition to be a producer and exporter of wire rod, does not produce wire rod or export wire rod to the United States.

Scope of Investigation

For purposes of this investigation, the term "carbon steel wire rod" covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross-section, not under 0.20 inch in diameter, nor over 0.74 inch in diameter, tempered or not tempered, treated or not treated, not manufactured or partly manufactured, and valued over or under 4 cents per pound. Wire rod is currently classifiable under items 607.14, 607.17, 607.22, and 607.23 of the *Tariff Schedules of the United States*.

Analysis of Programs

Throughout this notice we refer to certain general principles applied to the facts of the current investigation. These general principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order," which was published in the April 26, 1984 issue of the Federal Register (49 FR 18006).

Consistent with our practice in preliminary determinations, when a response to an allegation denies the existence of a program, receipt of benefits under a program, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses are subject to verification. If the response cannot be supported at verification, and the program is otherwise countervailable, the program will be considered a bounty or grant in the final determination.

Petitioners allege in the petition that Malayawata, which is 51 percent government-owned, may have benefitted from government equity infusions on terms inconsistent with commercial considerations. In addition, petitioners allege that Malayawata has been uncreditworthy since at least 1983. According to the government response, Malayawata does not produce wire rod or export wire rod to the United States. Therefore, an analysis of the equityworthiness and creditworthiness of Malayawata is not necessary for this preliminary determination. At verification, however, we will verify that Malayawata is not a producer or exporter of wire rod.

For purposes of this preliminary determination, the period for which we are measuring bounties or grants (the review period) is calendar year 1985. Based upon our analysis of the petition and the responses to our questionnaire submitted by the government of Malaysia, ASM, and Angkasa, we preliminarily determine the following:

I. Programs Preliminarily Determined To Confer Bounties or Grants

We preliminarily determine that bounties or grants are being provided to manufacturers, producers or exporters in Malaysia of wire rod under the following programs:

A. Tax Incentives for Exporters. Petitioners allege that the government of Malaysia provides tax incentives to promote exports of wire rod. First, a double tax deduction is granted for expenses related to export promotion, such as market research, overseas advertising, participation in trade exhibitions, and overseas sales offices. Second, Malaysian companies allegedly can deduct from net taxable income eight percent of the f.o.b. value of export sales if Malaysian content of the product is more than 50 percent; they allegedly can deduct five percent if Malaysian content is less than 50 percent.

According to the government response, section 27 of the Investment Incentives Act of 1968 allows exporters to obtain a double deduction of eligible export promotion expenses. The double deduction allows these export related expenses to be deducted twice, once in the financial statement and then again in the income tax form. Section 29 of the same Act provided, for tax years prior to 1979, an export allowance of eight percent of the increase in the gross income derived from the export of products incorporating more than 50 percent local content, and an allowance of five percent if local content is less than 50 percent. For tax years 1980 to 1983, section 29 was amended to provide a deduction of two percent of the ex-factory value of exports from taxable income and a deduction of ten percent of the increase in export value from the preceding year. In 1983, the government of Malaysia amended section 29 of the law to provide a flat deduction of five percent of the f.o.b. value of export revenues from taxable income. This amendment became effective in 1984 and applied to all tax returns filed in 1985.

According to the company response, ASM did not claim any export allowance or the double deduction for export promotion on the tax return filed during the review period. Angkasa claimed the export allowance of five percent of the f.o.b. value of qualifying exports and made a provisional claim

for the double deduction for export promotion expenditures.

Because these tax incentives are available only to exporters, we preliminarily determine that they confer a bounty or grant. For tax programs, we generally determine the value of the bounty or grant by calculating the amount of the benefit based on the tax return filed during the review period. Although Angkasa claimed the export allowance and the double deduction on the tax return filed in 1985, these claims did not affect Angkas's tax liabilities during the review period since Angkasa would have incurred a tax loss even absent these claims. Therefore, although we preliminarily determine these tax incentives to be countervailable, the estimated net countervailable benefit is zero.

B. Short-Term Export Financing. Petitioners allege that the government of Malaysia provides preferential pre- and post-export short-term financing through the Malaysian banking system. The commercial banks allegedly provide loans to exporters at rates lower than those available for domestic transactions.

In its response, the government of Malaysia stated that Bank Negara, the central bank, maintains an export credit refinancing facility for both pre- and post-shipment refinancing. This facility allows commercial banks to finance export transactions for a period of up to 92 days. Access to these funds is usually limited to three million Malaysian dollars for each exporter. The annual interest rates on these loans has varied over the life of the program.

According to the company response, ASM had no loans through Bank Negara on which interest was paid during the review period. Angkasa, however, had two loans from Bank Negara on which interest was paid during the review period.

Because only exporters are eligible for these loans, we preliminarily determine that they are countervailable to the extent that they are provided at preferential rates. The benchmark for short-term loans is the most comparable and predominant commercial rate for short-term financing. The Banker's Acceptance is the most comparable and commonly used alternative source of short-term financing. The government response lists the average Banker's Acceptance rate for 1985 as 9.53 percent. Comparing this rate to the rate charged on export loans, we find that the rate on export loans is preferential. Therefore, the export loans provided under this program confer a countervailable benefit upon wire rod from Malaysia. Using our short-term loan methodology, we calculate an estimated net bounty or grant of 0.09 percent *ad valorem*.

II. Programs Preliminarily Determined Not To Confer Bounties or Grants

A. Tax Holiday for Pioneer Status. Petitioners allege that the Malaysian government provides tax holidays for companies that have "pioneer status," utilize a certain amount of labor, produce a priority product, produce goods containing at least 50 percent local content or are located in designated development areas.

According to the government response only three programs provide for tax holidays: (1) Locational incentives; (2) labor utilization relief; and (3) pioneer status. The first two programs are discussed in the section of this notice entitled "Programs Determined Not to Be Used."

The designation of "pioneer status" is made by the Ministry of Trade and Industry. The criteria for designation of pioneer status are: (1) The number of pioneer companies already established which produce the products mentioned in the application; (2) the production of those pioneer companies; (3) the prospects for favorable development; and (4) the management of the company. Once granted pioneer status, a company is tax exempt for two to five years, depending on the level of investment. Furthermore, a company may be eligible for an extra one-year tax exemption for each of the following conditions that it meets: (2) The company makes a "priority" product; (2) the Malaysian content is at least 50 percent; and (3) the company is located in a development area. During fiscal years 1983 and 1984, ASM, but not Angkasa, was under pioneer status.

According to the government response, virtually all processed or manufactured goods produced in Malaysia have been designated as pioneer products. These include *inter alia*, agricultural products, textiles, furniture, rubber goods, industrial chemicals, cosmetics, fuel oils, steel, and electronic goods. Therefore, we preliminarily determine that the "pioneer status" tax holiday is not limited to a specific enterprise or industry or group of enterprises or industries.

B. Medium- and Long-Term Government Loans. Petitioners allege that the Malaysian Industrial Development Finance Bhd. (MIDF), the Industrial Development Bank of Malaysia, the Development Bank of Malaysia, the Borneo Development Corporation, and the Sabah Development Bank provide medium- and long-term government loans on terms inconsistent with commercial considerations. MIDF is discussed below; the other development banks are discussed in the "Programs Determined Not to Be Used" section of this notice.

MIDF was established in 1960 by the Malaysian government and several private investors. The original purpose of MIDF was to provide a source of long-term financing for industrial development in Malaysia. MIDF provides fixed-rate long-term loans for machinery, factory mortgages, and new plant or expansion projects. ASM had three MIDF loans outstanding during the review period.

According to the government response, MIDF has provided loans to a wide range of industries. These include, among others, the food, steel, non-ferrous metals, machinery, wood products, textile, rubber products, chemical and paper industries. Therefore, we preliminarily determine that the provision of MIDF loans is not limited to a specific enterprise or industry or group of enterprises or industries.

III. Programs Preliminarily Determined Not To Be Used

In accordance with our practice of accepting a response to an allegation which denies the receipt of benefits under a program, we preliminarily determine, subject to verification, that the manufacturers, producers, or exporters in Malaysia of wire rod did not use the following programs:

A. *Accelerated Depreciation Allowance for Exporters.* Petitioners allege that the Malaysian wire rod industry benefits from an accelerated depreciation allowance on capital expenditures incurred in acquiring plant or equipment to modernize production techniques if at least 20 percent of production is exported. According to the responses, neither ASM nor Angkasa has used an accelerated depreciation allowance.

B. *Other Tax Holidays.* As discussed in section II. A., the Malaysian government provides tax holidays for companies that utilize a certain amount of labor or are located in designated development areas.

According to the government response, a company may receive a tax holiday from two to five years depending on the level of employment. Moreover, a company is eligible for an additional one-year exemption for each of the following criteria that it meets: (1) The company produces a "priority" product; (2) the Malaysian content of the product is at least 50 percent; and (3) the

plant is located in a "development" area.

In addition, a company may receive a tax holiday if it is sited in a "locational incentive area". The length of the tax holiday varies from five to eight years, depending on the level of investment and the number of employees. Furthermore, a company is eligible for an additional one-year exemption for each of the following criteria that it meets: (1) The company makes a "priority" product; and (2) the Malaysian content of the product is at least 50 percent. The company response states that neither ASM nor Angkasa has used the above programs.

C. *Investment Tax Credits.* Petitioners allege that the government of Malaysia provides investment tax credits for approved projects which do not qualify under other incentive schemes (*e.g.*, pioneer status), and for investments which have heavy capital requirements and long start-up periods. The investment tax credit ranges from 25 to 40 percent of capital expenditures for plant, equipment, and buildings, is applied against taxable income, and can be carried forward until the entire credit is used. According to the responses, neither ASM nor Angkasa has received investment tax credits.

D. *Other Medium- and Long-Term Government Loans.* Petitioners allege that the Industrial Development Bank, the Development Bank of Malaysia, the Borneo Development Corporation and the Sabah Development Bank provide medium- and long-term government loans on terms inconsistent with commercial considerations. According to the responses, neither ASM nor Angkasa had loans outstanding from the aforementioned banks during the review period.

E. *Export Credit Insurance.* Exporters may benefit from the provision of export credit insurance at premium rates which are inadequate to cover the long-term operating costs and losses of the insurance program. According to the responses, neither ASM nor Angkasa has participated in this program.

F. *Industrial Building Allowance.* In 1984, the government of Malaysia instituted an industrial building allowance for warehouses and bulk installations used for storing goods for export. The allowance consists of an initial deduction of ten percent of the cost of acquisition, followed by an annual deduction of two percent. According to the responses, neither ASM nor Angkasa claimed the industrial building allowance on the tax return filed during the review period.

G. *Increased Capital Allowance.* An increased capital allowance may be available to projects which the government of Malaysia deems desirable and which do not qualify for other incentive schemes. The allowance applies to qualifying building and plant expenditures incurred in establishing a new factory or modernizing an existing one. Companies are permitted to deduct 40 percent of the cost of modernizing production techniques in an existing factory and three percent of the cost of constructing a building. Companies purchasing a building may increase the allowable percentage by 50 percent. According to the responses, neither ASM nor Angkasa claimed the increased capital allowance on the tax return filed during the review period.

Verification

In accordance with section 776(a) of the Act, we will verify the information used in making our final determination.

Public Comment

In accordance with § 355.35 of the Commerce Regulations, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on July 21, 1986 at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW. Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B099, at the above address within ten days after publication of this notice in the Federal Register. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, at least ten copies of pre-hearing briefs must be submitted to the Deputy Assistant Secretary by July 14, 1986. Oral presentation will be limited to issues in the briefs. In accordance with 19 CFR 355.33(d) and 19 CFR 355.34, written views will be considered if received not less than 30 days before the final determination or, if a hearing is held, within ten days after the hearing transcript is available.

This notice is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

May 28, 1986.

BILLING CODE 3510-DS-M

[C-798-601]

Preliminary Affirmative Countervailing Duty Determination: Carbon Steel Wire Rod From Zimbabwe

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that certain benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Zimbabwe of carbon steel wire rod (wire rod). The estimated net bounty or grant is 51.35 percent *ad valorem* for all manufacturers, producers, or exporters in Zimbabwe of wire rod.

We are directing the U.S. Customs Service to suspend liquidation of all entries of wire rod from Zimbabwe that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice, and to require a cash deposit or bond on entries of this product in the amount equal to the estimated net bounty or grant.

If this investigation proceeds normally, we will make our final determination on or before August 11, 1986.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Barbara Tillman or Ellie Shea, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2438 or 377-0184.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based on our investigation, we preliminarily determine that there is reason to believe or suspect that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Zimbabwe of wire rod. For purposes of this preliminary determination, the following programs are found to confer bounties or grants:

- Export Incentive Scheme; and
- Government Equity Infusions and Other Financial Assistance to Ziscosteel-Zimbabwe Iron & Steel Co. Ltd. for the Years 1982-1985.

We preliminarily determine the estimated net bounty or grant to be 51.35 percent *ad valorem* for all

manufacturers, producers, or exporters in Zimbabwe of wire rod.

Case History

On March 4, 1986, we received a petition in proper form from Armco, Inc., Atlantic Steel Co., Georgetown Steel Corp., North Star Steel Texas, Inc., and Raritan River Steel Co., filed on behalf of the U.S. industry producing wire rod. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that manufacturers, producers, or exporters in Zimbabwe of wire rod, directly or indirectly, receive benefits which constitute bounties or grants within the meaning of section 303 of the Act.

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on March 24, 1986, we initiated an investigation (51 FR 10906). We stated that we expected to issue a preliminary determination on or before May 28, 1986.

Since Zimbabwe is not a "country under the Agreement" within the meaning of section 701(b) of the Act, sections 303(a)(1) and 303(b) of the Act apply to this investigation. Accordingly, petitioners are not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of this merchandise materially injure, or threaten material injury to, a U.S. industry.

On April 1, 1986, we presented a questionnaire to the government of Zimbabwe, in Washington, DC, concerning the petitioners' allegations, and we requested a response by April 30, 1986. This date was extended to May 9, 1986 for the government response and May 12, 1986 for the company responses. On May 22, 1986, we received a partial response from the government of Zimbabwe. No response has been received from the manufacturers, producers, or exporters of wire rod in Zimbabwe.

Scope of Investigation

For purposes of this investigation, the term "carbon steel wire rod" covers a coiled, semi-furnished, hot-rolled carbon steel product of approximately round solid cross-section, not under 0.20 inch in diameter, nor over 0.74 inch in diameter, tempered or not tempered, treated or not treated, not manufactured or partly manufactured, and value over or under 4 cents per pound. Wire rod is currently classifiable under items 607.14, 607.17, 607.22, and 607.23 of the *Tariff Schedules of the United States*.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of the current investigation. These general principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order," which was published in the April 26, 1984 issue of the Federal Register (49 FR 18006).

The response provided by the government of Zimbabwe in this investigation was incomplete and untimely. Furthermore, no response was received from the manufacturers, producers, or exporters of wire rod in Zimbabwe. Therefore, for purposes of this preliminary determination, we are using the best information available as required under § 355.37 of our regulations (19 CFR 355.37). The Department has no record of past countervailing duty investigations or administrative reviews involving Zimbabwe and, therefore, we are unable to include such information in estimating the benefit from programs alleged in the petition to the bounties or grants. If we do not receive a complete response in time to verify the information submitted, we will continue to seek information from available sources to determine the countervailability and level of benefits of the programs under investigation. As best information available, we are using the estimates of benefits included in the petition. For equity infusions into Ziscosteel-Zimbabwe Iron & Steel Co. Ltd. (Zisco), we are also using information obtained from published sources. For the sales value used in calculating the *ad valorem* rates for the domestic bounties or grants, we are using, as best information available, the total sales value for Zisco, as provided in the response. We are using this value because petitioners provided no information on total sales value, and we were unable to obtain this figure from public sources. For those programs on which the petitioners provided no estimates of benefits and for which we were unable to develop information from published sources, we are requesting additional information to determine whether a bounty or grant is being conferred.

For purposes of this preliminary determination, the period for which we are measuring bounties or grants ("the review period") is calendar year 1985. Based upon our analysis of the petition and the best information available, we preliminarily determine the following:

I. Programs Preliminarily Determined To Confer Bounties or Grants

We preliminarily determine that bounties or grants are being provided to manufacturers, producers, or exporters in Zimbabwe of carbon steel wire rod under the following programs:

A. *Export Incentive Scheme.* Petitioners allege that, under the Export Incentive Scheme, the Zimbabwean wire rod industry receives the following benefits:

- a tax-free payment equal to at least nine percent of the f.o.b. value of qualifying exported goods;
- bonus allocations of foreign exchange calculated at the rate of one percent of the f.o.b. value of the exporter's manufactured exports; and
- a tax-free payment of five percent of the value of exports within a given period, which are over and above the company's exports registered for the same period during the previous year.

Based upon the best information available, we preliminarily determine that the companies under investigation received a tax-free payment equal to at least nine percent of the f.o.b. value of qualifying exported goods, resulting in an estimated net bounty or grant of nine percent *ad valorem*, and that they also received bonus allocations of foreign exchange calculated at the rate of one percent of the f.o.b. value of manufactured exports, resulting in an estimated net bounty or grant of one percent *ad valorem*.

Based upon the best information available, we preliminarily determine that the companies under investigation received an additional tax-free payment of five percent of the increase in the value of exports between 1984 and 1985. To calculate the benefit from this payment, we took five percent of the difference between the value of the 1984 and 1985 exports of wire rod to the United States, as reported in the Department of Commerce Special Summary Steel Invoice Data. We allocated that amount over the value of exports of wire rod to the United States in 1985, resulting in an estimated net bounty or grant of .51 percent *ad valorem*.

Therefore, to calculate the total estimated net bounty or grant received through the Export Incentive Scheme, we summed the *Ad valorem* rates found under each component to arrive at an estimated net bounty or grant of 10.51 percent *ad valorem*.

B. *Government Equity Infusions and Other Financial Assistance to Ziscosteel-Zimbabwe Iron & Steel Co., Ltd. for Years 1982–1985.* Petitioners

allege that Zisco, which is 49.7 percent state-owned, has benefitted from government equity infusions and other government financial assistance, including cash grants, on terms inconsistent with commercial considerations. Petitioners also allege that Zisco has been uncreditworthy and unequityworthy since 1982. Information submitted in the petition indicates that Zisco has been incurring losses since at least 1982.

As best information available, we have used petitioners' information which states that the government of Zimbabwe provided to Zisco 30 million Zimbabwe dollars ($Z30 million) in 1983 to cover the company's cash shorfalls and $Z200 million in 1984 for a capital development program. Petitioners have provided additional information indicating that the government of Zimbabwe provided $Z120 million in 1985 to the national railways and Zisco. As best information available, we are assuming that one-half of the $Z120 million was allocated to Zisco. Based on these figures, government assistance totaled $Z290 million for the period 1983–1985.

There is no indication in the petition of the form in which this government assistance was provided; therefore, for purposes of this preliminary determination, we are assuming that all government assistance to Zisco was in the form of equity infusions. Our own research has confirmed that Zisco has been incurring large losses since 1981. Therefore, as best information available, we are assuming that Zisco has been unequityworthy since the time of the first alleged equity infusion in 1983. Using information from the petition and from publications and materials maintained by the Department, we calculated the benefit from these infusions according to the rate of return shortfall methodology outlined in the Subsidies Appendix. Neither the petitioners nor the Department were able to obtain or develop information on Zisco's rate of return on equity. Therefore, as best information avalable, we are using Zisco's rate of return on sales, which we have developed based on Zisco's total sales in 1985, as provided in the response, and Zisco's losses in 1984 (the most recent year for which this statistic is available), as reported in the 1985 *Quarterly Economic Review of Zimbabwe and Malawi*. For the national average rate of return, we used the 1985 average monthly earnings yield for industrial shares of 6.36 percent, as published in the Reserve Bank of Zimbabwe's *Quarterly Economic and Statistical Review* (December 1985). We multiplied the rate of return shortfall by the total amount of equity received by Zisco since 183. We then allocated the aggregate benefit over the value of Zisco's total sales in 1985, resulting in an estimated net bounty or grant of 40.84 percent *ad valorem*.

II. Programs for Which We Need Additional Information

Information regarding the level of benefits received under the following programs was not supplied by petitioners. We also have been unable to obtain any information on the level of benefits or potential countervailability of these programs from any sources other than the petition. Therefore, we preliminarily determine that we need additional information on the following programs.

A. *Export Promotion.* Petitioners allege that the Zimbabwean wire rod industry benefits from export promotional assistance, including financial assistance for participation in trade expositions, from the Export Promotion Section of the Ministry of Trade and Commerce.

Since the respondents did not provide a complete response in this investigation, and the Department was not able to obtain any information about this program, we cannot quantify the amount of any bounty or grant that may have been received.

B. *Training Investment Allowance.* Petitioners allege that the Zimbabwean wire rod industry may benefit from a training investment allowance, available to businesses which construct new buildings and purchase new equipment. The allowance, which is to be used exclusively for employee training, is equivalent to fifty percent of the costs of new buildings and/or equipment.

Since the respondents did not provide a complete response in this investigation, and the Department was not able to obtain any information about this program, we cannot quantify the amount of any bounty or grant that may have been received.

C. *Regional Tax Incentives.* Petitioners allege that the Zimbabwean wire rod industry benefits from special tax incentives to encourage commercial and industrial development in prescribed "growth-point areas." Industries in the designated areas benefit from special depreciation rates, including an investment allowance of 15 percent on buildings, machinery, and furniture, and a special initial allowance of 100 percent, instead of the normal 2.5 percent, on new commercial buildings.

Since the respondents did not provide a complete response in this investigation, and the Department was not able to obtain any information about this program, we cannot quantify the amount of any bounty or grant that may have been received.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of carbon steel wire rod from Zimbabwe which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register** and to require a cash deposit or bond for each entry of this merchandise in the amount of the estimated net bounty or grant. The estimated net bounty or grant is 51.35 percent *ad valorem* for all manufacturers, producers, or exporters in Zimbabwe of carbon steel wire rod. This suspension will remain in effect until further notice.

Verification

In accordance with section 776(a) of the Act, if we receive complete responses in a timely manner, we will verify the information used in making our final determination. We will not accept any statement in a response that cannot be verified for our final determination.

Public Comment

In accordance with § 355.35 of the Commerce Regulations, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on June 30, 1986, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B–099, at the above address within ten days of the publication of this notice in the **Federal Register**. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, at least ten copies of the confidential version and seven copies of the nonconfidential version of the pre-hearing briefs must be submitted to the Deputy Assistant Secretary by June 23, 1986. Oral Presentations will be limited to issues raised in the briefs. In accordance with 19 CFR 355.33(d) and 19 CFR 355.34, written views will be considered if received not less than 30 days before the final determination or, if a hearing is

held, within ten days after the hearing transcript is available.

This notice is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

May 28, 1986.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Coastal Zone Management; Federal Consistency Appeal by Civil Designs, Inc., From an Objection by the Massachusetts Coastal Zone Management Office

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of appeal withdrawal.

On May 8, 1986, the Secretary of Commerce granted the request of Civil Designs, Inc. to withdraw its appeal filed under section 307(c)(3)(A) of the Coastal Zone Management Act. The appeal had been taken from an objection by the Massachusetts Coastal Zone Management Office (MCZM) to Civil Designs' alteration of a marina in Quincy, Massachusetts without necessary federal, state and local permits. The MCZM found Civil Designs' project, specifically the retaining wall and 3000 square feet of fill placed in wetlands, was inconsistent with the federally-approved Massachusetts Coastal Management Program.

After negotiations between the parties, Civil Designs agreed to and in fact has begun restoring the shoreline to its original condition in accordance with a plan submitted and approved by the Massachusetts Department of Environmental Quality Engineering. Consequently, because the basis for MCZM's objection will no longer exist, Civil Designs moved for dismissal of its appeal on April 16, 1986. The request was unopposed by the State of Massachusetts.

FOR FURTHER INFORMATION CONTACT: L. Pittman, Attorney/Advisor, Office of the Assistant General Counsel for Ocean Services, 3001 Wisconsin Avenue NW., Room 270, Washington, DC 20235; (202) 673-5200.

SUPPLEMENTARY INFORMATION: Notice of the appeal was published in the Federal Register on February 21, 1986 (51 FR 6294).

(Federal Domestic Assistance Catalog No. 11.419 Coastal Zone Management Program Administration)

Dated: May 22, 1986.

Daniel W. McGovern,

General Counsel, National Oceanic and Atmospheric Administration.

BILLING CODE 3510-08-M

North Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The North Pacific Fishery Management Council and its advisory bodies will convene separate public meetings as follows:

Americanization Committee—will convene June 9, 1986 at 9 a.m., at the National Marine Fisheries Service, Northwest and Alaska Fisheries Center auditorium, 2725 Montlake Boulevard, East, Seattle, WA, to continue deliberations regarding Council-established phaseout dates for foreign fishing and foreign processing. The Committee has conducted two previous meetings on April 18-19, and May 12, 1986. The June 9 meeting will be open to the public; however, no public testimony will be taken. The opportunity to submit written and oral testimony was provided at the April meeting. Questions regarding the June meeting should be directed to Ron Miller, Special Advisor, North Pacific Fishery Management Council, 411 West 4th Avenue, Suite 2D, Anchorage, AK 99501; telephone: (907) 274-4563.

Council—will convene June 25, 1986 at 9 a.m., and continue through approximately noon, June 27, at the Kodiak Community College, Kodiak AK, to approve for public review proposed changes (Amendment 15) to the fishery management plan (FMP) for Gulf of Alaska groundfish. Proposed Amendment 10 to the Bering Sea/Aleutian Islands Groundfish FMP will be given final approval to go to Secretarial review. The Council also will make final decisions on its role in management of Alaska salmon fisheries and discuss procedures for managing Tanner crab.

A revised joint venture policy will be reviewed and sent out for public comment following the meeting. The need for company limits on both bycatch and target species will be one of the major discussion items in the revised policy. The Council also will receive recommendations from an industry workgroup on amendments to the Magnuson Fishery Conservation and Management Act relating to foreign directed and joint venture fisheries. There also will be a status report on Kodiak trawl closures from an industry workgroup, and the Council will review trawl restrictions in the Bristol Bay Pot Sanctuary. The Council will meet in executive session at least once during the week to review ongoing litigation and foreign affairs.

Scientific and Statistical Committee and Advisory Panel—will convene meetings at 9 a.m. on June 23, also at the Kodiak Community College. Other plan team and workgroup meetings may be held on short notice during the week.

For further information contact Jim H. Branson, Executive Director, North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; telephone: (907) 274-4563.

Dated: May 30, 1986.

Carmen Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

Intent To Grant Exclusive Patent License, Whale Scientific, Inc.

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Whale Scientific, Inc., having a place of business at Commerce City, Colorado, an exclusive right in the United States to manufacture, use, and sell products embodied in the invention entitled "Implantation Device for Use In Vivo Stimulation and Collection of Monocytes from Peritoneum of Vertebrate," U.S. Patent 4,505,277. The patent rights in this invention have been assigned to the United States of America, as represented by the Secretary of Agriculture.

The proposed exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The proposed license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest.

Inquiries, comments and other materials relating to the proposed license must be submitted to Douglas J. Campion, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

Douglas J. Campion,

Office of Federal Patent Licensing, U.S. Department of Commerce, National Technical Information Service.

BILLING CODE 3510-04-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Limit for Certain Cotton Textile Products Produced or Manufactured in the Peoples' Republic of China

May 28, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 28, 1986. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

A CITA directive of December 24, 1985, as amended, which established import limits for specified categories of cotton, wool and man-made fiber textile products, including women's girls' and infants' cotton skirts in Category 342, produced or manufactured in China and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986, was published in the Federal Register on December 30, 1985 (50 FR 53182). Under the terms of the Bilateral Cotton Wool and Man-Made Fiber Textile Agreement of August 19, 1983, as amended, between the Governments of the United States and the People's Republic of China, the restraint limit for Category 342 is being increased from 184,807 dozen to 193,837 dozen by the application of swing for the agreement year which began on January 1, 1986.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983, (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston, III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 28, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of December 24, 1985, as amended, from the Chairman of the Committee for the Implementation of Textile Agreements, which established restraint limits for certain specified categories of cotton, wool and man-made fiber textile products, produced or manufactured in the People's Republic of China and exported during 1986.

Effective on May 28, 1986, the directive of December 24, 1985 is hereby further amended to increase the previously established restraint limit for cotton textile products in Category 342 to 193,837 dozen [1] under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 19, 1983, as amended.[2]

[1] The limit has not been adjusted to reflect any imports exported after December 31, 1985.

[2] The agreement provides, in part, that: (1) With the exception of Category 315, any specific limit may be exceeded by not more than 5 percent of its square yards equivalent total, provided that the amount of the increase is compensated for by an equivalent square yard equivalent decrease in one or more other specific limits in that agreement year; (2) the specific limits for certain categories may be increased for carryforward, and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553

Sincerely,

William H. Houston, III,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86-12502 Filed 6-3-86; 8:45 am]

BILLING CODE 3510-DR-M

Adjusting Import Levels for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Mexico

May 30, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 30, 1986. For further information contact Ann Fields, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

The Governments of the United States and Mexico have agreed to further amend their Bilateral Cotton, Wool and Man-Made fiber Textile Agreement of February 26, 1979, as amended and extended, to increase the consultation levels for Categories 334 (men's and boys' other cotton coats), 335 (women's, girls' and infants' cotton coats), 340 (men's and boys' cotton shirts), 359pt. (all TSUSA numbers except 361.0822, 361.6510, 384.0928 and 384.5227), 363 (cotton terry and other pile towels), 433 (men's and boys' wool suit-type coats), 604-A (only plied acrylic spun yarn in T.S.U.S.A. number 310.5040), and 640 (men's and boys' woven shirts of man-made fibers), produced or manufactured in Mexico and exported during the six-month period which began on January 1, 1986 and extends through June 30, 1986. The letter to the Commissioner of Customs which follows this notice implements these increases.

A description of the textile categories in terms of T.S.U.S.A numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14,

1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 8, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1988).

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

May 30, 1996.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of February 4, 1986, which directed you to prohibit entry of certain cotton, wool and man-made fiber textile products, produced or manufactured in Mexico and exported during the six-month period which began on January 1, 1996 and extends through June 30, 1995.

Effective on May 30, 1996, the directive of February 4, 1986 is hereby further amended to increase the following limits:

Category	Amended 6-mo limit [1]
334	34,214 dozen.
335	39,089 dozen.
340	95,000 dozen.
359 pt. [2]	217,282 pounds.
363	3,809,809 numbers.
433	10,000 dozen.
604-A [3]	475,000 pounds.
640	190,800 dozen.

[1] The limits have not been adjusted to reflect any imports exported after December 31, 1995.
[2] In Category 359, all TSUSA numbers except 381.0552, 381.6510, 384.0628, and 384.5227.
[3] In Category 604, only T.S.U.S.A. number 310.5949.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Notice of Intent To Prepare a Draft Environmental Impact Statement for a Proposed Ice Jam Flood Control Project on the Missisquoi River in the Village of Richford, Franklin County, VT

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement.

SUMMARY:

1. Description of Proposed Action.

The proposed project consists of a low overflow dam and a minor channel modification. The dam is an ogee weir located at 750 feet upstream of the Main Street Bridge with the crest elevation at 442.2. The crest length is 215 feet and the dam height is 12 feet. The base width is 30 feet. At the heel there is a 5 foot wide concrete key the full length of the spillway. At the toe there is a key extending 3 feet below the base of the dam. Downstream of the dam for a distance of 40 feet, there is a concrete apron with a stepped endsill. The abutment walls are cenli-levered concrete retaining walls that extend to the 100 year flood stage adjacent to and upstream of the dam. A capability for draining the dam is provided by a 10 foot stoplogged drain gate. The channel modification is located to the north of Big Island between Stations 87+50 and 93+00 and is approximately 750 feet downstream of the Main Street Bridge. The Channel modification consists of raising the weir into the Pilot Channel to elevation 430.0 and filling in the left bank to narrow the Main Channel between Stations 87+50 and 93+00. The proposed dam also includes provisions for hydopower at the site and the construction of a fish ladder to allow migration of resident fish.

2. Reasonable Alternatives

A reasonable alternative to the proposed dam is no action. Other alternatives considered include: a dam located 250 feet upstream of the Main Street Bridge and a dam with multiple stoplog openings.

3. Scoping Process

a. Public involvement

Preparation of the Draft Environmental Impact Statement (EIS) and the Detailed Project Study (DPS) involves coordination with several Federal, State and local agencies as well as coordination meetings held during the plan formulation stage. On March 19, 1996 the Corps conducted a public meeting attended by Congressional Representatives, U.S. Fish and Wildlife Serviced (USFWS), Vermont Agency of Environmental Conservation (VAEC) and local interests to review the Corps' alternative plans of improvement, discuss future steps necessary before a project for the Town of Richford could be recommended and to obtain the views and comments of local interests.

b. Significant issues requiring in-depth analysis

Water quality impacts; archaeological and cultural resources impacts; aquatic resources impacts; and terrestrial resources impacts.

c. Assignments

U.S. Fish and Wildlife Service will be coordinated with concerning the design of a fish ladder to be constructed as an integral part of the proposed dam.

d. Environmental review and consultation

Review will be as outlined in Council on Environmental Quality regulations dated November 29, 1983 (40 CFR Parts 1500–1508) and Corps regulations ER 200–2–2 dated August 25, 1990 (revised March 2, 1991).

4. Scoping Meeting will not be held.

5. Estimate date of statement availability July 1996.

Address:

Project Manager, Linda Baega, ATTN: NANPL–PB, Tel No. (212) 264–1060.

EIS Coordinator, Karen Gastina, ATTN: NANPL–E, Tel No. (212) 264–4662.

US Army Engineer District, New York, 26 Federal Plaza, New York, N.Y. 10007.

Dated: May 23, 1996.

Richard J. Morelde,

Acting Chief, Planning Division.

BILLING CODE 3710-92-M

DEPARTMENT OF EDUCATION

National Advisory Council on Women's Educational Programs; Meeting

AGENCY: National Advisory Council on Women's Educational Programs; Education.

ACTION: Notice of meeting.

SUMMARY: This sets forth the schedule and proposed agenda of the National Advisory Council on Women's Educational Programs and its Executive; Federal Policies, Practices Programs; WEEA and Civil Rights Committees. The agenda will include Committee reports, election of officers, discussion of Council goals and objectives, budget review and general discussion. This notice also describes the function of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend, and that a portion of the Executive Committee meeting will be closed.

DATES: June 11, 1986, 7:00 p.m. to 7:30 p.m., Executive Committee [closed session].

7:30 p.m. to close of business [open session].

June 12, 1986, 2:00 p.m. to close of business. Meetings of Federal Policies, Practices and Programs Committee; Civil Rights Committee and WEEA Program Committee.

June 13, 1986, 8:00 a.m. to 3:00 p.m., Full Council Meeting.

ADDRESS: All meetings will be held at the Capitol Hill Hotel, 200 C Street, SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Patricia A. Weber, Deputy Director, National Advisory Council on Women's Educational Programs, 2000 "L" Street, NW., Suite 568, Washington, DC 20036, [202] 634-6105.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Women's Educational Programs is established pursuant to Pub. L. 95-561. The Council is mandated to (a) advise the Secretary on matters relating to equal education opportunities for women and policy matters relating to the administration of the Women's Educational Equity Act of 1978; (b) make recommendations to the Secretary with respect to the allocation of any funds pursuant to the Act, including criteria developed to insure an appropriate geographical distribution of approved programs and projects throughout the Nation; (c) make recommendations to the Secretary with respect to the establishment of program priorities; (d) make such reports as the Council determines appropriate to the President and Congress on the activities of the Council; and (e) disseminate information concerning the activities of the Council.

The meeting of the Executive Committee will take place on Wednesday, June 11, 1986, from 7:30 p.m. until close of business. From 7:00 p.m. to 7:30 p.m., the Executive committee will meet in closed session to discuss personnel matters. At 7:30 p.m. the Executive Committee will meet in open session. The agenda will include confirmation hearing up-date, budget review, forum up-date, goals and objectives review and orientation up-date.

The meetings of the Federal Policies, Practices and Programs; Civil Rights and WEEA Programs Committees, will take place on Thursday, June 12 at 2:00 p.m. until close of business.

The agenda for the Federal Policies, Practices and Programs Committee will include discussion of cataloguing project and forum up-date, unfinished business and new business.

The agenda for the Civil Rights Committee will include new legislation, unfinished business and new business.

The agenda for the WEEA Program Committee will include priority recommendations, discussion of site visits, unfinished business and new business.

The full Council will meet June 13, 1986, beginning at 8:00 a.m. to 3:00 p.m. The agenda will include election of officers, budget review, committee reports, discussion of goals and objectives, forum up-date and student financial aid briefing.

Records will be kept of the proceedings and will be available for public inspection at the office of the National Advisory Council on Women's Educational Programs, 2000 L Street, NW., Suite 568, Washington, DC 20036.

Signed at Washington, DC, on May 16, 1986.

Sally A. Todd,

Executive Director.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

National Petroleum Council, Historical Factors Task Group; Meeting

Notice is hereby given that the Historical Factors Task Group will meet in June 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Historical Factors Task Group is reponsible for the identification and analysis of events, governmental policies, and actions (federal, state, and local), and the reactions of the oil and gas industries to such events, policies and actions (i.e., the "factors") that affect the supply of and demand for oil and gas in the U.S. since the end of World War II.

The Historical Factors Task Group will hold its third meeting on Wednesday, June 11, 1986, starting at 9:00 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street NW., Washington, DC.

The tentative agenda for the Historical Factors Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Discussion of the factors affecting natural gas supply and demand.
3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Historical Factors Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Historical Factors Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on May 29, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

[FR Doc. 86-12577 Filed 6-3-86; 8:45 am]

BILLING CODE 6450-01-M

American Indian Tribal Participation in the Implementation of the Nuclear Waste Policy Act of 1982

AGENCY: Department of Energy (DOE).

ACTION: Notice of Intent to Increase the Scope of Work under Grant Number DE-FG01-84NE44506 with National Congress of American Indians (NCAI).

SUMMARY: The United States Department of Energy, Office of Civilian Radioactive Waste Management, Office of Policy and Outreach, is preparing a grant modification to increase the work effort under Grant Number DE-FG01-84NE44506.

The purpose of the grant is to encourage American Indian Tribal participation in the consultation and cooperative decision making process required by the Nuclear Waste Policy Act.

Eligibility—Award of this effort has been limited to NCAI because of its unique qualifications as a non-profit Indian Organization and its familiarity with the project. NCAI provides at this time the only demonstrated capability to provide this needed liaison activity.

The term of this grant effort shall be three months with an estimated cost of $34,000.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[Docket No. ERA-C&E-86-43; OFP Case No. 61061-8317-20-24]

Powerplant and Industrial Fuel Use; Acceptance of Petition for Exemption and Availability of Certification by Corona CoGen, Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Acceptance of Petition for Exemption and Availability of Certification by Corona CoGen, Inc.

SUMMARY: On May 13, 1986, Corona CoGen, Inc. (Corona CoGen) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption for a cogeneration facility to be located in Corona, Riverside County, California, from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Corona CoGen is petitioning for an exemption based on the lack of alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rules setting forth criteria and procedures for petitioning for this type of exemption from the prohibitions of Title II of FUA are found in 10 CFR 503.32.

The proposed facility for which the petition was filed will consist of one natural gas-fired combustion turbine generator, and one unfired heat recovery steam generator which will produce approximately 47.8 megawatts (net) of electricity. The plant will burn natural gas only. It is expected that over 50 percent of the net annual electric power produced by the cogenerator will be sold to Southern California Edison, making the cogeneration facility an electric powerplant pursuant to the definitions contained in 10 CFR 503.3. The facility will produce approximately 35,500 pounds of steam per hour which will supply Integrated Protein Technology Company's heating and process steam needs. Corona CoGen will operate the facility.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the SUPPLEMENTARY INFORMATION section below.

As provided for in sections 701(c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue SW., Room 1E-190, Washington, DC 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the Federal Register.

DATES: Written comments are due on or before July 21, 1986. A request for a public hearing must be made within this same 45-day period.

ADDRESSES: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA-093, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

Docket No. ERA-C&E-86-43 should be printed on the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

Myra Couch, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-093, 1000 Independence Avenue, Washington, DC 20585, Telephone (202) 252-6768;

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy Forrestal Building, Room 8A-113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using petroleum. To qualify the petitioner must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in § 503.6 (cost calculation) of the regulations;

(3) No alternate power supply exists, as required under § 503.6 of the regulations;

(4) Use of mixtures is not feasible, as required under § 503.9 of the regulations; and

(5) Alternative sites are not available, as required under § 503.11 of the regulations.

In accordance with the evidentiary requirements of § 503.32(b) (and in addition to the certifications discussed above), Corona CoGen has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environmental impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE's guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the Federal Register as soon as practicable. No final action will be taken on the exemption until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that Corona CoGen is entitled to the exemption requested. That determination will be based on the entire of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, DC, on May 29, 1986.

Barton R. House,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 86-12579 Filed 6-3-86; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. ERA-C&E-86-42; OFP Case No. 67054-6320-20, 21-24]

Powerplant and Industrial Fuel Use; Acceptance of Petition for Exemption and Availability of Certification by Sierra CoGen, Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of acceptance of petition for exemption and availability of certification by Sierra CoGen, Inc.

SUMMARY: On May 12, 1986, Sierra CoGen, Inc. (Sierra Cogen) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption for a cogeneration facility to be located in Bakersfield, California, from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Sierra CoGen is petitioning for an exemption based on the lack of alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rules setting forth criteria and procedures for petitioning for this type of exemption from the prohibitions of Title II of FUA are found in 10 CFR 503.32.

The proposed facility for which the petition was filed will consist of two natural gas-fired combustion turbine generators, and two unfired heat recovery steam generators which will produce approximately 48.75 megawatts (net) of electricity. The gas turbine exhaust gases will be ducted to the heat recovery steam generators. The steam generators will utilize the heat in the hot exhaust gases to produce approximately 108,400 pounds per hour of steam to be used for enhanced oil recovery by Cities Service Oil and Gas Corporation. The electricity produced will be sold to the Pacific Gas & Electric Company.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the **SUPPLEMENTARY INFORMATION** section below.

As provided for in sections 701(c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E-190, Washington, DC 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the Federal Register.

DATES: Written comments are due on or before July 21, 1986. A request for a public hearing must be made within this same 45-day period.

ADDRESSES: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case control Unit, Office of Fuels, Programs, Room GA-093, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

Docket No. ERA-C&E-86-42 should be printed in the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

Myra Couch, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-093, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252-6769.

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. To qualify the petitioner must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in § 503.6 (cost calculation) of the regulations;

(3) No alternate power supply exists, as required under § 503.8 of the regulations;

(4) Use of mixtures is not feasible, as required under § 503.9 of the regulations; and

(5) Alternative sites are not available, as required under § 503.11 of the regulations.

In accordance with the evidentiary requirements of § 503.32(b) (and in addition to the certifications discussed above), Sierra CoGen has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environmental impact anaylsis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE's guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the Federal Register as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that Sierra CoGen is entitled to the exemption requested. That determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, DC, on May 29, 1986.

Barton R. House,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

Settlement Agreements; Hearing in Stripper Well Settlement

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Hearing on Settlement Agreement in the *Department of Energy Stripper Well Exemption Litigation.*

SUMMARY: The Economic Regulatory Administration of the United States Department of Energy (DOE) gives notice that a hearing has been scheduled before the Honorable Frank Theis on the Settlement Agreement in the *Department of Energy Stripper Well Exemption Litigation,* M.D.L. 378 (D. Kan.) in the United States District Court for the District of Kansas in Wichita at 1:30 P.M. on June 12, 1986. *See* 51 FR 19380, May 29, 1986.

FOR FURTHER INFORMATION CONTACT: Carl A. Corrallo, Solicitor, Economic Regulatory Administration, 1000 Independence Avenue SW., Washington, DC 20585, 202–252–4167.

A copy of the Agreement is available for inspection or copying at the DOE Freedom of Information Reading Room. The Reading Room is located in Room 1E–190 of the Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, and can be reached at 202–252–6020.

Issued in Washington, DC, on May 30, 1986.

Marshall A. Staunton,
Acting Administrator, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER86–486–000 et al.]

Electric Rate and Corporate Regulation Filings; Interstate Power Co. et al.

Take notice that the following filings have been made with the Commission:

1. Interstate Power Company

[Docket No. ER86–486–000]

May 28, 1986.

Take notice that Interstate Power Company (Company) tendered for filing on May 15, 1986, new Electric Service Agreements between the following communities and Interstate Power Company:

Community name	FERC No.
Lakefield, MN	67
Springfield, MN	114
Westbrook, MN	105

These agreements provide for lower transformer losses when low side metering is involved, and increase in average power factor requirements and the implementation of late payment penalties.

Interstate Power Company also tendered for filing on May 15, 1986, a revision to the Electric Service Agreement between Interstate Power Company and the City of Windom, Minnesota (FERC No. 123, Supplement 1).

This supplement revised the basic agreement to provide for a reduction in the transformer loss compensation percentage, and increase in average power factor, the inclusion of late payment provisions and a plant test requirement.

Comment date: June 10, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Adams-Marquette Electric Cooperative, Central Wisconsin Electric Cooperative, Columbus Rural Electric Cooperative, Waushara Electric Cooperative, Inc. and Rock County Electric Cooperative v. Wisconsin Power and Light Company

[Docket No. EL86–41–000]

May 29, 1986.

Take notice that on May 13, 1986, Adams-Marquette Electric Cooperative, Central Wisconsin Electric Cooperative, Columbus Rural Electric Cooperative, Waushara Electric Cooperative, Inc. and Rock County Electric Cooperative (hereinafter "Coops") by and through their attorneys Dykema, Gossett, Spencer, Goodnow & Trigg, tendered for filing this Complaint under Rule 206 of this Commission's Rules of Practice and Procedure, 18 CFR 385.206, seeking a Commission Order which:

1. Opens an investigation into Wisconsin Power and Light Company's (hereinafter "WP&L") possible improper collection of certain fixed gas costs through its fuel adjustment clause; and

2. Requires WP&L to comply with the terms of its own tariff by constructing and paying for transmission line extensions required to serve W–2 customers.

Specifically, the Coops request the Commission to issue an order which provides the following:

1. Institutes an investigation into the properity of WP&L's collection of fixed charges through its fuel cost adjustment clause. If it is determined that said collection was improper, this proceeding would result in a refund to wholesale customers of the overcharge plus interest;

2. Finds that WP&L's failure to construct transmission line extensions in accordance with the terms of its W–2 tariff constitutes a violation of § 35.1 of this Commission's Regulations; and

3. Requires WP&L to cease and desist its violation of § 35.1 of this Commission's Regulations and to adhere to the terms of its tariff.

Comment date: June 30, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Bangor Hydro-Electric Company

[Docket No. ER86–501–000]

May 28, 1986.

Take notice that on May 22, 1986, Bangor Hydro-Electric Company (Bangor) tendered for filing a proposed rate schedule pertaining to a Purchase Sale Agreement (Agreement) made as of March 26, 1986 between Bangor Hydro-Electric Company (Bangor) and UNITIL Power Corp. (UNITIL) for the sale of power to UNITIL.

Bangor states that the Agreement provides for a sale to UNITIL of 25,000 kilowatts of unit power from Bangor's entitlement in four small power production facilities and up to 6,000 kilowatts of system power from a mix of Bangor's power resources for a period of approximately fifteen years commencing on or about November 1, 1986.

Bangor requests that the Commission permit the rate schedule to become effective on October 1, 1986.

Bangor states that a copy of the rate schedule has been mailed or delivered to UNITIL, Bedford, N.H.

Comment date: June 10, 1986, in accordance with Standard Paragraph E at the end of this notice.

Cities and Villages of Belmont, Black Earth, Brodhead, Columbus, Evansville, Gresham, Hazel Green, Hustisford, Juneau, Lodi, Mount Horeb, New Glarus, Pardeeville, Plymouth, Princeton, Reedsburg, Richland Center, Sauk City, Sheyboygan Falls, Stoughton, Sun Prairie, Wisconsin Rapids and Wonewoc, Wisconsin, and Pioneer Power & Light Company, and Wisconsin Public Power Incorporated SYSTEM, Complainants, v. Wisconsin Power and Light Company, Respondent.

[Docket No. EL86–40–000]

May 29, 1986.

Take notice that on May 8, 1986, cities and villages of Belmont, Black Earth, Brodhead, Columbus, Evansville, Gresham, Hazel Green, Hustisford, Juneau, Lodi, Mount Horeb, New Glarus,

BEST COPY AVAILABLE

Pardeeville, Plymouth, Princeton, Reedsburg, Richland Center, Sauk City, Sheyboygan Falls, Stoughton, Sun Prairie, Wisconsin Rapids and Wonewoc, Wisconsin, and Wisconsin Public Power Incorporated SYSTEM and Pioneer Power & Light (collectively, the Complainants) tendered for filing a complaint against Wisconsin Power & Light Company pursuant to sections 206 and 306 of the Federal Power Act (16 U.S.C. 825e) and Rule 206 of the Commission's Rules of Practice and Procedure. The Complaint alleges WP&L has violated section 205 of the Federal Power Act (16 U.S.C. 824d) and §35.14 (18 CFR 35.14) of the Federal Energy Regulatory Commission's FERC's Regulations by improperly collecting from the Complaints through operation of the Company's fuel adjustment clause certain fixed gas costs associated with the provision of boiler fuel by WP&L's gas utility to the Company's electric utility.

Specifically, the Complainants ask that the Commission commence an investigation and hearing concerning the fixed gas cost issue, find that WP&L violated section 205 of the Act and § 35.14 of the Commission's Regulations by improperly collecting fixed gas costs through the fuel adjustment clause, determine the amount of overcollection and direct WP&L to refund to the Complainants their share of the overcollection, with interest.

Comment date: June 30, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public investigation.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12583 Filed 6-3-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP86-344-000]

Consolidated Gas Transmission Corp.; Granting Extension of Time

May 28, 1986.

On February 25, 1986, Consolidated Gas Transmission Corporation (Consolidated) applied to the Federal Energy Regulatory Commission for a certificate to construct 33.5 miles of 24-inch natural gas pipeline, called Line No. TL-460, in Onondaga and Oswego Counties, New York. A measuring station in Oswego County called the Biddlecum Road Measuring Station was also proposed. The pipeline and measuring station were to be used to deliver gas to Niagara Mohawk Corporation, a gas distribution company, to accommodate anticipated increases in annual and peak day demand for natural gas. On May 8, 1986, the Commission issued a notice entitled "Notice of Intent to Prepare an Environmental Assessment on the Proposed Line No. TL-460 and Biddlecum Road Measuring Station, Request for Comments, and Notice of Public Meeting." 51 FR 17227 (May 9, 1986). The notice described the project and established dates for public comment and a public meeting.

On May 23, 1986, Consolidated filed a motion to postpone the June 2, 1986 public meeting regarding the proposed project until June 30, 1986. The meeting was to be held in Baldwinsville, New York. Consolidated also requests that FERC extend the deadline for its response to staff's May 16, 1986, data request from June 9, 1986, to June 20, 1986. Consolidated states that these extensions are necessary because Niagara Mohawk Corporation is revising its market data and estimate of delivery requirements, which may require changing the proposed facilities. It also states that such changes could affect the alternative proposals being reviewed by the staff. Consolidated states that it plans to file an amendment to its original application by June 16, 1986.

Consolidated's request for extensions of time are granted, with the exception that no date will be set for the public meeting. The motion indicates that Consolidated is not ready to proceed with the project as proposed. Since Consolidated's amendment may include changes in facility requirements, it is inappropriate to proceed with the public meeting until after the amendment is filed. After Consolidated files its amendment and the staff and parties have had time to review it, a new notice to prepare an environmental assessment, request for comments, and notice of public meeting will be issued. The new notice will describe the amended proposal and will set new dates for public comments and a public meeting. Since the notice of May 8, 1986 is no longer relevant, it is hereby withdrawn.

Accordingly, the public meeting on June 2, 1986 is postponed until further notice and the deadline for Consolidated responding to staff's data request is extended until June 20, 1986.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12584 Filed 6-3-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP86-80-000]

Jupiter Energy Corp.; Filing

June 2, 1986.

Take notice that Jupiter Energy Corporation ("Jupiter") on May 23, 1986 tendered for filing proposed rate schedules covering transportation services performed by Jupiter for its three jurisdictional customers, Union Oil, Philips Petroleum Company, and Kerr-McGee Corporation. Jupiter proposes by this rate schedule filing to increase the rate at which it renders transportation service. The proposed rate would increase revenues from jurisdictional transportation service by $272,144 based on the 12 month period ended December 31, 1985, as adjusted. Jupiter requests an effective date of June 23, 1986.

Jupiter states that the reasons for the proposed transportation service rate increase are that its costs of rendering such services are different now than they were when the existing rate was established in 1966, that Jupiter's transportation volumes have declined and continue to decline, and that Jupiter is not presently recovering even the out-of-pocket costs of such service.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 9, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CI86-428-000]

Mobil Oil Corporation et al.; Application

May 28, 1986.

Take notice that on May 12, 1986, Mobil Oil Corporation, Mobil Producing Texas & New Mexico Inc., Mobil Oil Exploration & Producing Southeast Inc. and Mobil Exploration and Producing North America Inc. (jointly referred to as "Mobil") field an Application for Limited-Term Partial Abandonment Authorization and for Blanket Limited-Term Certificate Authorization for Sales with pre-granted abandonment. The authority sought therein would grant limited-term abandonment of sales of gas released by purchasing pipelines and the resale of that gas with pre-granted abandonment, pursuant to section 7 of the Natural Gas Act. These authorizations are being requested, effective immediately. Eligibility for these authorizations is limited to gas with a ceiling price in excess of the lawful price under NGPA section 109.

Any person desiring to be heard or to make any protest with reference to said application should, on or before June 10, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP77-192-002]

Northern Natural Gas Co., a Division of InterNorth, Inc.; Filing

June 2, 1986.

Take Notice that on May 23, 1986, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), tendered for filing to become a part of Northern Natural Gas Company's (Northern) F.E.R.C. Gas Tariffs, Original Volume No. 2:

Original Sheet No. 966a
First Revised Sheet No. 990

These sheets consist of supplements dated June 8, 1983 to Rate Schedule X-63, a Gas Exchange Agreement dated April 1, 1967 between Northern Natural Gas Company and Cabot Petroleum Corporation. The supplements add two additional delivery points to the agreement.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice & Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 9, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-12568 Filed 6-3-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI86-429-000]

Phillips Petroleum Co., Application

May 30, 1986.

Take notice that on May 16, 1986, Phillips Petroleum Company (Phillips) filed an application pursuant to sections 4 and 7 of the Natural Gas Act (NGA) and the provisions of 18 CFR Parts 154 and 157 (1) authorizing blanket limited-term abandonment; (2) authorizing blanket limited-term certificate for the resale of gas into interstate commerce; (3) authorizing pre-granted abandonment of sales for resale; and (4) authorizing limited-term transportation and pre-granted abandonment.

The authorizations requested therein will permit Phillips to respond expeditiously to the release of shut-in gas supplies resulting in greater market efficiency and savings to the consumer.

Specifically, Phillips requests the Commission to authorize:

(1) Blanket limited-term abandonment for a period of two years to permit sales for resale of NGA gas previously certificated by the Commission to the extent natural gas is released by the interstate pipelines or not currently subject to a valid written contract;

(2) Sales for resale natural gas subject to the NGA for which the maximum lawful price is higher than the NGPA Section 109 ceiling price;

(3) Sales for resale in interstate commerce without market limitations of NGA gas produced from interests attributable to Phillips and its joint interest owners.

(4) Pre-granted abandonment of any sale for resale pursuant to the blanket certificate issued herein;

(5) Sales for resale in interstate commerce, NGA gas subject to gas sales contracts which has been expired for three months or more and have not been renegotiated; and,

(6) That natural gas which is sold pursuant to authorizations therein, be transported by any willing transporter to effectuate the sale of gas.

Any person desiring to be heard or to protest with reference to said application should on or before June 16, 1986 file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a

protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing, therein must file a motion to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless Phillips is otherwise advised, it will be unnecessary for Phillips to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. ER86-380-000]

The Washington Water Power Co.; Filing

May 28, 1986.

Take notice that on May 21, 1986, The Washington Water Power Company (WWP) tendered for filing materials regarding Average System Cost (ASC) for the Washington and Idaho jurisdictions pursuant to its Residential Purchase and Sale Agreement with the Bonneville Power Administration. These materials include ASC for Washington and Idaho reflecting the revised methodology, and effective generally from October, 1984 to February, 1985, and ASC for Washington and Idaho based on increases in the costs of capital, investment, and operating expenses as approved by state regulatory commissions, and effective from February, 1985 to the present. Because WWP has deemed its ASC as being equal to the Bonneville Priority Firm rate, no residential exchange benefits currently accrue to them and this filing has no retail or wholesale rate effect.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 6, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180662; FRL-3024-4]

Emergency Exemptions; Fluazifop-butyl, etc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pest in the 9 States listed below. These exemptions, issued during the month of March, are subject to application and timing restrictions and reporting requirements designed to protect the environment to the maximum extent possible. Information on these restrictions is available from the contact persons in EPA listed below.

DATES: See each specific exemption for its effective dates.

FOR FURTHER INFORMATION CONTACT: See each specific exemption for the name of the contact person. The following information applies to all contact people:

By mail: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1806).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. California Department of Food and Agriculture for the use of fluazifop-butyl on garlic to control grasses; March 31, 1986 to July 1, 1986. (Jim Tompkins)

2. California Department of Food and Agriculture for the use of fluazifop-butyl on dry bulb onions to control barnyard and rabbitfoot grasses; March 17, 1986 to September 1, 1986. (Jim Tompkins)

3. California Department of Food and Agriculture for the use of metalaxyl on strawberries to control red stele disease; March 17, 1986 to November 30, 1986. (Jim Tompkins)

4. Colorado Department of Agriculture for the use of fenvalerate on winter wheat to control the pale western cutworm and/or the army cutworm in 24 Colorado counties; March 26, 1986 to June 30, 1986. (Jack E. Housenger)

5. Florida Department of Agriculture and Consumer Services for the use of avermectin on chrysanthemums, gypsophila, gerbera daisies, and snapdragons to control serpentine leafminers; March 12, 1986 to March 11, 1987. A notice of receipt was published in the Federal Register of February 18, 1986 (51 FR 6034), with no comments received. The rationale for issuance is based on:

a. There are no registered alternative pesticides which will provide adequte control of leafminers on ornamental flowers.

b. A significant economic loss my occur if a suitable pesticide is not made available. (Libby Pemberton)

6. Michigan Department of Agriculture for the use of fluazifop-butyl on dry bulb onions grown on muck soil to control grasses; March 27, 1986 to September 1, 1986. (Jim Tompkins)

7. Minnesota Department of Agriculture for the use of the active ingredients 6-(4-isopropyl-4-methyl-5-oxo-2-imidazoline-2-yl) methyl ester and 2-(4-isopropyl-4-methyl-5-oxo-2-imidazoline-2-yl) methyl ester on sunflowers to control wild mustard; March 14, 1986 to August 15, 1986. A notice of receipt was published in the Federal Register of January 8, 1986 (51 FR 779); issuance is based on:

a. No postemergent herbicides are registered for control of wild mustard in sunflowers. Other products tested for this use are economically unacceptable.

b. The potential loss of $4.1 million threatens the long-term financial viability of the sunflower industry in this State. (Libby Pemberton)

8. Montana Department of Agriculture for the use of fenvalerate on oats, barley, and wheat to control pale western cutworms and/or the army cutworm; March 20, 1986 to June 30, 1986. (Jack E. Housenger)

9. North Dakota Department of Agriculture for the use of the active ingredients 6-(4-isopropyl-4-methyl-5-oxo-2-imidazoline-2-yl) methyl ester and 2-(4-isopropyl-4-methyl-5-oxo-2-imidazoline-2-yl) methyl ester on sunflowers to control wild mustard; March 14, 1986 to August 15, 1986. A notice of receipt published in the Federal Register of January 2, 1986 (51 FR 60); issuance is based on:

a. No postemergent herbicides are registered for control of wild mustard in sunflowers. Other products tested for this use are economically unacceptable.

b. The potential loss of $7.9 million threatens the long-term financial

viability of the sunflower industry in this State. (Libby Pemberton)

10. South Dakota Department of Agriculture for the use of the active ingredients 6-(4-isopropyl-4-methyl-5-oxo-2-imidazoline-2-yl) methyl ester and 2-(4-isopropyl-4-methyl-5-oxo-2-imidazoline-2-yl) methyl ester on sunflowers to control wild mustard; March 14, 1986 to August 15, 1986. (Libby Pemberton)

11. Wisconsin Department of Agriculture, Trade, and Consumer Protection for the use of fluazifop-butyl on dry bulb onions grown on muck soil to control grasses; March 28, 1986 to September 1, 1986. (Jim Tompkins)

12. Wisconsin Department of Agriculture, Trade, and Consumer Protection for the use of iprodione on ginseng to control leaf and stem blight; March 25, 1986 to September 15, 1986. (Libby Pemberton)

Authority: 7 U.S.C. 136.

Dated: May 22, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

[FR Doc. 86-12377 Filed 6-3-86; 8:45 am]

BILLING CODE 6560-50-M

[OPP-00227; FRL-3024-3]

FIFRA Scientific Advisory Panel; Open Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: There will be a 2-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel to review the Office of Drinking Water's Draft Health Advisories for Fifteen Pesticide Chemicals. The meeting will be open to the public.

DATES: Wednesday and Thursday, June 25 and 26, 1986, from 8:30 a.m. to 5 p.m. each day.

ADDRESS: The meeting will be held at: Environmental Protection Agency, Rm. 1112, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT:

By mail: Stephen L. Johnson, Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (TS-766C), 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 1121, Crystal Mall, Building No. 2, Arlington, VA. (703-557-7695).

SUPPLEMENTARY INFORMATION: The agenda for the meeting is: Review of the Office of Drinking Water's Draft Health Advisories for the following 15 pesticide chemicals: alachlor, aldicarb, carbofuran, chlordane, 2,4-D, dibromochloropropane (DBCP), 1,2-dichloropropane, endrin, ethylene dibromide, heptachlor/heptachlor epoxide, lindane, methoxychlor, oxamyl, toxaphene, and 2,4,5-TP.

The Office of Drinking Water, through its Health Advisory Program, has been providing health effects guidance, along with technical assistance on analytical methodology and treatment techniques, to regional, State and local officials facing incidents of contamination of drinking water sources and supplies by chemicals for which no national drinking water standards existed. The Office of Drinking Water has prepared Draft Health Advisory documents dated September 30, 1985 for each of the 15 pesticide chemicals and has requested that the FIFRA Scientific Advisory Panel evaluate each of the Health Advisories for the 15 pesticide chemicals.

Health Advisories describe concentrations of contaminants in drinking water at which adverse non-carcinogenic effects would not be expected to occur. A margin of safety is included to protect senstive members of the population. Health Advisories are not legally enforceable Federal standards. They are subject to change as new and better information becomes available. To obtain copies of the Draft Health Advisory documents for specific substances please write to: Penelope Fenner-Crisp, Manager, Health Advisory Program, Criteria and Standards Division (WH-550), Environmental Protection Agency, Rm. E-1101C, 401 M St., SW., Washington, DC 20460, (202-382-7589).

Any member of the public wishing to submit written comments should contact Stephen L. Johnson at the address or telephone listed above to be sure that the meeting is still scheduled and to confirm the Panel's agenda. Interested persons are permitted to file such statements before the meeting. To the extent that time permits and upon advance notice to the Executive Secretary, interested persons may be permitted by the chairman of the Panel to present oral statements at the meeting. There is no limit on written comments for consideration by the Panel, but oral statements before the Panel are limited to approximately 5 minutes. Since oral statements will be permitted only as time permits, the Agency urges the public to submit written comments in lieu of oral presentations. All statements will be made part of the record and will be taken into consideration by the Panel. Persons wishing to make oral/written statements should notify the Executive Secretary and submit 10 copies of written comments and oral written testimony no later than June 16, 1986, in order to ensure appropriate consideration by the Panel.

Dated: May 23, 1986.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

[FR Doc. 86-12379 Filed 6-3-86; 8:45 am]

BILLING CODE 6560-50-M

[OPP-50657; FRL-3024-7]

Issuance of Experimental Use Permits; BASF Corp. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT

By mail: Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M. St., SW., Washington, DC 20460.

In person or by telephone: Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1800).

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

7969-EUP-21. Renewal. BASF Corporation Chemicals Division, 100 Cherry Hill Road, Parsippany, NJ 07054. This experimental use permit allows the use of 1,060 pounds of the herbicide sethoxydim on alfalfa to evaluate the control of grasses. A total of 1,060 acres are involved; the program is authorized only in the States of Arizona, California, Idaho, Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, Ohio, Oregon, Texas, Washington, and Wisconsin. The experimental use permit was previously effective from April 30, 1985 to April 30, 1986. The permit is now effective from May 5, 1986 to May 5, 1987. This permit is issued with the limitation that all treated crops are destroyed or used for research purposes only. (Robert Taylor, PM 25, Rm. 245, CM#2, (703-557-1800))

464-EUP-80. Issuance. Dow Chemical Company, 9008 Building, P.O. Box 1706, Midland, MI 48640. This experimental

use permit allows the use of 4,320 pounds of the herbicides 2,4–D and triclopyr on pastures and rangelands to evaluate the control of weeds. A total of 8,640 acres are involved; the program is authorized only in the States of Kentucky, Illinois, Iowa, Missouri, Ohio, Oregon, Pennsylvania, Washington, and West Virginia. The experimental use permit is effective from April 1, 1986 to March 31, 1988. A permanent tolerance for residues of the active ingredient in or on pasture grasses and rangelands has been established (40 CFR 180.142 and 180.417). (Robert Taylor, PM 25, Rm. 245, CM#2, (703–557–1800))

352–EUP–116. Extension. E.I. duPont deNemours & Company, Walkers Mill Building, Barley Mill Plaza, Wilmington, DE 19898. This experimental use permit allows the use of 298 pounds of the herbicide methyl 2-[[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)amino]carbonyl]sulfonyl]benzoate on forestry to evaluate the control of weeds. A total of 3,946 acres are involved; the program is authorized only in the of States of Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming. The experimental use permit is effective from May 6, 1986 to May 6, 1987. (Robert Taylor, PM 25, Rm. 245, CM#2, (704–557–1800))

352–EUP–133. Issuance. E.I. duPont deNemours & Company, Walkers Mill Building, Barley Mill Plaza, Wilmington, DE 19898. This experimental use permit allows the use of 1,125 pounds of the herbicides 4-amino-6-(1,1-dimethylethyl)-3-(methylthio)-1,2,4-triazine-5(4H)-one and ethyl 2-[[[[(4-chloro-6-methoxypyrimidin-2-yl)amino]carbonyl]amino]sulfonyl] benzoate on soybeans to evaluate the control of weeds. A total of 3,000 acres are involved; the program is authorized only in the States of Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. The experimental use permit is effective from April 30, 1986 to April 30, 1987. A permanent tolerance for residues of the active ingredient in or on soybeans has been established (40 CFR 180.332 and 180.439). (Robert Taylor, PM 25, Rm. 245, CM#2, (703–557–1800))

Persons wishing to review these experimental use permits are referred to the designated product manager. Inquires concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

Authority: 7 U.S.C. 136c.

Dated: May 22, 1986.

Issuance of Experimental Use Permits; Dow Chemical Co. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT:

By mail, the product manager cited in each experimental use permit at the address below: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person or by telephone: Contact the product manager at the following address at the office location or telephone number cited in each experimental use permit: 1921 Jefferson Davis Highway, Arlington, VA.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

464–EUP–85. Issuance. Dow Chemical Company, P.O. Box 1706, Midland, MI 48640. This experimental use permit allows the use of 750 pounds of the herbicide 2-(3,5-dichlorophenyl)-2-(2,2,2-trichloroethyl)oxirane on grain sorghum to evaluate the control of broadleaf weeds and grasses. A total of 1,950 acres are involved; the program is authorized only in the States of Alabama, Arkansas, Kansas, Missouri, Nebraska, Oklahoma, and Texas. The experimental use permit is effective from April 9, 1986 to April 9, 1988. A temporary tolerance for residues of the active ingredient in or on grain sorghum has been established. (Robert Taylor, PM 25, Rm. 245, CM#2, (703–557–1800))

352–EUP–126. Extension. E.I. duPont de Nemours and Company, Inc., Walkers's Mill Building, Barley Mill Plaza, Wilmington, DE 19898. This experimental use permit allows the use of 259 pounds of the fungicide 1-[[bis(4-fluorophenyl) methylsilyl]methyl]-1H-1,2,4-triazole on apples to evaluate the control of apple scab, cedar and apple rust, and powdery mildew. A total of 660 acres are involved; the program is authorized only in the States of California, Illinois, Indiana, Michigan, New Jersey, New York, North Carolina, Ohio, Oregon, Pennsylvania, Virginia, Washington, West Virginia, and Wisconsin. (Henry Jacoby, PM 21, Rm. 245, CM#2, (703–557–1900))

352–EUP–127. Extension. E.I. duPont de Nemours and Company, Inc., Walker's Mill Building, Barley Mill Plaza, Wilmington, DE 19898. This experimental use permit allows the use of 120 pounds of the fungicide 1-[[(bis(4-fluorophenyl) methylsilyl]methyl]-1H-1,2,4-triazole on grapes to evaluate the control of black rot and powdery mildew. A total of 480 acres are involved; the program is authorized only in the States of Arizona, California, Michigan, Missouri, New York, Ohio, Oregon, Pennsylvania, and Washington. This permit and the one above are effective from April 7, 1986 to April 7, 1987. Both permits are issued with the limitation that all treated crops are destroyed or used for research purposes only. (Henry Jacoby, PM 21, Rm. 245, CM#2, (703–557–1900))

352–EUP–135. Issuance. E.I. duPont deNemours and Company, Inc., Walker's Mill Building, Barley Mill Plaza, Wilmington, DE 19898. This experimental use permit allows the use of 50 ounces of the herbicide methyl 3-[[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)amino]carbonyl]amino]sulfonyl]-2-thiophenecarboxylate on soybeans to evaluate the control of various weeds. A total of 100 acres are involved; the program is authorized only in the States of Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. The experimental use permit is effective from April 7, 1986 to April 7, 1987. This permit is issued with the limitation that all treated crops are destroyed or used for research purposes only. (Robert

Taylor, PM 25, Rm. 245, CM#2, (703–557–1800))

748–EUP–18. Extension. PPG Industries, Inc., One PPG Place, Pittsburgh, PA 15272. This experimental use permit allows the use of 40 pounds of the herbicide 1-(carboethoxy)ethyl 5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate on soybeans to evaluate the control of broadleaf weeds. A total of 200 acres are involved; the program is authorized in the States of Alabama, Arkansas, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Virginia, and Wisconsin. The experimental use permit is effective from May 1, 1986 to May 1, 1987. This permit is issued with the limitation that all food or feed derived from the experimental use will be destroyed or used for research purposes only. (Richard Mountfort, PM 23, Rm. 237, CM#2, (703–557–1830))

201–EUP–79. Issuance. Shell Oil Company, 1025 Connecticut Ave. NW., Washington, DC 20036. This experimental use permit allows the use of 10,000 pounds (5,000 pounds each year) of the herbicide 1-methyl-4-(1-methylethyl)-2-Exo[(2-methylphenyl)-methoxy]-7-oxabicyclo[2.2.1.]heptane on cotton, peanuts, and soybeans to evaluate the control of annual grasses and broadleaf weeds. A total of 10,000 acres (5,000 acres each year) are involved; the program is authorized in the States of Alabama, Arizona, Arkansas, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. The experimental use permit is effective from April 4, 1986 to April 4, 1988. A temporary tolerance for residues of the active ingredient in or on cotton, peanuts, and soybeans has been established. (Robert Taylor, PM 25, Rm. 245, CM#2, (703–557–1800))

11273–EUP–44. Issuance. Zoecon Corporation, 975 California Ave., Palo Alto, CA 94304. This experimental use permit allows the use of 837 pounds of the herbicide norflurazon on peanuts to evaluate the control of various grasses and broadleaf weeds. A total of 620 acres are involved; the program is authorized only in the States of Alabama, Georgia, North Carolina, Oklahoma, South Carolina, and Texas. The experimental use permit is effective from April 9, 1986 to April 9, 1988. A temporary tolerance for residues of the active ingredient in or on peanuts has been established. (Richard Mountfort, PM 23, Rm. 237, CM#2, (703–557–1830))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

Pesticide Tolerance Petitions; Nor-Am Chemical Co.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Nor-Am Chemical Co. has submitted to EPA pesticide and feed additive petitions proposing to establish tolerances for residues of the insecticide 3,6-bis-(2-chlorophenyl)-1,2,4,5-tetrazine (referred to in this document as "clofentezine") in or on certain agricultural commodities.

ADDRESS: By mail, submit comments identified by the document control number [PF–459] and the petition number, attention Product Manager (PM–12), at the following address:

Information Services Section (TS–757C), Program Management and Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

In person, bring comments to: Information Services Section (TS–757C), Environmental Protection Agency, Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed in response to this notice will be available for public inspection in the Information Services Section office at the address given above, from 8 a.m., to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Jay Ellenberger, (PM–12), Registration Division (TS–767C), Environmental Protection Agency, Office of Pesticide Programs, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Room 202, CM#2, 1921 Jefferson Davis Hwy., Arlington, VA, (703–557–2386).

SUPPLEMENTARY INFORMATION: EPA has received pesticide (PP), and feed additive petitions (FAP), from Nor-Am Chemical Co., 3509 Silverside Rd., P.O. Box 7495, Wilmington, DE 19803, relating to the establishment of tolerances for residues of the insecticide clofentezine in or on certain agricultural commodities as follows:

Petition identity	CFR affected	Commodities	Part per million (ppm)
PP 6F3282	40 CFR Part 180.	Apples	0.15
		Meat	0.05
		Meat byproducts	0.05
		Milk	0.01
		Poultry, poultry byproducts	0.05
FAP 6H5500	21 CFR Part 561.	Apple pomace (dry).	1.0

The proposed analytical method of determining residues is gas chromatography.

Authority: 21 U.S.C. 346a and 348

Dated: May 22, 1986.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

Pesticide Registration Standards; Availability for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability of Proposed Standard for Comment.

SUMMARY: This notice announces the availability of certain proposed pesticide Registration Standard

documents for comment. The Agency has completed a review of each listed pesticide and is making available a document describing its regulatory conclusions and actions.

DATE: Written comments on each Registration Standard should be submitted on or before August 4, 1986.

ADDRESSES: Three copies of comments identified with the docket number listed with each Registration Standard should be submitted to:

By Mail: Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460

In person, deliver comments to: Rm 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment in response to this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public docket. Information not marked confidential will be inlcuded in the public docket without prior notice. The public docket and indices to the public dockets are available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: To request a copy of a Registration Standard, to request information concerning the public dockets, or to request indices to the public dockets, contact Frances Mann of the Information Services Section, in Rm. 236 at the address given above (703–557–3262). Requests should be submitted no later than July 7, 1986 to allow sufficient time for receipt before the close of the comment period.

For technical questions related to each Registration Standard, contact the Product Manager listed for that Standard, at the phone number given.

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency conducts a systematic review of pesticides to determine whether they meet the criteria for continued registration under section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). That review culminates in the issuance of a Registration Standard, a document describing the Agency's regulatory conclusions and positions on the continued registrability of the pesticide. In accordance with 40 CFR 155.34(c), published in the Federal Register of November 27, 1985 (50 FR 48908), before issuing certain Registration Standards, the Agency makes the proposed document available for public comment.

Proposed Registration Standards for the following pesticides are now available:

Name of pesticide	Docket No.	Contact person
1. Paraquat dichloride	1910-43-6	Robert Taylor, Product Manager 25, (703-557-1800).
2. Benomyl	17804-35-2	Henry Jacoby, Product Manager 21, (703-557-1900).
3. Thiophanate methyl	23564-25-08	Henry Jacoby, Product Manager 21, (703-557-1900).

Copies of each Registration Standard may be obtained from the Agency at the address listed under "FOR FURTHER INFORMATION CONTACT." Because of the length of each Standard and the limited number of copies available for distribution, only one copy can be provided by mail to any one individual or organization. Each Registration Standard is also available for inspection and copying in EPA Regional Offices at the addresses listed below after July 7, 1986.

List of EPA Regional Offices

Pesticides Branch, EPA—Region I, JFK Federal Building, Boston, MA 02203, Contact person: Andrew Triolo

Pesticides Branch, EPA—Region II, Woodbridge Avenue, Edison, NJ 08837, Contact person: Dave Andreassen

Ocean Dumping Program—Final Determination To Deny a Research Permit for the Incineration of Chemical Wastes at Sea

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The U.S. Environmental Protection Agency has determined that it is not currently necessary to conduct a research burn at sea pursuant to its Incineration-at-Sea Research Strategy and is therefore denying the application for Chemical Waste Management, Inc. (CWM), Oak Brook, Illinois, for the Vulcanus II (the Applicant), for a permit to perform that research. The Agency made a tentative determination to issue the proposed research permit on December 18, 1985. After reviewing the public comments filed on this tentative determination and the Hearing Officer's recommendations based on those comments, the Agency has decided not to issue a research permit until the Agency promulgates its proposed Ocean Incineration Regulations.

DATE: Any request for an adjudicatory hearing for a review of the Agency's determination to deny issuance of the permit must be filed pursuant to 40 CFR 222.10(a) within ten days of the publication of this determination at the address listed below.

ADDRESS: Requests for adjudicatory hearings may be sent to: Tudor Davies, Director, Office of Marine and Estuarine Protection [WH-556M], Environmental Protection Agency, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Lisa Barrera, (202) 382-5410.

SUPPLEMENTARY INFORMATION:

I. Legal Authority

In enacting the Marine Protection, Research, and Sanctuaries Act (MPRSA or the Act) of 1972, as amended (33 U.S.C. 1401 *et seq.*) Congress authorized the EPA to permit the dumping (including incineration) of waste materials in ocean waters. In addition, Congress in 1981 enacted section 2 of Pub. L. 96-572 (33 U.S.C. 1412a(b)) specifically authorizing EPA to issue permits for research if the Agency determines, among other things:

(1) [T]hat the proposed dumping [incineration] is necessary to conduct research—

(A) On new technology related to ocean dumping [incineration], or

(B) To determine whether the dumping [incineration] of such substance will unreasonably degrade or endanger human health, welfare, or amenities, or the marine environment, ecological systems, or economic potentialities.

EPA initially implemented the statutory requirements of the MPRSA through the Ocean Dumping Regulations which the Agency promulgated in 1977. 40 CFR Subchapter H. Although EPA has in the past permitted both ocean dumping and ocean incineration programs pursuant to these regulations, the Agency decided in May 1984 to defer the issuance of any operational ocean incineration permits until the Agency developed regulations with criteria more specifically related to the evaluation of ocean incineration activities. The Agency proposed those regulations on February 28, 1985, to modify the ocean dumping regulations as they apply to the incineration of liquid wastes at sea. The proposed regulations also would specifically implement the authority granted to the Agency in 1981 by Pub. L. 96–572, to issue research permits. EPA received over 900 public comments on the proposed regulations and is currently in the process of evaluating those comments. Final regulations will be promulgated at a future date.

II. Prior Incineration-at-Sea Permit Decisions

Since 1974, there have been four series of research burns conducted on organochlorine wastes. The first two series of burns were conducted in late 1974, early 1976, and 1977 in the Gulf of Mexico. A third series of burns followed late in 1977 when Herbicide Orange was incinerated in the Pacific Ocean west of Johnson Atoll. The last series of burns were conducted in 1981 and 1982 when liquid PCB wastes were incinerated at the Gulf Incineration Site under a research permit issued to Chemical Waste Management, Inc. (CWM), and Ocean Combustion Services, B.V.

CWM also submitted an application for a research permit on July 10, 1981, and an application for a research permit on November 2, 1981. On October 17, 1983, EPA made a tentative determination to issue the special and research permits to CWM. After reviewing the public comments and the Hearing Officer's Report, the Assistant Administrator for Water on May 23, 1984, issued a final determination not to issue either permit. The Assistant Administrator's decision was based, in part, on his determination that the Agency should develop specific criteria for regulating ocean incineration activities before issuance of operational permits.

The Assistant Administrator also concluded that there was a need to develop a comprehensive research strategy to verify available information related to the human health and environmental risks of ocean incineration. To that end, EPA prepared a draft research strategy that was discussed at public meetings on November 13, 1984 and December 18, 1984. After evaluating comments, the Agency published its "Incineration-at-Sea Research Strategy" on February 19, 1985. (Support Document G to Tentative Determination). The Research Stategy has both short and long-term goals. Initial research was intended to validate sampling and analytical protocols that would be used to obtain scientific information and to collect information on types and quantities of emissions from incineration, and potential exposure and biological effects of such emissions. The primary focus of the long-term research is to evaluate long-term human health and environmental effects of such emissions, the characteristics of a site which make it suitable for incineration, the effects of different incineration technologies on emissions and any resultant environmental effects from alternative technologies.

To implement its Research Strategy, the Agency developed a detailed "Proposed Incineration-at-Sea Research Burn Implementation Plan." EPA released a working draft of that Plan on May 6, 1985. (Support Document E to the Tentative Determination). The Plan describes in detail the sampling and analytical protocols that would be used in obtaining the various types of scientific information identified in the Research Strategy. The Agency thereafter entertained applications to conduct the research.

III. Basis for Agency's Tentative Determination to Issue CWM a Research Permit

On May 24, 1985, CWM filed an application for a permit to conduct research consistent with the Agency's Research Strategy. (Support Document D to the Tentative Determination). In the application, CWM stated that the "immediate need for a research permit is to provide additional physical, chemical, and biological information on incineration of liquid organohalogen materials at sea." CWM noted that "EPA has prepared a detailed plan for a research burn at sea" a portion of which "CWM is prepared to perform . . . under the supervision of EPA". *Id.* at 5. CWM also identified the "long-term need" for the permit as providing "additional information in respect to use of ocean incineration as a means of permanently destroying liquid organic hazardous waste." *Id.* The permit application proposed to burn up to 3,500 metric tons of polychlorinated biphenyl (PCB) waste on board the Vulcanus II. The Vulcanus II would be loaded with the waste materials in the Port of Philadelphia and burn the wastes at a site designated by EPA.

EPA made a tentative determination on December 16, 1985, to issue the research permit to authorize CWM "to participate in research activities that have been designated by the Agency." 50 FR 51360. The proposed permit would have authorized CWM to burn 706,958 gallons of fuel oil containing 10–30 percent PCBs over a 10-day period at the proposed North Atlantic Incineration Site, approximately 104 miles east of the mouth of the Delaware River.

IV. Public Hearing and Comments

During January 1986, four public hearings on the proposed permit were held. The dates of these hearings, the number of persons who registered and the number of persons who presented statements are summarized below:

Date	Location	Registration	Statements
Jan. 13, 1986	Philadelphia, PA	1,322	91
Jan. 16, 1986	Red Bank, NJ	661	69
Jan. 21, 1986	Wilmington, DE	164	31
Jan. 27, 1986	Ocean City, MD	798	162
Totals		2,845	257

By the close of the comment period on February 15, 1986, 1,644 persons, including those who made statements at the public hearings, had submitted comments to the Agency on the tentative detemination to issue the research permit. The Agency received submissions from members of Congress, Federal, state and local government agencies, governors, public interest and environmental organizations, industrial and labor organizations, professional societies and academia.

V. Hearing Officer's Report

In accordance with 40 CFR 222.6–222.8, a Presiding Officer (or Hearing Officer) was designated to conduct the public hearings, summarize all the public comments and make recommendations to the Assistant Administrator for Water relating to the

issuance, denial, or modification of the proposed research permit. On May 1, 1986, the Hearing Officer submitted his report.

The Hearing Officer's Report did not specifically recommend that the Agency issue, deny, or modify the permit but rather presented a series of recommendations related to policy, technical and legal issues that the Hearing Officer believed the Agency should carefully consider before proceeding with a research burn. The Hearing Officer's Report also noted many of the provisional elements of the ocean incineration program, the primary element being the "proposed, but not finalized," ocean incineration regulations. (Report at 5). A review of the public comments reveals that the concerns of many of the commenters about the transportation and incineration of liquid hazardous waste extend far beyond the more narrow statutory and regulatory criteria relevant to a decision on the issuance of a research permit. In his Report, therefore, the Hearing Officer summarized and discussed not only the adequacy of the draft permit, but these larger concerns as well. In general, the Report reflects the strong concerns expressed by a majority of the public commenters and many members of Congress that it is premature to issue a permit for a research burn at sea. In making its final determination, the Agency has considered the applicable statutory and regulatory criteria for permit issuance in light of the Hearing Officer's recommendations and the public comments.

VI. Basis for Determination to Deny the Permit

After a careful review of all the public comments and the Hearing Officer's Report, the Agency has decided that it is not currently necessary to perform the research outlined in its Research Strategy and therefore is denying the application for a research permit. The Hearing Officer's Report and his summary of the public comments clearly establish that the extensive number of issues raised during the public comment period are issues which the Agency should carefully consider before granting a permit for a research burn. Most of these issues previously have been raised by the public and currently are being considered by the Agency in the Agency's ongoing rulemaking process for development of comprehensive ocean incineration regulations. These issues include: establishing financial responsibility requirements and clarifying questions related to liability; addressing concerns related to the risks associated with land and marine transport; delineating factors to consider in the assessment of need; establishing criteria for consideration of an applicant's integrity; establishing requirements of contingency plans; addressing the issue of whether the Agency must prepare an environmental impact statement; addressing the need to finalize the designation of the North Atlantic Incineration Site; addressing the applicability of other federal statutes such as the Coastal Zone Management Act and the Endangered Species Act to a research permit; establishing appropriate sampling, analytical, and monitoring techniques; and establishing appropriate performance and operational standards.

The Agency believes that the more appropriate process for addressing and resolving these complex policy, technical and legal questions is through the Agency's ongoing rulemaking for development of comprehensive ocean incineration regulations. The Agency currently is reviewing and formulating decisions on the numerous issues raised in the rulemaking. Many of those issues relate directly to the appropriate procedures that should be followed in issuing any incineration permit and to the substantive requirements that should be imposed in such permits. The rulemaking proceeding offers the Agency a preferable forum in which to address and respond fully to the public concerns related to ocean incineration.

EPA recognizes that it initially proposed that research be conducted prior to the promulgation of ocean incineration regulations. That decision reflected the Agency's response to public concerns about the need to verify information gathered during the past burns regarding the effects of incineration on human health and the marine environment. The Agency, therefore, developed its Research Strategy. While information that would be developed pursuant to the Research Strategy would be useful in the development of ocean incineration regulations, the Agency does not believe such data is a necessary prerequisite to their issuance. Many of the most controversial issues related to the establishment of a permitting program are complex issues of policy and law that do not depend for resolution on the type of information intended to be gathered through the Research Strategy.

The Agency's decision that is not necessary to initiate implementation of its Research Strategy until after promulgation of the ocean incineration regulations removes any need for issuance of a research permit at this time. An essential finding required by 33 U.S.C. 1412a(b) (section 2 of Pub. L. 96-572) for issuance of a research permit is a finding of need. The Agency has determined that sufficient need does not exist at this time to warrant issuance of a research permit. EPA continues to support the goals of the Research Strategy and believes that the information intended to be gathered by the proposed research permit remains important to the development of an operating incineration program. However, such information can and should be obtained at a later date.

VII. Conclusion

The Agency intends to proceed at this time with development of the comprehensive ocean incineration regulations. Through this process, the Agency will carefully address and establish its position on the many issues identified in this decision. During this process the Agency will also work to better define the role of ocean incineration with respect to the Agency's hazardous waste management program. The Agency will continue with the development of its regulations and evaluation of ocean incineration because the Agency does not believe that existing information demonstrates that ocean incineration presents an unreasonable risk to human health or the environment. The Agency believes that ocean incineration offers a potentially valuable technology for disposal of this nation's increasing volumes of hazardous waste. However, if a research burn is to take place at sea, it will be after the Agency promulgates final ocean incineration regulations so that the public will know precisely how such an activity will be regulated.

The Agency will continue to work closely with all interested persons in the development of its ocean incineration regulations and any future research and operational program that may be instituted.

Dated: May 28, 1986.

Lawrence J. Jensen,

Assistant Administrator for Water.

Science Advisory Board; Radiation Advisory Committee; Open Meeting

Under Pub. L. 92-463, notice is hereby given that a meeting of the Science Advisory Board's Radiation Advisory Committee will be held at the U.S.

Environmental Protection Agency, Conference Room #4 South (on the Ground Floor, near the EPA Washington Information Center) Waterside Mall, 401 M Street SW., Washington, DC on June 20, 1986. The meeting will begin at 8:00 a.m. and adjourn no later than 6:00 p.m.

There are four major parts to the meeting. The Office Radiation of Programs will update the Committee on its Activities, particularly those relating to radon in indoor air. The Office of Environmental Engineering and Technology will present its research plan on the mitigation of radon in houses for review later this summer. The Radioepidemiology Subcommittee will report on its review of epidemiological work on radon in indoor air planned by the Office of Health Research. Graduate students from Carnegie-Mellon University will present a project on radon in indoor air.

The meeting is open to the public; however, seating is limited. Any member of the public wishing to attend or obtain information should contact Mrs. Kathleen Conway, Executive Secretary, or Mrs. Dorothy Clark, Staff Secretary, (A101–F) Radiation Advisory Committee, Science Advisory Board, by the close of business on June 17, 1986. The telephone number is (202) 382–2552.

Dated: May 28, 1986.

Kathleen Conway,
Acting Director, Science Advisory Board.

EXPORT-IMPORT BANK OF THE UNITED STATES

Advisory Committee of the Export-Import Bank of the United States; Meeting

SUMMARY: The advisory Committee was established by Pub. L. 98–181, November 30, 1983, to advise the Export-Import Bank on its programs and to provide comments for inclusion in the reports of the Export-Import Bank to the United States Congress.

TIME AND PLACE: Monday , June 23, 1986 from 9:30 a.m. to 12 noon. The meeting will be held in Room 1141, 811 Vermont Avenue, NW., Washington, DC 20571.

Agenda

The meeting agenda will include a discussion of Eximbank's Financial Report, objectives of Eximbank's reorganization, Charter renewal legislation update, Advisory Committee comments on 1985 Competitiveness Report, and foreign content issues.

Public Participation

The meeting will be open to public participation; and the last 20 minute will be set aside for oral questions or comments. Members of the public may also file written statement(s) before or after the meeting. In order to permit the Export-Import Bank to arrange suitable accommodations, members of the public who plan to attend the meeting should notify Joan P. Harris, Room 935, 811 Vermont Avenue, NW., Washington, DC 20571, (202) 566–8871, not later than June 18, 1986.

Further Information

For further information, contact Joan P. Harris, Room 935, 811 Vermont Avenue, NW., Washington, DC 20571, (202) 566–8871.

Bart Fassenden,
General Counsel.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Delegation of Authority With Respect to the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency, Federal Insurance Administration.

ACTION: Delegation of authority regarding community probation.

FOR FURTHER INFORMATION CONTACT: Frank Thomas, Assistant Administrator, Federal Emergency Management Agency, Federal Insurance Administration, 500 C Street SW., Washington, DC 20472, telephone (202) 646–2717.

Notice is hereby given that pursuant to 44 CFR 2.51, the Regional Directors are hereby authorized to exercise the authority set forth at 44 CFR 59.24(b). Under that section, the Regional Directors shall exercise all authorities and responsibilities involved in placing communities on and taking communities off probation status in the National Flood Insurance Program. The Federal Insurance Administrator shall retain responsibility for making the necessary adjustments to insurance rates for flood insurance policies covering properties located in affected communities.

This delegation supersedes all prior delegations of such authority.

EFFECTIVE DATE: This delegation shall be effective as of May 25, 1986.

Julius W. Becton, Jr.,
Director.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; American President Lines et al.

The Federal Maritme Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for

comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-010949.

Title: Container Stevedoring and Terminal Services Agreement between American President Lines, Ltd., Eagle Marine Services, Ltd., and Toyofuji Kaiun Kaisha, Ltd.

Parties:

American President Lines, Ltd. (Eagle)

Eagle Marine Services, Ltd. (Eagle)

Toyofuji Kaiun Kaisha, Ltd. (Carrier).

Synopsis: The proposed agreement would permit Eagle to provide container stevedoring and terminal services in behalf of Carrier's vessels berthed at terminal facilities separately arranged for by Carrier and located at the Port of Oakland, Middle Harbor Terminal, Berths C & D. The term of the agreement shall be for one (1) year, and automatically renewable for successive years. Carrier or Eagle may terminate the agreement at any time by giving the other 90 days' written notice. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Dated: May 30, 1986.

Tony P. Kominoth,

Assistant Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Arthur State Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 27, 1986.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Arthur State Bancshares, Inc.*, Union, South Carolina; to become a bank holding company by acquiring at least 80 percent of the voting shares of Arthur State Bank, Union, South Carolina.

2. *Chesnee State Bancshares, Inc.*, Chesnee, South Carolina; to become a bank holding company by acquiring at least 80 percent of the voting shares of Chesnee State Bank, Chesnee, South Carolina.

3. *Woodruff State Bancshares, Inc.*, Woodruff, South Carolina; to become a bank holding company by acquiring at least 80 percent of the voting shares of Woodruff, State Bank Woodruff, South Carolina.

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *First Brundidge Bancshares, Inc.*, Brundidge, Alabama; to become a bank holding company by acquiring 80 percent of the voting shares of The First National Bank of Brundidge, Brundidge, Alabama.

C. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Prairie Bankshares, Inc.*, Georgetown, Illinois; to acquire 100 percent of the voting shares of The First National Bank of Ogden, Ogden Illinois.

D. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Friendship Bancshares, Inc.*, Friendship, Tennessee; to become a bank holding company by acquiring at least 80 percent of the voting shares of Bank of Friendship, Friendship, Tennessee.

Board of Governors of the Federal Reserve System, May 29, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

First Wisconsin Corporation et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23 (a)(1) of the Board's Regulation Y (12 CFR 225.23 (a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843 (c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 25, 1986.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Wisconsin Corporation*, Milwaukee, Wisconsin; to engage *de novo* through its joint venture subsidiary Elan Life Insurance Company, Phoenix, Arizona, in the underwriting as reinsurer of credit life and credit accident and health insurance that is directly related to extensions of credit by the banking and nonbanking subsidiaries of Applicant pursuant to § 225.25(b)(9) of the Board's Regulation Y. The remaining interest in the joint venture will be acquired by CLICO Management, Inc., Springfield, Ohio, a wholly-owned subsidiary of The Credit Life Companies, Inc., Springfield, Ohio.

These activities will be conducted in the State of Wisconsin.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoening, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Brookwood Bancshares, Inc.*, Oklahoma City, Oklahoma; to engage directly in mortgage banking activities pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activities will be conducted in the State of Oklahoma.

Board of Governors of the Federal Reserve System, May 29, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Norwest Corporation et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than June 26, 1986.

A. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Norwest Corporation*, Minneapolis, Minnesota; to retain assets acquired from three Household Finance Corporation offices in Alaska and thereby engage in consumer finance, sales finance and commercial finance activities pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activities will be conducted in the State of Alaska.

B. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *AmeriWest Bancor, Inc.*, Phoenix, Arizona; to acquire Beeson, Inc., Scottsdale, Arizona, and thereby engage in management consulting to depository institutions pursuant to § 225.25(b)(11) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, May 29, 1986.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 86-12461 Filed 6-3-86; 8:45 am]

BILLING CODE 6210-01-M

WM Bancorp; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 26, 1986.

A. **Federal Reserve Bank of Richmond.** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *WM Bancorp*, Cumberland, Maryland; to become a bank holding company by the consolidation of GNB Bancshares, Oakland, Maryland, and LTC Bancorp, Cumberland, Maryland, and thereby indirectly acquire Garrett National Bank, Oakland, Maryland, and Liberty Bank of Maryland, Cumberland, Maryland.

Applicant has also applied to engage through its subsidiary Community Finance, Inc., Cumberland, Maryland, in consumer and commercial financial activities, including the extension of direct loans to consumers, the discount of retail and installment notes or contracts, the extension of direct loans to dealers for financing of inventory (floor planning) and to act as agent for the sale of life, accident and health insurance directly related to the extensions of credit through an agent arrangement pursuant to § 225.25(b)(1) and (b)(8)(i) of the Board's Regulation Y. These activities will be conducted in the State of Maryland.

Board of Governors of the Federal Reserve System, May 29, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Secretary's Private/Public Sector Advisory Committee on Catastrophic Illness; Advisory Committee Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet in 1986:

Name: Secretary's Private/Public Sector, Advisory Committee on Catastrophic Illness.

Date: June 19, 1986, 7:00 p.m. until 9:00 p.m.

Place: Humphrey Auditorium, 200 Independence Ave., SW., Washington, DC 20201.

Purpose: The purpose of the Private/Public Sector Advisory Committee on Catastrophic Illness will be to: (1) Solicit input from all interested parties regarding how government and the private sector can work together to address the problems of affordable insurance for catastrophic illness: and (2) Reflect periodically the views of the interested parties as well as the constituencies represented on the Committee regarding the report on catastrophic health care which the Secretary of Health and Human Services must submit to the Preisdent by the end of the year.

Agenda: The meeting of the Private/Public Sector Advisory Committee and the Health and Human Services Executive Advisory Committee will be an interim Report Session. The Private/Public Sector Advisory Committee will discuss major points and private sector inputs enunciated in the public forums. The Executive Advisory Committee will present a status report of what has been accomplished by midstudy. The Agenda will consist of: a welcome and opening remarks by James Balog, Chairman of the Private-Public Sector Advisory Committee; remarks from the Chairman of the Executive Advisory Committee and the Technical Work Groups; a review of purpose, scope and membership of the catastrophic illness study and discussion.

Anyone wishing to obtain a roster of members or other relevant information should write to or call Ms. Jean-Craft Comolli, Staff Director, Private/Public Sector Advisory Committee on Catastrophic Illness, or Ms. Nancy Hobbs, Public Forum Coordinator, 602E, Humphrey Building, 200 Independence Ave., SW., Washington, DC, (202) 245-2041.

Joseph Antos,
Vice Chairman, Executive Advisory Committee.

[FR Doc. 86-12561 Filed 6-3-86; 8:45 am]
BILLING CODE 4160-04-M

Secretary's Private/Public Sector Advisory Committee on Catastrophic Illness; Advisory Committee Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet in 1986:

Name: Secretary's Private/Public Sector, Advisory Committee on Catastrophic Illness.

Date: June 20, 1986, 9:00 a.m. until 4:00 p.m.

Place: Humphrey Auditorium, 200 Independence Ave., SW., Washington, DC 20201.

Purpose: The purpose of the Private/Public Sector Advisory Committee on Catastrophic Illness will be to: (1) Solicit input from all interested parties regarding how government and the private sector can work together to address the problems of affordable insurance for catastrophic illness: and (2) to reflect periodically the views of the interested parties as well as the constituencies represented on the Committee regarding the report on catastrophic health care which the Secretary of Health and Human Services must submit to the President by the end of the year.

Agenda: The forum of the Private/Public Sector Advisory Committee on Catastrophic Illness will consist of a welcome and opening remarks by Chairman James Balog and members of the Committee. Presenters will include:

The Honorable French Slaughter, Jr., U.S. House of Representatives
The Honorable David Dreier, U.S. House of Representatives
The Honorable Tarky Lombardi, New York State Senate
National Federation of Independent Businesses
Group Health Association
Peter Ferrara
National Association of Manufacturers
National Foundation for Long Term Care, National Medical Directors Association
American Association of Homes for the Aging
American Academy of Pediatrics
American Society of Internal Medicine
Oley Foundation
National Association of Children's Hospitals
Health Services, Inc.
American Nurses' Association
National Association of Rehabilitation Facilities
National Association of Social Workers
Maryland Office on Aging
Central Arkansas Area Agency on Aging
National Mental Health Association
Cancer Care, Inc.
Older Women's League
National Alliance for the Mentally Ill.

Anyone wishing to obtain information, a roster of members, or other relevant information should write to or call Ms. Jean-Craft Comolli, Staff Director, Private/Public Sector Advisory Committee on Catastrophic Illness, or Ms. Nancy Hobbs, Public Forum Coordinator, 602 E, Humphrey Building, 200 Independence Ave., SW., Washington, DC 20201, (202) 245-2041.

Joseph Antos,
Vice Chairman, Executive Advisory Committee.

BILLING CODE 4160-04-M

Centers for Disease Control

Grants for Centers for Research and Demonstration of Health Promotion and Disease Prevention

Program Announcement and Notice of Availability of Funds for Fiscal Year 1986

The Centers for Disease Control (CDC) announces that competitive grant applications are being accepted for centers for research and demonstration of health promotion and disease prevention, hereinafter referred to as "Prevention Centers." The Catalog of Federal Domestic Assistance number is 13.135.

Objectives

Recent biomedical and behavioral research has demonstrated new leads toward the causation and prevention of health problems. This new knowledge has emphasized the need for a broadened approach, utilizing many disciplines heretofore not part of the prevention team. There are also important evaluation questions and methodological issues affecting disease prevention and health promotion programs. The specific objectives are:

1. To stimulate and support academic-based centers for research and demonstration of health promotion and disease prevention.

2. To establish linkages, where applicable, between ongoing basic research in a wide array of fields and

applied research in disease prevention and health promotion.

3. To bring the knowledge and expertise of academic health centers to bear on practical public health problems.

4. To field test and rigorously evaluate for cost-effectiveness various methods and strategies for preventing unnecessary illness and promoting good health.

5. To shorten the time lag between the development of new and proven effective disease prevention and health promotion techniques and their widespread application.

Type of Assistance

The award instrument to be used resulting from this announcement will be grants.

Availability of Funds

In Fiscal Year 1986, $1,400,000 is available to fund two to four awards. The awards will range from approximately $250,000 to $700,000 with the average award being approximately $450,000.

Authority

This program is authorized under Section 1706 of the Public Health Service Act (42 U.S.C. 300u–5).

The grant administration policies of the Department of Health and Human Services and the Public Health Service are applicable to the Prevention Centers Program.

Eligibility Requirements

Eligible applicants are schools of medicine, schools of osteopathy, and schools of public health. Eligible applicants may enter into contracts, including consortia agreements (as described in the PHS Grants Policy Statement), as necessary to meet the essential requirements of this program, and to strengthen the overall application.

Essential Requirements:

Section 1706 of the PHS Act stipulates that a Prevention Center shall:

1. Be located in an academic health center with—

a. A multidisciplinary faculty with expertise in public health and which has working relationships with relevant groups in such fields as medicine, psychology, nursing, social work, education and business;

b. Graduate training programs relevant to disease prevention;

c. A core faculty in epidemiology, biostatistics, social sciences, behavioral and environmental health sciences, and health administration;

d. A demonstrated curriculum in disease prevention;

e. A capability for residency training in public health or preventive medicine.

2. Conduct—

a. Health promotion and disease prevention research, including retrospective studies and longitudinal prospective studies in population groups and communities;

b. Demonstration projects for the delivery of services relating to health promotion and disease prevention to defined population groups using, as appropriate, community outreach and organization techniques and other methods of educating and motivating communities; and

c. Evaluation studies on the efficacy of demonstration projects conducted under 2.b. above.

Other Characteristics:

A number of other characteristics, which are not specified by law, are desirable and will also be used in the evaluation of applications:

1. The availability of highly qualified professional staff to perform proposed activities with relevant experience in such fields as infectious and chronic diseases, injuries, occupational safety and health, environmental health, maternal and child health, international health, and health promotion and risk reduction;

2. The designation of a Director who is a recognized leader in health promotion and disease prevention, who has well-defined authorities and responsibilities, and who will devote sufficient time to accomplish the Prevention Center's objectives;

3. A continuing base of peer-reviewed projects or activities funded from other sources relevant to the goals of the prevention center and its central theme;

4. Demonstrated experience in successfully conducting and evaluating research, demonstration, and/or special projects relating to health promotion and disease prevention;

5. Commitment of the parent institution to the prevention center, so that the center will be recognized as a major element within the organizational structure; and manifested by various combinations of personnel, facilities, and activities funded from other sources;

6. Facilities and organizational arrangements that promote and foster collaboration among the staff and components of the prevention center;

7. A history of successful intramural cooperation among a variety of disciplines and, as appropriate, involving staff who will be part of the prevention center;

8. Effective working relationships with State and local health departments and other organizations (e.g., care providers, voluntary organizations, etc.) whose active support and participation are essential to successful implementation of proposed activities.

9. Effective mechanisms for linking prevention center activities with public health and biomedical and behavioral researchers and with recognized experts in proposed areas of emphasis;

10. Relevant data and experience for rigorously evaluating the efficacy and cost benefits of demonstrations and other center activities requiring rigorous evaluation; and

11. Plans for the establishment of a health promotion and disease prevention advisory committee or other suitable mechanisms for obtaining input from a variety of perspectives on the major aspects of the prevention center program.

12. Plans to become self-sustaining.

Applications

1. Copies—Place of Submission

Applications should be submitted on Form PHS–398 (revised May 1982). Applications should also adhere to the Errata to the Instruction Sheet for PHS–398 contained in the Grant Application Kit. The original and two copies of the application must be submitted on or before July 14, 1986, to the: Grants Management Officer, Procurement and Grants Office, Centers for Disease Control, 255 E. Paces Ferry Road, NE., Room 321, Atlanta, Georgia 30305.

Application kits are available from the CDC Grants Management Officer.

An applicant organization has the option of having specific salary and fringe benefit amounts for individuals omitted from the copies of the application that are made available to outside reviewing groups. If the applicant elects to exercise this option, use asterisks on the original and two copies of the application to indicate those individuals for whom salaries and fringe benefits are being requested; the subtotals must still be shown.

In addition, submit an additional copy of page four of Form PHS–398, completed in full with the asterisks replaced by the amount of the salary and fringe benefits requested for each individual listed. This budget page will be reserved for internal CDC staff use only.

2. Deadlines

Applications shall be considered as meeting the deadline if they are either:

a. Received at the above address on, or before, the deadline date, or

b. Sent on, or before, the deadline date and received in time for submission to the peer review committee. (Applicants should request a legibly-dated U.S. Postal Service postmark or obtain a legibly-dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing).

3. Late Applications

Applications which do not meet the criteria in either paragraph 2. a. or b. immediately above are considered late applications and will not be considered in the current competition and will be returned to the applicant.

4. Reviews

Applications are not subject to the review requirements of the National Health Planning and Resource Development Act of 1974 as amended (42 CFR parts 122 and 123), and are not subject to Inter-Governmental Review pursuant to Executive Order 12372.

5. Content of Application

Applications must include a narrative which details the following information:

a. The proposed theme for the center. Whether the proposed theme is broadly conceived or narrowly focused on one or a few closely related areas, activities to be conducted in conjunction with the center's theme should be clearly explained in terms of overall thrust, areas of emphasis, need, scientific basis, expertise, expected interactions, and anticipated outcomes.

While creativity and flexibility in selecting a theme are essential to stimulating innovative approaches and interactions, the center's proposed theme should be consistent with the Nation's health priorities or emerging health needs as defined by, "Promoting Health/Preventing Disease: Objectives For the Nation" (Department of Health and Human Services, 1980). In selecting a theme, applicants should also consider:

(1) The leading causes of preventable illness/injuries, premature death, and medical expenditures in the nation as a whole, as well as identified target populations; and/or

(2) Major cross-cutting issues affecting current or future health promotion and disease prevention efforts in the United States. The proposed theme should also reflect the interests and capabilities of the applicant and the health needs of community groups involved.

b. Clearly defined and measurable objectives consistent with the applicant's proposed theme and activities and the goals of the National program outlined under the Objectives section of this document. The center's proposed theme and objectives should likewise promote clarity of purpose and facilitate integration of center activities into a conceptual whole.

c. A detailed program plan describing the means by which the center's objectives will be achieved. The program plan must include a description of multidisciplinary interactions, developmental research, formal studies, community demonstrations, and shared expertise. For this purpose of this announcement, these terms are defined as:

(1) "Multidisciplinary interactions" means such investigations, surveys, literature searches, dialogues, assessments, initiatives, and other intramural or extramural activities as the applicant may propose in order to clearly explain, nurture, and further delineate specific needs and opportunities for furthering the aims of the prevention center program. The need for such interactions and now they will contribute to the center's objectives must be clearly defined.

(2) "Developmental research" means that series of steps leading to the development of specific studies or research projects. In addition to determining the need for further scientific research and methods development, developmental research includes identifying and synthesizing available scientific evidence or data about a specific health problem, population group, or health care setting. Applicants must clearly define the areas to be investigated and the methods to be used. The need for developmental research and how it will contribute to the center's objectives must be clearly defined.

(3) "Formal study" means an identified research project which is intended and designed to establish, discover, develop, clarify, or confirm information on the underlying mechanisms relating to a specific health problem, population group or health care setting. In the context of this program, formal studies include research on methods, retrospective studies and longitudinal prospective studies in defined populations, and controlled intervention trials. Proposed studies must adhere to the scienfitic method and fall within the framework of the Public Health Service's definition of "prevention research" as defined in (6) below. Grant funds cannot be used to support "prevention-relevant research" as defined in (7) below. The need for new studies, their contribution to the center's objectives, and the relevancy of ongoing studies conducted by core-faculty must be clearly defined.

(4) "Community demonstration" means a time-limited project aimed at testing the public health impact of an unproven intervention in remedying or reducing the underlying causes and/or influencing factoe of one or more preventable health problems in a well-defined community or target population. Testing the public health impact of a trial intervention, method, or approach on a community basis requires rigorous evaluation as well as quality control. The scientific basis and projected cost benefit of the intervention must be clearly delineated in the application along with a clear statement of the problem and methdology. Such demonstrations must also be consistent with the Public Health Service definition of "preventation research" as defined in (6) below. The need for each identified community demonstration and how it will contribute to the center's objectives must be clearly defined.

(5) "Shared expertise" means consultation to government public health agencies and other organizations in planning and evaluating health promotion and disease prevention activities matching the center's capabilities and theme. The mechanisms for offering such assistance, particularly as it relates to designing and/or conducting formal evaluations, and how it will enhance the center's objectives must be clearly defined.

(6) "Prevention research" includes only that research designed to yield results directly applicable to interventions to prevent occurrence of disease or disability, or progression of detectable but asymptomatic disease.

(a) Pre-intervention:

—Identification of risk factors for disease or disability.

—Development of methods for identification of disease controllable in the asymptomatic stage.

—Refinement of methodological and statistical procedures for quantitatively assessing risk and measuring the effects of preventive interventions.

(b) Intervention:

—Development of biologic interventions to prevent occurrence of disease or disability, or progression of asymptomatic disease.

—Development of environmental interventions to prevent occurrence of disease or disability, or progression of asymptomatic disease.

—Development of behavioral interventions to prevent occurrence of disease or disability, or progression of asymptomatic disease.

—Conduct of clinical and community trials and demonstrations to assess preventive interventions and to encourage their adoption.

Some interventions may be applicable to primary prevention as well as to disease treatment (e.g., diet and exercise as components of rehabilitation for coronary heart disease). Research into such intervention is considered prevention research.

(7) "Prevention-relevant research" includes that research which has a high probability of yielding results which will likely be applicable to disease prevention. Included are studies aimed at clearly explaining the chain of causation—the etiology and mechanism—of acute and chronic diseases. Such basic research efforts generate the fundamental knowledge which contributes to the development of future preventive interventions.

Applicants have broad flexibility in determining the appropriateness, scope and blend of these and other proposed activities, but at least twenty-five (25) percent of the center's resources must be allocated to defined formal studies/research projects and community demonstration as defined in parts c.(3) and c.(4) above. The need for such "other activities" that the applicant may consider necessary to accomplish its stated objectives must also be clearly defined along with expected outcomes.

d. A method of evaluation aimed at monitoring progress in meeting the center's objectives.

e. A description of the center director's role and authority relative to staffing the prevention center, coordination of effort, and control over center space and equipment.

f. A description of the core faculty and its role in implementing and evaluating the proposed program. Whether paid from the grant or other sources, the core faculty must include full or part-time faculty in epidemiology, biostatistics, social sciences, behavioral sciences, environmental health sciences, and one of the health disciplines which addresses the administration of health programs. The applicant may also include as a part of the core faculty other disciplines (e.g., health economics, biomedical ethics, occupational safety and health, health law, health education, medicine, and nursing) as needed to achieve the center's proposed objectives.

g. A list of staff, including the center director and core faculty, who are expected to participate in the center, including titles, tenure status, areas of expertise, and the amount of time devoted to each component of the proposed program, and whether paid from the grant or other sources.

h. A list of relevant current funded and/or pending grants and/or contracts for the core faculty (PHS 398, "Other Support") under part e. above. For each grant or contract include:

(1) Source of funds;
(2) Amount of funding;
(3) Identifying numbers;
(4) Whether funded or pending;
(5) Date of funding, initiation, and termination; and
(6) Relationship to the center's proposed theme, objectives and implementation plan.

i. Documentation of the involvement of appropriate public health agencies, care providers, community organizations, and other interested parties, including letters of support and a clear statement of their role, if applicable.

j. A description of how the applicant plans to obtain continuing input and advice from a variety of perspectives (e.g. scientists, public health officials, primary care providers, voluntary health organizations, and consumers) as counsel is needed, to maximize participation and "ownership" in prevention center activities and to obtain resources from other sources. Toward this end, applicants may establish an advisory committee or use other mechanisms suitable to their needs.

k. Documentation of the source, allocation and planned full use of State, local government, foundation, or institutional funds made available to the center and an indication of the discretion which the center has with these funds.

l. Charts showing the proposed organizational structure of the center and its relationship to the applicant institution and, where applicable, to affiliated institutions or collaborating organizations.

m. A detailed budget for the prevention center.

n. In regard to the Research Plan, instructions apply to community demonstration projects as well as formal research studies.

o. In citing preliminary studies or prior findings, the six phases of prevention research and demonstrations are:

(1) Hypothesis development;
(2) Methods development;
(3) Controlled intervention trials;
(4) Defined population studies;
(5) Demonstrations; and
(6) Wide-scale application of successful results.

The phase(s) to be conducted should be clearly delineated.

p. For community demonstration projects, also describe the scientific strength of the proposed interventions; the target population; projected cost benefits; data gathering activities and evaluations procedures; and possible future strategies for wide-scale application of the results if the specific aims of the project are accomplished.

q. Plans to become self-sustaining.

6. Review Criteria

Applications will be reviewed and evaluated by a dual review process.

a. A *peer review* will be conducted on all applications. The review process may include a site visit. Applications will be reviewed and evaluated in the peer review based on the evidence submitted which specifically describes the applicant's ability to meet the following criteria:

(1) The degree to which the applicant satisfies the essential requirements described under Eligibility Requirements section of this document.

(2) The degree to which the applicant possesses Other Characteristics described under Eligibility Requirements section of this document.

(3) The quality of the program's measurabale objectives and the overall match between the applicant's proposed theme, activities, and objectives and the goals of the National program.

(4) The scientific merit of the overall application relative to the types of research, demonstration, and other activities proposed.

(5) The need for, significance of, proposed studies and demonstrations, such that at least 25 percent of the grant award will be directed toward the conduct of defined formal studies/research projects and community demonstrations.

(6) The adequacy of the methods for coordinating the overall program and its components and the consistency of proposed activities with the Public Health Service's definition of "prevention research."

(7) The adequacy of the methods for evaluating achievement of the program's measureable objectives.

(8) Overall qualifications, adequacy, and appropriateness of personnel to accomplish proposed activities.

(9) The degree of commitment by the parent institution as manifested by the organizational status of the prevention center and combinations of center personnel, facilities and activities funded from other sources, and the likelihood that this commitment will be sustained or expanded in future years.

(10) The degree of commitment and cooperation manifested by other

interested parties, including State and local health departments, and community organizations where applicable. The degree of this commitment will also be measured by the likelihood that it will be sustained or expanded in future years.

(11) The reasonableness of the proposed budget in relation to the proposed program.

b. A *secondary review* of all applications will be conducted by a CDC committee based on:

(1) The results of the peer review.

(2) The significance of proposed prevention center activities, including areas of emphasis for research and demonstration.

(3) National needs and geographic balance.

(4) Balance between multi-disciplinary interactions, research projects, community demonstrations, and other proposed activities.

(5) Budgetary considerations.

(6) Plans to become self-sustaining.

7. Awards

Awards will be made based on priority score ranking, secondary review, availability of funds, and such other significant factors deemed necessary and appropriate by the Director, CDC.

Information

Information on application procedures, copies of application forms, and other material may be obtained from Betty Feeley, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE., Room 321, Atlanta, Georgia 30305, or by calling (404) 262-6575 or FTS 236-6575.

Technical assistance may be obtained from Tom G. Ortiz, Acting Director, Center for Professional Development and Training, Centers for Disease Control, Atlanta, Georgia 30333, or by calling (404) 262-6071 or FTS 236-6071.

Dated: May 30, 1986.

Donald R. Hopkins,

Deputy Director, Center for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

Blood Products Advisory Committee; Notice of Renewal

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces the renewal of the Blood Products Advisory Committee by the Secretary of Health and Human Services. This notice is issued under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)).

DATE: Authority for this committee will expire on May 13, 1988, unless the Secretary formally determines that renewal is in the public interest.

FOR FURTHER INFORMATION CONTACT: Richard L. Schmidt, Committee Management Office (HFA-306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2765.

Dated: May 29, 1986.

John M. Taylor,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 86-12601 Filed 6-3-86; 8:45 am]

BILLING CODE 4160-01-M

[Docket No: 86G-0066]

Gattefosse Etablissements; Filing of Petition for Affirmation of Gras Status

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a petition (GRASP 6G0306) has been filed on behalf of Gattefosse Etablissements proposing to affirm that glyceryl behenate is generally recognized as safe (GRAS) as an excipient in food prepared as tablets.

DATE: Comments by August 4, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lawrence J. Lin, Center for Food Safety and Applied Nutrition (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-426-8950.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))) and the regulations for affirmation of GRAS status in § 170.35 (21 CFR 170.35), notice is given that a petition (GRASP 6G0306) has been filed on behalf of Gattefosse Etablissements, 36 Chemin de Genas, Saint Priest, France, proposing to affirm that glyceryl behenate is GRAS for use as an excipient in food prepared as tablets.

The petition has been placed on display at the Dockets Management Branch (address above).

Any petition that meets the format requirements outlined in § 170.35 is filed by the agency. There is no prefiling review of the adequacy of data to support a GRAS conclusion. Thus, the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for GRAS affirmation.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the Federal Register in accordance with 21 CFR 25.40(c), as published in the Federal Register of April 26, 1985 (50 FR 16636).

Interested persons may, on or before August 4, 1986, review the petition and/or file comments (two copies, identified with the Docket number found in brackets in the heading of this document) with the Dockets Management Branch (address above). Comments should include any available information that would be helpful in determining whether the substance is, or is not, GRAS. A copy of the petition and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: May 15, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 86-12468 Filed 6-3-86; 8:45 am]

BILLING CODE 4160-01-M

Social Security Administration

Issuance of Social Security Acquiescence Rulings

AGENCY: Social Security Administration, HHS.

ACTION: Notice.

SUMMARY: As of April 30, 1986, the Social Security Administration (SSA) had issued 14 Social Security Acquiescence Rulings which are available to the public. Social Security Acquiescence Rulings are published under the authority of the Commissioner of Social Security. They are effective upon the date of publication. As additional Social Security Acquiescence Rulings are issued, we will periodically publish a notice to that effect in the Federal Register.

These rulings explain the manner in which SSA applies decisions of the United States Courts of Appeals, which

conflict with SSA policy, in adjudicating claims under title II and title XVI of the Social Security Act and Part B of the Black Lung Benefits Act.

Included in this notice are the following rulings which are available to the public.

AR 86-1(9)

Effective Date: January 23, 1986.

Summy v. *Schweiker*, 696 F.2d 1233 (9th Cir. 1982); Third party payments for medical care or services—Title XVI of the Social Security Act.

Issue

Whether the payment adjustment made by the Veterans Administration (VA) under its pension program in recognition of past unusual medical expenses qualifies as a third-pary payment for medical care or services, and therefore, does not constitute income under the Supplement Security Income (SSI) program.

Explanation of How SSA Will Apply the Decision Within the Circuit

The ruling applies only to cases where the individual resides in Washington, Idaho, Montana, California, Oregon, Nevada, Arizona, Alaska Hawaii, or the Northern Mariana Islands at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review.

When a case involves an individual who has received an additional pension or compensation payment from the VA as a result of unreimbursed medical expenses, the additional pension or compensation payment from the VA is not income for SSI purposes.

AR 86-2(2)

Effective Date: January 23, 1986.

Rosenberg v. *Richardson*, 536 F.2d 487 (2d Cir. 1976);

Capitano v. *Secretary of HHS*, 732 F. 2d 1066 (2d Cir. 1984) Entitlement of a Deemed Widow When a Legal Widow is Entitled on the Same Earning Record Title II of the Social Security Act.

Issue

Whether a "deemed widow" may be found entitled to Title II survior Social Security benefits when a legal widow is entitled to Title II survivor Social Security benefits on the same deceased person's Social Security earnings record and, if so, what is the appropriate amount of the "deemed widow's" benefits? This ruling also applies to widowers.

Explanation of How SSA Will Apply the Decision Within the Circuit

The ruling applies only to cases where the deemed widow resides in Connecticut, New York or Vermont at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review.

When a case involves a legal widow and a deemed widow as defined in 20 CFR 404.345 and 404.346(a), both have filed widow's claims on the same worker's earnings record and the legal widow is found entitled to receive less than a "full" widow's benefit, for whatever reason, the difference between the benefit amount the legal widow is entitled to receive and the amount of the full benefit will be paid to the deemed widow, subject to any reductions applicable to the deemed widow. As in any case involving auxiliary benefits, the family maximum cannot be exceeded.

AR 86-3(5)

Effective Date: January 23, 1986.

Martinez v. *Heckler*, 735 F.2d 795 (5th Cir. 1984) Disability Program—Individuals Who Are Illiterate and Unable to Communicate in English—Titles II and XVI of the Social Security Act.

Issue

Whether the Social Security disability vocational rules applicable to individuals who are illiterate or unable to communicate in English are applicable to individuals who are illiterate *and* unable to communicate in English.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only to cases in which the individual resides in Texas, Mississippi or Louisiana at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review. For such individuals seeking disability benefits or continuation of disability benefits under title II or title XVI, when illiteracy and inability to communicate in English are alleged or appear to be in question, findings with respect to both issues must be made. Where individuals limited to sedentary work, age 18 to 44 with unskilled or no work history are found to be both illiterate *and* unable to communicate in English, the lowest category of the grid regulations [20 CFR Part 404 Subpart P, Appendix 2] which might be applied to such individuals, namely Rule 201.23, cannot be applied under the holding of the *Martinez* decision. The grid regulations may be used only as guidance for decisionmaking. (See Appx. 2, 200.00(a))

In addition, under the court's decision, Rule 202.16 can also no longer be applied. Rule 202.16 applies to individuals limited to light work who are younger with unskilled or no work history and illiterate or unable to communicate in English. Following the court's rationale, Rule 202.16 cannot be applied to individuals who are both illiterate *and* unable to communicate in English. Again, the grid regulations may be used only as guidance for decisionmaking.

AR 86-4(3)

Effective Date: March 24, 1986.

Paskel v. *Heckler*, 768 F.2d 540 (3d Cir. 1985) Necessity of a Determination under Sections 225(b) and/or 1631(a)(6) of the Social Security Act for Disability Benefits Recipient Engaged in an Approved Vocational Rehabilitation Program Prior to Cessation of His/Her Benefits Based on Medical Recovery—Titles II and XVI of the Social Security Act.

Issue

Whether a disability benefits recipient, who was expected to recover and despite evidence that his/her medical condition was no longer disabling, is entitled to a determination under Sections 225(b) and/or 1631(a)(6) of the Social Security Act prior to cessation of his/her benefits, when the recipient is engaged in an approved vocational rehabilitation program.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only to cases involving the suspension or termination of disability benefits to an individual whose disability has ceased and who was, at the time of the suspension or termination, or who is participating in an approved VR program and who resides in Delaware, New Jersey, Pennsylvania or the Virgin Islands at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review. Since there is no SSI program in the Virgin Islands, this Ruling will apply only to Social Security disability claims there.

Disability benefits to such an individual cannot be terminated or suspended if the individual is participating in an approved VR program and the Commissioner of Social Security determines that specified continuation or completion of such programs will increase the likelihood

that such individual may be permanently removed from the disability benefit rolls. Such a "likelihood determination" must be made for the above described individual regardless of whether at the time he/she began the VR program his/her medical recovery was expected prior to the completion date.

AR 86-5(9)

Effective Date: March 24, 1980.

Leschniok v. *Heckler*, 713 F.2d 520 (9th Cir. 1983) Necessity of a Determination under Sections 225(b) and/or 1631(a)(6) of the Social Security Act for a Disability Benefits Recipient Engaged in an Approved Vocational Rehabilitation Program Prior to Cessation of His/Her Benefits Based on Medical Recovery—Titles II and XVI of the Social Security Act.

Issue

Whether a disability benefits recipient, who was expected to recover and despite evidence that his/her medical condition was no longer disabling, is entitled to a determination under Sections 225(b) and/or 1631(a)(6) of the Social Security Act prior to cessation of his/her benefits, when the recipient is engaged in an approved vocational rehabilitation program.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only to cases involving the suspension or termination of disability benefits to an individual whose disability has ceased and who was, at the time of the suspension or termination, or who is participating in an approved VR program and who resides in Alaska, Arizona, California, Guam, Hawaii, Idaho, Montana, Nevada, Northern Mariana Islands, Oregon or Washington at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review. Since there is no SSI program in Guam, this Ruling will apply to Social Security disability claims there.

Disability benefits to such an individual cannot be terminated or suspended if the individual is participating in an approved VR program and the Commissioner of Social Security determines that specified continuation or completion of such program will increase the likelihood that such individual may be permanently removed from the disability benefit rolls. Such a "likelihood determination" mus be made for the above decribed individual regardless of whether at the time he/she began the VR program his/her medical recovery was expected prior to the completion date.

AR 86-6(3)

Effective Date: April 2, 1986.

Aubrey v. *Richardson*, 462 F.2d 762 (3rd Cir. 1972);

Shelnutt v. *Heckler*, 723 F.2d 1131 (3rd Cir. 1983)—Interpretation of the Secretary's Regulation Regarding Presumption of Death—Title II of the Social Security Act.

Issue

Whether a presumption of death which must be rebutted by SSA arises under 20 CFR 404.721(b) once a claimant shows that an individual has been absent from his or her residence and has not been heard from for 7 years or whether the presumption only arises if the claimant also proves there is no apparent reason for the absence.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only in cases in which the claimant resides in Delaware, New Jersey, Pennsylvania or the Virgin Islands at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review.

In cases which involve 20 CFR 404.721(b), the presumption of death arises if the claimant presents evidence that the individual has been absent from his or her residence and not heard from for 7 years. The agency then must bear the burden of rebutting the presumption either by presenting evidence that the missing individual is alive or by providing an explanation, other than death, to account for the individual's absence in a manner consistent with continued life rather than death.

AR 86-7(5)

Effective Date: April 2, 1986.

Autrey v. *Harris*, 639 F.2d 1233 (5th Cir. 1981);

Wages v. *Schweiker*, 659 F.2d 50 (5th Cir. 1981)—Interpretation of the Secretary's Regulation Regarding Presumption of Death—Title II of the Social Security Act.

Issue

Whether a presumption of death which must be rebutted by SSA arises under 20 CFR 404.721(b) once a claimant shows that an individual has been absent from his or her residence and has not been heard from for 7 years or whether the presumption only arises if the claimant also proves there is no apparent reason for the absence.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only in cases in which the claimant resides in Texas, Louisiana or Mississippi at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review.

In cases which involve 20 CFR 404.721(b), the presumption of death arises if the claimant presents evidence that the individual has been absent from his or her residence and not heard from for 7 years. The agency then must bear the burden under the *Autrey* and *Wages* holdings of rebutting the presumption, either by presenting evidence that the missing individual is alive or by providing an explanation, other than death, to account for the individual's absense in a manner consistent with continued life rather than death.

AR 86-8(5)

Effective Date: April 2, 1986.

Johnson v. *Califano*, 607 F.2d 1176 (6th Cir. 1979)—Interpretation of the Secretary's Regulation Regarding Presumption of Death—Title II of the Social Security Act.

Issue

Whether a presumption of death which must be rebutted by SSA arises under 20 CFR 404.721(b) once a claimant shows that an individual has been absent from his or her residence and has not been heard from for 7 years or whether the presumption only arises if the claimant also proves there is no apparent reason for the absence.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only in cases in which the claimant resides in Michigan, Ohio, Kentucky or Tennessee at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review.

In cases which involve 20 CFR 404.72(b), the presumption of death arises if the claimant presents evidence that the individual has been absent from his or her residence and not heard from for 7 years. The agency then must bear the burden of rebutting the presumption, either by presenting evidence that the missing individual is alive or by providing an explanation, other than death, to account for the individual's absence in a manner consistent with continued life rather than death.

AR 86–9(9)

Effective Date: April 2, 1986.

Secretary of Health, Education and Welfare v. *Meza*, 368 F.2d 389 (9th Cir. 1966); *Gardner* v. *Wilcox*, 370 F.2d (9th Cir. 1966)—Interpretation of the Secretary's Regulation Regarding Presumption of Death—Title II of the Social Security Act.

Issue

Whether a presumption of death which must be rebutted by SSA arises under 20 CFR 404.721(b) once a claimant shows that an individual has been absent from his or her residence and has not been heard from for 7 years or whether the presumption only arises if the claimant also proves there is no apparent reason for the absence.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies to cases where the claimant resides in Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, Oregon, Washington, Guam, or the Northern Mariana Islands at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review.

In cases which involve 20 CFR 404.721(b), the presumption of death arises if the claimant presents evidence that the individual has been absent from his or her residence and not heard from for 7 years. The agency then must bear the burden of rebutting the presumption, either by presenting evidence that the missing individual is alive or by providing an explanation, other than death, to account for the individual's absence in a manner consistent with continued life rather than death.

AR 86–10(10)

Effective Date: April 2, 1986.

Edwards v. *Califano*, 1619 F.2d (10th Cir. 1980)—Interpretation of the Secretary's Regulation Regarding Presumption of Death—Title II of the Social Security Act.

Issue

Whether a presumption of death which must be rebutted by SSA arises under 20 CFR 404.721(b) once a claimant shows that an individual has been absent from his or her residence and has not been heard from for 7 years or whether the presumption only arises if the claimant also proves there is no apparent reason for the absence.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only in cases in which the claimant resides in Colorado, Kansas, New Mexico, Oklahoma, Utah or Wyoming, at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review.

In cases which involve 20 CFR 404.721(b), the presumption of death arises if the claimant presents evidence that the individual has been absent from his or her residence and not heard from for 7 years. The agency then must bear the burden of rebutting the presumption, either by presenting evidence that the missing individual is alive or by an explanation, other than death, to account for the individual's absence in a manner consistent with continued life rather than death.

AR 86–11(11)

Effective Date: April 2, 1986.

Autrey v. *Harris*, 639 F.2d 1233 (5th Cir. 1981)—Interpretation of the Secretary's Regulation Regarding Presumption of Death—Title II of the Social Security Act.

Issue

Whether a presumption of death which must be rebutted by SSA arises under 20 CFR 404.721(b) once a claimant shows that an individual has been absent from his or her residence and has not been heard from for 7 years or whether the presumption only arises if the claimant also proves there is no apparent reason for the absence.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only in cases in which the claimant resides in Alabama, Florida, or Georgia at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council review.*

In cases which involve 20 CFR 404.721(b), the presumption of death arises if the claimant presents evidence that the individual has been absent from his or her residence and not heard from for 7 years. The agency then must bear the burden under the *Autrey* holding of rebutting the presumption, either by presenting evidence that the missing individual is alive or by providing an explanation, other than death, to account for the individual's absence in a manner consistent with contipued life rather than death.

Autrey is a Fifth Circuit Case. However, the Eleventh Circuit formerly was part of the Fifth Circuit and Fifth Circuit decisions issued before October 1, 1981, which *Autrey* was, are precedent for the Eleventh Circuit. See *Bonner* v. *City of Prichard, Alabama*, 661 F. 2d 1206 (11th Cir. 1981).

AR 86–12(9)

Effective Date: April 8, 1986.

Hutcheson v. *Califano*, 638 F.2d 96 (9th Cir. 1981)—Determination of Stepchild and Resulting Entitlement to Auxiliary Benefits—Title II of the Social Security Act.

Issue

Definition of stepchild for purposes of entitlement to child's insurance benefits on the earnings record of a recipient of old-age insurance benefits.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only to cases in which the child resides in California, Arizona, Nevada, Oregon, Washington, Idaho, Montana, the Northern Mariana Islands, Alaska, Hawaii, or Guam at the time of the determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council. SSA will apply the State law of the insured wage earner's domicile at the time the application is filed, or, if the wage earner is dead, the wage earner's domicile at the time of death.

When a case involves the issue of whether or not a person is a stepchild of an insured individual for purposes of section 202(d)(1) of the Social Security Act, 42 U.S.C. 402(d)(1), the definition of "stepchild" as provided by State law rather than the Social Security regulation will be controlling, consistent with the *Hutcheson* decision.

AR 86–13(3)

Effective Date: April 8, 1986.

McNeal v. *Schweiker*, 711 F.2d 18 (3d Cir. 1983)—Child's Benefits—Contributions for Support—Title II of the Social Security Act.

Issue

Whether the Secretary must, in his evaluation of the worker's "contributions to the support" of an illegitimate child, consider the worker's means and the income of the family in which the child resided.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only to cases where the child resides in Pennsylvania, New Jersey, Delaware, or the U.S. Virgin Islands at the time of determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council.

BEST COPY AVAILABLE

In a claim for surviving child's benefits under section 202(d)(3) and 216(h)(3)(C)(ii) of the Social Security Act (42 U.S.C. 402(d)(3) and 416(b)(3)(C)(ii)) where the worker's income had been irregular or insubstantial, the substantiality and regularity of the worker's contributions to the child 's support must be evaluated in light of the financial resources of *both* the worker and the household in which the child resides.

AR 86-14(4)

Effective Date: April 8, 1986.

Jones v. *Secretary of Health, Education and Welfare*, 629 F.2d 394 (4th Cir. 1980)—Child's Benefits—Contributions for Support—Title II of the Social Security Act.

Issue

Whether the Secretary must, in his evaluation of the worker's "contributions to the support" of an illegitimate child, consider the worker's means and the income of the family in which the child resided.

Explanation of How SSA Will Apply the Decision Within the Circuit

This ruling applies only to cases where the child resides in North Carolina, South Carolina, Virginia, West Virginia or Maryland at the time of determination or decision at any level of administrative review, i.e., initial, reconsideration, administrative law judge hearing or Appeals Council.

In a claim for surviving childs benefits under section 216(h)(3)(C)(ii) of the Social Security Act (42 U.S.C. 416(h)(3)(C)(ii)) where the worker's income had been irregular or insurbstantial, the substantiality and regularity of the worker's contributions to the applicant's support must be evaluated in light of the financial resources of *both* the worker and the household in which the child resides.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA–8884–B]

Alaska Native Claims Selection; The English Bay Corporation

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613(a), will be issued to The English Bay Corporation for 2.77 acres. The lands involved are in the vicinity of English Bay, Alaska.

U.S. Survey No. 4788, Alaska.

A notice of the decision will be published once a week for four (4) consecutive weeks, in the ANCHORAGE TIMES. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision shall have until July 7, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Joe J. Labay,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310–40–M

[Group 859]

California; Filing of Plat of Survey

May 21, 1986.

1. This plat of the following described land will be officially filed in the California State Office, Sacramento, California immediately:

Mount Diablo Meridian, Kern County
T. 27 S., R. 36 E.

2. This plat, representing the independent resurvey of a portion of the subdivisional lines of Township 27 South, Range 36 East, Mount Diablo Meridian, California, under Group No. 859, California, was accepted May 15, 1986.

The subdivisional lines shown on this plat are independent of and supersede corresponding lines depicted on the plat approved January 6, 1883. The subdivisional lines, except the easterly tier (sections 1, 12, 13, 24, 25 and 36), shown on said 1883 plat, are canceled upon approval of this plat (see File 9600 (C–942), Group No. 859), and the remaining affected lands (except any valid mineral claims) have the status of unsurveyed public lands. The dependent resurvey of sections 12, 13, 24, and 25, executed concurrently with the resurvey under Group 858, California, are as shown on the plat approved April 22, 1986.

3. This plat will immediately become the basic record of describing the land for all authorized purposes. This plat has been placed in the open files and is available to the public for information only.

4. This was executed to meet certain administrative needs of the United States Forest Service.

5. All inquiries relating to this land should be sent to the California State Office, Bureau of Land Management, Federal Office Building, 2800 Cottage Way, Room E–2841, Sacramento, California 95825.

Alaska Native Claims Selection; Choggiung Ltd.

The notice to issue conveyance to the Alaska Native Claims Selection; Choggiung, Ltd., published in the Federal Register on April 29, 1986, page number 15963, is revoked and reissued as follows:

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1611, and 1613, will be issued to Choggiung Limited for approximately six acres. The lands involved are in the vicinity of Ekuk, Alaska.

Seward Meridian, Alaska

T. 16 S., R. 56 W. (Surveyed),
Sec. 12, those lands within Sec. 3(e) application AA–12836 excluded from Interim Conveyance No. 230, dated September 17, 1979.

A notice of the decision will be published once a week for four (4) consecutive weeks in the ANCHORAGE TIMES. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the

decision shall have until July 7, 1986, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Joe J. Labay,

Section Chief, Branch of ANCSA Adjudication.

National Park Service

Availability of Draft Land Protection Plan; Kenai Fjords National Park

AGENCY: National Park Service, Interior.

ACTION: Notice of availability of draft land protection plan.

SUMMARY: This notice announces the availability of the draft land protection plan for Kenai Fjords National Park, Alaska. The document will be available for public comment for 60 days. Public meetings are scheduled for Seward, Port Graham and English Bay, Alaska. Following consideration of public comments a final land protection plan will be prepared. This document dicusses nonfederal lands in and around the park and the proposed methods of protecting park resources and visitor uses.

DATES AND ADDRESSES: Comments on the draft document should be received no later than August 4, 1986, and should be addressed to: Superintendent, Kenai Fjords National Park, P.O. Box 1727, Seward, Alaska 99664.

Copies of the document are available upon request from the above address.

For further information contact park superintendent David Moore at the above address or at telephone number (907) 224-3874.

Dated: May 19, 1986.

Robert Peterson,

Acting Regional Director, Alaska Region.

BILLING CODE 4310-70-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-231]

Certain Soft-Sculpture Dolls Popularly Known as Cabbage Patch Kids, Related Literature and Packaging Therefor; Commission Decision Not To Review Initial Determination Terminating Investigation as to Two Respondents on the Basis of a Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Termination of investigation as to two respondents on the basis of a settlement agreement.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) (Order No. 17) granting a joint motion to terminate the investigation as to respondents Osco Drug, Inc., and Sav-On-Drugs, Inc., on the basis of a settlement agreement.

FOR FURTHER INFORMATION CONTACT: Stephen A. McLaughlin, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0421.

SUPPLEMENTARY INFORMATION: On October 1, 1985, Original Appalachian Artworks, Inc. (OAA), and Coleco Industries, Inc., filed a section 337 complaint with the Commission alleging unfair methods of competition and unfair acts in the importation and sale of certain Cabbage Patch Kids dolls, together with the related literature and packaging. The unfair acts alleged were infringement of OAA's copyrights, failure to mark country of origin, and violation of 17 U.S.C. 601(a). On March 3, 1986, OAA, Coleco, Osco, and Sav-On jointly moved to terminate the investigation as to Osco and Sav-On pursuant to rule 210.51 on the basis of a settlement agreement. The motion was supported by the Commission investigative attorney. On April 25, 1986, the presiding administrative law judge (ALJ) issued an ID (Order No. 17) granting the joint motion and terminating the investigation as to Osco and Sav-On on the basis of the settlement agreement. No petitions for review or comments from the public or Government agencies concerning the ID were received.

Termination of the investigation as to respondents Osco and Sav-On the basis of the settlement agreement furthers the public interest by conserving Commission resources and those of the parties involved.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and the Commission's rule 210.53 (19 CFR 210.53).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's EDD terminal on 202-724-0002.

Issued: May 29, 1986.

By Order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

Release of Waybill Data for Use in Conducting Certain Competitive Analyses

The Commission has received a request from Economists Incorporated, who has been retained by the Diamond Shamrock Corporation, for permission to use the 1981-1984 and, when available, 1985 ICC Waybill Sample to conduct certain competitive analyses for a proceeding before the Federal Trade Commission involving the competitive consequences of an acquisition of Diamond Shamrock's chlorine/caustic soda plants by Occidental Chemical Corporation. The waybill sample will be used to identify the relevant antitrust geographic market. This involves identifying the degree to which producers of cholorine in one region are able to supply customers in other regions. This can be ascertained, in part, by observing existing rail shipment patterns over a period of time and, thus, the need for the 1981-1985 Waybill Sample. It should be noted that Diamond Shamrock is primarily engaged in the production of chemical, rubber, and plastic products and is not engaged in the provision of any commercial motor carrier services.

The Commission required rail carriers to file waybill sample information if in any of the past three years they terminated on their lines at least: (1) 4,500 revenue carloads or (2) 5 percent of revenue carloads in any one State [49

CFR Part 1244). From this waybill information, the Commission has developed a Public Use Waybill File that has satisfied the majority of all our waybill data requests while protecting the confidentiality of proprietary data submitted by the railroads. However, if confidential waybill data are requested, as in this case, we will consider releasing the data only after certain protective conditions are met and public notice is given. More specifically, under the Commission's current policy for handling waybill requests, we will not release any confidential waybill data until after: (1) Public notice is provided so affected parties have an opportunity to object and (2) certain requirements designed to protect the data's confidentiality are agreed to by the requesting party (48 FR 40328, September 6, 1983).

Accordingly, if any parties object to this request, they should file their objections (an original and 2 copies) with the Director of the Commission's Office of Transportation Analysis (OTA) within 14 calendar days of the date of this notice. They should also include all grounds for objection to the full or partial disclosure of the requested data. The Director of OTA will consider these objections in determining whether to release the requested waybill data. Any parties who object will be timely notified of the Director's decision.

Contact: Elaine Kaiser, (202) 275-7003.

James H. Bayne,
Secretary.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-16,418]

Erti Co.; Dyersville, Iowa; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on February 28, 1986, applicable to all workers of Erti Company, Dyersville, Iowa. The Notice of Certification was published in the Federal Register on March 18, 1986 (51 FR 9290).

Based on additional information furnished to the Department on worker layoffs, the Office of Trade Adjustment Assistance reviewed the certification and supporting documents. The additional information revealed that layoffs of workers impacted by increased imports occurred at least two weeks prior to the January 2, 1985 impact date in the certification document.

The intent of the certification is to cover all workers who were adversely affected by increased import competition. Therefore, the notice is amended by providing a new impact date of December 1, 1984.

The amended notice applicable to TA-W-16,418 is hereby issued as follows:

All workers Erti Company, Dyersville, Iowa who became totally or partially separated from employment on or after December 1, 1984 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 23rd day of May 1986.

Robert A. Schaerfl,
Director, Office of Program Management, UIS.

BILLING CODE 4510-30-M

Robe Tex, Inc., et al.; Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period May 19, 1986-May 23, 1986.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-16,759; Robe, Tex, Inc., Brooklyn, NY

TA-W-16,658; Pocono Foundry, Inc., Stroudsbury, PA

TA-W-16,748; Cyclops Corp., Cytemp Div., Bridgeville, PA

TA-W-16,669; Pascoe Building Systems, Wathena, KS

TA-W-17,177; Monsanto Electronics Materials Co., Moore, SC

TA-W-16,619; Monsanto Electronics Materials, Co., St. Peters, MO

TA-W-16,703; Reserve Mining Co., Babbitt, MN, Silver Bay, MN

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-17,161; W.F. Davis Motor Co., Whitesburg, KY.

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-16,679; Olsten Temporary Services, Akron, OH

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-16,675; Kenwall Products Corp., Twinsburg, OH

Separations from the subject firm result from a transfer of production to another domestic facility.

TA–W–16,661; Parker-Hannifin, Saddlebrook, NJ

Separations from the subject firm resulted from a transfer of production to another domestic facility.

TA–W–16,979; Commercial Shearing, Inc., Salt Lake City, UT

Separations from the subject firm resulted from a transfer of production to another domestic facility.

Affirmative Determinations

TA–W–16,620; Shopsmith, Inc., Dayton, OH

A certification was issued covering all workers of the firm separated on or after February 1, 1985.

TA–W–17, 025; Florsheim Shoe Co., Cape Girardeau, MO

A certification was issued covering all workers of the firm separated on or after December 31, 1985.

TA–W–16,710; RTE Powermate Co., Hackensack, NJ

A certification was issued covering all workers of the firm separated on or after November 4, 1984.

TA–W–17,076; Pawtucket Dress Corp., Pawtucket, RI

A certification was issued covering all workers of the firm separated on or after December 8, 1984 and before January 13, 1986.

TA–W–16,680; Howard Fashion Industries, Orangeburg Garment Co., Orangeburg, SC

A certification was issued covering all workers of the firm separated on or after October 10, 1984 and before March 31, 1985.

TA–W–16,670; Creative Industries, Div. of Santa Claus Industries, Waterloo, IA

A certification was issued covering all workers of the firm separated on or after July 15, 1985 and before January 1, 1986.

TA–W–16,676; Mayfair of Massachusetts, Inc., Indiana Orchard, MA

A certification was issued covering all workers of the firm separated on or after November 5, 1984 and before July 21, 1985.

TA–W–16,677; Mayfair Mills, Inc., New York, NY

A certification was issued covering all workers of the firm separated on or after June 21, 1985 and before July 21, 1985.

TA–W–16,605; Spiegel-Eugene Corporation, Lebanon, PA

A certification was issued covering all workers of the firm separated on or after September 15, 1984 and before December 31, 1985.

TA–W–16,668; Sea Gems Beachwear, Inc., Long Island City, NY

A certification was issued covering all workers of the firm separated on or after January 1, 1985 and before June 18, 1985.

TA–W–16,690; Markay Sportswear, Inc., Long Island City, NY

A certification was issued covering all workers of the firm separated on or after November 8, 1984 and before May 15, 1985.

TA–W–17,008; Regency Electronics, Inc., Indianapolis, IN

A certification was issued covering all workers of the firm separated on or after December 12, 1984.

TA–W–16,628; LaFarge Calcium Aluminates, Inc., (Formerly Lone Star LaFarge, Inc.), Chesapeake, VA

A certification was issued covering all workers of the firm separated on or after July 1, 1985 and before March 31, 1986.

TA–W–16,558; CG Mfg Co., Taunton, MA

A certification was issued covering all workers of the firm separated on or after September 25, 1984 and before November 22, 1985.

TA–W–16,723; U-Brand Corp., Ashland, OH

A certification was issued covering all workers of the firm separated on or after January 25, 1986.

TA–W–16,724; U-Brand Corp., Shelby, OH

A certification was issued covering all workers of the firm separated on or after January 25, 1986.

TA–W–16,699; Rexnord, Inc., Springfield, MA

A certification was issued covering all workers of the firm separated on or after January 1, 1985.

TA–W–16,750; P & L Sportswear Co., Inc., Boston, MA

A certification was issued covering all workers of the firm separated on or after December 2, 1984 and before January 31, 1986.

TA–W–16,667; Jackson Sportswear, Worcester, MA

A certification was issued covering all workers of the firm separated on or after November 5, 1984 and before October 3, 1985.

TA–W–16,618; Marion Manufacturing Co., Marion, NC

A certification was issued covering all workers of the firm separated on or after October 23, 1984.

TA–W–16,667; Textron, Inc., CWC Castings Div., Plant #3, Muskegon, MI

A certification was issued covering all workers of the firm separated on or after December 6, 1984.

TA–W–16,622; Motorola, Inc., Austin, TX

A certification was issued covering all workers of the firm separated on or after January 1, 1985.

TA–W–16,688; Harrison Sportswear Co., Boston, MA

A certification was issued covering all workers of the firm separated on or after November 5, 1984 and before December 11, 1985.

TA–W–16,694; Allied Chemical, Solvay, NY

A certification was issued covering all workers of the firm separated on or after January 1, 1985.

TA–W–16,694A; Allied Chemical, Jamesville, NY

A certification was issued covering all workers of the firm separated on or after January 1, 1985.

TA–W–16,673; General Tire, Inc., Waco, TX

A certification was issued covering all workers of the firm separated on or after January 1, 1985.

TA–W–16,707; General Tire, Inc., Mayfield, KY

A certification was issued covering all workers engaged in employment related to the production of truck tires separated on or after January 1, 1985.

I hereby certify that the aforementioned determinations were issued during the period May 19, 1986–May 23, 1986. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213, during normal business hours or will be mailed to persons who write to the above address.

Dated: May 27, 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Job Training Partnership Act; Within-State Incentive Grants for Service to Hard-to-Serve Individuals and Programs Exceeding Performance Standards

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of proposed policy; request for comments.

SUMMARY: The Department of Labor proposes a policy to clarify the use of Job Training Partnership Act (JTPA) within-State incentive grants (so-called "6 percent funds") for purposes specifically set forth in JTPA. Some States have requested that they be permitted to use the funds for other purposes.

DATE: Comments must be submitted on or before June 19, 1986.

ADDRESS: Submit comments to: Assistant Secretary for Employment and Training, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213. Attention: Dr. Fred Romero, Administrator, Office of Strategic Planning and Policy Development.

FOR FURTHER INFORMATION CONTACT: Mr. Herman Williams. Telephone: (202) 376-6700.

SUPPLEMENTARY INFORMATION:

Statutory Background

Section 202(b)(3) of the Job Training Partnership Act (JTPA) provides that:

(3)(A) Six percent of the allotment of each State for each fiscal year shall be available to carry out subparagraph (B) of this paragraph.

(B) The amount reserved under subparagraph (A) of this paragraph shall be used by the Governor to provide incentive grants for programs exceeding performance standards, including incentives for serving hard-to-serve individuals. The incentive grants made under this paragraph shall be distributed among service delivery areas within the State exceeding their performance standards in an equitable proportion based on the degree by which the service delivery areas exceed their performance standards. If the full amount reserved under subparagraph (A) is not needed to make incentive grants under this subparagraph, the Governor shall use the amount not so needed for technical assistance to service delivery areas in the State which do not qualify for incentive grants under this subparagraph.

[29 U.S.C. 1502(b)(3).]

The above-described incentive grants are referred to as "six percent funds."

Discussion

On January 14, 1986, the Department of Labor (DOL) published at 51 FR 1576 proposed revisions to the Job Training Partnership Act (JTPA) federal reporting requirements for Program Year (PY) 1986 (July 1, 1986—June 30, 1987). Those proposed revised instructions would require States and/or service delivery areas (SDAs) to collect and report on post-program employment and earnings information. Many commenters expressed concern over the additional costs involved with starting up new post-program data collection systems or refining existing automatic data processing (ADP) systems to include new post-program reporting instructions. As a result, some States have requested that DOL allow a broad interpretation of the use of six percent funds to support new post-program data collection and reporting activity.

At the outset of JTPA programs, Governors were permitted to use the full amount of the six percent funds for technical assistance (TA), since there was no previous period of performance for which to award incentives. TA was interpreted to include costs for developing Management Information Systems (MIS) necessary to carry out performance standards responsibilities.

No further guidance on use of six percent funds was provided to the Governors other than in Training and Employment Information Notice (TEIN) No. 40-84 (April 25, 1985), which indicated, consistent with 20 CFR 627.1, that "the Governor has the authority to interpret and issue determinations. The DOL will accept these interpretations unless they are inconsistent with the Act and pertinent regulations." However, several States have set policies and expended six percent funds on a continuing basis in ways which were intended clearly to be acceptable only during the initial nine months of the JTPA programs, such as for MIS support and purchase of ADP hardware. Use of six percent funds to comply with the new post-program reporting requirements would be a further misuse of those funds.

Proposed Policy

In an effort to prevent the misuse of six percent funds, and to identify appropriate funding sources for reporting costs, DOL proposes the following policy:

Effective October 1, 1986, six percent funds shall not be used for any purposes other than to provide incentive grants to SDAs which exceed performance standards, including incentives for serving hard-to-serve individuals, and, if the full amount of six percent funds is not needed to make incentive grants, to provide technical assistance to SDAs which do not qualify for incentive grants. Six percent funds shall not be used for MIS or post-program data collection or other activities properly chargeable to administration. Actions in violation of this policy are inconsistent with JTPA and the JTPA regulations. See 20 CFR 627.1.

The October 1, 1986, effective date is provided to allow States a reasonable transition period to make required adjustments to cost assignment arrangements to conform to the new policy. Funds expended prior to the effective date for purposes contrary to the above policy and other expenditures which are inconsistent with JTPA or pertinent regulations (see 20 CFR 627.1) may be questioned in the audit process. Such costs will be reviewed on a case-by-case basis in accordance with TEIN No. 40-84, but, in general, the above-cited policy will not be applied retroactively.

Signed at Washington, DC, this 20 of May, 1986.

Roger D. Semerad,

Assistant Secretary for Employment and Training.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-86-62-C]

Consol Pennsylvania Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consol Pennsylvania Coal Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.1404-1 (braking system) to its Bailey Mine (I.D. No. 36-07230) located in Greene County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a trailing locomotive or equivalent devices be used on trains that are operated on ascending grades.

2. As an alternate method, petitioner proposes to equip all locomotives with devices capable of applying sand to all rails in either direction of travel; safe seating facilities; an audible warning device and a sealed beam headlight on either end.

3. Ropes and or chains will be provided between each car and the locomotive to prevent a runaway if an unplanned uncoupling occurs.

4. All operators of locomotives will be instructed to keep their locomotive under control and to operate at a safe rate of speed consistent with track conditions.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health

Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before July 7, 1986. Copies of the petition are available for inspection at that address.

Dated: May 22, 1986.

[Docket No. M-86-66-C]

Consol Pennsylvania Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consol Pennsylvania Coal Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.1100-2(e)(2) (quanity and location of firefighting equipment) to its Bailey Mine (I.D. No. 36-07230) located in Greene County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that one portable fire extinguisher and 240 pounds of rock dust be provided at each temporary electrical installation.

2. Petitioner states that the rock dust and sacks deteriorate because of the humid conditions in the mine.

3. As an alternate method, petitioner proposes to use two multipurpose dry chemical-type fire extinguishers in lieu of rock dust for fire protection at temporary electrical installations.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

BILLING CODE 4510-43-M

[Docket No. M-86-65-C]

Consolidation Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consolidation Coal Company, Consol Plaza, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.105 (housing of underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps) to its Osage No. 3 Mine (I.D. No. 46-01455) located in Monongalia County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirements that air currents used to ventilate structures of areas enclosing electrical installations be coursed directly into the return.

2. Petitioner states that the Osage No. 3 Mine cannot ventilate all permanent pump houses in an area along the mainline haulage. Falls and water in areas adjacent to the pump houses cause hazardous conditions when trying to run new vent pipes to the return. Because of the age of the haulageway and adjacent entries, the returns have deteriorated and are no longer effective to create a sufficient pull on the vent pipe.

3. As an alternate method, petitioner proposes to:

a. House the pumps in a sealed fireproof enclosure with steel doors;

b. Mount a dry powder chemical fire extinguisher over the pump. The extinguisher will operate automatically when the heat from the fire is sufficient to activate its automatic mechanism assembly; and

c. Course the intake air ventilating these enclosures outside by use of the Brand, Dolls Run and Statler Fans.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before July 7, 1986. Copies of the petition are available for inspection at that address.

Dated: May 28, 1986.

Patricia W. Silvey,

Director, Office of Standards Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-86-27-C]

Croner, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Croner, Inc., R.D. 4, Box 83 C, Berlin, Pennsylvania 15530 has filed a petition to modify the application of 30 CFR 77.1109(e) (quantity and location of firefighting equipment) to its Pine Hill No. 2 Mine (I.D. No. 36-02690) located in Somerset County, Pennsylvania. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirements that two portable fire extinguishers be provided near the transfer pump of each buried combustible liquid storage tank.

2. Petitioner states that the fuel storage tanks are above ground. All of the tanks are in areas within the mine sites, located away from other buildings and personnel. If a fire were to occur, the tanks could burn without causing any damage to property or personnel.

3. All equipment being refueled carry adequate fire protection. Except during refueling, no personnel are in the vicinity of tanks. All personnel are instructed to leave the area and call the fire department in the event of fuel tank fire.

4. For these reasons petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. BILLING CODE 4510-43-M

NUCLEAR REGULATORY COMMISSION

Bi-Weekly Notice; Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular bi-weekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This bi-weekly notice includes all amendments issued, or proposed to be issued, since the date of publication of the last bi-weekly notice which was published on May 21, 1986 (51 FR 18078), through May 28, 1986.

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

By July 7, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR § 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with

reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determinatin is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Branch Chief)*: petitioners' name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the local public document room for the particular facility involved.

Arizona Public Service Company et al., Docket No. STN 50–528, Palo Verde Nuclear Generating Station (PVNGS), Unit No. 2, Maricopa County, Arizona

Date of amendment request: April 15, 1986.

Description of amendment request: The proposed amendment would allow: (i) Co-owner El Paso Electric Company (El Paso) to transfer all or a portion of its fee interest in PVNGS Unit 2 to equity investors and (ii) the simultaneous transfer by the equity investors back to El Paso of a long term (approximately 27½ years) possessory leasehold interest of this share under the terms described in this application. It is comtemplated that the equity investors will be third parties not affiliated with El Paso. These equity investors might include electric utilities, or affiliates or subsidiaries thereof, in which case antitrust consideration may be present. Under the proposed transaction, it is represented that El Paso will remain in possession of its present interests in PVNGS Unit 2 under a leasehold rather than by virtue of ownership.

The proposed amendment is similar to a request filed on October 18, 1985, by Arizona Public Service Company (APS) regarding the sale and leaseback transactions by Public Service Company of New Mexico (PNM) of a portion of PNM's ownership interests in PVNGS Unit 1. See 50 FR 45055 (1985). By Order of December 12, 1985, the Commission approved the proposed sale and leaseback transactions and authorized the amendment of the PVNGS Unit 1 license subject to certain conditions. On December 20, 1985, the PVNGS Unit 1 license was amended and conditioned pursuant to the Commission's order. See 51 FR 1883 (1986). The Commission also has under consideration requests for additional similar transactions related to sale and leaseback of Palo Verde Units 1 and 2 ownership shares by PNM. See 51 FR 8250, 51 FR 8567, and 51 FR 9125 (1986).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

A discussion of these standards as they relate to the amendment request follows:

Standard 1—Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated

No change is involved to any of the design or criteria of the plant. The amendment does not, therefore, significantly increase the probability or consequences of an accident.

Standard 2—Create the Possibility of a New or Different Kind of Accident From Any Accident Previously Evaluated

The proposed amendment does not vary or affect any plant operating condition or parameter. For this reason, the NRC staff has determined that the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Standard 3—Involve a Significant Reduction in a Margin of Safety

The requested amendment does not change the design basis for any equipment in the plant. For this reason,

the NRC staff has determined that the change does not involve a significant reduction in any margins of safety.

Furthermore, the proposed amendment would maintain El Paso in possession of its present interests in PVNGS and El Paso would continue to be obligated to pay its share of all costs of construction, maintenance, operation, capital improvements and decommissioning. The equity investors would not have any rights of possession in, absent further license amendment, or control over PVNGS Unit 2. Arizona Public Service Company would continue to be the sole licensee authorized to use and operate the facility.

Based on the above consideration, the Commission proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room Location: Phoenix Public Library, Business, Science and Technology Department, 12 East McDowell Road, Phoenix, Arizona 85004.

Attorney for licensees: Mr. Arthur C. Gehr, Snell & Wilmer, 3100 Valley Center, Phoenix, Arizona 85007.

NRC Project Director: George W. Knighton.

Arizona Public Service Company et al., Docket No. STN 50-529, Palo Verde Nuclear Generating Station (PVNGS), Unit No. 2, Maricopa County, Arizona

Date of amendment request: May 2, 1986.

Description of amendment request: The proposed amendment would allow: (i) Co-owner Arizona Public Service Company (APS) to transfer all or a portion of its fee interest in PVNGS Unit 2 to equity investors and (ii) the simultaneous transfer by the equity investors back to APS of a long term (approximately 29½ years) possessory leasehold interest of this share under the terms described in this application. It is contemplated that the equity investors may be third parties affiliated with APS. These equity investors might include electric utilities, or affiliates or subsidiaries thereof, in which case antitrust considerations may be present. Under the proposed transaction, it is represented that APS will remain in possession of its present interests in PVNGS Unit 2, under a leasehold rather than by virtue of ownership. However, APS would continue to be the sole licensed operator of the facility.

The proposed amendment is similar to a request filed on October 18, 1985, by Arizona Public Service Company (APS) regarding the sale and leaseback transactions by Public Service Company of New Mexico (PNM) of a portion of PNM's ownership interests in PVNGS Unit 1. See 50 FR 45855 (1985). By Order of December 12, 1985, the Commission approved the proposed sale and leaseback transactions and authorized the amendment of the PVNGS Unit 1 license subject to certain conditions. On December 23, 1985, the PVNGS Unit 1 license was amended and conditioned pursuant to the Commission's order. See 51 FR 1669 (1986). The Commission also has under consideration requests for additional similar transactions related to sale and leaseback of Palo Verde Units 1 and 2 ownership shares by PNM. See 51 FR 8253, 51 FR 9587, and 51 FR 9125 (1986). Also, a request for a similar transaction related to sale and leaseback of Palo Verde Unit 2 ownership shares by El Paso Electric Company (request dated April 15, 1986) has been filed with the Commission.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amended to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

A discussion of these standards as they relate to the amendment request follows:

Standard 1—Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated

No change is involved to any of the design or criteria of the plant. The amendment does not, therefore, significantly increase the probability or consequences of an accident.

Standard 2—Create the Possibility of a New or Different Kind of Accident From Any Accident Previously Evaluated

The proposed amendment does not vary or affect any plant operating condition or parameter. For this reason, the NRC staff has determined that the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Standard 3—Involve a Significant Reduction in a Margin of Safety

The requested amendment does not change the design basis for any equipment in the plant. For this reason, the NRC staff has determined that the change does not involve a significant reduction in any margins of safety.

Furthermore, the proposed amendment would maintain APS in possession of its present interests in PVNGS and APS would continue to be obligated to pay its share of all costs of construction, maintenance, operation, capital improvements and decommissioning. The equity investors would not have any rights of possession in, absent further license amendment, or control over PVNGS Unit 2. Arizona Public Service Company would continue to be the sole licensee authorized to use and operate the facility.

Based on the above considerations, the Commission proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room Location: Phoenix Public Library, Business, Science and Technology Department, 12 East McDowell Road, Phoenix, Arizona 85004.

Attorney for licensees: Mr. Arthur C. Gehr, Snell & Wilmer, 3100 Valley Center, Phoenix, Arizona 85007.

NRC Project Director: George W. Knighton.

Arkansas Power and Light Company, Docket No. 50-313, Arkansas Nuclear One, Unit No. 1, Pope County, Arkansas

Date of amendment request: April 30, 1986.

Description of amendment request: The amendment would revise the Technical Specifications (TSs) to provide for a modification that would change the Combustible Gas Control System in Arkansas Nuclear One, Unit 1 (ANO-1) from a system based on a redundant Hydrogen Purge System (with capability to install an external hydrogen recombiner) to a system based on a redundant Internal Hydrogen Recombiner System as the means for controlling combustible gas concentrations in containment following a postulated Loss of Coolant Accident (LOCA).

Specifically, the amendment would change Specification 3.14, "Hydrogen Purge System" and specification 4.12, "Hydrogen Purge System Surveillance" to be consistent with the "Standard Technical Specifications for Babcock and Wilcox Pressurized Water Reactors," NUREG-0103 (Rev. 4, Fall, 1980) for atmospheric containments as applicable to Westinghouse Electric Hydrogen Recombiners. Conforming changes would be made to the Table of Contents.

Both the existing system and the Internal Hydrogen Recombiner System are in compliance with regulatory requirements of 10 CFR 50.44, "Standards for Combustible Gas Control System in Light-Water-Cooled Power Reactors." Both systems are consistent with associated regulatory guidance:

—Regulatory Guide 1.7 (Rev. 2, November, 1978) and Safety Guide 7 (1971), as applicable.
—General Design Criteria 41, 42, and 43.
—Standard Review Plan 6.2.5, as applicable.

The Combustible Gas Control System is not being changed for regulatory reasons, but is being changed due to considerations of maintainability. No changes are being made to the required capabilities for mixing or measuring combustible gases.

Basis for proposed no significanct hazards consideration determination: The proposed changes have been reviewed against each of the criteria in 10.CFR 50.92, namely that the proposed changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed facility change from a redundant Hydrogen Purge System to a redundant Internal Hydrogen Recombiner System to control combustible hydrogen following an accident and the associated TS changes would in no way increase the probability or consequences of an accident previously evaluated. Installation of internal hydrogen recombiners improves hydrogen removal capability while minimizing the consequences of a postulated LOCA. The proposed system change would affect the type of equipment used to meet the regulatory requirement for control of combustible gas concentration in containment (10 CFR 50.44(b)(3)). The proposed system, consisting of hydrogen recombiners, is comprised of components which have been given a degree of regulatory preference. The proposed TSe would have no effect on the probabilty or consequences of an accident previously evaluated.

The proposed facility change and the associated changes in the TSe would not create the possiblity of a new or different kind of accident from any accident previously evaluated. The proposed hydrogen recombiners have been environmentally qualified, they are to be installed in locations which will ensure their effectiveness and no negative impact on other safety-related equipment, and they will be consistent with regulatory requirements relating to Combustible Gas Control Systems. The proposed TSs would not affect the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed facility modification and associated TS changes would not involve a significant reduction in a margin of safety. The proposed equipment change is from a type of system which allows controlled release of combustible gas from containment to a type of system that does not result in a release from containment (10 CFR 50.44(h)(2)). The recombiner system has been given regulatory preference because of its characteristic of not generating releases during a postulated LOCA. The recombiner system proposed to be installed has greater hydrogen removal capability than the current purge system, in the extent that it should be used. Although both systems meet the regulatory requirements, the proposed system is an improvement on the system currently in place. The proposed TSs are equivalent to or more conservative that the existing TSs for the Hydrogen Purge System and thus do not involve a reduction in margin of safety.

On these bases, the Commission proposes to determine that the proposed amendment does not involve a significant hazards consideration.

Local Public Document Room location: Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801.

Attorney for licensee: Nicholas S. Reynolds, Bishop, Libermen, Cook, Purcell and Reynolds, 1200 17th Street, NW., Suite 700, Washington, D.C. 20036.

NRC Project Director: John F. Stolz.

Carolina Power and Light Company, Docket No. 50-261, H. B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Date of amendment request: January 8, 1986.

Description of amendment request: The proposed amendment would revise Technical Specifications (TS) for the H.B. Robinson Steam Electric Plant, Unit No. 2. The proposed revision involves reducing the reporting requirements for primary coolant iodine spiking from a short-term report to an item included in the Annual Report. In addition, the reporting of challenges to primary safety and relief valves will be removed as a Special Report and included as part of the Annual Report in accordance with Generic Letter 82-16. The licensee inadvertently placed these reports under special reports in the Technical Specification rather than under annual reports.

As part of a continuing effort to reduce or delete unnecessary reporting requirements, the Commission issued Generic Letter (GL) 85-19. GL 85-19 provided guidance for licensees to reduce reporting requirements for primary coolant iodine spikes. In addition, the GL provided guidance for eliminating unnecessary Technical Specification requirements to shut down a plant if coolant iodine activity limits are exceeded for 800 hours in a 12-month period.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance in the form of examples of amendments that are not considered likely to involve significant hazards considerations (48 FR 14870). Example (i) states "a purely administrative change to the Technical Specifications: for example, a change to achieve consistency throughout the Technical Specificiations, correction of an error or a change in nomenclature."

As discussed above, the licensee's request to change reporting requirements for the safety and relieve valves was clearly due to an error. This change request is therefore identical to example (i). Accordingly, the Commission proposes to determine that this change does not involve a significant hazards consideration.

The licensee's request for changing the reporting requirements for primary coolant iodine spiking does not match any of the examples. However, the licensee has determined and the NRC staff agrees that the proposed amendments will not:

(1) involve a significant increase in the probability or consequences of an accident previously evaluated because changing the reporting requirements and eliminating the coolant iodine limit would not adversely affect the accident analysis or safety margins as currently defined because other controls and operating limits currently implemented would prevent the Final Safety Analysis Report assumptions from being exceeded as a result of severely degraded fuel;

(2) create the possibility of a new or different kind of accident than that previously evaluated because changing reporting requirements does not involve any analyzed accident conditions;

(3) involve a significant reduction in a margin of safety because the requested reporting requirement change does not involve any safety analysis.

Accordingly, the Commission proposes to determine that this change does not involve significant hazards considerations.

Local Public Document Room Location: Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535.

Attorney for licensee: Shaw, Pittman, Potts, and Trowbridge, 1800 M Treet, N.W., Washington, D.C. 20036

NRC Project Director: Lester S. Rubenstein.

Commonwealth Edison Company, Dockst No. 50–10, Dresden Station, Unit 1, Grundy County, Illinois

Date of amendment request: January 7, 1986.

Description of amendment request: The licensee proposed: (1) That License No. DPR–2 for Dresden Station, Unit No. 1 (the facility), be amended to possess-but-not-operate status; (2) that License No. DPR–2 be amended to delete requirements that the licensee believed were no longer applicable at the shutdown facility; and (3) that the technical specifications be revised to reflect the permanently shutdown possess-but-not-operate status of the facility. Items (2) and (3) will be noticed separately in the Federal Register. This notice applies only to item (1).

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR Part 50.92 by providing certain examples (48 FR 14870). One of the examples (ii) of actions not likely to involve a significant hazards consideration relates to changes that constitute additional restrictions or controls not presently included in the license. The proposed action to amend License No. DPR–2 to possess-but-not-operate status is more restrictive than the present license because the present license would permit operation of the facility if certain conditions are met. Therefore, since the proposed amendment is encompassed by example (ii) of the Commissions guidance, the staff has determined that the proposed action does not involve a significant hazards consideration.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Attorney for licensee: Michael I. Miller, Isham, Lincoln and Beale, Three First National Plaza, Suite 5200, Chicago, Illinois 60602.

NRC Project Director: Herbert N. Berkow.

Connecticut Yankee Atomic Power Company, Docket No. 50–213, Haddam Neck Plant, Middlesex County, Connecticut

Date of amendment request: May 14, 1986.

Description of amendment request: The proposed amendment would permit the performance of monthly surveillance tests on valve SI–NOV–24 (on the line from the refueling water storage tank) and on valve RH–MOV–874 (on the residual heat removal system pump discharge), in accordance with the licensee's application for amendment dated May 14, 1986. The monthly surveillance tests on the subject valves are required to assure the operability of a high pressure recirculation cooling mode following a certain range of small line break loss-of-coolant accidents.

Basis for proposed no significant hazards consideration determination: The proposed technical specification changes address a condition that was discovered as a result of the recent Haddam Neck Plant Probabilistic Safety Study, and for which an exemption for the single failure criterion was granted on April 28, 1986. The proposed changes are in additional to existing surveillance requirements and are being provided to increase the reliability of the high pressure safety injection (HPSI) method of high pressure recirculation cooling following a specific set of small break loss-of-coolant accidents.

The Commission has provided examples (48 FR 14870, April 6, 1983), of actions not likely to involve a significant hazards consideration. Example (ii) of this guidance states that a change that constitutes an additional limitation, restriction, or control not presently in the technical specifications; for example, a more stringent surveillance requirement would not likely constitute a significant hazard. The staff has reviewed the proposed license amendment and concluded that it falls within the envelope example of (ii) since the proposed amendment adds additional surveillance requirements to the plant technical specifications concerning the operability of the subject valves. Accordingly, the staff proposes to determine that the proposed changes do not involve a significant hazards considerations.

Local Public Document Room location: Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry and Howard, Counselors at Law, City Place, Hartford, Connecticut 06103–3499.

NRC Project Director: Christopher I. Grimes.

Consumers Power Company, Docket No. 50–155, Big Rock Point Plant, Charlevoix County, Michigan

Date of amendment request: May 1, 1986.

Description of amendment request: The proposed Technical Specification change would add a sentence to a Table which currently establishes the minimum requirements for shift crew composition during the various conditions of plant operation. The proposed sentence would provide flexibility for the Shift Supervisor to designate a Reactor Operator as the shift commander during his absence. This proposed change is also consistent with the intent of information previously submitted to and accepted by the NRC in response to NUREG–0737, Item I.A.1.2, Shift Supervisor Responsibilities.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

10 CFR 50.91 requires that at the time a licensee requests an amendment, it must provide to the Commission its analyses, using the standards in Section 50.92, about the issue of no significant hazards consideration. Therefore, in accordance with 10 CFR 50.91 and 10 CFR 50.92, the licensee has performed and provided the following analysis.

The operation of Big Rock Point in accordance with the proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.

This change will allow the Shift Supervisor, who holds the only required on-shift senior reactor operators license, the flexibility to leave the control room/Shift Supervisor Office area for short durations which will increase his ability to investigate and assimilate overall plant performance thereby allowing him to make better decisions in regards to safe operation of the plant. This change would therefore tend to decrease the probability of occurrence of previously evaluated accidents or their consequences.

The operation of Big Rock Point in accordance with the proposed amendment will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed amendment will allow the Shift Supervisor to not be in the control room/Shift Supervisor Office

area at all times. However, short notice communications to or from the Shift Supervisor are available through the plant public address system and/or portable radios. Previously evaluated accidents or malfunctions do not place restrictions on where the Shift Supervisor is located at the time an accident may be initiated. Therefore, this change would not create the possibility of an accident or malfunction of a different type from those previously evaluated.

The operation of Big Rock Point in accordance with the proposed amendment will not involve a significant reduction in a margin of safety.

This proposed change enables the Shift Supervisor to make better, more complete, decisions in regards to safe operation of the plant which tends to reduce the probability of occurrence of an accident and therefore would tend to increase the margin of safety as defined in the technical specifications.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NCR Project Director: John A. Zwolinski.

Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: December 18, 1985.

Description of amendment request: The proposed amendments would change the expiration date in paragraph 2.L of Facility Operating License NPF-9 for Unit 1 from midnight on February 28, 2013, to midnight on June 12, 2021. Similarly, the expiration date in paragraph 2.K of Facility Operating License NPF-17 for Unit 2 would be changed from midnight on February 28, 2013, to midnight on March 3, 2023.

Basis for proposed no significant hazards consideration determination: McGuire Nuclear Station is currently licensed for a duration of 40 years commencing with issuance of the construction permits. The proposed amendments would provide a duration of 40 years beginning with issuance of the low power (5%) operating licenses.

Plant equipment, components and structures were designed considering a 40 year service life of the plant. Some equipment, such as the major components of the nuclear steam supply system, was designed for 40 years of service life. Other equipment is not expected to last for a full 40 years; however, in those cases, surveillance and maintenance procedures were implemented into the plant operation to assure that degradation is promptly identified and corrective actions, such as refurbishment and replacement, are taken. Those procedures were designed according to various industry codes and the plant Technical Specifications to ensure that plant structures, equipment and components would operate safely and as designed.

The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations and examples of actions likely to involve significant hazards considerations. The request involved in this case does not match any of those examples. However, the staff has reviewed the licensee's request for the above amendments and determined that should this request be implemented, it would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because plant equipment, components, and structures were designed considering a 40 year service life, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the physical plant design would not be changed. Also, it would not (3) involve a significant reduction in a margin of safety because surveillance and maintenance procedures are implemented into the plant operation to assure that degradation is promptly identified and corrective actions are taken. Accordingly, the Commission proposes to determine that this change does not involve significant hazards considerations.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223.

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242.

NRC Project Director: B.J. Youngblood.

Mississippi Power & Light Company, Middle South Energy, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: May 12, 1986.

Description of amendment request: The amendment would change Technical Specification Table 3.3.2-2, "Isolation Actuation Instrumentation Setpoints" by changing the trip setpoint and allowable value for the reactor core isolation cooling (RCIC) system steam line high flow.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee has made an analysis of significant hazards considerations using the standards of 10 CFR 50.92 and has concluded that the proposed amendment does not involve a significant hazards consideration. The NRC staff has made a preliminary review of the licensee's analysis and associated bases. Staff's discussion of the proposed amendment as it relates to the three standards follows.

The RCIC steam line high flow trip setpoint would be changed from 363 inches of water to 56 inches of water and the allowable value would be changed from 371 inches of water to 64 inches of water. The change is needed to correct an error in the calculation of the present values. The specified values are differential pressures on flow meter in the RCIC steam supply line and are calculated based on 300 percent of rated RCIC steam flow. The present values were calculated for a four inch diameter steam line (which is the pipe size for other BWRs) rather than the six inch diameter steam line which is installed in the Grand Gulf Nuclear Station, Unit 1. The calculational model and input values for the model other than the pipe diameter are correct and were used in the calculation of the values proposed in this amendment. The only change in the

calculation of the proposed values is the use of a six inch diameter pipe instead of a four inch diameter pipe.

The safety function of the isolation valve in the RCIC steam supply line is to close following a postulated break of the steam supply line thus isolating the containment. The flow rate assumed in the loss of coolant accident (LOCA) safety analysis was 300 percent of rated RCIC steam flow and is not changed in the calculation of the proposed instrument setpoint and allowable values. Because the safety analysis for the LOCA would remain the same, the proposed change would not involve a significant increase in the probability or consequences of an accident previously evaluated. The change would make the actuation instrumentation setpoints consistent with the as-built plant. The setpoints have been and continue to be administratively controlled to the proposed values by plant administrative procedures. Because the plant equipment and operating procedures remain the same, the proposed change would not create the possibility of a new or different kind of accident from any accident previously evaluated. Because the proposed values are more conservative than the presently specified values, the proposed change would not involve a significant reduction in a margin of safety.

Accordingly, the staff proposes to determine that the proposed amendment does not involve a significant hazards consideration.

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154.

Attorney for licensee: Nicholas S. Reynolds, Esquire, Bishop, Liberman, Cook, Purcell and Reynolds, 1200 17th Street, N.W., Washington, D.C. 20036.

NRC Project Director: Walter R. Butler.

Pacific Gas and Electric Company, Docket No. 50–133, Humboldt Bay Power Plant, Unit No. 3, Eureka, California

Date of amendment request: May 14, 1986.

Description of amendment request: The licensee proposes an amendment to License No. DPR–7 to approve a revised security plan for Humboldt Bay Power Plant, Unit No. 3 (the facility). The proposed security plan is reduced in scope to cover only the storage of spent fuel. The facility is permanently shut down and authority to operate has been deleted by an amendment to allow possess-but-not operate status issued on July 16, 1985.

Basis for proposed no significant hazards consideration determination: The proposed change does not involve an increase in the probability or consequences of an accident previously evaluated because: (1) The security plan only eliminates areas, equipment and systems that are not operating with the facility permanently shutdown and (2) the spent fuel, which is the primary focus of the proposed plan, has a reduced potential for the probability or consequences of an accident because of the significant radioactive decay in the more than 9 years the facility has been shutdown.

The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated, because the method of storage of spent fuel has not changed, and with the reactor defueled and permanently shut down, no reactor accidents are possible.

The proposed change does not involve a reduction in a margin of safety because the security measures described in the plan are commensurate with the risks associated with the storage of fuel which have decreased because of radioactive decay of the fuel in the more than 9 years the facility has been shutdown.

Therefore, based on the above considerations the NRC staff has determined in accordance with 10 CFR Part 50.92 that this proposed amendment will not involve a significant hazards consideration.

Local Public Document Room location: Eureka-Humboldt County Library, 421 I Street (County Court House) Eureka, California 95501.

Attorney for licensee: Phillip A. Crane, Jr., Pacific Gas and Electric Company, Post Office Box 7442, San Francisco, California 94120.

NRC Project Director: Herbert N. Berkow.

Portland General Electric Company, et al., Docket No. 50–344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: April 7, 1986.

Description of amendment request: The proposed amendment would delete Trojan Technical Specification (TTS), Paragraph 3.4.10.1.d. Paragraph 3.4.10.1.d of TSS ¾ 4.10, "RCS Structural Integrity," currently allows the licensee to perform an evaluation of reduced structural integrity as an alternative to restoring structural integrity. By letter dated February 10, 1986 the staff requested the licensee review Paragraph 3.4.10.1.d and propose revised Technical Specifications based on the staff's concern that safety related components, especially those which are part of the reactor coolant pressure boundary or attached thereto, should not be placed into service with reduced structural integrity. The proposed amendment responds to the staff's request.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining that a proposed amendment involves no significant hazards consideration. Accordingly the licensee has performed the following analysis:

This change does not involve a significant increase in the probability or consequences of an accident previously evaluated because deleting TTS 3.4.10.1.d requires that strucutural integrity be restored in lieu of performance of an evaluation. This change constitutes an additional restriction not presently included in the TTS.

This change does not create the possibility of a new or different kind of accident from any accident previously evaluated because restoring structural integrity is more conservative than evaluating structural integrity from an accident analysis standpoint. By restoring structural integrity, assurance is provided that a new or different kind of accident will not occur.

This change does not involve a significant reduction in a margin of safety because restoring structural integrity in lieu of evaluating structural integrity assures that margins of safety are not reduced.

In the April 6, 1983 Federal Register (48 FR 14870), the NRC published a list of examples of amendments that are not likely to involve a significant hazards consideration. Example ii of that list applies to the changes proposed herein and states: "A change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications, e.g., a more stringent surveillance requirement."

Since the above example is judged to apply to the proposed change, the proposed change is deemed not to involve a significant hazard consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. The staff has, therefore, made a proposed determination that the licensee's request does not involve significant hazards considerations.

Local Public Document Room location: Multnomah County Library, 801 S.W. 10th Avenue, Portland, Oregon.

Attorney for licensee: J.W. Durham, Senior Vice President, Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204.

NRC Project Director: Steven A. Varga.

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: April 9, 1986.

Description of amendment request: The proposed amendment request would revise the Trojan Technical Specifications (TTS) related to the reporting requirements for Reactor Coolant System specific activity as follows:

(1) TTS 3.4.8, Action, Modes 1, 2, and 3, Item a—The provision limiting operation with specific activity greater than 1.0 uCi/gram Dose Equivalent I–131 to 10 percent of the unit's total yearly operating time would be deleted. (The basis for this deleted provision also would be deleted.)

(2) TTS 3.4.8, Action, Modes 1, 2, 3, 4, and the 5, Item a—The requirement that the specific activity analysis results be submitted in the Annual Report would be added.

(3) TTS 6.9.1.5.d would be added to specify information regarding the specific activity analysis which must be included in the Annual Report.

The proposed amendment is in response to Generic Letter 85–19 which states the staff's determination that the reporting requirement for iodine spiking can be reduced from a short-term report (Special Report or Licensee Event Report) to an item which is to be included in the Annual Report. The information to be submitted in the Annual Report would more clearly designate the results to be included from the specific activity analysis and exclude information regarding fuel burnup by core region.

Additionally, Generic Letter 85–19 states the staff's determination that the requirement to shut down a plant if coolant iodine activity limits are exceeded for 800 hours in a 12-month period (expressed as 10 percent of total yearly operating time in the TTS) can be eliminated. The limit is no longer considered necessary on the basis that proper fuel management by licensees (with the quality of nuclear fuel greatly improved) and existing reporting requirements [10 CFR 50.72(b)(1)(ii)] should preclude ever approaching the limit.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining that a proposed amendment involves no significant hazards considerations.

Accordingly, the licensee has performed the following analysis:

1. Does the license amendment involve a significant increase in the probability or consequences of an accident previously evaluated? Changing reporting requirements is administrative only. The provision regarding a percentage of total yearly operating time is no longer considered necessary since proper fuel management, improved fuel quality, and existing reporting requirements [10 CFR 50.72(b)(1)(ii)] should preclude approaching the limit. Therefore, the change in reporting requirements and the elimination of the operating limit will not involve a significant increase in the probability or consequences of an accident.

2. Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated? Changing reporting requirements is administrative only. Those changes and the elimination of an unnecessary operating limit do not create the possibility of a new or different type of accident.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Changing reporting requirements is administrative only. Those changes and the elimination of the provision regarding a percentage of total yearly operating time do not involve a significant reduction in a safety margin since proper fuel management, improved fuel quality, and existing reporting requirements should preclude approaching the limit.

Based on the above analysis, the licensee concluded that the proposed amendment does not involve a significant hazards considerations. The staff has reviewed the licensee's determination and agrees with the licensee's analysis. The staff has, therefore, made a proposed determination that the licensee's request does not involve a significant hazards consideration.

Local Public Document Room location: Multnomah County Library, 801 S.W. 10th Avenue, Portland, Oregon.

Attorney for licensee: J.W. Durham, Senior Vice President, Portland General Electric Company, 121 S. W. Salmon Street, Portland, Oregon 97204.

NRC Project Director: Steven A. Varga.

Power Authority of the State of New York, Docket No. 50-286, Indian Point Unit No. 3, Westchester County, New York

Date of amendment request: April 18, 1986.

Description of amendment request: This application for revision to the Indian Point 3 Technical Specifications seeks to increase the maximum allowable total core peaking factor, F_Q. Presently, the Technical Specifications limit the full power F_Q to less than or equal to 2.13. This change will increase the full power F_Q limit to less than or equal to 2.20.

The February 11, 1980 NRC Confirmatory Order had limited the calculated fuel peak clad temperature (PCT) to a maximum of 2000°F under large break LOCA conditions. As a result of this limit, a substantial penalty on F_Q had to be imposed.

The application provides the Appendix K Emergency Core Cooling System (ECCS) reanalysis assuming a uniform 24% steam generator tube plugging level, which was transmitted to the NRC via the Authority's May 5, 1983 letter. The limiting Final Acceptance Criteria (FAC) analysis case was the Double Ended Cold Leg Guillotine (DECLG) break, C_d=0.4. For this limiting case, the PCT was calculated to be 2039°F for a full power F_Q of 2.20. This case was re-analyzed with a full power F_Q of 2.14. The resultant PCT was 1995°F and thereby assured compliance with the February 11, 1980 Order. This F_Q limit was incorporated into the Indian Point 3 Technical Specification via Amendment 48, dated January 13, 1984.

By Rescission of Order, dated July 5, 1985, the February 11, 1980 Confirmatory Order was rescinded. As such, the aforementioned limiting case analysis with an F_Q of 2.20 can now be utilized as the resultant PCT of 2039°F satisfies the PCT requirement of 10 CFR 50.46.

However, the aforementioned Appendix K reanalysis, assuming a F_Q of 2.20, was performed in support of reactor operations with uniform 24% steam generator tube plugging. The Authority's March 14, 1986 letter transmitted Revision 1 to WCAP–10705, "Safety Evalution for Indian Point 3 with Asymmetric Tube Plugging Among Steam Generators (Non-proprietary)," which documented sensitivity of asymmetric steam generator tube plugging level on the LOCA and non LOCA transients. Enclosure 2 to this Safety Evaluation details the sensitivity of asymmetric tube plugging on calculated ECCS performance. The full power F_Q of 2.20 for the ECCS reanalysis

performed for a uniform 26% steam generator tube plugging level is not adversely impacted by asymmetric effects.

The Authority's April 23, 1985 letter transmitted proposed revisions to the Technical Specifications in support of the Cycle 5 refueling, which involved a fuel design transition from the Westinghouse 15×15 low parasitic (LOPAR) design to the 15×15 Optimized Fuel Assembly (OFA) design. The greater hydraulic resistance of the 15×15 OFA will cause an approximate reduction of 2.2% in reflood flow rate. This will result in an approximate 10°F increase in PCT under large break LOCA conditions. As a result of this increase in PCT, the F_Q limit had to be lowered from 2.14 to 2.13 so that the Confirmatory Order requirement of 2000°F PCT would not be exceeded. These revisions were incorporated into the Indian Point 3 Technical Specifications via Amendment 61, dated August 27, 1985.

Including the 10°F increase to account for the OFA design results in a PCT of 2049°F for a F_Q of 2.20 under the LOCA conditions. The limits of 10 CFR 50.46 are not exceeded. The F_Q assumed in all of the small break LOCA and non-LOCA transient analyses was 2.32. Asymmetric steam generator tube plugging and the OFA design did not necessitate any reductions in this assumed F_Q value. Hence F_Q of 2.20 assumed in the large break LOCA is limiting.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

A discussion of these standards as they related to this amendment follows:

(1) Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed change seeks to increase the F_Q limit to 2.20. The revised limit will not increase the probability of an accident previously analyzed as this limit is an operational restriction to limit the consequences of the accident. The analyses results are within the safety limits provided by 10 CFR 50.46.

(2) Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Increasing the F_Q limit to 2.20 will not introduce the possibility of an accident of a different type than previously analyzed.

(3) Does the proposed amendment involve a significant reduction in a margin of safety?

In issuing Amendment 46 to the Indian Point 3 Technical Specifications, dated January 13, 1984, the NRC in their safety evaluation report reviewed and approved the ECCS reanalysis assuming a F_Q of 2.14, which results in a PCT of 1995°F. The proposed change increasing the F_Q limit of 2.20 will result in a PCT of 2039°F. The presence of OFA fuel in the core will result in a PCT of 2049°F.

The analyses results are within the safety limits specified in 10 CFR 50.46.

Based on the above, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

Attorney for licensee: Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

NRC Project Director: Steven A. Varga.

Sacramento Municipal Utility District, Docket No. 50-312, Rancho Seco Nuclear Generating Station, Sacramento County, California

Date of amendment request: December 18, 1984 , as revised April 26, 1985, supplemented May 22, 1985, and superseded October 30, 1985.

Description of amendment request: The amendment would revise the Technical Specifications to establish Limiting Conditions for Operation (LCOs) for the utilization of the Decay Heat Removal System (DHRS) to cool the spent fuel pool. This is required because the spent fuel pool has a single loop heat removal system. If this loop becomes unavailable for removing heat from the fuel pool, one of the DHRS loops can be utilized to assure that the pool temperature is kept low enough to prevent boiling.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for a no significant hazards determination by providing certain examples (48 FR 14870). One of the examples (ii) of actions not likely to involve a significant hazards consideration relates to changes that constitute additional restrictions or controls not presently included in the Technical Specifications. The proposed amendment would add limitations and controls by adding LCOs for the use of the DHRS for cooling the fuel pool. The implementation of the proposed LCOs would provide additional controls and limitations not included in the current Technical Specifications. For this reason, the Commission proposes to determine that the application does not involve a significant hazards consideration.

Local Public Document Room location: Sacramento City-County Library, 828 I Street, Sacramento, California 95814.

NRC Project Director: John F. Stolz.

South Carolina Electric and Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station, Unit 1, Fairfield County, South Carolina

Date of amendment request: June 10, 1985, as supplemented December 6, 1985.

Description of amendment request: The amendment would: (1) Combine diesel generator (DG) Technical Specification (TS) Surveillance requirements 4.8.1.1.2.a.3 and 4 into one reqirement, 4.8.1.1.2.a.3; (2) change the DG TS surveillance requirement regarding the 24 hour run, such that the requirement to operate for 2 hours at the 2 hour DG load rating can be performed at anytime during the 24 hours instead of during the first 2 hours of the 24-hour run; (3) add to the Bases section for DG TS 3/4.8 a reference to the June 10, 1985 and December 6, 1985, amendment requests; (4) change the DG load rejection test in the TS surveillance from 830 kW to 729 kW; and (5) add a note to TS 3.8.1.2 to clarify that the Engineered Safety Feature (ESF) Load Sequencer may be de-energized in Modes 5 and 6.

The initial application dated June 10, 1985, was noticed in the Federal Register on July 17, 1985 (50 FR 29016). Additional information and new changes were submitted by letter dated December 6, 1985. Upon review, the NRC has determined that some of the initial changes requested, along with the new changes, require renoticing.

Basis for proposed no significant hazards consideration determination: The license is proposing to change the requirement to perform the DG two hour test at the beginning of the 24 hour run

and allow it to be performed at any time during the 24 hour period (item 2 above). This proposal is in accordance with the requirements of Regulatory Guide 1.108, item C.2.a(3), which states that testing should, "demonstrate full-load carrying capability for an interval of not less than 24 hours, of which 22 hours should be at a load equivalent to the continuous rating of the diesel generator and 2 hours at a load equivalent to the 2 hour rating of the diesel generator."

TS surveillance requirement 4.8.1.1.2.e.2 requires a load rejection test of greater than or equal to the maximum single load placed on the diesel generators (item 4 above). As listed in the Virgil C. Summer Nuclear Station Final Safety Analysis Report (FSAR), Table 8.3-3, (Channel A), the largest load is 729 kW and is associated with the charging pump. Accordingly, the licensee proposes that the Technical Specifications should be changed from 830 kW to 729 kW to reflect this load.

The licensee also requested an additional clarifying note be added to TS 3.8.1.2 to indicate that the ESF Load Sequencer may be de-energized in Modes 5 and 6 (item 5 above). The solid state protection system, which the automatic signals that start the diesel go through at the plant, is not required to be operable in Modes 5 and 6. Therefore, to be consistent with the other solid state protection TS (see Table 3.3-3, "Engineered Safety Feature Actuation System Instrumentation," items 1 and 7), this note is necessary to provide clarification for the determination of the diesel generators' operability in Modes 5 and 6.

The remaining changes, combining two TS line items into one (item 1 above), and referencing both amendment requests in the bases (item 3 above), are administrative in nature.

The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations. One of the examples relates to a purely administrative change to Technical Specifications such as a change to achieve consistency throughout the Technical Specifications. Three of the changes (items 1, 3 and 5) involved here are similar to this example. The other two changes (items 2 and 4) do not match any of the examples. However, the staff has reviewed the licensee's request for these two changes and has determined that should they be implemented, they will not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the load run and load reject tests will be conducted based on Regulatory Guide 1.108 and the FSAR, respectively. Also, they will not (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the physical plant design is not changed. Finally, they will not (3) involve a significant reduction in a margin of safety because the changes are based on a regulatory guide and the FSAR, respectively. Accordingly, the Commission proposes to determine that these changes do not involve significant hazards considerations.

Local Public Document Room location: Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180.

Attorney for licensee: Randolph R. Mahan, South Carolina Electric and Gas Company, P.O. Box 764, Columbia, South Carolina 29218.

NRC Project Director: Lester S. Rubenstein.

South Carolina Electric and Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station, Unit 1, Fairfield County, South Carolina

Date of amendment request: January 9, 1986, supplemented April 14, 1986.

Description of amendment request: The amendment would change License Condition 2.C (24) in Operating License No. NPF-12. Currently, the condition states, "SCE&G shall continue the seismic monitoring program discussed in Section 2.5.3 of the Safety Evaluation Report until December 31, 1983, at which time there shall be a reevaluation of the need for further monitoring to be made an additional licensing requirement." The amendment would change the condition to read, "SCE&G shall maintain responsibility for a seismic monitoring program as discussed in Section 2.5.3 of the Safety Evaluation Report until a request is made by the Licensee and approved by the NRC staff for reduction or elimination of the program."

Basis for proposed no significant hazards consideration determination: The University of South Carolina (USC) has indicated an interest in maintaining and operating the licensee's microseismic network to ensure continued monitoring in the future. The licensee has negotiated a contract (grant) with the USC Geology Department to provide complete operation, maintenance, and data analysis.

The original license condition required a reevaluation of the need for monitoring after December 31, 1983. Monitoring has continued since that time and by the recently negotiated contract will continue for some time into the future. Therefore, the license condition is being changed to reflect maintenance of a seismic monitoring program until a request is made by the licensee and approved by the NRC staff for reduction or elimination of the program.

The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations. The request involved in this case does not match any of those examples. However, the staff has reviewed the licensee's request for the above amendment and determined that should this request be implemented, it will not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the microseismic monitoring network is not part of the plant, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the physical plant design is not being changed. Also, it will not (3) involve a significant reduction in a margin of safety because the microseismic monitoring will continue under improved controls. Accordingly, the Commission proposes to determine that this change does not involve significant hazards considerations.

Local Public Document Room location: Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180.

Attorney for licensee: Randolph R. Mahan, South Carolina Electric and Gas Company, P.O. Box 764, Columbia, South Carolina 29218.

NRC Project Director: Lester S. Rubenstein.

South Carolina Electric and Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station, Unit 1, Fairfield County, South Carolina

Date of amendment request: March 17, 1986.

Description of amendment request: The amendment would change Technical Specification 6.2.2, "Administrative Controls—Unit Staff," to clarify that the Director, Nuclear Plant Operations does not need to review individual overtime during extended shutdown periods. The amendment would also change Technical Specification 3.5.3, "ECCS Subsystems—Tavg Less than 350°F," to clarify that the residual heat removal system can be aligned to the reactor coolant system during Mode 4 operation and manual alignment to the refueling water storage tank would be utilized upon receipt of a safety injection signal.

Basis for proposed no significant hazards consideration determination: Technical Specification (TS) 6.2.2.d states that, "Except during extended shutdown periods, the use of overtime should be considered on an individual basis. . . ." The amendment would clarify that individual overtime does not need to be reviewed by the Director, Nuclear Plant Operations during extended shutdown periods.

TS 3.5.3.d would be changed to be more like the Westinghouse Standard Technical Specifications, thereby clarifying that the residual heat removal system can be aligned to the reactor coolant system during Mode 4 operation.

The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations. The request involved in this case does not match any of those examples. However, the staff has reviewed the licensee's request for the above amendment and determined that should this request be implemented, it will not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because both changes clarify existing Technical Specification requirements, and (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the physical plant design is not being changed. Also, it will not (3) involve a significant reduction in a margin of safety because Technical Specification requirements are not being changed. Accordingly, the Commission proposes to determine that this change does not involve significant hazards considerations.

Local Public Document Room location: Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180.

Attorney for licensee: Randolph R. Mahan, South Carolina Electric and Gas Company, P.O. Box 764, Columbia, South Carolina 29218.

NRC Project Director: Lester S. Rubenstein.

Southern California Edison Company, et al. Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of amendment request: January 25, 1984 and October 25, 1985 (Reference PCN-84).

Description of amendment request: The proposed change would delete License Condition 2.C(5) of the San Onofre Nuclear Generating Station (SONGS) Units 2 and 3 Operating Licenses, NPF-10 and NPF-15, respectively. These license conditions define the requirements for the environmental qualification program for safety related electrical equipment. On February 23, 1983, the Commission issued a new rule, 10 CFR 50.49, which defines the requirements for environmental qualification of safety related electrical equipment and supersedes the SONGS 2 and 3 license conditions.

Specifically, License Condition 2.C(5)a requires that SCE be in compliance with the provisions of NUREG-0588 "Interim Staff Position on Environmental Qualification of Safety Related Equipment," Revision 1 dated July 1981. 10 CFR 50.49 encompasses the requirements of NUREG-0588 and states that equipment qualified in accordance with NUREG-0588 need not be requalified in accordance with the provisions of 10 CFR 50.49. However, replacement equipment must be qualified under the provisions of 10 CFR 50.49. License Condition 2.C(5)b requires that complete and auditable records, which describe the environmental qualification status of all safety related electrical equipment, be available and maintained and that such records be updated and maintained current as equipment is replaced or further tested. 10 CFR 50.49 encompasses the record keeping requirements of this license condition. License Condition 2.C(5)c requires implementation of an environmental qualification maintenance procedures program. Additionally, License Condition 2.C(5)d requires the implementation of an improved environmental qualification surveillance program to detect age-related degradation and any improved maintenance program procedures required by such a surveillance program. 10 CFR 50.49 encompasses these requirements by requiring that qualified equipment will meet its specified performance requirements when it is subjected to the conditions predicted to be present when it must perform its safety function, up to the end of its qualified life, and requires that replacement equipment must also be qualified. By letters dated August 23, 1983 and April 10, 1985, SCE affirmed that maintenance program procedures had been implemented and that an improved surveillance program had been implemented.

Basis for No Significant Hazards Considerations Determination: The Commission has provided guidance concerning the application of standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870) of amendments that are considered not likely to involve significant hazards considerations. Example (vi) relates to a change which either results in some increase to the probability or consequences of a previously analyzed accident or may reduce, in some way, a safety margin but where the results of the change are clearly within all acceptance criteria with respect to the system or component specified in the Standard Review Plan (SRP); for example, a change resulting from a small refinement of a previously used calculational model or design method. Example (vii) relates to a change to make a license conform to changes in the regulations where the license change results in a very minor change to facility operations currently within keeping with the regulations.

10 CFR 50.49, which was promulgated after the issuance of the SONGS 2 and 3 operating licenses, defines the Commission requirements for an acceptable environmental qualification program. Specifically, this rule identifies record keeping requirements, implementation schedule, and environmental qualification criteria. The rule supersedes previous Staff criteria for environmental qualifications such as those contained in NUREG-0588. License Conditions 2.C(5)a and 2.C(5)b identify schedule, environmental qualification criteria and record keeping requirements. These requirements have been superseded by 10 CFR 50.49; therefore, the proposed deletion of License Condition 2.C(5)a and 2.C(5)b makes the licenses conform to changes in the regulations. Thus, this change is similar to example (vii) of 48 FR 14870.

SRP Section 3.11, "Environmental Qualification of Mechanical and Electrical Equipment," describes the general requirements for the design and environmental qualification of all equipment. The specific acceptance criteria for assessing the acceptability of an environmental qualification program for safety related electrical equipment is provided by reference to NUREG-0588. 10 CFR 50.49 has superseded NUREG-0588 and thus specific SRP acceptance criteria are now found in 10 CFR 50.49. The proposed change deletes License Conditions 2.C(5)c and 2.C(5)d which define the requirements for an environmental qualification maintenance and surveillance program and requires the affirmation of implementation of the improved surveillance and maintenance procedures. 10 CFR 50.49 requires safety related electrical equipment remain qualified for its qualified life and that replacement equipment also be qualified. These two aspects of 10 CFR 50.49, while not specifically identifying

the means of accomplishing these requirements, achieve the same goal as License Conditions 2.C(5)c and 2.C(5)d; thus, while deletion of these license conditions removes the specificity of how equipment will be maintained in a qualified condition of its life, the same ultimate requirement is mandated by 10 CFR 50.49. Since the requirements of 10 CFR 50.49 must be met and since they define an acceptable environmental qualification program, the environmental qualification program will continue to meet the acceptance criteria even with the deletion of License Conditions 2.C(5)c and 2.C(5)d. Therefore, the proposed change is similar to example (vi) of 48 FR 14870.

Local Public Document Room Location: General Library, University of California at Irvine, Irvine, California 92713.

Attorney for Licensees: Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attn.: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111.

NRC Project Director: George W. Knighton.

Southern California Edison Company, et al, Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California.

Date of amendment request: February 7, 1986 (Reference: PCN-210).

Description of amendment request: The proposed change would delete, in its entirety, Technical Specification 3/4.6.2.2, "Iodine Removal System," and replace it with a new technical specification requiring trisodium phosphate in the containment emergency sump area.

Technical Specification 3/4.6.2.2, "Iodine Removal System," requires that a spray additive tank, containing at least 1456 gallons of between 40 and 44% by weight of NaOH solution, and two chemical addition pumps be operable in Modes 1, 2 and 3. The original purpose of this iodine removal system was to ensure that in the event of a LOCA a sufficient amount of NaOH will be added to the containment spray to raise the pH to between 8 and 9 during the initial phase of the spray. The effects of the increased pH levels are to increase the iodine removal capability of the spray and the iodine retention in the sump.

An additional function of the NaOH in the iodine removal system, during the long term recirculation phase, is to maintain the pH level of sump at greater than or equal to 7.0 to minimize the potential for chloride induced stress corrosion of austenitic stainless steel.

A new analysis utilizing recent changes in NRC methodology (NUREG-0800, Section 6.5.2, Rev. 1), combined with knowledge gained from recent studies on the behavior of iodine in the post-LOCA environment, demonstrates that the deletion of the spray additive tank does not significantly change the calculated offsite thyroid doses. The pH of the containment spray does not need to be increased during the initial phase of containment spray during a LOCA to enhance iodine removal.

However, in the post-LOCA recirculation phase, the emergency core cooling system (ECCS) solution pH must be increased to greater than or equal to 7.0 to minimize chloride induced stress corrosion cracking of austenitic stainless steel components, and to minimize the hydrogen produced by the corrosion of galvanized surfaces and zinc based paints. To accomplish this increase in the ECCS solution pH, a new technical specification is proposed to replace Technical Specification 3.6.2.2. This new technical specification requires the presence of a specified amount of trisodium phosphate in the containment area. This amount of trisodium phosphate will maintain long term pH control in the ECCS recirculation solution, thereby minimizing the potential for chloride induced stress corrosion and maximizing iodine retention in the sump solution.

Basis for Proposed No Significant Hazards Considerations Determination: The Commission has provided guidance for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870) of amendments that are considered not likely to involve significant hazards consideration. Example (vi) relates to a change which either may result in some increase in the probability or consequences of a previously-analyzed accident or may in some way reduce a safety margin, but where the results of the change are clearly within all acceptance criteria with respect to the system or component specified in the Standard Review Plan (SRP).

SRP Sections 6.1.1, "Engineered Safety Features Materials," 6.5.2, "Containment Spray as a Fission Product Cleanup System," an 15.6.5, "Loss of Coolant Accidents Resulting From Spectrum of Postulated Piping Breaks Within the Reactor Coolant System," define the pertinent acceptance criteria. SRP Section 6.1.1 requires that the composition of containment spray and core cooling water be controlled to ensure a minimum pH of 7.0 following a loss of coolant accident to inhibit initiation of stress corrosion cracking. SRP Section 6.5.2 defines conditions under which the containment spray system can be credited for fission product removal. SRP Section 15.6.5 defines, by reference to 10 CFR 100, the post accident dose limits.

The only impact that the proposed technical specification change has on this system is the deletion of the use of NaOH in the initial containment spray phase following a postulated LOCA, and the substitution of trisodium phosphate for NaOH in the sump solution during the long term recirculation phase. Consistent with SRP Section 6.5.2, no credit is taken for containment spray removal of elemental iodine. The current analysis, taking credit for NaOH addition, calculates a 0-2 hour exclusion area boundary (EAB) thyroid dose of 86.0 rem and a 0-30 day low population zone (LPZ) thyroid dose of 11.5 rem.

The 10 CFR 100 acceptance criteria are 300 rem for both categories. For the new analysis, the corresponding conservative case EAB thyroid dose is 76.2 rem and the LPZ thyroid dose is 12.2 rem. An optimized case resulted in calculated EAB thyroid dose of 57.7 rem and LPZ thyroid dose of 8.7 rem. Depending on the degree of conservatism in the new analysis, the deletion of the spray additive tank may slightly increase or decrease the calculated thyroid dose at the LPZ, and will in all cases reduce the thyroid dose at the exclusion area boundary. It should be noted that in all cases there is significant margin between the calculated thyroid doses and the limits defined in 10 CFR 100, and this margin is essentially independent of whether the spray additive tank is operable, or if the SAT is deleted and the sump pH control system is operable. Thus, the proposed change meets the dose acceptance criteria of SRP Section 15.6.5.

The proposed requirements will assure a post accident sump pH greater than or equal to 7.0, thereby meeting the SRP 6.1.1 requirements to minimize the potential for chloride stress corrosion, the generation of hydrogen or the environmental qualification of equipment. Therefore, because the proposed change meets the SRP acceptance criteria, it is similar to example (vi) of 48 FR 14870.

Local Public Document Room Location: General Library, University of California at Irvine, California 92713.

Attorney for Licensees: Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Avenue, P.O.

Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attn.: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111.

NRC Project Director: George W. Knighton.

Wisconsin Public Service Corporation, Docket No. 50–305, Kewaunee Nuclear Power Plant, (KNPP), Kewaunee County, Wisconsin

Date of amendment request: April 29, 1986.

Description of amendment request: The licensee proposes one major revision related to a recent determination that the copper and nickel content of reactor vessel belt line welds is greater than initially assumed. This discovery results in a needed revision to the reactor coolant system heatup and cooldown rates curves in the Technical Specifications (TS). In addition, the discovery also resulted in eight changes regarding error corrections, minor administrative changes and changes to attain consistency between different sections of the TS.

Basis for proposed no significant hazards consideration determination: The major change requested in this proposed license amendment consists of revisions to the heatup and cooldown limit curves due to recently discovered higher amounts of nickel and copper in the limiting reactor vessel weld.

This proposed change does not involve a significant hazards consideration because operation of the KNPP in accordance with this change would not:

(1) Significantly increase the probability or consequences of an accident previously evaluated. The revised heatup and cooldown limit curves meet the applicable regulatory requirements that ensure the conservatism of the curves. The revised safety factor applied to the thermal stress intensity factor meets the requirements of the ASME Boiler and Pressure Vessel Code and the criteria in the NRC Standard Review Plan Section 5.3.2. The use of updated material information that had been revised in the conservative direction is also not a concern because this data agrees with the guidance set forth in Draft Regulatory Guide 1.99, Revision 2 (current version). With the preparation of the limit curves in accordance with the latest criteria and guidance, there is no significant hazards concern for any postulated change in the probability or consequences of an accident previously evaluated.

(2) Create the possibility of a new or different type of accident from any previously analyzed. The revised heatup and cooldown curves do not create the possibility of a new or different type of accident. The curves were prepared in accordance with regulatory requirements and require plant operation within more limiting requirements to allow operation to 15 EFPY instead of 10 EFPY. Thus, no new or different type of accident has been created.

(3) Significantly reduce the margin of safety as defined in the basis for any Technical Specification. The safety factors and margins used in the preparation of the limit curves meet the requirements of the ASME Code and the guidance of Draft Regulatory Guide 1.99, Revision 2. The safety factor which was applied to the thermal stress intensity factor meets the requirements of the ASME code and the criteria in the Standard Review Plan. The use of updated material information does not present a safety concern as this data agrees with the guidance set forth in Draft Regulatory Guide 1.99, Revision 2. In addition, the margins added to the material reference temperature were consistent with the draft regulatory guide.

Regarding the remaining eight proposed changes the Commission has provided guidance for the application of standards for determining whether a significant hazards consideration exists by providing examples of amendments that are considered not likely to involve significant hazards considerations (48 FR 14870). One of these examples (i) is a purely administrative change to technical specifications: For example a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature. All eight of the remaining changes fall into these categories. Based on our evaluation of the first change involving revised heatup and cooldown limit curves, we have determined that this change does not involve a significant hazards consideration. The remaining eight proposed changes are similar to an example for which no significant hazards consideration exists. As a consequence of the above the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSES AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices because time did not allow the Commission to wait for this bi-weekly notice. They are repeated here because the bi-weekly notice lists all amendments proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Duke Power Company, et al., Docket Nos. 50–413 and 50–414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: May 5, 1986.

Brief description of amendment: The amendments would extend for Unit 1 only on a one-time basis and until the first refueling outage, certain 18-month or 24-month surveillances which can be conducted only when Unit 1 is shut down.

Dated of publication of individual notice in **Federal Register:** May, 21, 1986 (51 FR 18705).

Expiration date of individual notice: June 19, 1986.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730.

Virginia Electric and Power Company, Docket Nos. 50–280 and 50–281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia

Date of amendment request: April 30, 1986.

Brief description of amendment request: The proposed amendments would permit plant operation with the reactor coolant pump and steam generator supports redesigned in accordance with the recently noticed amendment to General Design Criterion 4 (GDC–4), 10 CFR Part 50, Appendix A (51 FR 12502), which will be effective May 12, 1986.

Dated of publication of individual notices in **Federal Register:** May 9, 1986 (51 FR 17286).

Expiration date of individual notice: June 9, 1986.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the Federal Register as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see: (1) The applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission s Public Document Room 1717 H Street, N.W., Washington, D.C., and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Arkansas Power and Light Company, Docket No. 50-313, Arkansas Nuclear One, Unit No. 1, Pope County, Arkansas

Date of application for amendment: September 3, 1985.

Brief description of amendment: The amendment revises the ANO-1 TSs by removing those TSs related to the Reactor Vessel Material Surveillance Program.

Date of issuance: May 20, 1986.

Effective date: May 20, 1986.

Amendment No.: 98.

Facility Operating License No. DPR-51. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: November 6, 1985 (50 FR 26209).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 20, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801.

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of Application for amendment: May 30, 1984, as supplemented December 19, 1985.

Brief description of amendment: The amendment revises the Technical Specification operability and surveillance requirements for Snubbers. The changes were requested by NRC Generic Letter 84-13 dated May 3, 1984. The incorporation of this amendment clarifies and increases snubber surveillance, defies snubber testing and acceptance criteria, and includes a snubber service life program.

Date of issuance: May 19, 1986.

Effective date: Immediately to be implemented within 30 days.

Amendment No.: 112.

Facilities Operating License No. DPR-26: Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: July 24, 1984 (49 FR 29906) and February 12, 1986 (51 FR 5273).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 19, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Consumers Power Company, Docket No. 50-155, Big Rock Point Plant, Charlevoix County, Michigan

Date of application for amendment: July 30, 1984 as revised May 24, 1985.

Brief description of amendment: The amendment adds the definition "Reportable Event," adds the term where appropriate and deletes specific reporting requirements from the Technical Specifications in response to the Commission's Generic Letter 83-43, Reporting Requirements of 10 CFR 50, Sections 50.72 and 50.73.

Date of issuance: May 12, 1986.

Effective date: May 12, 1986.

Amendment No. 85.

Facility Operating License No. DPR-6. This amendment revised the Technical Specifications.

Date of initial notice in Federal Register: September 20, 1984 (49 FR 36397).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 12, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, *City of Dalton, Georgia, Docket No. 50-321, Edwin I. Hatch Nuclear Plant, Unit No. 1, Appling County, Georgia*

Date of application for amendment: March 7, 1986.

Brief description of amendment: The amendment revises the main steam line high radiation scram and isolation setpoints, on a one time short term basis, to facilitate test injections of hydrogen into the reactor coolant.

The test is expected to be completed within about 20 days of its start.

Date of issuance: May 21, 1986.

Effective date: within 30 days of issuance.

Amendment No.: 125.

Facility Operating License No. DPR-57. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: March 26, 1986 (51 FR 10461).

The Commission's related evaluation of the amendments is contained in a Safey Evaluation dated May 21, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia.

BEST COPY AVAILABLE

GPU Nuclear Corporation, Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of application for amendment: November 7, 1985, as revised by March 3, 1986 (TSCR 135).

Brief description of amendment: The amendment approves changes to the Appendix A Technical Specifications (TS) pertaining to the facility licensed operator staffing requirements. The changes revise the facility staffing requirements in TS Section 6.2.2 for the minimum number of licensed operators in the control room during the various modes of reactor operation. It adds requirements on the number of licensed operators to specifically allow more such operators in the control room.

Date of issuance: May 12, 1986.

Effective date: May 12, 1986.

Amendment No. 102.

Provisional Operating License No. DPR–16. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: December 18, 1985 (50 FR 51624); March 26, 1986 (51 FR 10459).

The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated May 12, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Ocean County Library, 101 Washington Street, Toms River, New Jersey 08753.

Indiana and Michigan Electric Company, Docket No. 50–316, Donald C. Cook Nuclear Plant, Unit No. 2, Berrien County, Michigan

Date of application for amendment: March 14 and March 27, 1986, as supplemented by letters dated May 1 and May 5, 1986.

Brief description of amendment: The amendment revises the Technical Specifications for changes related to the cycle 6 reload, clarifications to make Unit 2 Specifications consistent with Unit 1 and the Standard Technical Specifications, and editorial changes.

Date of issuance: May 21, 1986.

Effective date: May 21, 1986.

Amendment No.: 62.

Facility Operating License No. DPR–74. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: April 9, 1986 (51 FR 12249).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 21, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Nebraska Public Power District, Docket No. 50–298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of application for amendment: December 20, 1984, as supplemented February 22, 1985 and February 19, 1986.

Brief description of amendment: The amendment revises the Technical Specifications (TS) for: (1) Average power range monitor (APRM) flow transmitter calibration, (2) definition of "OPERABLE—OPERABILITY," (3) automatic depressurization system actuation logic and (4) Cooper Nuclear Station organizational changes.

Date of issuance: May 19, 1986.

Effective date: May 19, 1986.

Amendment No.: 99.

Facility Operating License No. DPR–62. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: March 27, 1985 (50 FR 12148) and April 9, 1986 (51 FR 12251).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 19, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 28, 1986.

Brief description of amendment: The amendment modifies the Technical Specifications to eliminate the requirement for Emergency Cooling System operability during hydrostatic testing with the reactor not critical and reactor coolant temperature greater than 212°F.

Date of issuance: May 12, 1986.

Effective date: May 12, 1986.

Amendment No.: 62.

Facility Operating License No. DPR–63. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: March 26, 1986 (51 FR 10466).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 12, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 3, 1986.

Brief description of amendment: The amendment restricts the replacement of dry tubes associated with the intermediate range monitor (IRM) and source range monitor (SRM) instrumentation.

Date of issuance: May 22, 1986.

Effective date: May 22, 1986.

Amendment No.: 83.

Facility Operating License No. DPR–63. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: March 26, 1986 (51 FR 10466).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 22, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Pacific Gas and Electric Company, Docket Nos. 50–275 and 50–323, Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of application for amendments: February 14, 1986.

Brief description of amendments: These amendments revise the Technical Specification 5.3.1, "Fuel Assemblies" to increase the reload fuel maximum enrichment from 3.5 to 4.5 weight percent U–235.

Date of issuance: May 13, 1986.

Effective date: May 13, 1986.

Amendment Nos.: 7 and 5.

Facility Operating License Nos. DPR–80 and DPR–82: Amendments revised the Technical Specifications.

Date of initial in Federal Register: April 9, 1986 (51 FR 12235).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 13, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: California Polytechnic State University Library, Documents and Maps Department, San Luis Obispo, California 93407.

South Carolina Electric & Gas Company, Docket No. 50–395, Virgil C. Summer Nuclear Station, Unit No. 1 Fairfield County, South Carolina

Date of application for amendment: March 15, 1985.

Brief description of amendment: The amendment modifies the Technical Specifications to reflect administrative changes—changes to a position title, changes to an index, clarification of monitoring instruments and changes in reporting.

Date of issuance: May 16, 1986.

Effective date: Seven days after date of issuance.

Amendment No. 49.

Facility Operating License No. NPF–12. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: July 31, 1985 (50 FR 31072).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 16, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Fairfield County Library, Garden and Washington streets, Winnsboro, South Carolina 29180.

South Carolina Electric & Gas Company, Docket No. 50-395, Virgil C. Summer Nuclear Station, Unit No. 1 Fairfield County, South Carolina

Date of application for amendment: June 10, 1985.

Brief description of amendment: The amendment would revise Technical specification ¾ 8.1, "A.C. Sources," and its bases, and is based on NRC Generic Letter 84–15, "Proposed Staff Actions to Improve and Maintain Diesel Generator Reliability." The proposed revision will reduce the number and severity of diesel generator starts, thereby decreasing engine wear and increasing reliability, and will also restructure the action and surveillance requirements for clarity and usability.

Date of issuance: May 20, 1986.

Effective date: Within 7 days from date of issuance.

Amendment No. 50.

Facility Operating License No. NPF–12. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: July 17, 1985 (50 FR 29016)

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 20, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Fairfield County Library, Garden and Washington streets, Winnsboro, South Carolina 29180.

Southern California Edison Company et al., Docket No. 50-206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of application for amendment: May 17, 1984, as amended March 17, 1986.

Brief description of amendment: The proposed change modifies the Technical Specifications to incorporate Reactor Coolant System pressure-temperature limits that have been updated to account for recently measured irradiation effects on the reactor pressure vessel's nil ductility temperature.

Date of issuance: May 21, 1986.

Effective date: May 21, 1986.

Amendment No. 92.

Provisional Operating License No. DPR–13. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: July 24, 1984 (49 FR 29921) and April 9, 1986 (51 FR 12239).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 21, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Main Library, University of California, P.O. Box 19557, Irvine, California 92713.

Southern California Edison Company, et al. Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Dates of Application of Amendments: January 25, April 27, and November 30, 1984.

Brief Description of Amendments: The amendments revise the following: (1) Technical Specification 3/4.6.3, "Containment Isolation Valves" and includes the Limiting Condition for Operation, Action Statements and Surveillance Requirements; (2) Table 3.3–6 of Technical Specification 3/4.3.2, "Engineered Safety Feature Actuation System Instrumentation and Technical Specification 3/4.7.1.5, "Main Steam Isolation Valves"; and Limiting Condition for Operating 3.6.4.1, Hydrogen Monitors and Surveillance requirement 4.6.4.1.

Date-of-Issuance: May 16, 1986.

Effective Date: May 16, 1986, to be fully implemented within 30 days of issuance.

Amendment Nos.: 46 and 35.

Facility Operating License Nos. NPF–10 and NPF–15: Amendments revised the Technical Specifications.

Date of Initial Notice in Federal Register: February 12, 1986, June 4, 1985 and July 3, 1985 (51 FR 5278, 50 FR 23550 and 50 FR 27509).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 16, 1986.

No significant hazards consideration comments were received: No.

Local Public Document Room Location: San Clemente Library, 242 Avenida Del Mar, San Clemente, California.

Virginia Electric and Power Company, et al., Docket Nos. 50-338 and 50-339, North Anna Power Station, Units No. 1 and 2, Louisa County, Virginia

Date of application for amendments: August 6, 1985.

Brief description of amendments: The amendments delete the redundancy of reporting requirements presently specified in the North Anna, Units 1 and 2 Technical Specification 6.5.3.1.

Date of issuance: May 19, 1986.

Effective date: May 19, 1986.

Amendment Nos.: 79 and 68.

Facility Operating License Nos. NPF–4 and NPF–7. Amendments revised the Technical Specifications.

Date of initial notice in Federal Register: September 25, 1985 (50 FR 38923).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated May 19, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room locations: Board of Supervisors Office, Louisa County Courthouse, Lousia, Virginia 23093, and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Virginia Electric and Power Company, Docket Nos. 50-280 and 50-281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia

Date of application for amendments: August 9, 1985, as superseded December 20, 1985.

Brief description of amendments: These amendments delete the snubber listings in T.S. Tables 4.17–1 and 4.17–2, and provide editorial changes in TS 3.20 and TS 4.17 to reflect the deletion of the snubber tables, and the implementation of an administratively controlled listing.

Date of issuance: May 15, 1986.

Effective date: May 15, 1986.

Amendment Nos. 107 and 107.

Facility Operating License Nos. DPR–32 and DPR–37: Amendments revised the Technical Specifications.

Date of initial notice in Federal Register: April 9, 1986 (51 FR 12241).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 15, 1986.

No significant hazards consideration comments received: No.

Local Public Room location: Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

Washington Public Power Supply System, Docket No. 50-397, WNP-2, Richland, Washington

Date of application for amendment: January 17, 1986.

Brief description of amendment: This amendment will revise the WNP-2 Technical Specifications by changing the operation of value FPC-V-149 from manual to automatic. Valve FPC-V-149 is the interface between the Suppression Pool Cleanup System and the Fuel Pool Cooling (FPC) System. At present it is manually closed and locked during normal power operation. The change will provide a motorized isolation valve in the suppression pool cleanup return line and allow use of the FPC filter-demineralizers for suppression pool cleanup during reactor operations.

Date of Issuance: May 13, 1986.

Effective Date: May 13, 1986.

Amendment No. 24.

Facility Operating License No. NPF-21: Amendment revised the Technical Specifications.

Date of Initial Notice in the Federal Register: March 12, 1986 (51 FR 8503).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 13, 1986.

No significant hazards consideration comments received: No.

Local Public Room Location: Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Washington Public Power Supply System, Docket No. 50-397, WNP-2, Richland, Washington

Dates of application for amendment: March 28, 1986, as supplemented May 7 and 8, 1986.

Brief description of amendment: This action amends a license condition of the WNP-2 Operating License NPF-21. Attachment 2, Paragraph 3.(a) of License Condition 2.C.(16) now requires that the licensee shall implement (install or upgrade) requirements of Regulatory Guide 1.97, Rev. 2, with the exception only of flux monitoring, prior to startup following the first refueling outage. This amendment permits implementation of this Regulatory Guide requirement to be delayed for the Suppression Pool Level Monitoring System until startup following the second refueling outage.

Date of Issuance: May 23, 1986.

Effective Date: May 23, 1986.

Amendment No. 25.

Facility Operating License No. NPF-21: Amendment revises Attachment 2, Paragraph 3. of License Condition 2.C.(16).

Date of Initial Notice in the Federal Register: April 23, 1986 (51 FR 15418).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 23, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Washington Public Power Supply System, Docket No. 50-397, WNP-2, Richland, Washington

Dates of application for amendment: January 17, 1986, and February 18, 1986.

Brief description of amendment: This action amends the WNP-2 Technical Specification Table 3.6.3-1, "Primary Containment Isolation Valves" to: (1) Reflect corrections and additions to and deletions from the Excess Flow Check Valve listings, Traversing Incore Probe System valve listings, Residual Heat Removal System valve listings and equipment qualification limits; (2) reidentify certain valves in accordance with current Supply System practices; (3) add valves previously omitted; (4) provide clarification to notes in the table; (5) correct typographical errors; and (6) delete maximum isolation time listings for valves not performing an automatic containment isolation function.

Date of Issuance: May 23, 1986.

Effective Date: May 23, 1986.

Amendment No. 26.

Facility Operating License No. NPF-21: Amendment revises the Technical Specifications.

Date of Initial Notice in the Federal Register: April 23, 1986 (51 FR 15416).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 23, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Richard Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Washington Public Power Supply System, Docket No. 50-397, WNP-2, Richland, Washington

Date of application for amendment: January 17, 1986.

Brief description of amendment: This action will amend the WNP-2 Technical Specifications by changing Technical Specification Table 3.6.4.3-1, "Motor Operated Valves Thermal Overload Protection" to add valves previously omitted, add valves as a result of system upgrades, and remove valves having no safety related function.

Date of Issuance: May 23, 1986.

Effective Date: May 23, 1986.

Amendment No. 27.

Facility Operating License No. NPF-21: Amendment revises the Technical Specifications.

Date of Initial Notice in the Federal Register: April 23, 1986 (51 FR 15416).

The Commission's related evaluation of the amendment is contained in a Safety Evalution dated May 23, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Washington Public Power Supply System, Docket No. 50-397, WNP-2, Richland, Washington

Date of application for amendment: February 26, 1986, as supplemented on April 7, 24, 25, 30 and May 22, 1986.

Brief description of amendment: This action amends the WNP-2 Technical Specifications to support the operation of WNP-2 at full rated power during the next fuel cycle, Cycle 2. This reload amendment changes the Technical Specifications in the following areas: (1) Establishes operating limits for all fuel types for the upcoming Cycle 2 operation; (2) reflects the replacement of 128 initial core fuel assemblies with Exxon Nuclear Company (ENC) fuel assemblies for the upcoming Cycle 2 operation; and (3) modifies the Bases section of the Technical Specification to account for the use of Exxon fuel assemblies.

Date of Issuance: May 23, 1986.

Effective Date: May 23, 1986.

Amendment No. 28.

Facility Operating License No. NPF-21: Amendment revises the Technical Specifications.

Date of Initial Notice in the Federal Register: April 23, 1986 (51 FR 15417)

The Commission's related evaluation of the amendment is contained in a Safety Evalution dated May 23, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Yankee Atomic Electric Company, Docket No. 50-29, Yankee Nuclear Power Station, Franklin County, Massachusetts

Date of application for amendment: May 26, 1981, as revised January 23, 1984 and February 28, 1985.

Brief description of amendment: The amendment modifies the Technical Specifications (TS) for: (1) Safety injection tank temperature; (2) steam generator blowdown monitor setpoint; (3) a main coolant system surveillance requirement to reflect removal of the Low Pressure Surge Tank as part of the containment boundary; (4) remove a charging system valve from the ECCS surveillance requirements to reflect the current flowpath; (5) modify the reactor vessel wall fluence exposure curve; (6) modify the high pressure carbon dioxide limiting condition for operation (LCO) to allow maintenance in specified plant areas; (7) modify containment isolation terminology; (8) modify the specified composition of the plant on-site review committee; (9) modify the radioactive effluent TS LCO to require operation only when flow exists; and (10) add an additional flow rate measuring device to the radioactive liquid effluent TS.

Date of Issuance: May 14, 1986.

Effective Date: May 14, 1986.

Amendment No. 92.

Facility Operating License No. DPR-3. Amendment revised the Technical Specifications.

Date of Initial Notice in the Federal Register: March 27, 1985, (50 FR 12186) and September 25, 1985 (50 FR 38924).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 14, 1986.

No significant hazard consideration comments received: No.

Local Public Document Room location: Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Yankee Atomic Electric Company, Docket No. 50-29, Yankee Nuclear Power Station, Franklin County, Massachusetts

Date of application for amendment: March 28, 1984, with additional information May 3, 1984, and supplemented May 7, 1985.

Brief description of amendment: The proposed change modifies the Technical Specifications (TS) to: (1) Allow movement of spent fuel pit building hatches (excluding the cask hatch cover) over the spent fuel pit after newly discharged spent fuel assemblies have discharged 60 days or less, depending on the number of assemblies discharged, as opposed to the current TS requirement of at least 90 days of decay; and (2) allow use of the travel crane to move the cask hatch over the spent fuel pit building, except that movement over fuel assemblies in the spent fuel pit will be prohibited.

Date of Issuance: May 20, 1986.

Effective date: May 20, 1986.

Amendment No. 93.

Facility Operating License No. DPR-3. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: August 14, 1985 (50 FR 32804).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated May 20, 1986.

No significant hazard consideration comments received: No.

Local Public Document Room location: Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing. For exigent circumstances, a press release seeking public comment as to the proposed no significant hazards consideration determination was used, and the State was consulted by telephone. In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant, a shorter public comment period (less than 30 days) has been offered and the State consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see: (1) The application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By July 7, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a

notice of hearing or an appropriate order.

As required by 10 CFR § 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Branch Chief*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and /or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of application for amendment: May 9, 1986.

Brief description of amendment: This licensee amendment revises the technical specifications to permit operation of the facility during the remainder of Cycle 14 without removing tube 37-73 in the No. 2 steam generator from service by plugging.

Date of issuance: May 14, 1986.

Effective date: May 14, 1986.

Amendment No. 76.

Facility Operating License No. DPR-61. Amendment revised the technical specifications.

Public comments requested as to proposed no significant hazards consideration: No.

The Commission's related evaluation of the amendment and final no significant hazards considerations determination are contained in a Safety Evaluation dated May 14, 1986. The State of Connecticut was consulted concerning the waiver of compliance issued on May 8, 1986 and, at that time, expressed no concern from the standpoint of plant safety. On May 14, 1986, an attempt was made to notify the state representative of our intent to issue an emergency license amendment, however, he was unavailable due to official state business.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry and Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

Local Public Document Room location: Russell Library, 124 Broad Street, Middletown, Connecticut 06457.

NCR Project Director: Christopher I. Grimes.

Dated at Bethesda, Maryland, this 28th day of May 1986.

For the Nuclear Regulatory Commission.

Robert M. Bernero,

Director Division of BWR Licensing.

[FR Doc. 86-12415 Filed 6-3-86; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Ad Hoc Subcommittee on TVA; Meeting

The ACRS Ad Hoc Subcommittee on TVA will hold a meeting on June 12 and 13, 1986. The June 12-discussion will be held in the Tennessee Valley Authority's Chattanooga Office Complex, Tennessee River Room, 1101 Market Street, Chattanooga, TN. The June 13 discussion will be held in the Sequoyah Nuclear Plant, Managers Conference Room, Daisy, TN.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Thursday, June 12, 1986—8:30 a.m. until the conclusion of business

Friday, June 13, 1986—8:30 a.m. until the conclusion of business

The Subcommittee will discuss TVA reorganization and related technical and management issues.

Oral statements may be presented by members of the public with the concurrence of the subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with

any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Dr. Richard Savio (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: May 29, 1986.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590-01-M

[Docket No. 50-320 License No. DPR-73 EA 84-137]

GPU Nuclear (Three Mile Island, Unit 2); Notice of Hearing

Commissioners: Nunzio J. Palladino, Chairman, Thomas M. Roberts, James K. Asselstine, Frederick M. Bernthal, Lando W. Zech, Jr.

General Public Utilities Nuclear Corporation (GPU Nuclear or licensee), Parsippany, New Jersey is the holder of Operating License No. DPR-73 issued by the Nuclear Regulatory Commission (NRC). The license was issued on February 8, 1978 and modified by Order on July 20, 1979.

The NRC's Office of Investigations (OI) conducted nine investigations into allegations dealing with various items involving management integrity at the Three Mile Island Nuclear Station. The NRC staff subsequently reviewed the reports and other pertinent materials and documented its review in Supplement 5 to the Safety Evaluation Report (SER) on TMI-1 Restart (NUREG-0680, Supplement 5). As a result of the review, an apparent violation of NRC requirements was identified.

On August 12, 1985, the Director, Office of Inspection and Enforcement, pursuant to the authority in section 234 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2282), and 10 CFR 2.205, served on the licensee a Notice of Violation and Proposed Imposition of Civil Penalty. This Notice alleged that Richard D. Parks, a Bechtel employee, was discriminated against for engaging in protected activities in reporting safety problems to management, requesting assistance from the NRC, and commencing a proceeding with the Department of Labor. By letter dated October 21, 1985, the licensee denied the allegations.

On March 4, 1986 the NRC issued an Order Imposing Civil Monetary Penalty. 51 FR 8681 (March 12, 1986). The Order required the license to pay a civil penalty in the amount of $64,000 and provided an opportunity to request a hearing on the Order.

In a letter dated March 20, 1986 the licensee responded by requesting a hearing with respect to the Order Imposing Civil Monetary Penalty.

Pursuant to the Atomic Energy Act of 1954, as amended, and the regulations in Title 10, Code of Federal Regulations, Part 2, notice is hereby given that a hearing will be held before the Honorable Ivan W. Smith, Administrative Law Judge, at a time to be set by the Administrative Judge.

The issues before the Administrative Law Judge to be considered and decided will be, as stated in the March 4, 1986 Order Imposing Civil Monetary Penalty, (1) whether the licensee violated NRC requirements as set forth in the Notice of Violation and Proposed Imposition of Civil Penalty issued on August 12, 1985 and (2) whether, on the basis of such violation, the Order should be sustained.

Pursuant to 10 CFR 2.705, an answer to this Notice may be filed by the licensee within 20 days after service of this Notice of hearing.

A prehearing conference will be held by the Administrative Law Judge at a date and place to be set by the Administrative Law Judge to consider pertinent matters in accordance with the Commission's Rules of Practice. The date and place of hearing will be set at or after the prehearing conference and notice in the Federal Register.

Required papers shall be filed by mail or telegram addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Chief, Docketing and Service Branch, or by delivery to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC.

Pending further order of the Administrative Law Judge, parties are required to file, pursuant to the provisions of 10 CFR 2.708, an original and two (2) copies of each document with the Commission.

Pursuant to 10 CFR 2.785, the Commission authorizes an Atomic Safety and Licensing Appeal Board to exercise the authority and perform the review functions which would otherwise be exercised and performed by the Commission. The Appeal Board will be designated pursuant to 10 CFR 2.787, and notice as to membership will be published in the Federal Register.

Dated at Washington, DC, this 30th day of May, 1986.

For the Commission.[1]

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 86-12572 Filed 6-3-86; 8:45 am]

BILLING CODE 7590-01-M

Nuclear Waste Policy Act: Proposed Establishment of a Federally Funded Research and Development Center for Waste Management

ACTION: Notice of intent.

SUMMARY: The Nuclear Regulatory Commission (NRC) announces that it is considering the establishment and sponsorship of a Federally Funded Research and Development Center (FFRDC) for waste management technical assistance and research as a potential solution to problems of conflict of interest and continuity of technical assistance. The Commission has not made a commitment to sponsor the FFRDC. Final approval by the Commission will be subject to review of the comments received in the repsonse to Notice of Intent and to finding a highly qualified contractor to manage and operate the FFRDC. The comment period expired April 24, 1986. The list of respondents to the Notice of Intent and all comments received are available for public inspection at the U.S. Nuclear Regulatory Commission, Public Document Room, 1717 H Street, NW., Washington, DC 20555.

SUPPLEMENTARY INFORMATION:

Background

Under the Nuclear Waste Policy Act of 1982 (NWPA), the U.S. Nuclear Regulatory Commission (NRC) is responsible for licensing the construction, operation, and closure of facilities required for a high-level radioactive waste disposal system, which are to be designed, constructed, operated, and closed by the U.S.

---

[1] Commissioner Bernthal was absent when this item was affirmed, if he had been present, he would have approved it.

Department of Energy (DOE). The facilities of the DOE waste disposal system will include mined geologic repositories; monitored retrievable storage (MRS) facilities or other interim storage measures; and transportation vehicles, casks and handling equipment.

NRC's high-level waste licensing program currently faces two critical problems with respect to contracted technical assistance and research. First, the continued use of contractors who also have a contractual relationship with DOE's high-level waste program, or with any other party who might be a participant in NRC's high-level waste licensing hearings, may give rise to an organizational conflict of interest situation, and may draw into question the independence and freedom from bias of the contractor's work and, consequently, of NRC's licensing decisions. According to the definition in 41 CFR 20–1.54, an "organizational conflict of interest" means that:

> . . . a relationship exists whereby a contractor or prospective contractor has present or planned interests related to the work to be performed under an NRC contract which: (1) May diminish its capacity to give impartial, technically sound, objective assistance and advice or may otherwise result in a biased work product, or (2) may result in its being given an unfair competitive advantage.

Second, the long-term continuity of NRC's waste management technical assistance and research program over the next twenty years or more is threatened as a result of efforts to avoid organizational conflict of interest situations (contractors are required to choose between doing work for NRC's program or for DOE's much larger program) and by the possible recompetition of technical work. The loss of contractor expertise has a significant impact to NRC's technical program because of its evolving nature and NRC's need for contractor experts to appear as expert witnesses at adjudicatory hearings.

In light of the problems discussed above, the NRC believes that the long-term contractual support offered by a Federally Funded Research and Development Center (FFRDC) for waste management technical assistance and research is a potential solution for providing the special long-term contractual relationship needed by NRC in order to alleviate potential conflict of interest situations and provide long-term continuity.

Notice of Intent

This Notice of Intent indicates that NRC is considering the establishment and sponsorship of an FFRDC for waste management technical assistance and research as a solution to the problems of conflict of interest and long-term continuity. The FFRDC would be entitled, "The Center for Nuclear Waste Regulatory Analyses" (hereinafter referred to as the "Center"). The publication of this Notice of Intent, however, is not a commitment on the part of NRC to establish and sponsor an FFRDC. Any final decision to do so must be approved by the Commission and be in compliance with Office of Federal Procurement Policy (OFPP) Letter No. 84–1, "Federally Funded Research and Development Centers" (April 4, 1984).

Technical assistance and research tasks to be performed by the Center would encompass the following general areas: (1) Waste sytems engineering and integration; (2) long-term performance of a geologic setting; (3) long-term performance of an engineered barrier system; (4) performance of an MRS and repository during operation; (5) special analytical evaluations; and (6) transportation, environmental impacts, and other areas related to the Nuclear Waste Policy Act.

The period of performance for the Center would expand throughout the duration of NRC's high-level waste licensing responsibilities (estimated to be twenty years or more). The period of performance for the contract to manage and operate the Center would be for five years (to be renewed every five years, subject to comprehensive review by the NRC). The level of effort for the first five years would build up from about 20–25 staff years during the first year to about 50 staff years during the fifth year and may increase by up to 50%, depending upon program development and appropriations availability. ("Staff years" includes direct staff plus support staff.)

The NRC screening criteria for the Center are: (1) No conflict of interest with the high-level waste program; (2) operation of the Center as a not-for-profit organization free of control by any organization whose affiliations could give rise to conflict of interest; (3) capability to provide long-term continuity in resources to NRC throughout the duration of its high-level waste program under NWPA (e.g., 20 years or more); (4) multi-disciplined staff; (5) access to existing equipment and facilities (e.g., computational and experimental laboratories); (6) expertise in the areas of technical assistance and research identified above; and (7) capability to provide testimony by expert staff during NRC adjudicatory hearings.

Final Commission approval to issue a solicitation package will be subject to review of the public comments received in response to the draft solicitation package. The comment period expired April 24, 1986 and all comments received are available for public inspection at the U.S. Nuclear Regulatory Commission, Public Document Room, 1717 H Street, NW., Washington, DC 20555. Final Commission approval to establish and sponsor the Center will be subject to finding a highly qualified contractor to manage and operate the Center.

Dated at Bethesda, Maryland, this 28th day of May 1986.

For the U.S. Nuclear Regulatory Commission.

Victor Stello, Jr.,

Executive Director for Operations.

BILLING CODE 7590–01–M

[Docket No. 50–247]

Consolidated Edison Co. of New York; Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Consolidated Edison (the licensee) to withdraw portions of its February 14, 1983 amendment application of the Indian Point Nuclear Generating Unit No. 2 (IP–2), located in Westchester County, New York. The proposed amendment would have revised the Technical Specifications to make certain positions as stringent as Standard Technical Specifications. The withdrawal affects the following Technical Specification sections.

Section 3.4—all changes.
Section 3.6—all changes.
Section 3.8—Paragraph 3.8.C.2.
Section 3.10—all changes.
Section 3.11—all changes.
Section 3.5—Paragraph 3.5.7, reference to 3.5.7 in paragraph 3.5.8, associated bases on page 3.5.5. Table 3.5–5 and associated bases on page 3.5–5.

The Commission issued a Notice of Consideration of Issuance of the Amendments in the Federal Register on September 21, 1983 (48 FR 43134). By letter dated May 14, 1985, the licensee requested, pursuant to 10 CFR 2.107, permission to withdraw portions of its application for the proposed amendment.

The Commission has considered the licensee's May 14, 1985 request and determined that permission to withdraw the identified portions of the February 14, 1983 application for amendment should be granted.

For further details with respect to this

action, see: (1) The Application for amendment dated February 14, 1983; (2) the licensee's letter dated May 14, 1985, requesting withdrawal of the application for license amendment; and (3) our letter dated May 29, 1986. All of the above documents are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Dated at Bethesda, Maryland, this 29th day of May 1986.

Steven A. Varga,

Director, PWR Project Directorate No. 3, Division of PWR Licensing-A, NRR.

BILLING CODE 7590-01-M

Applications for Licenses to Export Nuclear Facilities or Materials; Transnuclear, Inc.

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application" please take notice that the Nuclear Regulatory Commission has received the following application for an export license. A copy of the application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed before July 3, 1986. any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, U.S. Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear materials or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

NRC EXPORT APPLICATIONS

Name of applicant, date of application, date received, application number	Material type	Material in kilograms		End-use	Country of destination
		Total element	Total isotope		
Transnuclear, Inc., May 14, 1986, May 16, 1986 XSNM02941, Amend 01.	Enriched uranium	Addl 52.500	Addl 46.963	Additional fuel for HFR Greenable Research Reactor.	France.

Dated this 29th day of May 1986 at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

Marvin R. Peterson,

Assistant Director, Export/Import and International Safeguards, Office of International Programs.

BILLING CODE 7590-01-M

[Docket Nos. 50-272 and 50-311]

Public Service Electric and Gas Co. et al., Salem Nuclear Generating Station, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of a partial exemption from the requirements of Appendix J to 10 CFR Part 50 to Public Service Electric and Gas Company (the licensee) for the Salem Nuclear Generating Station, Units 1 and 2, located at the licensee's site in Salem County, New Jersey.

Environmental Assessment

Identification of Proposed Actions. The proposed exemption would relieve the licensee from the requirement of conducting a full pressure airlock leakage test, pursuant to Paragraph III.D.2(b)(ii) of Appendix J to 10 CFR Part 50, whenever airlocks are opened during periods when containment integrity is not required. Licensee would rely, instead, on the seal leakage test described in Paragraph III.D.2(b)(iii) when the reactor is in cold shutdown (Mode 5) or refueling (Mode 6) and when no maintenance has been performed on the airlock.

Licensee's request for exemption and the bases therefor are contained in a letter dated April 11, 1986.

The Need for the Proposed Actions. The proposed exemption is from performance of the leakage rate test required by Paragraph III.D.2(b)(ii) of 10 CFR Part 50, Appendix J, which takes at least 8 hours per airlock. Exemption from full pressure leakage tests on airlocks opened during a period when containment integrity is not required would provide the licensee with greater plant availability over the lifetime of the plant.

Environmental Impact of Proposed Actions. The proposed exemption would permit the substitution of an airlock seal leakage test (Paragraph III.D.2(b)(iii) of Appendix J. 10 CFR Part 50) for the full pressure airlock test otherwise required by Paragraph III.D.2.(b)(ii) when the airlock is opened while the reactor is in a cold shutdown or refueling mode. If the tests required by III.D.2(b)(i) and (iii) are current, no maintenance having been performed on the airlock and with it properly sealed, this exemption will not affect containment integrity and does not affect the risk of facility accidents. Thus, post-accident radiological releases will not be greater than previously determined nor does the proposed exemption otherwise affect radiological plant effluents, nor result in any significant occupational exposure. Likewise, the exemption does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant radiological or non-radiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Actions. Because we have concluded that there is no measurable environmental impact associated with the proposed exemption, any alternatives to the exemption will have either no environmental impact or greater environmental impact.

The principal alternatives would be to deny the requested exemption. Such action would not reduce environmental impacts of Salem Units 1 and 2 operations and would result in reduced operational flexibility or unwarranted delays in power ascension.

Alternative Use of Resources. These actions do not involve the use of resources not previously considered in connection with the "Final

Environmental Statement Related to Operation of Salem Nuclear Generating Station, Units 1 and 2," dated April 1973.

Agencies and Persons Consulted. The NRC reviewed the licensee's request that supports the proposed exemption. The NRC staff did not consult other agencies or persons.

Findings of No Significant Impact

Based upon the foregoing environmental assessment, we conclude that the proposed exemption will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

For further details with respect to the proposed actions, see the licensee's request for exemption dated April 11, 1986 which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Salem Free County Public Library, 112 W Broadway, Salem, New Jersey 08079.

Dated at Bethesda, Maryland, this 29th day of May 1986.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, PWR Project Directorate No. 3, Division of PWR Licensing—A.

[FR Doc. 86-12695 Filed 6-3-86; 8:45 am]

BILLING CODE 7590-01-M

Intent To Relocate Records for the Brunswick Steam Electric Plant

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of intent to relocate the records for the Brunswick Steam Electric Plant.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) is moving the Local Public Document Room (LPDR) records collection for the Brunswick Steam Electric Plant from the Brunswick County Library (Library), Southport, North Carolina, to another as yet undetermined location. Because of the size of the collection, which now measures almost 50 shelf feet of material, it has become increasingly difficult for the Brunswick County Library to provide the shelf space necessary to maintain this collection, and they have asked that it be relocated. The purpose of this notice is to invite public comment on possible LPDR sites.

DATE: Comment period expires July 3, 1986. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments filed on or before this date.

ADDRESS: Written comments may be submitted o the Local Public Document Room Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Jona L. Souder, Chief, Local Public Document Room Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone 301-492-7536, or Toll Free 800-638-8061.

SUPPLEMENTARY INFORMATION: Since the early 1970's the Brunswick County Library, located at 109 W. Moore Street, Southport, North Carlina, has served as the Local Public Document Room repository for record relating to the Brunswick Plant. The document collection includes essentially all records considered by the NRC in the licensing and regulation of the Brunswick Plant. Because of the growth in the size of the collection, the Library no longer has the shelf space necessary to house the material and has asked that the LPDR collection be relocated.

Among the facotors the NRC will consider in selecting a new location for the collection are:

(1) The willingness and ability of the library to house and maintain the collection;

(2) The physical facilities available, including shelf space, workspace and copying and micrographics equipment;

(3) The willingness and ability of the library staff to assist the public to locating records;

(4) The public accessibility of the library, including parking, ground transportation, and hours of operation, particularly evenings and weekends hours;

(5) The proximity (within 50 miles) of the library to the Brunswick Plant located in Southport, North Carolina; and

(6) The proximity of the library to existing user groups of the collection, if known.

Public comments are requested on the desirability to moving the Brunswick LPDR collection to any appropriate library in the vicinity of the Brunswick Plant.

Dated at Bethesda, Maryland, this 30th day of May, 1986.

For the U.S. Nuclear Regulatory Commission.

Donnie H. Grimsley,

Director, Division of Rules and Records, Office of Administration.

BILLING CODE 7590-01-M

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) Collection title: Self-Employment Questionnaire
(2) Form(s) submitted: AA-4
(3) Type of request: Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.
(4) Frequency of use: On occasion
(5) Respondents: Individuals or households
(6) Annual responses: 600
(7) Annual reporting hours: 158
(8) Collection description: Section 2 of the RRA provides for payment of annuities to qualified employees and their spouses. In order to receive an annuity, the applicant must stop all railroad work and all work for pay outside the railroad industry that is considered "last person service" (LPS). This collection obtains information about the applicant's self-employment work to be used in making an LPS determination.

Additional Information or Comments

Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312-751-4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Judy McIntosh (202-395-6880), Office of Management and Budget, Room 3208,

New Executive Office Building, Washington, DC 20503.

Pauline Lohens,

Director of Information and Data Management.

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) Collection title: Statement of Death by Funeral Director
(2) Form(s) submitted: G-273
(3) Type of request: Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection
(4) Frequency of use: On occasion
(5) Respondents: Businesses or other for-profit
(6) Annual responses: 12,000
(7) Annual reporting hours: 600
(8) Collection description: The Railroad Retirement Act provides for payment of benefits to qualified individuals due to the death of a railroad worker. The statement obtains information needed to support a claim for death benefits.

Additional Information or Comments

Copies of the proposed forms and supporting documents can be obtained from Pauline Lohens, the agency clearance officer (312-751-4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Judy McIntosh (202-395-6880), Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC. 20503.

BILLING CODE 7905-01-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 22-15234]

Application and Opportunity for Hearing; Citicorp

Notice is hereby given that Citicorp (the "Applicant") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding that the trusteeships of United States Trust Company of New York (the "Trust Company") under four existing indentures, and a Pooling and Servicing Agreement (the "Agreement") dated as of March 1, 1986 under which certificates evidencing interests in a pool of mortgage loans have been issued, is not likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trust Company from acting as Trustee under either of such indentures or the Agreement.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest it shall within ninety days after ascertaining that it has such a conflicting interest, either eliminate the conflicting interest or resign as trustee. Subsection (1) of section 310(b) provides, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which securities of an obligor upon the indenture securities are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of the subsection another indenture under which other securities of the same obligor are outstanding, if the issuer shall have sustanied the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under both the qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under one of such indentures.

The Applicant alleges that:

(1) The Trust Company currently is acting as Trustee under four indentures in which the Applicant is the obligor. The indenture dated as of February 15, 1972 involved the issuance of Floating Rate Notes due 1989, the indenture dated as of March 15, 1977 involved the issuance of various series of unsecured and unsubordinated Notes, the indenture dated as of August 25, 1977 involved the issuance of Rising-Rate Notes, Series A and the indenture dated as of April 21, 1980 involved the issuance of various series of unsecured and unsubordinated Notes. Said indentures were filed as, respectively, Exhibits 4(a), 2(b), and 2(a) to Applicant's respective Registration Statements Nos. 2-42915, 2-58355, 2-59396, and 2-64862 filed under the Securities Act of 1933, and have been qualified under the Trust Indenture Act of 1939. Said four indentures are hereinafter called the Indentures and the securities issued pursuant to the Indentures are hereinafter called the Notes.

(2) The Applicant is not in default in any respect under the Indentures or under any other existing indenture.

(3) On March 25, 1986, the Trust Company entered into a Pooling and Servicing Agreement dated as of March 1, 1986 (the "1986-C Agreement") with Citibank, N.A., Originator and Servicer, and Citicorp Homeowners, Inc., under which there were issued on March 25, 1986 Mortgage Pass-Through Certificates, Series 1986-C 7.00% Pass-Through Rate (the "Series 1986-C Certificates"), which evidence fractional individend interests in a pool of conventional one-to-four-family mortgage loans (the "1986-C Mortgage Pool") originated and serviced by Citibank, N.A. and having adjusted principal balances aggregating $51,911,000.11 at the close of business on March 1, 1986, which mortgage loans were assigned to the Trust Company as Trustee simultaneously with the issuance of the Series 1986-C Certificates. On March 25, 1986, Applicant, the parent of Citibank, N.A., entered into a guaranty of even date (the "1986-C Guaranty") pursuant to which applicant agreed, for the benefit of the holders of the Series 1986-C Certificates, to be liable for 4% of the initial aggregate principal balance of the 1986-C Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1986-C Guaranty. The 1986-C Guaranty states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1986-C Guaranty would rank on a parity with the obligations evidenced by the Notes. The Series 1986-C Certificates were registered under the Securities Act of 1933 (Registration Statement on Forms S-11 and S-3, File No. 33-780) as part of a delayed or continuous offering of

$1,000,000,000 aggregate amount of Mortgage Pass-Through Certificates pursuant to Rule 415 under the Act. The Series 1986–C Certificates were offered by a Prospectus Supplement Dated March 20, 1986, supplemental to a Prospectus dated October 9, 1985. The 1986–C Agreement has not been qualified under the Trust Indenture Act of 1939.

(4) The obligations of Applicant under the Indentures and the 1986–C Guaranty are wholly unsecured, are unsubordinated and rank *pari passu*. Any differences that exist between the provisions of the Indentures and the 1986–C Guaranty are unlikely to cause any conflict of interest among the trusteeships of the Trust Company under the indentures and the 1986–C Agreement.

(5) The Applicant Company has waived notice of hearing, waived hearing, and waived any and all rights to special procedures under Rule 8(b) of the Commission's Rules of Practice in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, File No. 22–15236, which is a public document on file in the office of the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C.

Notice is Further Given that any interested person may, not later than June 23, 1986, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of law or fact raised by said application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon.

Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and for the protection of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Shirley E. Hollis,

Acting Secretary.

May 28, 1986.

BILLING CODE 8010-01-M

[Release No. IC–15120 (812–6286)]

Merrill Lynch, Pierce, Fenner & Smith Inc., et al.; Notice of Filing of Application

Notice is hereby given that Merrill Lynch, Pierce, Fenner & Smith Incorporated, Shearson Lehman Brothers Inc., Prudential-Bache Securities Inc., Dean Witter Reynolds Inc., Paine Webber Incorporated ("Sponsors"); and all presently outstanding, or subsequently-issued, series ("Series") of Municipal Investment Trust Fund, The Municipal Income Fund, The Corporate Income fund, The Mortgage-Backed Income Fund, The Tax-Exempt Mortgage Fund, The International Bond Fund, The Government Securities Income Fund, The Equity Income Fund, Liberty Street Trust, The Fund of Stripped ("Zero") U.S. Treasury Securities and The Merrill Lynch Fund of Stripped ("Zero") U.S. Treasury Securities ("Funds"), c/o Merrill Lynch, Pierce, Fenner & Smith Incorporated, One Liberty Plaza, New York, N.Y. 10080; registered under the Investment Company Act of 1940 ("Act"), as unit investment trusts, filed an application on January 17, 1986, and amendments thereto on February 19, March 21, May 6, and May 20, 1986, requesting an order of the Commission pursuant to section 6(c) of the Act, exempting the Funds from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 26(a)(2)(C) of the Act, and Rule 22c–1 thereunder, to permit sales charges on units of beneficial interest of the Funds ("Units"), to be imposed on a deferred basis, including charges levied through a contingent deferred sales load ("CDSL"), and pursuant to section 11 of the Act, approving certain offers of exchange between Funds. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, and to the Act for the text of the applicable provisions thereof.

Applicants state that each of the Funds is sponsored by one or more of the Sponsors, and that the Sponsors will determine a sales charge per Unit, subject to existing limits under applicable laws and regulations, and to other relevant factors, including deferral of sales charges. It is further stated that the portion of the sales charge deferred is to be collected through deductions from distributions ("Distribution Deduction") over the period necessary to recover the uncollected balance of the sales charge initially determined ("Collection Period"), but that in no event will the total of these deductions exceed the amount of sales charge per Unit determined on the date of purchase, nor will any amount be added to the sales charge so deferred for interest, or any similar or related charge, to reflect, or adjust for, any "time-value of money" calculation.

Applicants represent that the CDSL would be imposed only if an investor sells Units to the Sponsors, or redeems Units, before the Collection Period on those Units has been completed. No CDSL would be imposed on sales or redemptions of Units on which collections have been completed, and, in determining whether a CDSL is applicable, those Units will be the ones to be redeemed first. Applicants represent that at no time will the CDSL, plus the Distribution Deductions, exceed the amount of the aggregate sales charge determined as of the date of purchase. The CDSL will be computed in accordance, with the assumption that the Units held for the longest period of time are to be liquidated first, in the amount of the uncollected balance of the original sales charge.

Applicants submit that this deferred sales charge proposal would permit investors to reap the benefit of having their capital fully invested from the date of purchase, noting that the CDSL would only be imposed if Units are redeemed before the attributable selling expenses are collected through Distribution Deductions. Applicants represent that the amount, computation and timing of the CDSL are designed to promote fair treatment of all investors, and that the material provisions of the sales loading will be fully disclosed in the prospectus of each applicable Series.

The Sponsors are authorized to waive the CDSL on sales or redemptions within one year following death or disability (as defined in section 72(m)(7) of the Internal Revenue Code of 1954 ("Code") of the investor; on distributions from qualified retirement plans following retirement (or upon attaining age 59½ in the case of IRA, Keogh and Code section 403 (b) plans), or on return of excess contributions; on exchanges of Units for any other Series which assesses a CDSL (in which case, the Distrubtion Deductions on the newly-acquired Units would continue only until the remaining balances of the sales charge on the Units formerly held had been collected), or of Units acquired in an exchange from a Series with a front-end load; and on sales, or redemptions, of Units acquired pursuant to employee benefit plans of the Sponsors or their affiliates. In support of these variations in the applicability of the CDSL, Applicants state that waiver in the case of death or disability would be

appropriate because the contingency is unforeseen; that waiver on distributions from a qualified retirement plan is consistent with policies reflected in the Code and prior provisions of Rule 22d–1 under the Act; that waiver of the CDSL on an exchange of Units would be appropriate because any uncollected balance of the sales charge would eventually be recovered through the CDSL on the Units acquired, or because a full sales charge would have already been paid; and finally, that waiver on sales or redemptions by employees of the Sponsors and their affiliates would reflect savings in selling efforts and sales expenses in those circumstances.

Applicants also seek an order allowing a reduced sales charge on exchanges. The proposed reduced charge would generally be $15 per Unit ($15 per 1,000 Units, on $1 Units, or 1.5% of the offering side evaluation of the underlying securities). An adjustment would be made, however, on exchanges of Units occurring within five months of purchase for Units of a Series with a higher sales loading structure, or of Units which impose Distribution Deductions for Units of a Series which impose a front-end load at any time before the Distribution Deductions had at least equalled the per Unit sales charge then applicable to intermediate-term Series. In either such instance, the exchange fee will be the greater of the $15 per Unit charge (or its equivalent), or the difference between the sales charge collected and the normal sales charge on the Units being acquired. Applicants represent that these reductions are justified by cost savings. The Sponsors reserve the right to vary the sales charges and to modify, suspend, or terminate the exchange option at any time.

Applicants state that the CDSL, along with the Distribution Deductions, are intended to compensate the Sponsors for their expenses in offering Units for sale, and are therefore sales charges in the traditional sense except that they are not collected at the time of original investment. These expenses include those in organizing Series, disseminating advertising and sales literature, printing and distributing prospectuses, and compensating dealers and salesmen engaged in the selling effort. The CDSL is intended to help the Sponsors recoup these expenses on Units redeemed (or repurchased prior to a certain length of time by approximating the amount which would have been received if the charge had been collected in its entirety at the time of purchase. Applicants believe that this procedure will encourage the retention of Units for a longer term, and that it will generally be perceived by investors as a more fair and equitable technique for payment of the sales charge than loading these charges entirely at the inception of the investment.

Applicants assert, in addition, that the establishment of the CDSL would not prevent an investor from receiving his proportionate share of the current net assets of a Series, but rather, it would merely defer the deduction of the sales charges, and make it contingent upon an event which may never occur. Applicants submit further that the CDSL and the Distribution Deductions functionally qualify as "sales loads" within the meaning of section 2(a)(35) of the Act, inasmuch as they are paid to the Sponsors to reimburse them for expenses related to the sale of Units, and that by making the CDSL contingent upon an event which may never occur, Applicants do not alter this basic characteristic of the CDSL. Applicants also contend that the imposition of a CDSL upon redemption, instead of a sales charge at the time of purchase, would not cause an investor to receive a redemption price below that which would be determined by the current net asset value of the Units redeemed. Therefore, Applicants assert further that the proposed CDSL would not cause the Units to fall outside the meaning of "redeemable securities" as defined in section 2(a)(32) of the Act, and applied in Rule 22c–1 thereunder. It is stated that the price of Units upon redemption will continue to be based on their current net asset value. The CDSL will merely be deducted at the time of redemption in arriving at the investor's proportionate redemption proceeds. Applicants further submit that although a portion of the sales charge is deducted from each investor's income distributions until the investment is terminated, such charge should not be considered a Fund expense, and therefore should not be subject to the limits prescribed by section 26(a)(2) of the Act on payments to depositors and principal underwriters of unit investment trusts.

In summary, Applicants state that the proposed sales charge structure is consistent with all provisions of the Act; and that, while they believe that exemptive relief would not be required but for the proposed waivers of the CDSL, they have sought the exemptive relief described herein, in order to resolve any issues that may be raised by the proposed CDSL under sections 2(a)(32), 2(a)(35), 22(c) and 26(a)(2) of the Act, and Rule 22c–1 thereunder. They have also requested an order under section 11 of the Act which would permit offers of exchange without the imposition of a CDSL, on the grounds that consummation of exchanges on the basis of a fixed transaction fee of approximately $15 per $1000 Unit would not produce any inequitable results for the holders of Units.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for this request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Acting Secretary.

BILLING CODE 8010–01–M

[Release No. IC–15122; 812–6283]

Merrill Lynch KECALP Growth Investments Limited Partnership 1983 et al.; Application

May 29, 1986.

Notice is hereby given that Merrill Lynch KECALP Growth Investments Limited Partnership 1983 ("1983 Partnership"), 165 Broadway, One Liberty Plaza, New York, New York 10080, Merrill Lynch KECALP L.P. 1984 ("1984 Partnership"), Merrill Lynch KECALP L.P. 1986 ("1986 Partnership"), ML Venture Partners I, L.P. ("Venture Partnership"), Merrill Lynch & Co., Inc. ("ML&Co."), Merrill Lynch Venture Capital Inc. ("MLVC") and Merrill Lynch Interfunding Inc. ("MLIF", and collectively with the above, "Applicants"), filed an application on January 15, 1986, and an amendment thereto on May 7, 1986, for an order of the Commission, pursuant to sections 17(b) and 57(c) of the Investment Company Act of 1940 ("Act"), exempting them from the provisions of section 17(a) and 57(a), and, pursuant to section 17(d) and Rule 17d–1 thereunder, permitting:

(i) The 1986 Partnership to purchase up to 7,634 shares of common stock of FGIC Corporation ("FGIC") from ML&Co.; (ii) the 1983 Partnership, the 1984 Partnership and the 1986 Partnership to purchase an aggregate of 35,000 shares of convertible preferred stock issued by Alliant Computer Systems Corporation ("Alliant") from MLIF; and (iii) the 1986 Partnership and the Venture Partnership to purchase an aggregate of 731,707 shares of convertible preferred stock issued by Viewlogic Systems, Inc. ("Viewlogic") from MLVC. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of the applicable provisions.

The application states that the 1983 Partnership, the 1984 Partnership and the 1986 Partnership (together, "KECALP Partnerships"), limited partnerships organized under the laws of Delaware, are non-diversified closed-end management investment companies registered under the Act. The investment objective of each Partnership is to seek long-term capital appreciation. Under the terms of the offerings as set forth in the registration statements of the KECALP Partnerships, units of limited partnership interest were offered exclusively to employees of ML&Co. and its subsidiaries and to non-employee directors of ML&Co. Applicants state that eligible employees must have received annualized compensation of at least $75,000 for the most recent year. Each of the KECALP Partnerships is an "employees' securities company" within the meaning of section 2(a)(13) of the Act, and operates in accordance with the terms of an exemptive order ("KECALP Exemptive Order") issued, pursuant to section 6(b) of the Act, in Investment Company Act Release No. 12363 (April 8, 1982).

Applicants state that the Venture Partnership, a limited partnership organized under the laws of Delaware, is a business development company under the Act organized in 1982, the investment objective of which is to seek long-term capital appreciation by making venture capital investments. The Venture Partnership has five general partners, four of whom are individuals ("Individual General Partners"). In accordance with section 56(a) of the Act, a majority of the Individual General Partners are persons who are not "interested persons" of the Partnership within the meaning of section 2(a)(19) of the Act; those persons are referred to herein as the "Independent General Partners".

The application indicates that the managing general partner for the Venture Partnership is Merrill Lynch Venture Capital Co., L.P. ("Managing General Partner"). The general partner of the Managing General Partner is MLVC, which is also the management company for the Venture Partnership. MLVC is an indirect subsidiary of ML&Co., a holding company which, through its subsidiaries, provides investment, financing, real estate, insurance and related services. MLIF, a Delaware corporation, is an indirect subsidiary of ML&Co. that is engaged in commercial financing transactions.

The application states that FGIC, a Delaware corporation, was organized in 1983 to provide, through one or more subsidiaries, insurance and financial guarantees for a variety of investment instruments. ML&Co. participated in the organization of FGIC and presently holds approximately 19% of FGIC's outstanding common stock and approximately 13% of FGIC's non-voting comulative convertible preferred stock. ML&Co. has agreed to sell to the 1986 Partnership up to 7,634 of the shares of common stock which it acquired in June, 1985; the price paid for those shares by ML&Co. was $131 per share. Applicants represent that the 1986 Partnership will not invest more than 10 percent of its limited partners' capital contributions in that stock.

The application indicates that the purchase price to be paid by the 1986 Partnership will be the lower of (i) the value of the investment on the date it is acquired by the 1986 Partnership (as determined by the board of directors of KECALP) or (ii) the cost to ML&Co. of purchasing and holding the investment. With respect to clause (ii), such cost shall be $131 per share plus carrying costs relating to such investment. For purposes of this transaction, carrying costs consist of interest charges computed at the lower of (i) the prime rate charged by Citibank, N.A. during the period from the date the Investment Committee approved the 1986 Partnership's purchase of FGIC common stock from ML&Co. until the 1986 Partnership acquires the investment or (ii) the effective cost of borrowings by ML&Co. during such period. The effective cost of borrowings by ML&Co. is its actual "Average Cost of Funds," which it calculates on a monthly basis by dividing its consolidated financing expenses by the total amount of borrowings during this period.

Applicants state that Alliant, a corporation formed in 1982, has developed a series of computers which apply parallel processing to certain existing computer software programs. Pursuant to a stock purchase agreement, Alliant sold 1,152,008 shares of Series D convertible preferred stock on December 18, 1985, for a purchase price of $10 per share. Applicants indicate that MLIF purchased an aggregate of 35,000 shares of that stock for $350,000 on behalf of the KECALP Partnerships as follows: 10,000 shares for the 1983 Partnership, 10,000 shares for the 1984 Partnership and 15,000 shares for the 1986 Partnership. Applicants represent that all of those shares were acquired by MLIF since the 1986 Partnership had not yet closed its initial offering and thus had no funds to purchase such securities; in addition, since MLIF participated in that transaction, neither the 1983 nor 1984 Partnerships could participate directly in that transaction without an exemptive order permitting those co-investments with an affiliate of ML&Co. To the knowledge of Applicants, no other investor in such offering is an affiliated person of ML&Co. Applicants also represent that the terms of the purchase of the three KECALP Partnerships will be identical in all respects.

The purchase price to be paid by the KECALP Partnerships to MLIF for the shares of Series D preferred stock of Alliant proposed to be acquired by the KECALP Partnerships will be the lower of (i) the value of the investment on the date it is acquired by each of the KECALP Partnerships (as determined by the board of directors of KECALP) or (ii) the cost to MLIF of purchasing and holding the investment. With respect to clause (ii), such cost shall be the original purchase price of $10 per share paid for such shares, plus carrying costs relating to such investment. For purposes of this transaction, carrying costs consist of interest charges computed at the lower of (i) the prime commercial lending rate charged by Citibank, N.A. during the period from the date MLIF purchased the investment until the KECALP Partnerships acquire the investment or (ii) the effective cost of borrowings by ML&Co. during such period, calculated as described above.

The application states that, Viewlogic, a corporation founded in 1984, was formed to build and market an integrated software system. Pursuant to a stock purchase agreement dated October 18, 1985, Viewlogic sold 1,829,269 shares of Class C preferred stock for a purchase price of $1.64 per share. Applicants state that MLVC purchased an aggregate of 731,707 shares of that stock; 600,756 were

purchased on behalf of the Venture Partnership and the balance, 121,951 shares, were acquired on behalf of the 1986 Partnership. Applicants represent that those shares were acquired by MLVC because the 1986 Partnership had not yet closed its initial offering and therefore had no funds to purchase the investment, and there was also a question under Section 17(d) and Rule 17d–1 thereunder as to whether the two Partnerships could co-invest in the offering without a Commission order. To the knowledge of Applicants, no other investor in such offering is an affiliated person of ML&Co. Applicants further represent that the terms of the purchases by the two Partnerships will be identical in all respects.

The application states that the purchase price to be paid by the Venture Partnership and the 1986 Partnership to MLVC for the shares of Class C preferred stock of Viewlogic will be the lower of (i) the value of the investment on the date it is acquired by each of the Venture Partnership and the 1986 Partnership (as determined by the board of directors of KECALP and the Independent General Partners of the Venture Partnership) or (ii) the cost to MLVC of purchasing and holding the investment. With respect to clause (ii), such cost shall be the original purchase price of $1.64 per share paid for such shares of Viewlogic stock, plus carrying costs relating to such investment. For purposes of this transaction, carrying costs consist of interest charges computed at the lower of (i) the prime commercial lending rate charged by Citibank, N.A. during the period from the date MLVC purchased the investment until the Venture Partnership and the 1986 Partnership acquire the investment or (ii) the effective cost of borrowings by ML&Co. during such period, calculated as described above.

Applicants state that the issuance of an order is justified by both the terms of the transactions and the fact that the proposed investments are not otherwise available to the Venture Partnership and the KECALP Partnerships. Applicants represent that, with respect to the terms of the transactions, the board of directors of KECALP, including the members of the Investment Committee and the Managing General Partner are sophisticated and experienced in valuing securities and evaluating financial transaction generally. In this regard, Applicants further represent that the board of directors and the Investment Committee, on behalf of the KECALP Partnerships with respect to the transactions in securities of FGIC, Alliant and Viewlogic, and the Independent General Partners, on behalf of the Venture Partnership with respect to the transactions in Viewlogic's securities, considered all information deemed relevant, including the nature of the investments by affiliation of ML&Co. in FGIC, Alliant and Viewlogic, and the fairness of the purchase prices proposed to be paid by the KECALP Partnerships and the Venture Partnership.

According to the application, in evaluating the terms of the transactions, the Investment Committee of KECALP and the Independent General Partners of the Venture Partnership considered the fact that the proposed purchase prices to be paid by the KECALP Partnerships and the Venture Partnership will include carrying costs incurred by an affiliated person (i.e., ML&Co., MLVC and MLIF) if the value of each investment at the times of acquisition by the KECALP Partnerships and the Venture Partnership is more than the sum of the purchase price plus the affiliate's carrying costs. Both the KECALP Partnerships and the Venture Partnership believe that it is entirely appropriate for them to reimburse affiliates for carrying costs in a situation where affiliates purchased such investments as, in effect, their nominee and the partnerships would have purchased such investments directly if it had not been deemed necessary to obtain the orders requested herein. The Applicants submit that to deny reimbursement for carrying costs would result in a further and unwarranted loss to ML&Co., MLVC and MLIF and provide a disincentive to act on behalf of the KECALP Partnerships and the Venture Partnership in the future in transactions of this type.

Applicants state that in both the KECALP Exemptive Order and the 1986 Partnership's prospectus, it was indicated that affiliates of ML&Co. would be involved in identifying and investing in many of the 1986 Partnership's portfolio investments. The prospectus of the Venture Partnership indicated that Venture Partnership may be a co-investor in portfolio companies with affiliates of management. The Venture Partnership and the 1986 Partnership thus submit that the order requested herein is consistent with the purposes of the 1986 Partnership and the Venture Partnership, their stated policies and the disclosure made to prospective investors. Finally, Applicants represent that, in connection with the KECALP Bond, Investment Committee and Individual General Partners deliberations and determinations regarding the KECALP Partnerships' and the Venture Partnership's proposed transactions, appropriate record-keeping will be maintained and made available for inspection by the Commission in accordance with the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 18, 1986 at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-in-law, by certificate), shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Acting Secretary.

BILLING CODE 8010–01–M

[Release No. IC–15115; 812–6377]

ML Venture Partners I, L.P., et al.

May 27, 1986.

Notice is hereby given that ML Venture Partners I, L.P. ("Partnership"), Merrill Lynch Venture Capital, Inc. ("Management Company"), the management company for the Partnership, 717 Fifth Avenue, New York, NY 10022, and Merrill Lynch KECALP L.P. 1984 ("KECALP" and, together with Partnership and Management Company, "Applicants"), 165 Broadway, One Liberty Plaza, New York, NY 10080, filed an application on May 8, 1986, for an order of the Commission: (1) Pursuant to section 57(a)(4) of the Investment Company Act of 1940 ("Act"), and Rule 17d-1 thereunder, permitting the concurrent investment by the Partnership and KECALP in convertible preferred stock issued by Private Satellite Network, Inc. ("PSN"); and (2) pursuant to sections 17(b) and 57(c) of the Act, exempting from the provisions of sections 17(a)(1) and 57(a)(1) of the Act, the contingent sale of preferred stock of PSN by the Management Company to KECALP and the Partnership. All interested persons are referred to the application on file with the Commission for a statement of

the representations contained therein, which are summarized below, and to the Act for the text of the applicable statutory provisions.

The Partnership was formed as a limited partnership under Delaware law in 1982; it has elected to be treated under the Act as a business development company, and has as its investment objective long-term capital appreciation through venture capital investments. The Partnership has five general partners, four of which are natural persons (referred to hereinafter as "Individual General Partners"). The Partnership's managing partner is Merrill Lynch Venture Capital Co., L.P. ("Managing General Partner"), and the general partner of the Managing General Partner is the Management Company. The Management Company is an indirect subsidiary of Merrill Lynch & Co., Inc. ("ML&CO."), a holding company which, through subsidiaries, provides investment, financing, real estate, insurance and related services. At December 31, 1985, the Partnership had net assets of approximately $65 million.

Applicants further state that KECALP, an employees' securities company as defined in section 2(a)(13) of the Act, is a limited partnership, registered under the Act as a closed-end, non-diversified management company, having as its investment objective long-term capital appreciation together with the tax advantages resulting from certain investments. Limited partnership interests in KECALP were sold in an aggregate principal amount of $3,747,000 in a registered public offering which closed in May, 1984, exclusively to those employees of ML&Co and its subsidiaries having annual compensation in 1985 of at least $75,000, and to non-employee directors of ML&Co. It is further stated that KECALP operates in accordance with the terms of an exemptive order issued pursuant to section 6(b) of the Act on April 8, 1982 (Investment Company Act Release No. 12363) ("KECALP Exemptive Order"). Applicants state that the general partner of KECALP is KECALP Inc. ("KECALP General Partner"), a Delaware corporation and a wholly-owned subsidiary of ML & Co. The KECALP General Partner is responsible for managing and making investment decisions for KECALP, and all investments made by KECALP are approved by the investment committee of the board of directors of the KECALP General Partner.

It is further stated that PSN is engaged in the business of building and operating private television networks for geographically-diversified corporations and other organizations. In August 1984, the Partnership acquired 10.9% of the outstanding shares of PSN Series B Convertible Preferred Stock, and KECALP conditionally acquired 1.6% of the same issue, subject to the issuance of a Commission exemptive order on an application filed by the Partnership and KECALP regarding such transactions. That exemptive relief was granted (*In the Matter of ML Venture Partners I, L.P.*, Investment Company Act Release No. 14350 (February 1, 1985).

It is further stated that PSN intends to seek additional financing through a private placement of securities, which is presently scheduled to close on June 15, 1986. Some of such securities have been made available to KECALP and the Partnership, among others, on the basis of their current holdings in PSN, and the Managing General Partner and the KECALP General Partner have independently determined to approve investments of $58,075 and $8,715, respectively, which represents the pro rata shares of the new offering available to the Partnership and KECALP in respect of their respective acquisitions PSN Series B Stock. However, because the proposed new investments may not be made concurrently by the Partnership and KECALP without the relief requested herein, the Management Company has agreed that, if the application is not granted by the closing, the Management Company will make the proposed investments on behalf of the Partnership and KECALP, and then sell such securities to the Partnership and KECALP if and when the relief requested herein is granted.

Applicants further state that if the Management Company makes the purchases on behalf of KECALP and the Partnership, the purchase price to be paid by KECALP and the Partnership to the Management Company for the new shares of PSN stock will be the lower of (i) the value of the securities on the date they are acquired by each of the Partnership and KECALP (as determined by the Independent General Partners of the Partnership and the board of directors of the KECALP General Partner), or (ii) the cost to the Management Company of purchasing and holding the securities. With respect to clause (ii), such cost will be the original purchase price paid for the shares at the closing, plus carrying costs relating to such investment. Carrying costs would consist of interest charges computed at the lower of (i) the prime commercial lending rate charged by Citibank, N.A. during the period from the date the Investment Committee of KECALP and the Board of Directors of the Partnership approved the purchase of the securities until KECALP and the Partnership acquire the securities, or (ii) the effective cost of borrowings by ML & Co. during such period. The effective cost of borrowings by ML & Co. is its actual "average cost of funds," which ML & Co. calculates on a monthly basis by dividing its consolidated financing expenses by the total amount of borrowings during the period.

Applicants submit that the statutory standards are satisfied with respect to the relief requested under sections 17(b) and 57(c) of the Act. Applicants believe that such relief is justified by both the terms of the transaction and the fact that the proposed investments would not otherwise be available to the Partnership and KECALP. With respect to the terms of the transactions, the KECALP General Partner and the Managing General Partner have reviewed the proposed investments in detail. In evaluating the terms of the transactions, both the Investment Committee and the Independent General Partners considered the fact that the proposed purchase prices to be paid by the Partnership and KECALP would include carrying costs incurred by an affiliated person (i.e., the Management Company) if the value of the investments at the time of acquisition by the Partnership and KECALP should be greater than the sum of the purchase price of each plus the Management Company's carrying costs. Both KECALP and the Partnership believe that it is entirely appropriate for them to reimburse affiliates for carrying costs in a situation where an affiliate has purchased an investment as, in effect, their nominee, and KECALP and the Partnership would have purchased such investments directly if it had not been deemed necessary to obtain prior Commission exemptive relief. Applicants submit that to deny reimbursement for carrying costs would result in a further and unwarranted loss to the Management Company and provide a disincentive to act on behalf of the Partnership and KECALP in the future.

Applicants also state that the above-described investments are not otherwise available for purchase by the Partnership or KECALP, and cite the opinion of the Managing General Partner and the KECALP General Partner that it is important to maintain the respective positions of the Partnership and KECALP in PSN. The Managing General Partner and the KECALP General Partner, have approved such investments after review of a

considerable number of possible investments for the Partnership and KECALP, and their previous investments in PSN. Applicants thus submit that the respective investment programs of the Partnership and KECALP would be prejudiced if they are not permitted to make the proposed investments.

It is represented, in addition, that the KECALP General Partner believes that the proposed investments are consistent with the rationale underlying the establishment of KECALP as an "employees' securities company." In the application for exemptive relief granted in Investment Company Act Release No. 12363 (April 8, 1982), as well as in KECALP's prospectus, it was indicated that ML & Co. and its affiliates would be involved in structuring, identifying and investing in many of the KECALP's portfolio investments. Similarly, the proposed transactions are consistent with the Partnership's investment objective and the kinds of transactions in which it was contemplated the Partnership would participate.

In support of their request for an order permitting the proposed concurrent participation in accordance with the provisions of section 57(a)(4) of the Act, and Rule 17d-1 thereunder, Applicants reiterate that the Managing General Partner and the KECALP General Partner have reviewed the proposed participation in additional shares of PSN stock, determined that such participation would be consistent with the Partnership's and KECALP's investment objectives and that the proposed investments would not disadvantage either the Partnership or KECALP on the terms specified, maintaining their respective investment positions, or in disposing of such positions. Applicants also reiterate, that in the KECALP Exemptive Order as well as in KECALP's prospectus, it was indicated that affiliates of ML & Co. would be involved in identifying and investing in many of KECALP's portfolio investments. Similarly, the prospectus of the partnership indicated that the Partnership may be a co-investor in portfolio companies with affiliates of management. Applicants therefore submit that the relief requested herein is consistent with the purposes of KECALP and the Partnership, their stated policies and the disclosures they have made to prospective investors. Applicants also believe that the proposed investments are in the best interests of KECALP and the Partnership to the extent that the investments are not otherwise available to them.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 16, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Acting Secretary.

BILLING CODE 8010-01-M

[Release No. IC-15116 (812-6353)]

PaineWebber Master Series, Inc., (Formerly PaineWebber Special Income Fund); Application To Permit a Contingent Deferred Sales Load and Certain Offers of Exchange

May 27, 1986.

Notice is hereby given that PainWebber Master Series, Inc. ("Applicant"), registered under the Investment Company Act of 1940 ("the Act") as an openend, management investment company, located at 1285 Avenue of the Americas, New York, New York 10019, filed an application on April 21, 1986, and an amendment thereto on May 19, 1986, for an order of the Commission pursuant to section 6(c) of the Act granting exemption from sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the Act and Rule 22c-1 thereunder to the extent necessary: (1) Authorizing Applicant's proposed operation of its contingent deferred sales charge when shares of two or more Series of Applicant are outstanding; (2) authorizing Applicant not to impose a contingent deferred sales charge on exchanges by shareholders between different Series of Applicant; and (3) permitting Applicant to waive the imposition of contingent deferred sales charges on redemptions made under Applicant's systematic withdrawal program; and for an order pursuant to section 11(a) of the Act authorizing Applicant to impose a $5.00 service charge on each exchange of shares between different Series. All interested persons are referred to the application on file with the Commission for a statement of the representations therein, which are summarized below, and to the Act and rules thereunder for the text of the applicable provisions.

Applicant, organized as a Maryland corporation, states that it currently offers one Series of shares to the public ("Existing Series") and may offer shares of two or more additional Series for public sale in the future ("Future Series"). Further, Applicant states that, on March 13, 1986, the Commission issued an order (Investment Company Act Release No. 14966) (the "Order") which granted certain exemptions to permit Applicant to impose a contingent deferred sales charge ("CDSL") upon certain redemptions of its Existing Series of shares, and to reduce or waive the CDSL that would otherwise be applicable in certain instances.

Applicant now proposes to offer shares of Future Series for public sale, permit exchanges between Series (subject to a $5.00 service charge for each exchange) ("Exchanges"), and implement a systematic withdrawal program as described below. Applicant states that the Order and the application underlying it did not address the operation of the CDSL should shares of two or more Series be outstanding, should Exchanges between Series be permitted, and should participation in a systematic withdrawal program be offered to shareholders of certain Series. Further, the Order and application underlying it did not address the imposition of a $5.00 service charge on Exchange transactions. Applicant states that it is filing this application to obtain exemptive relief for these matters.

Applicant represents that it in no manner proposes to alter the operation of the CDSL, waivers therefrom and reduction therein authorized previously by the Order. Applicant represents further that when a shareholder holds shares in two or more of its Series and redeems shares of one Series, the applicability and amount of the CDSL imposed on the redemption will be determined only with respect to the shareholder's investment in and purchase payments for the Series being redeemed, and not with respect to the shareholder's aggregate investment in all Series of Applicant.

Applicant further proposes that an exception to this procedure be implemented with respect to Exchanges between Series without any CDSL being imposed. (However, as discussed below, Applicant proposes to impose a $5.00 service charge on each Exchange.) For purposes of determining the applicability and rate of any CDSL, the

status of any shares surrendered in an Exchange as representing capital appreciation and/or dividend and capital gain distribution reinvestments in the Series exchanged out of will be passed on to the corresponding shares acquired in a second Series as a result of the Exchange. Accordingly, if an investor who has made an Exchange redeems shares of the Series exchanged into, no CDSL will be imposed to the extent such redemption represents capital appreciation of and/or reinvestments in the Series exchanged out of which occurred prior to the Exchange. In addition, any other shares of the Series acquired in an Exchange will be deemed to have been held for the same length of time as the corresponding shares of the first Series surrendered upon the Exchange.

Applicant states that in order to effect an Exchange order, shares will be exchanged out of a Series in the following order: First, shares representing capital appreciation of the Series being exchanged out of; next, shares representing the reinvestment of dividends and capital gain distributions in such Series; and, finally, other shares of such Series held by the shareholder for the longest period of time.

Applicant submits that the proposed operation of the CDSL where shares of two or more Series are outstanding as described above raises no questions under the Act or the rules thereunder, and that the application of the CDSL with respect to a shareholder's distinct investments in different Series of the Applicant is fair and reasonable and in the best interests of shareholders. Applicant further asserts that any possible variation of the CDSL due to the proposed Exchanges will be applied equally to all shareholders of a given class, and that it will comply with all provisions of Rule 22d–1 under the Act as if that rule were applicable to such Exchange.

Applicant further proposes that a $5.00 service charge be imposed on each Exchange transaction. Applicant states that such charge will be paid to Applicant for the costs it incurs in effecting Exchanges for shareholders of the Applicant. Applicant submits that permitting Exchanges without the imposition of a CDSL would provide shareholders with the opportunity to change their investment objectives and encourage them to do so when appropriate. Applicant further submits that the imposition of the $5.00 service charge on an Exchange is fair and reasonable, in that the charge is designed solely to defray Applicant's expenses in facilitating each Exchange. Applicant further states that the imposition of the service charge does not affect the basis on whch Exchanges between Series will be made.

In addition, Applicant proposes that a shareholder be permitted to elect to participate in Applicant's systematic withdrawal program (the "Program"). Under the Program, a dollar amount of a participating shareholder's investment in a participating Series will be redeemed automatically by Applicant on either a monthly, quarterly, semi-annual or annual basis, and the proceeds mailed to the shareholder. The amount to be redeemed and frequency of the automatic withdrawals will be specified by the shareholder upon his election to participate in the Program. Applicant reserves the right to change the terms and conditions of the Program and the Series with respect to which the Program is offered from time to time. Applicant states that no CDSL be imposed on redemptions made under the Program, and that this may create a variation in the amount of CDSL applicable to different classes of Applicant's shareholders.

Applicant asserts that the proposed waiver of the CDSL under the Program will be applied equally to all Applicant's shareholders of a given class, and is fair and reasonable and in the best interests of shareholders. Applicant further represents that, if the relief sought with respect to the Program is granted, it will comply with all provisions of Rule 22d–1 under the Act as if that rule were applicable.

Applicant asserts that the relief requested is appropriate and in the public interest, consistent with the protection of investors, and provisions of the Act. Applicant therefore requests that the Commission issue an order under sections 6(c) and 11(a) of the Act granting the exemptions as requested and permitting the Exchange.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 20, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of the interest, the reasons for the request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Acting Secretary.

BILLING CODE 8010–01–M

[Release No. IC–15112 (File No. 812–6277)]

RNC Liquid Assets Fund, Inc.; Application

May 23, 1986.

Notice is hereby given that RNC Liquid Assets Fund, Inc. ("Liquid Assets"), RNC Regency Fund, Inc. ("Regency"), and RNC Income Fund, Inc. ("Income"), each of which is registered under the investment Company Act of 1940 (the "Act") as an open-end management investment company (such investment companies, together with any management investment company organized subsequent to the date of the application for which Midvale Securities Corporation acts as principal underwriter (the "Distributor", collectively referred to with the Funds as "Applicants") 10960 Wilshire Boulevard, Los Angeles, California 90024, filed an application on January 5, 1986, for an order of the Commission pursuant to section 11(a) of the Act to permit offers to exchange shares of the Funds on a basis other than relative net asset value. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below, and to the Act for the applicable provisions thereof.

Applicants represent that each of the Funds intend to make a continuous public offering of its shares at the current offering price mentioned in its prospectus. Since Liquid Assets is a no-load fund, the current offering price of its shares will equal the net asset value of the shares. However, the current offering price of Regency and Income (which will invest in equity and fixed income debt, respectively) will include a sales charge, contemplated to be 8.5%, subject to certain reductions for purchases of $10,000 or more. Applicants further state that the registration statement filed with the Commission by Regency has been declared effective and it has commenced offering its shares, and that the registration statements filed with the Commission by Liquid Assets and Income have not yet been declared effective.

According to the application, the Distributor, a California corporation, is a wholly-owned subsidiary of Roley, Nichols Capital Group, Inc., a financial services group, which is the parent of RNC Capital Management Co., the Funds' investment adviser. Applicant states that the Distributor serves as the principal underwriter for each of the existing Funds. Applicants further state that it is anticipated that the Distributor will act as the principal underwriter for additional registered investment companies, the shares of which may be sold at varying sales charges or on a no-load basis.

Applicants propose to permit each of the Funds to elect to offer to exchange its shares ("new shares") for shares ("outstanding shares") of any of the other Funds, provided that such other Fund has agreed to such exchange, on the basis of relative net asset value per share, plus an amount equal to the difference, if any, between the sales charge previously paid on the outstanding shares and the sales charge payable on the new shares if such new shares were purchased at the time of the exchange at their then public offering price. Applicants further request that the order permit the Funds to charge shareholders a fee, payable to the Distributor, of $5.00 for each exchange as a service charge for exercising the exchange privilege.

Applicants state that with respect to outstanding shares as to which previous exchanges have taken place, the sales charge previously paid shall include the aggregate of the sales charges paid with respect to such shares in the initial purchase and any subsequent exchange. The exchange privilege may not be exercised any more than twice in one calendar year. Applicants further state that shares issued pursuant to dividend reinvestment are sold on a no-load basis in each of the Funds. For purposes of the exchange privilege, Applicants represent, dividend reinvestment shares shall be deemed to have been sold with a sales charge equal to the sales charge previously paid on the shares on which the dividend was paid. In the event that a shareholder of a Fund wishes to exchange less than all his shares and the exchange involves a sales charge differential, those shares exchanged first will be those which are to be exchanged on the most favorable terms; i.e., shares previously exchanged involving a higher aggregate sales charge or shares sold at higher break points. Applicants state that to be exchanged, outstanding shares must have a value of $1,000 or more and have been outstanding for at least 15 days.

Applicants state that the purposes of the proposed exchange plan is to permit shareholders of the various Funds to exchange their shares for shares of the other Funds when their investment objectives change or when market conditions favor one type of investment over another. Applicants submit that the terms of the proposed order sought in the application provide shareholders of the Funds with desirable flexibility for their financial planning. Applicants further submit that the exchange formulation provides a fair and equitable exchange privilege to shareholders of all the participating Funds while preventing a shareholder from acquiring shares of a Fund having the highest sales charge by simply purchasing shares of another Fund with a lower sales charge or no sales charge and then exchanging such shares for those of the former Fund on the basis of relative net asset value per share. Applicants further submit that the imposition of the $5.00 service charge on exchanges between Funds is fair and will not harm shareholders or discriminate among shareholders of any Fund. It is designed merely to compensate each Fund for the costs incurred in facilitating exchanges.

Accordingly, Applicants submit that the granting of their request is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 16, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC-15114; File Nos. 812-6248 and 812-6229]

Application and Opportunity for Hearing; Sun Life Insurance and Annuity Co. of New York and Sun Life Assurance Co. of Canada (U.S.) et al.

May 21, 1986.

Notice is hereby given that Sun Life Insurance and Annuity Company of New York ("Sun Life New York"), a New York stock life insurance company with its home office at 67 Broad Street, New York, New York 10004; Sun Life (N.Y.) Variable Account C ("Account C"), registered under the Investment Company Act of 1940 ("Act") as a unit investment trust and established by Sun Life New York in connection with the proposed issuance of certain master group deferred combination fixed/variable annuity contracts ("contracts"); and Clarendon Insurance Agency, Inc. ("Clarendon"), located at 200 Berkeley Street, Boston, Massachusetts 02116, and the principal underwriter for the contracts, filed an application on November 12, 1985, and an amendment thereto on May 13, 1986. Sun Life Assurance Company of Canada (U.S.) ("Sun Life (U.S.)"), a Delaware stock life insurance company with its executive office at One Sun Life Executive Park, Wellesley Hills, Massachusetts 02181; Sun Life (U.S.) Variable Account D ("Account D"), registered under the Act as a unit investment trust and established by Sun Life (U.S.) in connection with the proposed issuance of contracts similar to those to be issued by Sun Life New York; and Clarendon, the principal underwriter for the contracts (together with Sun Life New York and Account C, "Applicants"), filed an application on October 10, 1985, and an amendment thereto on May 12, 1986. Each set of Applicants requested an order pursuant to section 6(c) of the Act, exempting them from the provisions of sections 26(a)(2)(C) and 26(c)(2) of the Act to the extent necessary to permit transactions described in the applications. All interested persons are referred to the applications on file with the Commission for a statement of the representations contained therein, which are summarized below and are referred to the Act and rules thereunder for a statement of the relevant provisions.

Sections 26(a)(2)(C) and 27(c)(2)

Applicants request exemption from sections 27(a)(2)(C) and 27(c)(2) to the extent necessary to deduct from Accounts C and D a mortality and expense risk charge determined annually based on total purchase

payments credited to all participants' accounts under a contract pursuant to the following schedule:

Purchase payments	Asset charge (percent)	Approximate breakdown for	
		Mortality (percent)	Expense (risk charge, percent)
Up to $250,000	1.50	0.80	0.50
$250,000 to $1,499,999	1.25	0.80	0.45
$1,500,000 to $4,999,999	1.10	0.80	0.30
$5,000,000 and over	0.95	0.80	0.15

Applicants represent that it is expected that during the first year the contracts are offered, the average asset charge for all paricipants' accounts will be approximately 1.21%. If, at the end of the first year, the average asset charge is higher than 1.25%, Applicants represent they will no longer rely on this exemptive order, but will seek additional exemptive relief. Applicants state the mortality risk arises from the contractual obligation to continue to make annuity payments to each annuitant regardless of how long the annuitant lives and regardless of how long all annuitants as a group live. The expense risk is the risk that the administrative charges provided in the contracts may be insufficient to cover the actual total administrative expenses incurred by Sun Life New York and Sun Life (U.S.). No sales charge is deducted from purchase payments and up to 10% of purchase payments credited to a participant's account may be withdrawn in any account year on a non-cumulative basis without the imposition of a deferred sales charge ("withdrawal charge"). Amounts withdrawn in excess of 10% will be subject to a withdrawal charge assessed against purchase payments credited to the participant's account as follows:

Number of years payments in participant's account	Withdrawal charge (percent)
1	6
2	6
3	5
4	4
5	3
6	2
7	1
8	0

All withdrawals will be processed on a first-in, first-out basis. No withdrawal charge is imposed upon withdrawals providing a death benefit or to purchase an annuity provided that payment under the annuity option elected is over a period of at least five years. No withdrawal charge is imposed upon amounts withdrawn after a participant's account has been established for twelve years. Applicants represent that in no event will aggregate withdrawal charges assessed against a participant's account exceed 6% of aggregate purchase payments made to that account. Applicants represent that the withdrawal charge which is assessed in connection with certain full or partial withdrawals will recoup expected distribution costs associated with registered and distributing the contracts. Applicants further represent that neither Sun Life New York nor Sun Life (U.S.) expect to realize a profit from the mortality and expense risk charge, and that the charges do not incorporate any charges for the assumption of distribution expense risks. Sun Life New York and Sun Life (U.S.) have determined their respective charges are reasonable in amount with respect to comparable annuity products. These latter representations are based upon analyses of publicly available information about comparable annuity products in light of the products' particular annuity features, taking into consideration such as factors as annuity rate guarantees, current charge levels, sales loads and expense charge guarantees. Both Sun Life New York and Sun Life (U.S.) undertake to maintain and make available to the Commission upon request, a memorandum setting forth the basis for their representation. Accounts C and D represent they will invest in a mutual fund only if such fund undertakes to have a Board of Directors with a disinterested majority formulate and approve any plan under Rule 12b–1 to finance distribution expenses.

Notice is further given that any interested person wishing to request a hearing on the applications may, not later than June 17, 1986 at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues, if any, of fact or law that are disputed. Such request should be addressed to: Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of such request should be served personally or by mail upon the Applicants at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the applications will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; St. Lucie County, FL.

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in St. Lucie County, Florida.

FOR FURTHER INFORMATION CONTACT: R.V. Robertson, District Engineer, Federal Highway Administration, 227 N. Bronough Street, Room 2015, Tallahassee, Florida 32301, Telephone: (904) 681-7236.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Florida Department of Transportation (FDOT), is preparing an Environmental Impact Statement (EIS) for the proposed improvements along Port St. Lucie Boulevard in the City of Port St. Lucie, Florida, from the Florida Turnpike east to a terminus at US-1/State Road 5, a distance of approximately 4.5 miles. Improvements to the corridor are considered necessary to provide for the existing and projected traffic demand.

Alternatives under consideration include the No Project alternative, and alternate schemes for improving the roadway along the existing alignment in varying right of way widths. Included as part of the build alternatives is the widening or replacement of the existing bridges over Long Creek and the North Fork of the St. Lucie River.

Federal, State and local agencies have contributed early coordination comments through the State Advance Notification process. Additionally, a project planning team developing this project has contacted Federal, State and local agencies for information relative to land use planning, water quality analysis, and local planning needs. Public information meetings will be held during the development of the EIS. In addition, a public hearing will be held. Public notice will be given of the time and place of the meeting and hearing. The draft EIS will be made available for public and agency review and comment prior to the public hearing. No formal scoping meeting is planned at this time.

To ensure that the full range issues related to the proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning the proposed action and the EIS should be directed to the Federal Highway Administration at the address provided above.

Issued on May 28, 1986.

P.E. Carpenter,

Division Administrator, Tallahassee, Florida.

[FR Doc. 86-12517 Filed 6-3-86; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement: Orange County, CA

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that a Tier I Environmental Impact Statement will be prepared for a proposed highway project in Orange County, California.

FOR FURTHER INFORMATION CONTACT: Glenn Clinton, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, California 95809, Telephone: (916) 551-1310.

SUPPLEMENTARY INFORMATION: The FHWA, working with the California Department of Transportation (CALTRANS) and Orange County Environmental Management Agency (OCEMA) will prepare an Environmental Impact Statement (EIS) on a proposal to locate on new alignment a multimodal facility with 6 to 8 lanes and a median of sufficient width for high-occupancy vehicles (HOV) or transit considerations. Transportation improvements are needed to serve existing and planned development. This document will address the entire length of the proposed corridor, a distance of 31 to 40 miles, which extends southerly from an interchange with the proposed Eastern Corridor near the City of Tustin to join the San Diego Freeway (I-5) between Ortega Highway (Route 74) in the City of San Juan Capistrano and the vicinity of the San Onofre Nuclear Generating Station within the U.S. Marine Corps Camp Pendleton property in northern San Diego County.

Alternatives Being Considered for the Project Are

A. New Highway Alternative

This involves locating and constructing between 6 to 8 general traffic lanes. An undetermined number of proposed interchanges will be included in this alternative.

B. Transit/HOV Improvements

In addition to the above, transit/high occupancy vehicle (HOV) lanes, located in the median, will be evaluated, along with Park-and-Ride facilities.

C. No Project

This alternative is essentially the "no build" option. Note: All other reasonable alternative including other corridors and possibly various transit options will be considered.

Consultation by Orange County with various State and local agencies began in February of 1982 for a northern segment of the corridor identified as extending southerly from the Eastern Corridor Interchange to just north of the future Oso Parkway extension near the community of Mission Viejo. In November of 1985 Orange County began consultation with State and local agencies for the southern segment of the corridor identified as beginning just north of the future Oso Parkway and extending southerly to a connection with the San Diego Freeway (I-5). These consultations identified areas of special concern along the proposed route, which were the focus of locally initiated environmental studies. FHWA believes that this early consultation has been extensive and consistent with 40 CFR 1501.7. However, in order to inform potentially affected agencies and the public of FHWA involvement, at least one formal scoping meeting will be held. Once a date and location is established,

BEST COPY AVAILABLE

appropriate public notification will be given.

To ensure that the full range of issues related to this proposed route are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Issued on: May 23, 1986.

Glenn Clinton,

District Engineer, Sacramento, California.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[Notice No. 596]

Senior Executive Service: Appointments of Individuals To Serve as Members of the Performance Review Board

The Civil Service Reform Act of 1978, 5 U.S.C. 4314(c)(4) requires that the appointment and changes in the membership of performance review boards be published in the Federal Register. Therefore, in compliance with this requirement, notice is hereby given that the individuals whose names and position titles appear below have been appointed to serve as members of the performance review board for the Bureau of Alcohol, Tobacco and Firearms (ATF) for the rating year beginning July 1, 1985, and ending June 30, 1986. This notice effects changes in the membership of the ATF Performance Review Board previously appointed May 3, 1985 (50 FR 18957).

Name and Title

Michael H. Lane—Deputy Assistant Secretary (Regulatory, Trade and Tariff Enforcement)—Department of the Treasury

David D. Queen—Deputy Assistant Secretary (Law Enforcement), Department of the Treasury

John W. Mangels—Director, Office of Operations, Department of the Treasury

John T. Blank—Director, Facilities Management Division, Department of the Treasury, Internal Revenue Service

Marvin J. Dessler—Chief Counsel, Bureau of Alcohol, Tobacco and Firearms

VETERANS ADMINISTRATION

Special Medical Advisory Group; Meeting

The Veterans Administration gives notice under Pub. L. 92-463 that a meeting of the Special Medical Advisory Group will be held on June 19 and 20, 1986. The session on June 19 will be held at the Sheraton Carlton Hotel, 923 Sixteenth Street, NW, Washington, DC 20006, and the session on June 20 will be held in the Administrator's Conference Room at the Veterans Administration Central Office, 810 Vermont Avenue, NW, Washington, DC 20420. The purpose of the Special Medical Advisory Group is to advise the Administrator and Chief Medical Director relative to the care and treatment of disabled veterans, and other matters pertinent to the Veterans Administration's Department of Medicine and Surgery.

The session on June 19 will convene at 6 p.m. and the session on June 20 will convene at 8 a.m. All sessions will be open to the public up to the seating capacity of the rooms. Because this capacity is limited, it will be necessary for those wishing to attend to contact Kathy Eller, Secretary, Office of the Chief Medical Director, Veterans Administration Central Office (phone 202/389-5156) prior to June 16, 1986.

Dated: May 28, 1986.

By direction of the Administrator:

Rosa Maria Fontanez,

Committee Management Officer.

1

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 12:02 p.m. on Wednesday, May 28, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to:

(A)(1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in First State Bank & Trust Company, Edinburg, Texas, which was closed by the Banking Commissioner for the State of Texas on Friday, May 23, 1986; (2) accept the bid for the transaction submitted by NBC Bank—Edinburg, Edinburg, Texas, a newly chartered State nonmember bank; (3) approve the applications of NBC Bank—Edinburg, Edinburg, Texas, for Federal deposit insurance and for consent to purchase certain assets of and assume the liability to pay deposits made in First State Bank & Trust Company, Edinburg, Texas, and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction;

(B) Consider recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings involving certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof;

Name of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

At that same meeting, the Board of Directors, anticipating the closing of Roseland State Bank, Roseland, Nebraska, by the Director of Banking and Finance for the State of Nebraska later that same day, accepted the highest bid for a purchase and assumption transaction which may be submitted in accordance with the "Instruction for Bidding," subject to receipt of necessary approvals from appropriate State and/or Federal regulatory authorities.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director C. C. Hope, Jr. (Appointive), concurred in by Mr. Dean S. Marriott, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters would be considered in a closed meeting pursuant to subsection (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: May 30, 1986.

Federal Deposit Insurance Corporation.

Margaret M. Olsen,

Deputy Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 5:21 p.m. on Thursday, May 29, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in The Lone Rock Bank, National Association, Lone Rock, Iowa, which was closed by the Senior Deputy Comptroller for Bank Supervision, Office of the Comptroller of the Currency, on Thursday, May 29, 1986; (2) accept the bid for the transaction submitted by Swea City State Bank , Swea City, Iowa, an insured State nonmember bank; (3) approve the application of Swea City State Bank, Swea City, Iowa, for consent to purchase certain assets of and assume the liability to pay deposits made in The Lone Rock Bank, National Association, Lone Rock, Iowa, and for consent to establish the sole office of The Lone Rock Bank, National Association as a branch of Swea City State Bank; and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director C.C. Hope, Jr. (Appointive), concurred in by Mr. Dean S. Marriott, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(6), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: May 30, 1986.

Part II

Department of Education

34 CFR Parts 76 and 653

Carl D. Perkins Scholarship Program; Notice of Proposed Rulemaking

DEPARTMENT OF EDUCATION

34 CFR Parts 76 and 653

Carl D. Perkins Scholarship Program

AGENCY: Department of Education.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Secretary proposes regulations to govern the actions of designated State agencies in their administration of the Carl D. Perkins Scholarship Program. The regulations are needed to implement Title V, Part E of the Higher Education Act of 1965, as amended by the Human Services Reauthorization Act of 1984, 20 U.S.C. 1119d–1119d–8. These regulations specify the responsibilities of the Secretary of the U.S. Department of Education in the administration of the program and, in addition, describe the responsibilities of State agencies which administer the scholarships and the responsibilities of the scholarship recipients.

DATE: Comments must be received on or before July 7, 1986.

ADDRESS: All comments concerning these proposed regulations should be addressed to Neil C. Nelson, Chief, State Student Incentive Grant Program, Office of Student Financial Assistance, Office of Postsecondary Education, U.S. Department of Education, (Room 4026, ROB–3), 400 Maryland Avenue SW., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Neil C. Nelson, Telephone (202) 472–4285.

SUPPLEMENTARY INFORMATION:

Background

The Carl D. Perkins Scholarship Program is authorized under Title V, Part E of the Higher Education Act of 1965, as amended by the Human Services Reauthorization Act of 1984. The purpose of the program is to provide scholarships to enable and encourage outstanding high school graduates who demonstrate an interest in teaching to pursue teaching careers at the elementary or secondary school level.

The scholarships are to be awarded on the basis of academic merit and an interest in teaching. The intention in awarding a scholarship is not merely to enable the recipient to complete successfully a course of study and obtain a teaching certificate, but to commit that individual to the pursuit of a teaching career. The legislation requires that a scholarship recipient teach at the elementary or secondary school level for two years for each year of scholarship assistance. A scholar who does not complete the teaching obligation is required to repay the amount of the scholarships he or she has received, prorated according to the fraction of the teaching obligation not completed, plus interest and collection fees. The repayments are to be made in accordance with a schedule and at an interest rate prescribed by the Secretary. To encourage recipients to fulfill their commitment to teaching and to ensure that the program will not be viewed as a loan program, the Secretary proposes a substantial interest charge which is adjusted annually, from the time interest begins to accrue to the time the repayment period begins, and is set at a rate which is the greater of 14% or 5% above the average 91-day Treasury bill rate for the most recent quarter ending March 31. The interest charge applicable during the repayment period is the greater of these rates as determined when the repayment schedule is established. The interest rate, therefore, will be at least 2 percentage points higher than the highest rate charged by a Federal student financial assistance loan program; the PLUS Program, authorized under Title IV, Part B of the Higher Education Act of 1965, as amended, charges 12%.

To increase the likelihood that recipients will make a commitment to teaching as a career, the statute requires that the scholarship recipient satisfy the teaching obligation by teaching on a full-time basis. The Secretary is concerned, however, that this requirement to teach full-time not interfere with the recipients' ability to care for their own children, particularly during the early, formative months of life. The Secretary therefore requests comments on the practices of local education agencies in granting leaves of absence to individuals to adjust to the birth or adoption of a child, and on other factors relating to the full-time teaching requirement and its impact on the family responsibilities of scholarship recipients. Depending on the comments received, the Secretary will explore available regulatory alternatives to the teaching requirements in proposed § 653.40.

The reference to 34 CFR 662.410(b)(3) in proposed § 653.21(a)(4) is to a section in a Notice of Proposed Rulemaking published in the Federal Register on September 4, 1985 (50 FR 35964–36013), proposing to amend the regulations for the Guaranteed Student Loan Program and the PLUS Program.

The Secretary proposes to amend the Education Department General Administrative Regulations to make the provisions of 34 CFR Part 76 (State-Administered Programs) applicable to the Carl D. Perkins Scholarship Program.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities. State educational agencies administer the program. States and State agencies are not small entities under the Regulatory Flexibility Act.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 4026, ROB–3, 7th and D Street, SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, public comment is invited on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any

other agency or authority of the United States.

List of Subjects in 34 CFR Part 653

Education, Grant Programs—education, Scholarships, State-administered—education, Teachers.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance Number 84.178: Carl D. Perkins Scholarship Program)

Dated: May 30, 1986.

William J. Bennett,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by amending Part 76 and adding a new Part 653, as follows:

PART 76—STATE-ADMINISTERED PROGRAMS

1. The authority citation for Part 76 continues to read as follows:

Authority: Section 403(a)(1) of Pub. L. 90-247, 88 Stat. 559, 580, as amended (20 U.S.C. 1221e-3(a)(1)), unless otherwise noted.

2. In the table following § 76.1 Section D., Higher Education Programs, is amended by adding a new entry at the end of Section D, to read as follows:

§ 76.1 Programs to which Part 76 applies.

* * * * *

Name of program	Authorizing statute	Implementing regulations (34 CFR)	CFDA No.
D. Higher Education Programs			
* * * * *			
Carl D. Perkins Scholarship Program.	Title V, Part E of the Higher Education Act (20 U.S.C. 1119d-1119d-8).	Part 653	84.178
* * * * *			

3. Section 76.102 is amended by adding a new paragraph (aa) to read as follows:

§ 76.102 Definitions of "State plan" for Part 76.

* * * * *

(aa) *Carl D. Perkins Scholarship Program.* The application under Section 563 of the Higher Education Act.

* * * * *

4. The table following § 76.125 is amended by adding the following language to the list under "Postsecondary Education Programs":

§ 76.125 What is the purpose of these regulations?

* * * * *

CFDA No. and name of program	Authorizing legislation	Implementing regulations (Title 34 CFR Part)
Postsecondary Education Programs		
* * * * *		
84.178 Carl D. Perkins Scholarship Program.	Title V, Part E of the Higher Education Act (20 U.S.C. 1119d-1119d-8).	653
* * * * *		

5. A new Part 653 is added, to read as follows:

PART 653—CARL D. PERKINS SCHOLARSHIP PROGRAM

Subpart A—General

Sec.

653.1 What is the Carl D. Perkins Scholarship Program?
653.2 Who is eligible to participate in this program?
653.3 What regulations apply to this program?
653.4 What definitions apply to this program?

Subpart B—What Assistance Does the Secretary Provide Under This Program?

653.10 For what purposes may a State use its payments under this program?

Subpart C—How Does a State Apply for Grants?

653.20 What must a State do to receive grants under this program?
653.21 What requirements must be met by States in the administration of this program?

Subpart D—How Does a State Select Scholars Under This Program?

653.30 What are the eligibility requirements?
653.31 Who selects the scholars?
653.32 What are the selection criteria and procedures?

Subpart E—What Are the Scholarship Conditions?

653.40 What agreement must a scholar have with the State agency?
653.41 What are the requirements for a scholar to continue to receive payments under this program?
653.42 What are the consequences of a scholar's noncompliance with the teaching requirement?

Authority: 20 U.S.C. 1119d-1119d-8, unless otherwise noted.

Subpart A—General

§ 653.1 What is the Carl D. Perkins Scholarship Program?

Under the Carl D. Perkins Scholarship Program the Secretary makes available, through grants to the States, scholarships to eligible individuals to enable and encourage them to pursue teaching careers at the elementary or secondary school level.

(20 U.S.C. 1119d)

§ 653.2 Who is eligible to participate in this program?

(a) States are eligible to apply for grants under this program.

(b) Outstanding high school graduates who wish to pursue teaching careers at the elementary or secondary level are eligible to apply to their respective States of residence for scholarships under this program.

(20 U.S.C. 1119d-2)

§ 653.3 What regulations apply to this program?

The following regulations apply to the Carl D. Perkins Scholarship Program:

(a) The regulations in this Part 653.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), Part 76 (State-Administered Programs), Part 77 (Definitions that Apply to Department Regulations), Part 78 (Education Appeal Board), and Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(20 U.S.C. 1119-d *et seq.*)

§ 653.4 What definitions apply to this program?

The following definitions apply to terms used in this part:

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR Part 77:

Application
EDGAR
Elementary school
Nonprofit
Private
Public
Secondary school
Secretary
State
State educational agency

(b) *Other definitions that apply to this part.* The following additional definitions apply to this part:

"Academic year" means a period of time during which a full-time student is expected to complete the equivalent of one of the following:

(1) Two semesters.
(2) Two trimesters.
(3) Three quarters.

"Act" means the Higher Education Act of 1965, as amended.

"Award year" means the period of time from July 1 of one year through June 30 of the following year.

"Full-time student" means a student enrolled in an institution of higher education, other than a correspondence school, who is carrying a full-time academic workload as determined by

the institution under standards applicable to all students enrolled in that student's program.

"Handicapped children" has the same meaning under this part as the same term defined in 34 CFR 300.5 of the Assistance to States for Education of Handicapped Children regulations.

"Limited English proficiency" has the same meaning under this part as the same term defined in 34 CFR 500.4 of the General Provisions regulations for the Bilingual Education Program.

"Scholar" means a scholarship recipient.

"Scholarship" means an award made to an individual under this part for one academic year.

(20 U.S.C. 1119d–1119d–5)

Subpart B—What Assistance Does the Secretary Provide Under This Program?

§ 653.10 For what purposes may a State use its payments under this program?

A State may use its payments under the Carl D. Perkins Scholarship Program only for making payments to scholars.

(20 U.S.C. 1119d)

Subpart C—How Does a State Apply for Grants?

§ 653.20 What must a State do to receive grants under this program?

(a) To receive grants under the Carl D. Perkins Scholarship Program, a State shall submit an application to the Secretary for review and approval.

(b) The Secretary approves an application that—

(1) Designates as the State agency for the administration of the Carl D. Perkins Scholarship Program, either—

(i) The State agency which administers the State Student Incentive Grant Program under Title IV, Part A, Subpart 3 of the Act; or

(ii) The State agency which administers the Guaranteed Student Loan Progam and with which the Secretary has an agreement under section 428(b) of the Act;

(2) Identifies the panel or agency which has established criteria and procedures for the selection of scholars and will select the scholars as required by §§ 653.31 and 653.32;

(3) Describes a program of activities for carrying out the purposes set forth in § 653.1 in such detail that the Secretary may determine the degree to which the State's program will accomplish those purposes. This description must include—

(i) The selection criteria and procedures to be used by the State, in the selection of scholars, which satisfy the provisions of this part; and

(ii) The procedures by which the designated State agency intends to publicize the availability of Carl D. Perkins Scholarships to secondary school students in the State;

(4) Explains how the criteria and procedures for the selection of scholars were developed and in what ways they reflect the State's present and projected needs for elementary and secondary teachers in general those with training in specific academic disciplines;

(5) Provides assurances that—

(i) No changes will be made in the designation of an agency to administer the Carl D. Perkins Scholarship Program, in the selection criteria and procedures to be used in the selection of scholars, or any other aspect of the program of activities described in its application without the prior written approval of the Secretary;

(ii) No one will receive a Carl D. Perkins Scholarship without entering into an agreement with the designated State agency under which he or she agrees to the terms specified in § 653.40;

(iii) A copy of the agreement which the State agency will enter into with scholars under § 653.40 will be included in the scholarship application form;

(iv) The State agency will monitor scholars' compliance with the provisions of §§ 653.40, 653.41(b), and 653.42;

(v) The State agency will make particular efforts to attract students from low-income backgrounds or who express a willingness or desire to teach in schools having less than average academic results or serving large numbers of economically disadvantaged students; and

(vi) Scholarships will be awarded without regard to sex, race, handicapping condition, creed, or economic background; and

(6) Contains a copy of the agreement referred to in paragraph (b)(5)(iii) of this section.

(c) Upon the Secretary's approval of its application, a State need not submit additional applications in order to continue to be considered for funding under this program.

(20 U.S.C. 1119d–2)

(Approved by the Office of Management and Budget under control number 1840–0678)

§ 653.21 What requirements must be met by States in the administration of this program?

(a) To continue to receive payments under this part, a State shall—

(1) Provide scholarship assistance only to students who meet the requirements of §§ 653.30, 653.40, and 653.41;

(2) Limit scholarship assistance to no more than four academic years for each scholar;

(3) Make reports to the Secretary that are necessary to carry out the Secretary's functions under this part;

(4) Establish and implement policies and procedures which are necessary to administer the repayment provisions of § 1653.42 and, in cases of noncompliance with these provisions, implement collection procedures consistent with 34 CFR 682.410(b)(3);

(5)(i) Litigate and attempt to obtain a judgment against a scholar for the amount of the debt prior to the expiration of the State's statute of limitations, in the event collection efforts under paragraph (a)(4) of this section are unsuccessful; or

(ii) Provide an amount equal to the amount of the debt from its own funds if the State fails to litigate in accordance with the requirements of paragraph (a)(5)(i) of this section; and

(6) Expend all funds received from the Secretary for scholarships during the award year specified by the Secretary with regard to those funds, except as otherwise provided in paragraph (d) of this section.

(b) A State shall award a scholarship in the amount of $5,000 for an academic year, except as otherwise provided in paragraph (c) of this section.

(c) A State shall not award a scholarship which exceeds the scholar's cost of attendance. If a scholarship, when added to the amount the scholar is to receive for the same academic year under Title IV of the Act, would otherwise exceed the scholar's cost of attendance, as defined for the National Direct Student Loan Program in 34 CFR 674.11, the State shall reduce the scholarship by the amount in which the combined awards would be in excess of the scholar's cost of attendance.

(d) After awarding all scholarships for payment during an award year, as required by paragraph (a)(6) of this section, a State may reserve for expenditures in the following award year a remaining amount of funds which is less than the amount required for a scholarship.

(20 U.S.C. 1119d–3, 1119d–4, 1119d–5)

Subpart D—How Does a State Select Scholars Under This Program?

§ 653.30 What are the eligibility requirements?

To be selected as a scholar, an individual shall—

(a)(1) Be a United States citizen or National;

(2) Be a permanent resident of the United States;

(3) Provide evidence from the Immigration and Naturalization Service that he or she is in the United States for other than a temporary purpose with the intention of becoming a citizen or permanent resident; or

(4) Be a permanent resident of the Trust Territory of the Pacific Islands or of the Northern Mariana Islands;

(b)(1) Have graduated from high school;

(2) Be scheduled to graduate from high school within 3 months of the date of the award; or

(3) Have received a certificate of high school equivalency for successfully completing the Tests of General Educational Development (GED); and

(c)(1) Rank in the top ten per centum of his or her graduating class; or

(2) Have received GED test scores recognized by the State to be equivalent to ranking in the top ten per centum of the high school graduates in the State, or nationally, in the academic year for which the eligibility determination is being made.

(20 U.S.C. 1119d–4)

§ 653.31 Who selects the scholars?

(a) Scholars must be selected by—

(1) A seven-member statewide panel appointed by the chief State elected official, acting in consultation with the State educational agency;

(2) An existing grant agency designated by the chief State elected official and approved by the Secretary, or

(3) An existing panel designated by the chief State elected official and approved by the Secretary.

(b) A selection panel must be representative of school administrators, teachers, and parents.

(20 U.S.C. 1119d–4)

§ 653.32 What are the selection criteria and procedures?

(a) The panel or agency appointed or designated by the chief State elected official in accordance with § 653.31 shall establish criteria and procedures for the selection of scholars.

(b) The selection criteria and procedures must reflect the present and projected needs of the State for elementary and secondary teachers as required by section 563(c) of the Act and must be developed after consideration of the views of the State and local educational agencies, private educational institutions, and other interested parties as required by section 563(d) of the Act.

(c) The State shall make applications available to high schools in the State and in other locations convenient to applicants, parents, and other interested parties.

(d) The panel or agency referred to in paragraph (a) of this section shall select scholars without regard to the applicants' eligibility for assistance under Title IV of the Act and without regard to whether applicants plan to attend publicly or privately controlled institutions.

(20 U.S.C. 1119d–2, 1119d–4)

Subpart E—What Are the Scholarship Conditions?

§ 653.40 What agreement must a scholar have with the State agency?

(a) To receive a scholarship, an individual shall enter into an agreement with the State agency under which he or she agrees, except as otherwise provided in paragraph (b) of this section—

(1) To teach on a full-time basis, as determined by the institution or agency in which he or she is teaching, for a period of not less than two years for each year for which scholarship assistance was received—

(i) In a public elementary or secondary school in any State;

(ii) In a public elementary or secondary education program in any State;

(iii) In a private nonprofit elementary or secondary school located and serving students in a district eligible for assistance under Chapter 1 of the Education Consolidation and Improvement Act of 1981; or

(iv) Handicapped children, or children with limited English proficiency, in a private nonprofit elementary or secondary school;

(2) To fulfill the teaching obligation described in paragraph (a)(1) of this section within ten years after completing the postsecondary education degree program for which the scholarship was awarded;

(3) To provide the State agency evidence of complaince with paragraphs (a) (1) and (2) of this section and § 653.41 as required by the State agency; and

(4) To repay all or part of the scholarship plus interest and reasonable collection fees as specified in § 653.42 if the conditions of paragraphs (a) (1) and (2) of this section are not met or if the individual ceases to pursue the postsecondary education degree program for which the scholarship was awarded.

(b) The requirement to teach two years for each year of scholarship assistance is reduced by one-half in the case of individuals who teach on a full-time basis—

(1) In a school which is designated by the Secretary as meeting the provisions of 34 CFR 674.54(a) of the National Direct Student Loan Program regulations for the year in which the individual is teaching at the school or the prior year; or

(2) Handicapped children, or children with limited English proficiency, in an education program or school referred to in paragraph (a)(1) of this section.

(c) The agreement referred to in paragraph (a) of this section must include—

(1) A description of the procedures under which the provisions of § 653.42 (g) through (j) will be implemented; and

(2) A description of the procedures under which a scholar may appeal any determination of non-compliance with any provisions under this part.

(20 U.S.C. 1119d–2)

§ 653.41 What are the requirements for a scholar to continue to receive payments under this program?

(a) A State agency shall continue to make payments to a scholar under this program only during the periods that the State agency finds that the scholar meets the conditions described in paragraph (b) of this section.

(b) To maintain eligibility for a scholarship, a scholar must be—

(1) Enrolled as a full-time student in a postsecondary institution that is currently accredited by a nationally recognized accrediting agency or association that the Secretary determines to be a reliable authority as to the quality of training offered, in accodance with section 1201 (a) of the Act;

(2) Pursuing a course of study leading to certification as a teacher at the elementary or secondary level, as determined by the State in which the postsecondary institution the student is attending is located; and

(3) Maintaining satisfactory progress as determined by the postsecondary institution the student is attending, in accordance with the criteria established in 34 CFR 668.16(e) of the Student Assistance General Provisions regulations.

(20 U.S.C. 1119d–5)

§ 653.42 What are the consequences of a scholar's noncompliance with the teaching requirement?

(a) A scholar found by a State to be in noncompliance with the agreement entered into under § 653.40, or to have ceased to pursue the postsecondary

education degree program for which the scholarship was awarded, shall—

(1) Repay the amount of the scholarships received, prorated according to the fraction of the teaching obligation not complete, as determined by the State agency;

(2) Pay a simple, per annum interest charge on the outstanding principal; and

(3) Pay all reasonable collection costs as determined by the State agency but not to exceed 25 percent of the amount of the unpaid principal and accrued interest.

(b) The interest charge referred to in paragraph (a)(2) of this seciton accrues from—

(1) The date of the intitial scholarship paymet if the scholar has ceased to pursue the postsecondary education degree program for which the scholarship was awarded; or

(2) The day after that portion of the scholarship period for which the teaching obligation has been fulfilled.

(c)(1) The interest charge referred to in paragraph (a)(2) of this section is adjusted annually, except as provided for under paragraph (c)(2) of this section, and is set at a rate which is the greater of:

(i) Fourteen percent; or

(ii) Five percent above the average of the bond equivalent rates of 91–day Treasury bills auctioned during the most recent quarter ending March 31.

(2) The interest charge applicable during the repayment period is the greater of the rates described in paragraph (c)(1)(i) and (ii) of this section as determined when the repayment schedule is established.

(d) A scholar required by paragraph (a) of this section to repay his or her scholarship shall—

(1) Enter repayment status on the first day of the calendar month after—

(i) The State has determined that the scholar has ceased to pursue the postsecondary education degree program for which the scholarship was awared;

(ii) The date the scholar informs the agency he or she does not plan to fulfill the teaching obligations; or

(iii) the latest date on which the scholar must have begun teaching in order to have completed the teaching obligation within ten years after completing the postsecondary education for which the scholarship was awarded, as determined by the State agency; and

(2) Make monthly or quarterly payments to the State which—

(i) Cover principal, interest, and collection costs according to a schedule established by the State which calls for compete repayment within ten years after the scholar enters repayment status, exept as provided in paragraph (i) of this section; and

(ii) Amount annually to no less than $1200 or the unpaid balance, whichever is less.

(e) The State agency shall not require scholarship repayments amounting to more than $1200 annually unless higher payments are needed to complete the entire repayment within the ten-year period described in paragraph (d)(2) of this section.

(f) The State agency shall capitalize any accrued interest at the time it establishes a scholar's repayment schedule.

(g) A scholar is not considered in violation of the repayment schedule established under paragraph (d) of this section during the time he or she is—

(1) Engaging in a full-time course of study at an institution of higher education, as defined in 34 CFR 668.2 of the Student Assistance General Provisions regulations;

(2) Serving, not in excess of three years, as a member of the armed services of the United States;

(3) Temporarily totally disabled, for a period not to exceed three years, as established by sworn affidavit or a qualified physician;

(4) Unable to secure employment for a period not to exceed twelve months by reason of the care required by a spouse who is disabled;

(5) Seeking and unable to find full-time employment for a single period not to exceed twelve months; or

(6) Seeking and unable to find full-time employment as a teacher in a public elementary or secondary school or public education program.

(h) During the time a scholar qualifies for any of the exceptions in paragraph (g) of this section, he or she need not make the scholarship repayments referred to in paragraph (d) of this section and interest does not accrue.

(i) The State agency shall extend the ten-year scholarship repayment period established under paragraph (d) of this section by a period equal to the length of time a scholar meets any of the conditions listed in paragraph (g) of this section.

(j) The State agency shall cancel a scholar's repayment obligations if it determines—

(1) On the basis of a sworn affidavit of a qualified physician, that the scholar is unable to teach on a full-time basis because of an impairment that is expected to continue indefinitely or result in death; or

(2) On the basis of a death certificate or other evidence of death that is conclusive under State law, that the scholar has died.

Part III

Department of Education

34 CFR Part 280

Magnet Schools Assistance Program; Final Regulations

DEPARTMENT OF EDUCATION

34 CFR Part 280

Magnet Schools Assistance Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends three sections of the regulations which implement the Magnet Schools Assistance Program. These amendments to the regulations implement the statutory changes to the Magnet Schools Assistance Act (Title VII of the Education for Economic Security Act, Pub. L. 98-377) which were enacted on November 22, 1985 as part of the National Science, Engineering, and Mathematics Authorization Act of 1986, Pub. L 99-159.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the Federal Register or later if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: M. Patricia Goins, Division of Educational Support, U.S. Department of Education (Room 2023, FOB-6), 400 Maryland Avenue SW., Washington, DC 20202. Telephone: (202) 472-7980.

SUPPLEMENTARY INFORMATION:

Summary of Amendments

Section 703 of the Act, which describes the purposes of the Magnet Schools Assistance Program, has been amended by combining the four clauses in the statement of purpose into two clauses. This language change does not significantly alter the purposes of the Magnet Schools Assistance Program. Section 280.1 of the regulations is amended to conform to the statutory change.

Section 706 of the Act has been amended to narrow the range of activities for which magnet schools funds may be used. Under section 706, grants may be used by an eligible local educational agency (LEA) for—

(1) Planning and promotional activities directly related to expansion and enhancement of academic programs and services offered at magnet schools;

(2) The acquisition of books, materials, and equipment (including computers) and the maintenance and operation thereof, necessary for the conduct of programs in magnet schools; and

(3) The payment of or subsidization of the compensation of elementary and secondary school teachers who are certified or licensed by the State and who are necessary for the conduct of programs in magnet schools.

With respect to clauses (2) and (3), assistance must be directly related to improving the knowledge of mathematics, science, history, English, foreign languages, art, or music, or to improving vocational skills.

Only the above-described activities may be supported with magnet schools funds. A new §280.40 setting out these authorized activities has been added to the regulations.

Section 709 of the Act has been amended by deleting the prohibition on secular humanism instruction. This prohibition, presently codified at §280.40(d) of the regulations, is deleted. The remaining provisions currently in §280.40 are redesignated as §280.41.

A Notice of Proposed Rulemaking was published in the Federal Register on March 10, 1986. The public had 30 days in which to submit written comments concerning the proposed amendments. Only one comment was received, and it recommended no changes to the proposed amendments.

Executive Order 12291

These proposed amendments have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

List of Subjects in 34 CFR Part 280

Civil rights, Desegregation, Education, Education Department, Elementary and secondary education, Grant programs-education, Magnet schools.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these final regulations.

Dated: May 30, 1986.

William J. Bennett,

Secretary of Education.

The Secretary amends Title 34 of the Code of Federal Regulations by amending Part 280 as follows:

PART 280—MAGNET SCHOOLS ASSISTANCE PROGRAM

1. The authority citation for Part 280 is revised to read as follows:

Authority: 20 U.S.C. 4051-4062, unless otherwise noted.

2. Section 280.1 is revised to read as follows:

§ 280.1 What is the Magnet Schools Assistance Program?

The Magnet Schools Assistance Program provides grants to eligible local educational agencies (LEAs) for use in magnet schools that are part of an approved desegregation plan and that are designed to bring students from different social, economic, ethnic and racial backgrounds together. The purposes of the program are to support, through financial assistance to eligible LEAs,—

(a) The elimination, reduction, or prevention of minority group isolation in elementary and secondary schools with substantial portions of minority students; and

(b) Courses of instruction within magnet schools that will substantially strengthen the knowledge of academic subjects and the grasp of tangible and marketable vocational skills of students attending such schools.

(20 U.S.C. 4053)

§ 280.4 [Amended]

3. In § 280.4(b), under the definition, "special curriculum", in paragraph (4), the "of" is changed to "or" between the words, "elementary" and "secondary".

§ 280.10 [Amended]

4. Section 280.10 is amended by: removing "for planning and conducting programs" from paragraph (a); removing paragraphs (d) and (e); and revising the citation of authority to read "(20 U.S.C. 4054)".

§ 280.40 [Redesignated as § 280.41]

5. Section 280.40 is redesignated as § 280.41 and paragraph (d) is removed. After the semicolon at the end of paragraph (b) insert "or". At the end of paragraph (c) replace the semicolon and the "or" with a period.

6. A new § 280.40 is added to read as follows:

§ 280.40 What costs are allowable?

An LEA may use funds received under this part for the following activities:

(a) Planning and promotional activities directly related to the expansion and enhancement of academic programs and services offered at magnet schools, though planning activities are subject to the restriction in § 280.41(a).

(b) The acquisition of books, materials, and equipment (including computers) and the maintenance and operation thereof. Any books, materials or equipment purchased with grant funds must be—

(1) Necessary for the conduct of programs in magnet schools; and

(2) Directly related to improving the knowledge of mathematics, science, history, English, foreign languages, art, or music, or to improving vocational skills.

(c) The payment or subsidization of the compensation of elementary and secondary school teachers—

(1) Who are certified or licensed by the State;

(2) Who are necessary to conduct programs in magnet schools; and

(3) Whose employment is directly related to improving the knowledge of mathematics, science, history, English, foreign languages, art, or music, or to improving vocational skills.

Part IV

Environmental Protection Agency

40 CFR Part 280

Hazardous Waste; Interim Prohibition Against Installation of Unprotected Underground Storage Tanks; Interpretive Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 280

[FRL 2988-8]

Hazardous Waste; Interpretive Rule on the Interim Prohibition Against Installation of Unprotected Underground Storage Tanks

AGENCY: Environmental Protection Agency.

ACTION: Interpretive rule.

SUMMARY: New Subtitle I of the Resource Conservation and Recovery Act (RCRA), as amended, provides for the regulation of underground storage tanks. Section 9003(g) of Subtitle I establishes interim requirements for underground storage tanks that are installed between May 7, 1985 and the effective date of new tank standards required to be promulgated by EPA under section 9003(e). This notice sets forth EPA's interpretation of Section 9003(g).

FOR FURTHER INFORMATION CONTACT: Pamela Harris, (202) 382-4814; or Steven Way, (202) 475-9328; or the RCRA/Superfund Hotline at (800) 424-9346 (toll free or (202) 382-3000 in Washington, DC.

SUPPLEMENTARY INFORMATION:

I. Introduction: The Hazardous and Solid Waste Amendments of 1984

On November 8, 1984, the President signed into law the Hazardous and Solid Waste Amendments of 1984, Public Law 98-616. These Amendments extend and strengthen the provisions of the Solid Waste Disposal Act of 1970 as amended by RCRA. A major portion of this new legislation, Subtitle I, provides for the development and implementation of a regulatory program for underground storage tanks used to contain regulated substances, which include petroleum and substances defined as hazardous substances under section 101(14) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).[1]

Among the provisions of new Subtitle I, section 9003 requires EPA to promulgate regulations pertaining to the detection, prevention, and correction of releases from underground storage tanks as may be necessary to protect human health and the environment.[2] Section 9003(c) sets forth minimum requirements that must be promulgated for all underground storage tanks and section 9003(e) sets forth additional requirements that must be promulgated for new underground storage tanks. Regulations under both sections 9003 (c) and (e) for tanks containing petroleum products are to be effective by May 8, 1987. With respect to tanks containing hazardous substances, regulations under section 9003(e) for new tanks are to be effective by November 8, 1987 and regulations under section 9003(c) for existing tanks are to be effective by November 8, 1988.

Until new tank standards promulgated under section 9003(e) become effective, section 9003(g)(1) establishes interim requirements for any tank installed on or after May 7, 1985. That section provides as follows:

. . . [N]o person may install an underground storage tank for the purpose of storing regulated substances unless such tank (whether of single or double walled construction)—

(A) will prevent releases due to corrosion or structural failure for the operational life of the tank;

(B) is cathodically protected against corrosion, constructed of noncorrosive material, steel clad with a noncorrosive material, or designed in a manner to prevent the release or threatened release of any stored substance; and

(C) the material used in the construction or lining of the tank is compatible with the substance to be stored.

As a limited exception, section 9003(g)(2) allows the installation of tanks without corrosion protection in soil with a resistivity of 12,000 ohm-cm or more. Under that provision, soil tests must be conducted in accordance with American Society for Testing and Materials (ASTM) Standard G57-78.

II. Purpose of the Interpretive Rule

An interpretive rule is a statement issued by an agency to advise the public of the agency's construction of the statutes and rules that it administers. An interpretive rule simply construes the language of the statute or regulation and does not impose additional obligations. Such rules are exempt from the notice and comment requirements of the Administrative Procedures Act, 5 U.S.C. 553(b)(A) (1982). A substantive rule, such as the new tank standards authorized by section 9003(e), is a rule that is issued by an agency pursuant to statutory authority that implements the statute. EPA intends this notice to be an interpretive rule, not a substantive rule.

Section 9003(g) establishes statutory requirements that took effect on May 7, 1985 without prior action on the part of EPA. Several of the requirements set forth under section 9003(g) are in the form of performance standards. EPA believes that the interpretive rule clarifies obligations of the regulated community in complying with the interim prohibition. The rule also puts the regulated community on notice of the circumstances under which the Agency will proceed with enforcement action for noncompliance.

III. Other Related EPA Activities

On July 15, 1985, EPA codified the statutory language of section 9003(g) in its regulations at 40 CFR 280.2.

EPA is preparing a guidance document that is available in draft form in the Regional Offices. This document discusses methods and technologies for preventing releases from tanks due to corrosion, structural failure, or the storage of materials that are incompatible with the tanks' construction or lining. This guidance will assist tank users in determining effective approaches to meet the performance standards in section 9003(g).

---

[1] "Underground storage tank" is defined under RCRA Subtitle I, section 9001(1) as any one or combination of tanks (including underground pipes connected thereto) which is used to contain an accumulation of regulated substances, and the volume of which (including the volume of the underground pipes connected thereto) is 10 percent or more beneath the surface of the ground. Such term does not include any—

(A) Farm or residential tank of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes,

(B) Tank used for storing heating oil for consumptive use on the premises where stored,

(C) Septic tank,

(D) Pipeline facility (including gathering lines) regulated under:

(i) The Natural Gas Pipeline Safety Act of 1968, (49 U.S.C. App. 1671, et seq.),

(ii) The Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App. 2001, et seq.), or

(iii) Which is an intrastate pipeline facility regulated under State laws comparable to the provisions of law referred to in clause (i) or (ii) of this subparagraph;

(E) Surface impoundment, pit, pond or lagoon,

(F) Storm water or waste water collection system,

(G) Flow-through process tank,

(H) Liquid trap or associated gathering lines directly related to oil or gas production and gathering operations, or

(I) Storage tank situated in an underground area (such as a basement, cellar, mineworking, drift, shaft or tunnel) if the storage tank is situated upon or above the surface of the floor.

"Regulated substances" are defined under RCRA Subtitle I, section 9001(2) as:

(A) Any substance defined in section 101(14) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (but not including any substance regulated as a hazardous waste under Subtitle C), and

(B) Petroleum, including crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

[2] "Release" is defined under RCRA Subtitle I, section 9001(3) as any spilling, leaking, emitting, discharging, escaping, leaching, or disposing from an underground storage tank into ground water, surface water or subsurface soils.

IV. Legislative History of Section 9003(g)
